Retail (RETL)

Ronn Smith
Marketing Department Chair
325 Business Building
479-575-4055

The Department of Marketing offers a retail major that leads to a B.S.B.A. degree. The department also offers a marketing major (<http://catalog.uark.edu/undergraduatecatalog/collegesandschools/sammwaltoncollegeofbusiness/marketingmktg/>).

The major in retail is designed to prepare students for careers in retailing or in companies that manufacture, sell, and distribute consumer goods to retailers. In addition to a broad view of the business and retail environments students can select to concentrate their retail studies in accounting, economics, finance, information systems, international retail, management, marketing, or supply chain management. A general retail concentration is also available.

Retail Major Requirements

The retail major requires 24 hours of major and collateral courses in the discipline as well as satisfying the other requirements for the B.S.B.A. degree. A maximum of 27 hours is allowed in a retail major or discipline field of study (i.e., core, major, electives) unless the extra courses are part of an interdisciplinary minor or collateral track. See an adviser for selection of courses.

Major Course Requirements in All Concentrations

MKTG 3553	Consumer Behavior	3
MKTG 3633	Marketing Research	3
MKTG 4433	Retail Strategy	3
MKTG 4443	Retail Buying and Merchandise	3
Select four from a single concentration:		12

Accounting Concentration

ACCT 3723	Intermediate Accounting I
ACCT 3753	Intermediate Accounting II
ACCT 4673	Product, Project and Service Costing
ACCT 4753	

Economics Concentration

ECON 3033	Microeconomic Theory
ECON 3133	Macroeconomic Theory
ECON 4333	Economics of Organizations
ECON 4633	International Trade
ECON 4643	International Macroeconomics and Finance

Finance Concentration

FINN 3013	Financial Analysis
FINN 3053	Financial Markets and Institutions
FINN 3603	Corporate Finance
And select one of the following:	
FINN 3623	Risk Management
FINN 3703	International Finance
FINN 3933	Real Estate Principles
Information Systems Concentration	
ISYS 2263	Principles of Information Systems
ISYS 4213	ERP Fundamentals
ISYS 4243	Current Topics in Computer Information

Retail B.S.B.A. Eight-Semester Degree Program

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 87) for university requirements of the program.

Courses in BOLD must be taken in the designated semester. Courses in ITALIC may be taken in varied sequences as long as other designated requirements for these courses are met. Although other courses listed are not required to be completed in the designated sequence, the recommendations below are preferred.

First Year	Units	
	Fall	Spring
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)	3	
MATH 2053 Finite Mathematics	3	
COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003) ¹	3	
WCOB 1111 Freshman Business Connection	1	
BLAW 2013 The Legal Environment of Business (ACTS Equivalency = BLAW 2003) ¹	3	
ISYS 1120 Computer Competency Requirement	0	
U.S. History or Political Science— University Core	3	
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)		3
ACCT 2013 Accounting Principles		3
WCOB 1033 Data Analysis and Interpretation		3

ECON 2023 Principles of Microeconomics (ACTS Equivalency = ECON 2203)	3	
Natural Science – University Core	4	
Year Total:	16	16

Second Year	Units	
	Fall	Spring
MGMT 2053 Business Foundations or ACCT 2023 Accounting Principles II	3	
ISYS 2103 Business Information Systems ¹	3	
MATH 2043 Survey of Calculus (ACTS Equivalency = MATH 2203) ²	3	
Social Science – University Core	3	
Fine Art/Humanities – University Core	3	
SCMT 2103 Introduction to Supply Chain Management ¹		3
MGMT 2103 Managing People and Organizations ¹		3
ECON 2013 Principles of Macroeconomics (ACTS Equivalency = ECON 2103) ²		3
Fine Art/Humanities – University Core		3
Natural Science – University Core		4
ALL pre-business requirements should be met by end of term		
Year Total:	15	16

Third Year	Units	
	Fall	Spring
MKTG 3433 Introduction to Marketing ¹	3	
FINN 3043 Principles of Finance ¹	3	
Retail Concentration	3	
Junior Senior Business Electives	6	
MKTG 3553 Consumer Behavior		3
MKTG 4433 Retail Strategy		3
MGMT 3013 Strategic Management		3
Retail Concentration		6
Year Total:	15	15

Fourth Year	Units	
	Fall	Spring
MKTG 4443 Retail Buying and Merchandise	3	
Junior Senior Business Elective	6	
General Education Electives	3	
Retail Concentration		3
Junior Senior Business Elective		3
General Education Electives		9
Year Total:	12	15

Total Units in Sequence: 120

¹ Must be completed prior to MGMT 3013.

² Must be completed prior to taking any 3000 or 4000 level business electives.

Retail Minor for Business Students

The Department of Marketing offers a retail minor for Walton College students desiring more knowledge of retail, to assist them in their careers.

The minor requires the completion of 15 hours of study with all of the courses applied toward the minor taken in residence.

The 15 hours include the following courses:

MKTG 3433	Introduction to Marketing	3
MKTG 3553	Consumer Behavior	3
MKTG 4433	Retail Strategy	3
MKTG 4443	Retail Buying and Merchandise	3
Select one of the following:		3
ECON course at 3000 or 4000 level		
FINN 3013	Financial Analysis	
ISYS 4213	ERP Fundamentals	
MGMT course at 3000 or 4000 level		
MKTG 3653	Category Management Topics	
MKTG 4233	Integrated Marketing Communications	
MKTG 4453	New Product Development	
SCMT 3613	Supply Management	
Total Hours		15

Students who desire to earn a retail minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student's undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor. All upper level minor requirements must be taken in residence.

Supply Chain Management (SCMT)

Brian Fugate

Department Chair

475 Business Building

479-575-4051

Supply Chain Management Department Website (<https://walton.uark.edu/departments/supplychain/>)

The Department of Supply Chain Management offers an undergraduate major leading to a Bachelor of Science in Business Administration degree. The major is designed to prepare students for careers in carrier management, logistics management, and at retailers or in companies that manufacture, sell, and distribute consumer goods to retailers. There is an emphasis on business process integration and students will learn to apply analytical techniques and use the systems approach in managing the flow of materials into and through the production and manufacturing processes of a firm to its customers. Employment opportunities exist in marketing, sales, and operations positions with carriers in all transportation modes, and in positions with shippers having responsibility in one or more areas under logistics management, warehousing, packaging, and materials handling. Opportunities also exist in governmental agencies.

Requirements for B.S.B.A. in Supply Chain Management

Supply Chain Management Major Requirements

Major Course Requirements	24
SCMT 3443 Transportation and Distribution Management	3
SCMT 3613 Supply Management	3
SCMT 3623 Inventory and Forecasting Analytics	3
SCMT 3643 International Logistics	3
SCMT 4653 Supply Chain Strategy	3
Concentration Hours	9
Maximum of 27 hours of SCMT courses in department (core, major, elective). More than 27 hours allowed if the extra courses are part of interdisciplinary minor or collateral track.	
Junior/Senior Business Electives	12
Total Hours	60

Supply Chain Management Minor for Business Students

The Department of Supply Chain Management offers a minor for Walton College students desiring more knowledge of supply chain management to assist them in their careers. The minor requires the completion of 15 hours of study from the following courses:

SCMT 3443 Transportation and Distribution Management	3
SCMT 3613 Supply Management	3
Select three classes from the following:	9
ISYS 4213 ERP Fundamentals	
SCMT 3623 Inventory and Forecasting Analytics	
SCMT 3633 Behavioral Supply Chain Management	
SCMT 3643 International Logistics	
SCMT 3653 Retail Supply Chain Analysis	
SCMT 4003H Honors Supply Chain Management Colloquium	
SCMT 4103 Special Topics in Supply Chain Management	
SCMT 4123 Sustainable Logistics and Supply Chain Management	
SCMT 4633 Transportation Analytics	
SCMT 4653 Supply Chain Strategy	
SCMT 4853 Cross-Sector Collaboration for Sustainability	
Students may also use up to 3 hours of a Walton College Study Abroad course (WCOB 330V) in Panama or China and/or 3 hours of cooperative education (WCOB 310V) in supply chain management toward the minor.	

Total Hours	15
-------------	----

Students who desire to earn a Supply Chain Management minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student's undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor. All upper level minor requirements must be taken in residence.

Walton College of Business (WCOB)

Alan E. Ellstrand

Associate Dean for Programs and Research

328 Business Building

479-575-7105

Walton College offers three minor programs for business majors, each of which is interdisciplinary and not attached to a specific department in the college. Requirements for each of the three minors are listed under the tabs.

Similarly, courses that are interdisciplinary and not assigned to a specific department in Walton College are listed here under the WCOB subject code.

Minor in Blockchain Enterprise Systems for Business Majors

The minor requires completion of 15 hours of study with all of the upper division courses applied toward the minor in residence. Students who desire to earn a Blockchain Enterprise Systems minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for a minor must be completed prior to the awarding of the student's undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor. All upper-division minor requirements must be taken in residence.

Requirements for Minor in Blockchain Enterprise Systems:

Required Courses

ISYS 4173	Blockchain Fundamentals	3
ISYS 4453	Introduction to Blockchain Applications	3
ISYS 4463	Blockchain Enterprise Systems Development	3
Choose 6 hours from the following:		6
ACCT 3533	Accounting Technology	
ACCT 3723	Intermediate Accounting I	
ACCT 4963	Audit and Assurance Services	
ECON 3433	Money and Banking	
ECON 4433	Experimental Economics	

ECON 4633	International Trade	
ECON 4743	Introduction to Econometrics	
ECON 4753	Forecasting	
FINN 3053	Financial Markets and Institutions	
FINN 3063	Investments	
FINN 3603	Corporate Finance	
ISYS 3293	Systems Analysis and Design	
ISYS 4193	Business Analytics and Visualization	
ISYS 4213	ERP Fundamentals	
MGMT 3933	Entrepreneurship and New Venture Development	
MGMT 4263	Organizational Change and Development	
SCMT 3613	Supply Management	
SCMT 3623	Inventory and Forecasting Analytics	
SCMT 3643	International Logistics	
SCMT 3653	Retail Supply Chain Analysis	

Total Hours

15

Enterprise Resource Planning Minor

The Walton College offers an interdisciplinary minor in Enterprise Resource Planning (ERP). ERP systems are large-scale programs, which are used by many large companies to integrate their business processes and run the organization using primarily one software system. The minor requires completion of 15 hours of study with all of the upper division courses applied toward the minor taken in residence. The 15 hours include:

ISYS 4213	ERP Fundamentals	3
ISYS 4223	ERP Configuration and Implementation	3
Select three of the following:		9
ACCT 3533	Accounting Technology	
ACCT 3723	Intermediate Accounting I	
ISYS 4233	Seminar in ERP Development	
SCMT 3443	Transportation and Distribution Management	
SCMT 3613	Supply Management	
SCMT 3623	Inventory and Forecasting Analytics	

Total Hours

15

Students who desire to earn an Enterprise Resource Planning minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student's undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor. All upper level minor requirements must be taken in residence.

Financial Economics Minor

The Walton College offers an interdisciplinary minor in Financial Economics. The minor will provide students with the background needed for research in finance and industry. The minor requires completion of 15 hours of study with all of the upper division courses applied toward the minor taken in residence. The 15 hours include:

FINN 3013	Financial Analysis	3
ECON 4753	Forecasting	3
Select three of the following:		9
FINN 3063	Investments	

FINN 3603	Corporate Finance	
ECON 3433	Money and Banking	
ECON 4743	Introduction to Econometrics	
Total Hours		15

Students who desire to earn a Financial Economics minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student's undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point average in the courses offered in the minor. All upper level minor requirements must be taken in residence.

Nonprofit Studies Minor

The Walton College offers an interdisciplinary minor in Nonprofit Studies. This minor will prepare students for working in the nonprofit sector as well as educating students who may be on boards and participate in other civic organizations. The minor requires completion of 15 hours of study with all of the upper division courses applied toward the minor taken in residence.

The 15 hours include:

MKTG 4513	Nonprofit Marketing	3
SCMT 4853	Cross-Sector Collaboration for Sustainability	3
Select three courses from the following:		9
ACCT 4703	Governmental/Nonprofit Accounting	
WCOB 310V	Cooperative Education	
PLSC 300V	Internship in Public Affairs	
WCOB 3023	Sustainability in Business	
MGMT 4243	Ethics and Corporate Responsibility	
MGMT 4253	Leadership	
MGMT 4263	Organizational Change and Development	
ECON 3843	Economic Development, Poverty & the Role of the World Bank and IMF in Low-Income Countries	
PLSC 4853	International Norms and Corporate Social Responsibility	
PLSC 3103	Public Administration	
SOCI 4013	Special Topics in Sociology	
Total Hours		15

Students who desire to earn a Nonprofit Studies minor must notify the Walton College Undergraduate Programs Office of intent to pursue a minor. All requirements for the minor must be completed prior to the awarding of the student's undergraduate degree. All specific course prerequisites must be met. Each student must have a 2.00 cumulative grade-point-average in the courses offered for the minor. All upper division level minor requirements must be taken in residence.

Minors for Non-Business Students

For students who are business majors, the requirements for business minors are listed with each major business program.

To facilitate students outside Walton College in obtaining knowledge that will assist them in making sustained contributions to organizations and society in a global, diverse, and dynamic environment, the Walton College offers a business minor for non-business majors. The minor requires completion of 21 required hours of study (including equivalencies) with at least 50 percent of the courses applied toward the minor taken

in residence. Each student must have a 2.00 cumulative grade-point average in the courses offered for the minor.

Non-business, degree-seeking students working toward a minor should note the following:

1. Students who elect to obtain a business minor must provide written notice of their intent to the dean's office of the college in which they are receiving a degree. This notice and all requirements for the business minor must be completed prior to the awarding of the student's undergraduate degree.
2. Business minor students must complete all 1000- and 2000-level courses required for the business minor and be a junior- or senior-level student to enroll in 3000- or 4000-level business courses.
3. All specific course prerequisites must be met. Although business minor students are not required to satisfy the entire pre-business core, they must complete the required courses and any other prerequisite course specified prior to enrolling in a 3000/4000-level course.
4. Business minor students may complete multiple minors with the exception of General Business and an additional area of business study. Students may not use more than three hours of minor courses toward additional minor requirements.
5. ECON 2143 will substitute for ECON 2013/ECON 2023 for prerequisite purposes. In addition, students who take both ECON 2013 Principles of Macroeconomics (ACTS Equivalency = ECON 2103) and ECON 2023 Principles of Microeconomics (ACTS Equivalency = ECON 2203) will satisfy the economics requirements of the minor.
6. Business minor students are ineligible to take MGMT 3013 Strategic Management.
7. ECON 3053 and WCOB 3043 may not count toward the junior- or senior-level course requirements for the minor.
8. All equivalencies must be approved by the assistant dean for undergraduate programs.
9. Students may choose to pursue Concentration 1—General Business online, as long as they adhere to the requirements for online programs (p.).

All upper level minor requirements must be taken in residence. All students seeking a business minor are required to complete the Walton College computer competency requirement ISYS 1120 and the following courses:

ECON 2143	Basic Economics: Theory and Practice	3
ACCT 2013	Accounting Principles	3
WCOB 1033	Data Analysis and Interpretation	3
Total Hours		9

In addition, students must select and complete one of the following concentrations:

Requirements for General Business Minor

Select four of the following (at least 6 hours must be at the 3000 or 4000 level):

ACCT 2023	Accounting Principles II or MGMT 20 Business Foundations	
BLAW 2013	The Legal Environment of Business (ACTS Equivalency = BLAW 2003)	
ISYS 2103	Business Information Systems	

SCMT 2103	Introduction to Supply Chain Management	
MGMT 2103	Managing People and Organizations	
FINN 3043	Principles of Finance	
MKTG 3433	Introduction to Marketing	
Plus any other 3000- to 4000-level Walton College course (except WCOB 3043)		
Total Hours		12

Requirements for Accounting Minor

ACCT 2023	Accounting Principles II	3
ACCT 3723	Intermediate Accounting I	3
Plus an additional 6 hours from the following:		6
ACCT 3533	Accounting Technology	
ACCT 3753	Intermediate Accounting II	
ACCT 3843	Fundamentals of Taxation I	
ACCT 4673	Product, Project and Service Costing	
ACCT 4963	Audit and Assurance Services	
Total Hours		12

Requirements for Business Economics Minor

ECON 3033	Microeconomic Theory	3
ECON 3133	Macroeconomic Theory	3
Plus an additional 6 hours of 3000- to 4000-level business economics courses		6
Total Hours		12

Requirements for Enterprise Resource Planning Minor

ACCT 2023	Accounting Principles II	3
FINN 3043	Principles of Finance	3
ISYS 4213	ERP Fundamentals	3
SCMT 2103	Introduction to Supply Chain Management	3
Select an additional 3 hours from the following:		3
ISYS 4223	ERP Configuration and Implementation	
ISYS 4233	Seminar in ERP Development	
ISYS 4293	Business Intelligence	
Total Hours		15

Requirements for Enterprise Systems Minor

ISYS 4453	Introduction to Blockchain Applications	3
ISYS 4463	Blockchain Enterprise Systems Development	3
Plus an additional 6 hours from the following:		6
ISYS 4213	ERP Fundamentals	
ISYS 4223	ERP Configuration and Implementation	
ISYS 4233	Seminar in ERP Development	
ISYS 4293	Business Intelligence	
Total Hours		12

Requirements for Finance Minor

FINN 3043	Principles of Finance	3
Plus an additional 9 hours of 3000- to 4000-level finance courses		9
Total Hours		12

Requirements for Information Systems Minor

ISYS 3293	Systems Analysis and Design	3
ISYS 3393	Business Application Development Fundamentals	3
Plus an additional 3 hours from the following:		3
ISYS 4213	ERP Fundamentals	
ISYS 4223	ERP Configuration and Implementation	
One 3-hour 4000-level ISYS course		3
Total Hours		12

Requirements for International Business Minor

ECON 4633	International Trade	3
ECON 4643	International Macroeconomics and Finance	3
Plus an additional 6 hours from the following:		6
ECON 3843	Economic Development, Poverty & the Role of the World Bank and IMF in Low-Income Countries	
ECON 3853	Emerging Markets	
ECON 3933	The Japanese Economic System	
ECON 468V	International Economics and Business Seminar	
FINN 3703	International Finance	
MGMT 4583	International Management	
MKTG 4633	Global Marketing	
SCMT 3643	International Logistics	
Total Hours		12

Requirements for Management Minor

MGMT 4243	Ethics and Corporate Responsibility	3
Plus an additional 9 hours of 3000/4000 level management courses (may include MGMT 2103 or MGMT 3563)		9
Total Hours		12

Requirements for Marketing Minor

MKTG 3433	Introduction to Marketing	
Select an additional 9 hours from the following:		9
MKTG 3553	Consumer Behavior	
MKTG 3633	Marketing Research	
MKTG 4233	Integrated Marketing Communications	
MKTG 4343	Selling and Sales Management	
MKTG 4433	Retail Strategy	
MKTG 4443	Retail Buying and Merchandise	
MKTG 4453	New Product Development	
MKTG 4633	Global Marketing	
SCMT 3613	Supply Management	
Total Hours		9

Requirements for Retail Minor

MKTG 3433	Introduction to Marketing	3
MKTG 4433	Retail Strategy	3
MKTG 3553	Consumer Behavior	3
MKTG 4443	Retail Buying and Merchandise	3
Total Hours		12

Requirements for Supply Chain Management Minor

SCMT 3443	Transportation and Distribution Management	3
SCMT 3613	Supply Management	3
Two more SCMT courses of 3000/4000 level		6
Total Hours		12

College of Education and Health Professions

Mission and Objectives

The mission of the College of Education and Health Professions is to enhance the quality of life of the citizens of Arkansas, the nation, and the world through the development of scholar-practitioners in education, health, and human services.

The goals of the College of Education and Health Professions are to:

- Strengthen the academic quality and reputation of the college by developing and enhancing programs of excellence in teaching, research, and service.
- Improve the quality and diversity of our students, faculty, and staff.
- Generate increased private and public support for the college's research, academic, and service initiatives.

Facilities and Resources

The Sylvia Hack Boyer Office of Academic Student Initiatives and Services (OASIS)

The office provides advising and student support services to undergraduate students in the College of Education and Health Professions from matriculation to graduation.

The Office for Teacher Education

The office provides field placement, teacher licensure, and student assessment. The office also provides support to the academic departments as they pursue state and national accreditation.

Organization

For administrative purposes, the undergraduate programs of the college are organized under four academic units, with majors shown after each unit:

1. Curriculum and Instruction
 - a. Career and Technical Education
 - b. Childhood Education
 - c. Educational Studies
 - d. Elementary Education
 - e. Special Education
 - f. Spanish Education
 - g. German Education
 - h. French Education
 - i. Social Studies Education
 - j. English Education
2. Eleanor Mann School of Nursing
 - a. Nursing
3. Health, Human Performance and Recreation

- a. Exercise Science
- b. Physical Education
- c. Public Health
- d. Recreation and Sport Management
4. Rehabilitation, Human Resources, and Communication Disorders
 - a. Communication Sciences and Disorders
 - b. Human Resource and Workforce Development

Facilities

The Graduate Education Building, Peabody Hall, Epley Center for Health Professions, and the Health, Physical Education and Recreation Building serve as the nucleus of the College of Education and Health Professions' activities.

The Graduate Education Building houses the Department of Rehabilitation, Human Resources and Communication Disorders, an auditorium, several conference and seminar rooms, classrooms, and offices for individual professors, along with administrative and service units such as the Dean's office, OASIS, and computer laboratory.

Peabody Hall houses the Department of Curriculum and Instruction, classrooms and offices for individual professors, along with the Office for Teacher Education for the College and University.

The Health, Physical Education and Recreation (HPER) Building houses the majority of faculty offices and classrooms for Athletic Training, Public Health, Kinesiology, Recreation and Sport Management, the Office for Studies on Aging, the Exercise Science Research Center, and the University Recreation offices.

The department of University Recreation serves the university community by providing a diverse selection of recreational opportunities and facilities that are designed to enhance the quality of life of each participant. University Recreation is organized into eight program areas: Accessible Recreation, Club Sports, Facility Management, Fitness/Wellness, Instructional Programs, Intramural Sports, and the Outdoor Connection Center. University Recreation operates its main facility in the Health, Physical Education and Recreation Building, which houses an Olympic-sized swimming pool, multiple gymnasiums, an indoor track, the Donna Axum Fitness Center, racquetball courts and the Outdoor Connection Center. In addition to the HPER building, UREC also operates the University Recreation Fitness Center, located on the second floor of the Arkansas Union, which features almost 6,000-square feet of fitness floor space, a 1,500-square foot group exercise room, and men's and women's locker and shower facilities. Memberships may be purchased by university faculty, staff and alumni for both the HPER Building and the University Recreation Fitness Center. For additional information, please visit the department of University Recreation website (<http://urec.uark.edu>).

The Communication Sciences and Disorders program and the Speech and Hearing Clinic are housed in Epley Center for Health Professions. The clinic contains faculty offices, a classroom, a graduate seminar room, teaching and research laboratories, and space and facilities for the provision of services to the speech, language, and hearing impaired. University services are provided through the clinic to university students and the community.

The Eleanor Mann School of Nursing is also housed in Epley Center for Health Professions. The nursing program facilities include administrative offices, faculty offices, two classrooms, simulation laboratories, a

conference room, and a computer classroom. The school has affiliation agreements for clinical practice with area health care agencies.

The West Avenue Annex building houses research and service units: the Center for Mathematics and Science Education (CMASE), the Center for Children and Youth, the Arkansas Leadership Academy (ALA) and the Office for Innovation in Education (OIE). Established in 1991, the Arkansas Leadership Academy is a nationally recognized statewide partnership of 13 universities, 9 professional associations, 15 educational cooperatives, the Arkansas Departments of Education, Higher Education, and Workforce Education, the Arkansas Educational Television Network, Tyson Foods Inc., Wal-Mart Stores Inc., and the Walton Family Foundation. The Center for Mathematics and Science Education provides quality resources to private and public educators. The center also serves as the Arkansas NASA Educator Resource Center, disseminating educational materials provided by NASA. The Office for Innovation in Education is funded by the Arkansas Department of Education to develop and test new approaches to deliver and assess K-12 education innovations.

Established in 1974, the Center for the Utilization of Rehabilitation Resources for Education, Networking, Training and Service (CURRENTS) provides customized training and consulting for organizations ranging from large state agencies to small not-for-profits and is nationally recognized for the high level of commitment and responsiveness to their customers and their efforts to expand, improve, and strengthen services to people with disabilities. The center is located at the Arkansas School for Mathematics, Sciences and the Arts, Hot Springs, Arkansas.

Academic Journals

The college is host to the *Journal of Research on the College President*, edited by G. David Gearhart, a professor of higher education and Chancellor Emeritus, and the *Journal of School Choice*, edited by Robert Maranto, 21st Century Endowed Chair in Leadership in the Department of Education Reform.

Degrees Offered

The college offers curricula leading to three degrees - the Bachelor of Science in Education degree (B.S.E.), the Bachelor of Science (B.S.), the Bachelor of Arts in Teaching (B.A.T.), and the Bachelor of Science in Nursing (B.S.N.). Some of these degree programs have concentrations and specialties that are described within their section(s).

College Admission Requirements

All entering students (including freshmen, international, and transfer) admitted to the University of Arkansas, Fayetteville, are eligible for admission to the college. Some undergraduate programs require additional admission criteria to complete.

Transfer of Credit

The policies controlling the granting of credit for course work taken at other institutions apply as follows:

1. Courses completed at the lower-division (freshman or sophomore) level at another institution may not count as equivalents of upper-division (junior or senior) level courses offered in the college unless student requests program modification with proper petition approvals.
2. Students should be prepared to submit official course descriptions of transfer course work if there is any question as to whether the college will grant degree credit for such work.

Exploring Majors

Students enrolled in the College of Education and Health Professions are encouraged to declare a major as soon as possible. For assistance contact the *Sylvia Hack Boyer* Office of Academic Student Initiatives and Services, 350 Graduate Education Building, 479-575-4203.

College Scholarships

Thanks to the generosity of donors, the College of Education and Health Professions offers several scholarship opportunities. These gifts allow the college to support the university's mission of recruiting and retaining high-achieving students who enrich and diversify the academic environment. Scholarships are available for both graduate and undergraduate students. Please visit the college's scholarship webpage (<https://coehp.uark.edu/for-students/scholarships/>) for more information.

Student Organizations

There are many general-interest societies and organizations on the campus, and nearly every department of the university maintains an honor society through which high scholarship is rewarded. Of special interest to students in the college are the following:

- Eta Sigma Gamma - honor society for Public Health
- Kappa Delta Pi – honor society for education
- Phi Delta Kappa – honor fraternity for graduate students
- Kinesiology Club – for kinesiology majors
- Recreation and Sport Management Majors Club – for recreation and sport management students
- Razorback Athletic Training Association (RATA) – for undergraduate kinesiology majors with a concentration in exercise science – pre-athletic training, entry level graduate athletic training students and graduate assistant athletic trainers in women's and men's athletics
- National Student Speech-Language-Hearing Association – for communication sciences and disorders majors
- Arkansas Nursing Students Association, National Student Nurse Association, and the Pi Theta chapter of Sigma Theta Tau International Honor Society of Nursing – for nursing majors

College Academic Regulations

Admission Process for Initial Teacher Licensure

Stage I: Enrollment

Enroll in an undergraduate degree program leading to a potential teacher licensure field. Potential fields include the following:

- Agricultural Education – B.S.A.
- Art Education – B.F.A.
- Career & Technical Education (Business Education) – B.S. E. Licensure Program
- Career & Technical Education (Family & Consumer Science) – B.S. E. Licensure Program
- Career & Technical Education (Technology Education) – B.S. E. Licensure Program
- Childhood Education – B.S.E.
- Elementary Education – B.S.E. Licensure Program
- Human Environmental Sciences Education – B.S.H.E.S.
- Kinesiology K-12 – B.S. Licensure Program
- Music Education – B.M.

- Secondary Education – B.A., B.S.
- Special Education - B.S.E. Licensure Program
- Speech-Language Pathology – B.S.

Stage II: Admission to Teacher Education

Complete the Admission to Teacher Education application on the Office of Field Placement and Licensure website (<http://teacher-education.uark.edu/admissions/>) for details. Satisfactory completion of this form does not guarantee admission to the student teaching semester or the Masters of Arts in Teaching (M.A.T.) degree program or other teacher education programs.

Stage III: Program Admission

The following minimum criteria are necessary to be eligible for consideration for admission to a teacher education program:

1. Meet all requirements in stages I and II.
2. Consult with faculty adviser for additional requirements set by the chosen program.

Initial Licensure

Students who have completed the stages listed above must obtain a licensure packet from the Teacher Certification Officer, 338 Graduate Education Building, prior to entering internship/student teaching. A mandatory meeting is held each semester before starting either an internship or a student teaching experience.

Students should always consult the Teacher Certification Officer or adviser regarding licensure requirement changes. Students will not be licensed to teach in Arkansas until they have met all requirements for licensure as set forth by the Arkansas Department of Education.

College Honor Roll

At the close of each semester, the college recognizes students who qualify for the Honor Roll. Students must carry a minimum of 12 semester hours to be eligible for the Honor Roll and obtain a minimum term GPA of 3.75.

Graduation with Distinction

Graduation with Distinction will be conferred to College of Education and Health Professions students (who are not participating in the college "Honors Program") based upon their University of Arkansas cumulative grade-point average at the time of graduation. To earn this distinction, a student must have completed at least one-half of the course work required for his or her degree at the University of Arkansas, Fayetteville. The graduation with distinction designation will be assigned as follows:

1. For highest distinction, the student must have a minimum cumulative grade point average of 3.95.
2. For high distinction, the student must have a minimum cumulative grade point average of 3.80.

Degree Requirements

Minimum Requirements for the B.S.E. or B.S. or B.S.N. Degree

The candidates for a baccalaureate degree from the college must meet university requirements, which specify at least 120 semester hours of work with a grade-point average of at least 2.00 on all work attempted in the university. Students exempting any course must still meet the 120-hour graduation requirement and should consult their adviser for

specific program requirements. Exemption of courses does not result in credit earned. The students must comply with the prescriptions and restrictions listed below and under General Studies and must complete the requirements in one or more of the approved degree programs.

Students must also meet all other university requirements for graduation, including the University Core requirements (p. 97). Students are required to have a pre-graduation check at least one semester prior to the graduation term. Students who complete the pre-graduation check and meet all university and College of Education and Health Professions requirements may apply for graduation under the guidelines detailed on the Graduation Requirements page (p. 91). All course work, university requirements, and college requirements must be completed by the deadline for the term in which applied. Students not graduating in spring, but wishing to participate in the spring commencement ceremony, must apply for graduation by the established priority deadline for the spring term. For clarification, please contact the Sylvia Hack Boyer Center for Student Services, 336 Graduate Education Building, at 479-575-4203.

Graduate Studies

The Graduate School, in cooperation with the college, offers advanced work in education and health professions leading to the degrees of Master of Arts in Teaching, Master of Science, Master of Education, Educational Specialist, Doctor of Education, and Doctor of Philosophy.

The graduate programs include:

- Adult and Lifelong Learning
- Athletic Training
- Childhood Education
- Communication Disorders
- Community Health Promotion
- Counselor Education
- Curriculum and Instruction
- Educational Leadership
- Educational Statistics and Research Methods
- Educational Technology
- Education Policy
- Elementary Education
- Higher Education
- Human Resource and Workforce Development
- Kinesiology
- Middle-Level Education
- Nursing
- Physical Education
- Recreation and Sport Management
- Rehabilitation
- Secondary Education
- Special Education

The Graduate School awards the graduate degrees. Students who are interested in registering for graduate courses or in becoming candidates for these degrees should consult the dean of the Graduate School and the Graduate School Catalog.

Students who plan to study for an advanced degree in the subject-matter field should consult with the head of the department concerning course requirements to be eligible to begin graduate study. Specialization requirements for a B.S.E. degree in the College of Education and Health

Professions may not be sufficient in every field to gain admission for graduate study without deficiencies.

Accreditations

The University of Arkansas holds membership in and is accredited by the North Central Association of Colleges and Secondary Schools. The college is also a member of the American Association of Colleges for Teacher Education.

The graduate program in communication disorders is accredited by the Council on Academic Accreditation of the American Speech-Language-Hearing Association, but the program is currently on probation. Find out more in the Graduate Catalog (<http://catalog.uark.edu/graduatecatalog/programsofstudy/communicationdisorderscds/>).

The counselor education graduate program is nationally accredited through the Council for the Accreditation of Counseling and Related Educational Programs (CACREP).

The Bachelor of Science in Nursing (B.S.N.) degree program is accredited by the Commission on Collegiate Nursing Education. It is also approved by the Arkansas State Board of Nursing.

The M.S. degree program in Rehabilitation Counseling is accredited by the Council on Rehabilitation Education (CORE). Graduates of the accredited program are eligible to sit for the Certified Rehabilitation Counselor (CRC) examination.

The B.S. degree program in Public Health is accredited by the Council on Education for Public Health (CEPH).

The teacher education program of the College of Education and Health Professions is accredited by the Council for the Accreditation of Educator Preparation (CAEP). This accreditation covers the initial teacher preparation programs and/or advanced educator preparation programs. Because of the accreditation by the Council for the Accreditation of Educator Preparation, students who complete the curricula as outlined in this catalog are eligible to be recommended for licensure in states that agree to certify graduates who are recommended by the College of Education and Health Professions as having fulfilled its requirements. Students who complete the approved program of study leading to initial licensure are eligible to receive licenses to teach at the grade level or in the fields for which they have made preparation upon application and presentation of acceptable scores on the appropriate Praxis exams. However, students must follow licensure guidelines set forth by the Arkansas Department of Education to be licensed to teach.

Below the majors, concentrations and minors are listed the requirements for teaching licensure.

Majors, Concentrations and Minors

Majors and Concentrations

- Career and Technical Education (p. 452)
 - Business Education
 - Family and Consumer Sciences Education
 - Technology Education
- Childhood Education (p. 459)
- Communication Sciences and Disorders (p. 469)
- Educational Studies (p. 473)
- Elementary Education (p. 485)
- English Education (p. 487)
- Exercise Science (p. 489)
- French Education (p. 492)
- German Education (p. 493)
- Human Resource and Workforce Development (p. 496)
- Nursi (p. 474)ng (p. 474)
- Public Health (p. 498)
- Recreation and Sport Management (p. 500)
- Social Studies Education (p. 503)
- Spanish Education (p. 505)
- Special Education (p. 507)
- Teaching K-12 Physical Education and Health (p. 509)

Minors

- UAteach (p. 511)

Undergraduate students in the college may declare any official academic minor available at the University of Arkansas. Students must notify the Sylvia Hack Boyer Office of Academic Student Initiatives and Services of their intent to pursue a minor. The college, with the assistance of the college offering the minor, will certify that the requirements of the minor have been satisfied. The academic minor will be designated on the student's official transcript. Requirements for the minor are listed in the catalog under the department offering the minor.

Other Programs

Curricula Offered for Initial Licensure

Nursing Licensure: Completing the minimum requirements for the degree of Bachelor of Science in Nursing will satisfy the academic requirements for licensure as a Registered Professional Nurse. Students must complete all of the requirements set forth by the Arkansas State Board of Nursing to be licensed as a registered nurse. See adviser for details.

Teacher Licensure and Licensure of other School Personnel

The University of Arkansas offers approved undergraduate programs of study for initial licensure in childhood education, career and technical education (business education, family and consumer science, technology education), kinesiology (P-12 physical education), school counseling, special education, speech-language pathology, music and art education, and agriculture education, initial teacher licensure programs in secondary education (English/language arts, drama/speech, social studies, science, mathematics, world language), and childhood education in the Masters of Arts In Teaching (M.A.T.) degree program. The M.A.T. degree program is offered in consecutive summer, fall, and spring semesters with initial enrollment in the summer semester. The M.A.T. is a graduate degree program and requires a minimum of 33 semester hours. The M.A.T. degree program has two areas of emphasis: childhood education and secondary education in drama/speech, English, foreign language, mathematics, science and social studies. Consult the Admissions Process for Initial Teacher Licensure Stages I-III and the Graduate School Catalog for admission and graduation requirements for the M.A.T. degree program. The approved program of study for initial licensure in speech-language pathology is the Master of Science degree in Communication Disorders. Procedures for obtaining licensure parallel those used with M.A.T. graduates. There are some non-M.A.T. licensure programs. See the appropriate sections of this catalog for that information. For bachelor's degree licensure requirements in career and technical education, music and art education, and some areas of agriculture education, see appropriate sections of this catalog.

The State Board of Education issues the regulations governing the licensure of teachers in Arkansas. The Board specifies minimum cut-off scores for all Praxis exams. Each application for a teacher's license requires completion of an approved program of study, completion of a state and national background check, and documentation of passing the Praxis exams. Those wishing to add an additional license or endorsement, should contact the Teacher Certification Officer in 338 Graduate Education Building for the approved programs of study or go to the menu "Additional Licensure Plan (<http://coehp.uark.edu/licensure.html>)" on the college's website.

University Teacher Education Board

The University Teacher Education Board is composed of the associate deans; faculty representatives from the College of Education and Health Professions; the J. William Fulbright College of Arts and Sciences; the Dale Bumpers College of Agricultural, Food and Life Sciences; public school teachers and/or administrators, and students. The functions are to

- Govern the teacher education and licensure program.
- Establish general policies and procedures necessary to maintain quality in degree programs.
- Oversee the general coordination of the initial licensure process
- Approve new courses and course changes in individual licensure program.

The Board serves as a liaison for the faculties involved and emphasizes the importance of teacher education as one of the primary responsibilities of the university.

Honors Program

The College of Education and Health Professions (COEHP) Honors Program is designed for students who value and want to be challenged by an exceptional educational experience and want to focus their studies intensively. The program creates and supports an academic environment of intellectual adventure and provides a carefully integrated and demanding curriculum. The rewards are immense: high academic achievement; involvement in undergraduate research; academic distinction of *summa cum laude*, *magna cum laude*, or *cum laude* and confirmation of an honors degree on the student's transcript; and recognition at commencement.

The mission of the Honors Program is to: establish and maintain an Honors community of learning that is intellectually rigorous, personally and culturally enriching, and fosters learning and discovery through independent and collaborative inquiry; allow students to be creative, inquisitive and innovative; support student research and analysis of ideas; support student academic ventures through mentoring, travel, and supplies when presenting work at undergraduate research symposia; challenge students to connect the classroom with the larger world by expanding social and cultural experiences and promoting leadership, and prepare students for admission to and success within graduate and professional schools in the United States and abroad.

Benefits of participating in the Honors Program include: small class sizes, close contact with talented faculty, opportunity for independent study that counts toward the requirements of the Honors Program, special academic counseling and priority registration, increased confidence and skill in writing, honors housing, Latin Honors designation on transcript, enhanced career opportunities, and increased advantages for graduate or professional school applicants.

Admission to the University of Arkansas Honors College assures automatic admission to the COEHP Honors Program for incoming freshmen. The student can apply for admission electronically through the Honors College website (<https://honorscollege.uark.edu/apply/>). The following are admission criteria for students seeking admission to the COEHP Honors Program:

Entering Freshmen

- 28 ACT or 1310 SAT score (Critical Reading plus Math). Honors admission is based on your highest composite ACT or SAT score, not on superscores.
- 3.5 or greater high school GPA

Students Applying as Continuing or Transfer

(within and outside the University of Arkansas)

- 3.5 or greater cumulative GPA
- Applications will not be accepted from students who are within three full semesters of anticipated graduation date.

Expectations

At the end of each academic semester, the COEHP Honors Program will review academic records of all enrolled COEHP Honors students. A student's cumulative GPA must be 3.50 or greater to remain in good standing within the COEHP Honors Program; if the cumulative GPA falls between 3.00 and 3.49, the student will be placed on probation for one

academic semester. At that time, the student is strongly encouraged to remove any Honors courses from their schedule. At the end of the probationary period if the student's cumulative GPA is 3.50 or greater, they will be reinstated in good standing within the COEHP Honors Program; if the cumulative GPA is less than 3.50 the student will be removed from the COEHP Honors Program and the student must remove any Honors courses from their schedule. If the student's cumulative GPA falls below 3.00 at any point, the student will be immediately removed from the COEHP Honors Program and the student must remove any Honors courses from their schedule.

All COEHP Honors students are held to the highest standard with regard to academic achievement and academic integrity. Students violating the Academic Integrity Policy that receive a sanction of 1.0 or greater at the University of Arkansas will be permanently removed from the COEHP Honors Program without the ability to reapply. The student may appeal the decision to the University's Academic Integrity Board; if the sanction is overturned and removed, the student will be reinstated into the COEHP Honors Program.

Honors Degrees

The College of Education and Health Professions is dedicated to providing programs designed to meet the Honors student's needs. To achieve this aim, the college faculty has developed the COEHP Honors Program — an honors program for students of superior academic talent.

Students successfully completing the COEHP Honors Program will receive the following academic accolades:

- GPA of 3.9 or greater — *summa cum laude*
- GPA of 3.7 or greater — *magna cum laude*
- GPA of 3.5 or greater — *cum laude*

Requirements for COEHP Honors Program: Requirements for the COEHP Honors Program include meeting all university, COEHP, and department degree requirements. Additionally, students must maintain a cumulative GPA of 3.5, complete a minimum of 18 credit hours of honors courses, and complete and defend an honors thesis/project. Of the 18 honors credit hours, a minimum of 10 must be completed within the student's program of study (except in situations as described in the following paragraph), including the Honors Tutorial (3901H) and 3 hours of Honors Thesis (498VH), which may be split across multiple semesters.

Students who wish to complete the Honors thesis/project with a COEHP faculty mentor outside of their major should enroll in the Honors Tutorial and Honors Thesis courses that correspond with the faculty member's department/program; these hours shall be counted toward the 10 hour requirement. Students who wish to complete the Honors thesis/project with a non-COEHP faculty mentor should accumulate a minimum of 4 hours of Honors research/independent study courses that correspond with the faculty mentor's department/program; these hours shall be counted toward the 10 hour requirement.

For Exercise Science students, Honors Research Methods in Exercise Science (EXSC 3723H) may be substituted for the Honors Tutorial (3901H)

Honors courses must be completed in residence at the University of Arkansas, Fayetteville campus in order to satisfy the required 18 honors credits to receive the COEHP Honors distinction. Any honors credits awarded based on AP/IB results shall not be used to fulfill this requirement. Transfer students from other four-year institutions may

initiate an appeal with the COEHP Honors Council if they wish to have transfer Honors credit satisfy part of the 18 hour requirement.

For more information about the COEHP Honors Program or to complete an application form, please visit coeophonors.uark.edu (<https://coeophonors.uark.edu/>).

The program in Career and Technical Education offers a degree program leading to a Bachelor of Science in Education for the preparation of teachers, supervisors, and administrators in career and technical education. Students must choose one of three concentrations, each of which leads to teacher licensure:

- The concentration in Business Education offers on-campus students the chance to become effective educators and communicators as they learn to teach the latest computer technologies and subject matter focused on the core areas of business. The concentration provides rigorous and intellectually stimulating programs that offer students a broad variety of professional careers in business education and technology.
- The concentration in Family and Consumer Sciences Education offers on-campus students the ability to learn critical and creative thinking skills through a variety of courses including parenting and human development; family studies; nutrition and foods; textiles and apparel production; and housing and design. The diverse curriculum offers studies that mirror real life, enabling students in this concentration to develop both personal and professional skills.
- The concentration in Technology Education prepares students to teach technology, pre-engineering, or other technical subject matter at the high school, middle-level, or community college. Additionally, the program prepares students to enter mid-level technical/management careers in business and industry.

Admission to the B.S.E. in Career and Technical Education is competitive and admission will be determined by the Career and Education faculty based on the items listed with the concentration requirements. Students seeking admission to the Career and Technical Education program at the University of Arkansas must be aware of the deadlines and admissions policies. These deadlines and limitations are designed to ensure that all students have a high quality experience.

The University of Arkansas program in career and technical education has been approved by the State Board for Career and Technical Education for the preparation of teachers, supervisors, and administrators in career and technical education.

Requirements for B.S.E. in Career and Technical Education with Business Education Concentration

Stage I: Pre-Admission

1. Obtain a GPA of 2.7 or better on UA coursework.
2. Complete technical courses with a grade of "C" or better.

3. Complete pre-education core courses with a grade of "C" or better.
4. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT as defined by the Arkansas Department of Education.
5. Complete CATE 3103 during the fall semester of the sophomore year.

Stage II: Admission to the CATE Program

Admission to the Career and Technical Education (CATE) program occurs the semester after that the candidate has completed CATE 3103 Introduction to Professionalism.

The application process includes:

1. Submission of the application to teacher education through the university-wide Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes:
 - Completing and passing the criminal background check
 - Passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013 (<http://catalog.uark.edu/search/?P=ENGL%201013/>), and required math for each CATE concentration area.
2. Submission of the CATE application.
3. Oral interview with CATE faculty.
4. Submission of writing sample.

*Note: Another background check will be required prior to graduation in order to be eligible for licensure.

Stage III: Requirements for Program Continuation

1. Maintain a cumulative GPA of 2.7 or better.
2. Complete or present proof of registration for the Praxis II Content exam required by the Arkansas Department of Education Licensure area.
3. All professional education courses must have a grade "C" or better. No teaching methods courses may be taken as self-paced (correspondence).

Admission Requirements for Internship Semester (Spring, Senior Year)

All students in the Career and Technology Education program must complete the following requirements before being admitted to the spring semester of their senior year.

General Requirements

1. Students must complete the application to teacher education through the Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes completing and passing the criminal background check, and also passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013, and required math for each concentration.
2. All professional education courses must have a grade of "C" or better. No teaching methods courses may be taken by as self-paced (correspondence) courses. CATE 3103, CATE 4013, CATE 4023, and CATE 4033 are fall-only courses. CATE 4052 and CATE 406X are

spring-only courses. All technical courses must be completed prior to the student teaching semester.

3. Earn a cumulative GPA of 2.70 or better by the end of the fall semester, senior year. Students are not permitted to student teach if the GPA requirement is not met.
4. Students must have passed Praxis II: Content Knowledge to be admitted to the spring semester, senior year.
5. Candidate must complete a successful "internship admission interview" with Career and Technical Education faculty. Note these interviews are scheduled with all senior students during the fall semester.
6. Satisfactorily complete the internship/student teaching experience at a school/district in Benton or Washington County that has been approved by the Field Experience Coordinator.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

All CATE program courses must have a grade of "C" or better. No teaching methods courses may be taken as self-paced (correspondence) courses.

I. University Core Requirements

35

Required University Core for Career & Technical Education

PSYC 2003	General Psychology (ACTS Equivalency = PSYC 1103)
-----------	---

Recommended for Business Education concentration

ECON 2013	Principles of Macroeconomics (ACTS Equivalency = ECON 2103)
ECON 2023	Principles of Microeconomics (ACTS Equivalency = ECON 2203)
MATH 2053	Finite Mathematics

II. Professional Education

35

CIED 1013	Introduction to Education
CIED 3023	Survey of Exceptionalities or CIED 402 Teaching in Inclusive Secondary Settings
CIED 3033	Classroom Learning Theory
CATE 3103	Introduction to Professionalism
CATE 4013	Teaching Strategies
CATE 4023	Classroom Management
CATE 4033	Assessment / Program Evaluation
CATE 4052	Seminar Teaching Internship
CATE 406X	Teaching Internship

III. Technical Requirements

21

ACCT 2013	Accounting Principles
BLAW 2013	The Legal Environment of Business (ACTS Equivalency = BLAW 2003)
MGMT 2053	Business Foundations or ACCT 2023 Accounting Principles II
MKTG 3433	Introduction to Marketing

¹ Core areas must be completed as outlined in Catalog of Studies, see the University Core requirements (p. 97).

Requirements for B.S.E. in Career and Technical Education with Family and Consumer Sciences Education Concentration

Stage I: Pre-Admission

1. Obtain a GPA of 2.7 or better on UA coursework.
2. Complete technical courses with a grade of "C" or better.
3. Complete pre-education core courses with a grade of "C" or better.
4. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT as defined by the Arkansas Department of Education.
5. Complete CATE 3103 during the fall semester of the sophomore year.

Stage II: Admission to the CATE Program

Admission to the Career and Technical Education (CATE) program occurs the semester after that the candidate has completed CATE 3103 Introduction to Professionalism.

The application process includes:

1. Submission of the application to teacher education through the university-wide Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes:

- Completing and passing the criminal background check
- Passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013 (<http://catalog.uark.edu/search/?P=ENGL%201013/>), and required math for each CATE concentration area.

2. Submission of the CATE application.

3. Oral interview with CATE faculty.

4. Submission of writing sample.

*Note: Another background check will be required prior to graduation in order to be eligible for licensure.

Stage III: Requirements for Program Continuation

1. Maintain a cumulative GPA of 2.7 or better.

2. Complete or present proof of registration for the Praxis II Content exam required by the Arkansas Department of Education Licensure area.

3. All professional education courses must have a grade "C" or better. No teaching methods courses may be taken as self-paced (correspondence).

Admission Requirements for Internship Semester (Spring, Senior Year)

All students in the Career and Technology Education program must complete the following requirements before being admitted to the spring semester of their senior year.

General Requirements

1. Students must complete the application to teacher education through the Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes completing and passing the criminal background check, and also passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013, and required math for each concentration.
2. All professional education courses must have a grade of "C" or better. No teaching methods courses may be taken by as self-paced (correspondence) courses. CATE 3103, CATE 4013, CATE 4023, and CATE 4033 are fall-only courses. CATE 4052 and CATE 406X are spring-only courses. All technical courses must be completed prior to the student teaching semester.
3. Earn a cumulative GPA of 2.70 or better by the end of the fall semester, senior year. Students are not permitted to student teach if the GPA requirement is not met.
4. Students must have passed Praxis II: Content Knowledge to be admitted to the spring semester, senior year.
5. Candidate must complete a successful "internship admission interview" with Career and Technical Education faculty. Note these

interviews are scheduled with all senior students during the fall semester.

6. Satisfactorily complete the internship/student teaching experience at a school/district in Benton or Washington County that has been approved by the Field Experience Coordinator.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

In addition to the General Studies, the following courses are required for a concentration in Family and Consumer Sciences Education.

University Core for Concentration in Family and Consumer Science 35

Required University Core

PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)

Recommended for Family and Consumer Science concentration

¹ Core areas must be completed as outlined in Catalog of Studies, see the University Core Requirements (p. 97).

Requirements for B.S.E. in Career and Technical Education with Technology Education Concentration

Stage I: Pre-Admission

1. Obtain a GPA of 2.7 or better on UA coursework.
2. Complete technical courses with a grade of "C" or better.
3. Complete pre-education core courses with a grade of "C" or better.
4. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT as defined by the Arkansas Department of Education.
5. Complete CATE 3103 during the fall semester of the sophomore year.

Stage II: Admission to the CATE Program

Admission to the Career and Technical Education (CATE) program occurs the semester after that the candidate has completed CATE 3103 Introduction to Professionalism.

The application process includes:

1. Submission of the application to teacher education through the university-wide Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes:
 - Completing and passing the criminal background check
 - Passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013 (<http://catalog.uark.edu/search/?P=ENGL%201013/>), and required math for each CATE concentration area.
2. Submission of the CATE application.
3. Oral interview with CATE faculty.
4. Submission of writing sample.

*Note: Another background check will be required prior to graduation in order to be eligible for licensure.

Stage III: Requirements for Program Continuation

1. Maintain a cumulative GPA of 2.7 or better.
2. Complete or present proof of registration for the Praxis II Content exam required by the Arkansas Department of Education Licensure area.
3. All professional education courses must have a grade "C" or better. No teaching methods courses may be taken as self-paced (correspondence).

Admission Requirements for Internship Semester (Spring, Senior Year)

All students in the Career and Technology Education program must complete the following requirements before being admitted to the spring semester of their senior year.

General Requirements

1. Students must complete the application to teacher education through the Teacher Education Office (see the Teacher Education Application Fee) during spring semester of sophomore year. This includes completing and passing the criminal background check, and also passing the Praxis I core academic subjects test by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken upon completion of ENGL 1013, and required math for each concentration.
2. All professional education courses must have a grade of "C" or better. No teaching methods courses may be taken by as self-paced (correspondence) courses. CATE 3103, CATE 4013, CATE 4023, and CATE 4033 are fall-only courses. CATE 4052 and CATE 406X are spring-only courses. All technical courses must be completed prior to the student teaching semester.
3. Earn a cumulative GPA of 2.70 or better by the end of the fall semester, senior year. Students are not permitted to student teach if the GPA requirement is not met.

4. Students must have passed Praxis II: Content Knowledge to be admitted to the spring semester, senior year.
5. Candidate must complete a successful "internship admission interview" with Career and Technical Education faculty. Note these interviews are scheduled with all senior students during the fall semester.
6. Satisfactorily complete the internship/student teaching experience at a school/district in Benton or Washington County that has been approved by the Field Experience Coordinator.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

¹ See the University Core (p. 97) page.

² All professional education courses must have grade "C" or better to award degree credit.

Internship Semester (Spring Semester/Senior Year) Admission Criteria:

1. Candidate must hold a cumulative GPA of 2.70 or higher.
2. Candidate must have completed the application to teacher education through the Teacher Education Office (see the Teacher Education Application Fee (p. 73)) during spring semester of sophomore year. This includes passing the Praxis Core exam and successfully completing the required criminal background check.
3. Candidate must have taken and passed the Praxis II content examination during the previous semester or earlier.
4. Candidate must complete a successful "internship admission interview" with Career & Technical Education faculty. Note these interviews are scheduled with all senior students during the fall semester.

Note: All students seeking licensure in the State of Arkansas are subject to a criminal background check. Forms needed to complete this procedure may be obtained in 340 Graduate Education Building on the University of Arkansas campus. These forms may also be obtained from any police station (including the University of Arkansas Police station) or directly from the Arkansas State Department. These background checks take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

¹ Must meet University Core

Teacher Licensure

Requirements for teacher licensure vary from state to state and may differ among teacher preparation programs. Please note that Arkansas requires all applicants to successfully complete a criminal background check. Background checks must be cleared before the candidate begins student teaching.

Carter, Vinson R., Ph.D., M.A.T., B.S. (University of Arkansas), Associate Professor, Department of Curriculum and Instruction, 2008.

Daugherty, Michael, Ed.D., M.S., B.S. (Oklahoma State University), Professor, Department of Curriculum and Instruction, 2005.

Orr, Betsy, Ed.D., M.Ed. (University of Arkansas), B.A. (University of Arkansas at Monticello), Associate Professor, Department of Curriculum and Instruction, 1989.

Childhood Education (CHED)

The Department of Curriculum and Instruction offers programs that prepare candidates for initial teacher licensure in Elementary Education (K-6). The B.S.E. degree in Childhood Education is not an initial teacher licensure program but instead leads to the Master of Arts in Teaching (M.A.T.), which is the initial teacher licensure preparation program. Information about the M.A.T. degree program can be found in the University of Arkansas *Graduate Catalog* on the Elementary Education (<http://catalog.uark.edu/graduatecatalog/programsofstudy/elementaryeducationmat/>) page or the Teacher Education (<http://catalog.uark.edu/graduatecatalog/programsofstudy/teachereducation/>) page.

Students majoring in Childhood Education must choose from among four concentrations:

- English as a Second Language Concentration
- Gifted and Talented Concentration
- Reading Concentration
- Science, Technology, Engineering and Math Concentration

Changes to the B.S.E. in Childhood Education have been included pending approval by the Arkansas Higher Education Coordinating Board.

Requirements for B.S.E. in Childhood Education with EASL Concentration

Admission to the B.S.E. in Childhood Education is competitive and consists of a three-stage process; simply meeting the minimum requirements will not guarantee admission to the program. Admission will be determined by the Childhood Education faculty based on the seven items listed below in Stage II.

Stage I: Pre-Elementary Education (PELED)

Complete either 63 hours of program pre-requisites for CHEDBS or 47 hours of program pre-requisites for ELELBS:

1. Obtain a GPA of 3.0 or better on UA coursework.
2. †Complete all program courses with a "C" or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT.
4. Complete a background check.

Stage II: Admission to the Childhood Education Program (CHED)

Admission to the Childhood Education Program is competitive and completion of all Pre-Elementary Education requirements must occur prior to entering the Childhood Education Program of Study the following fall term. Not all applicants meeting the minimum requirements will be admitted to the program. Applications to the Childhood Education (CHED) program must be submitted by Jan. 30.

The application process includes:

1. Submission of the application to teacher education (see the Teacher Education Application Fee (p. 73)) through the university-wide Teacher Education Office.
2. Submission of Childhood Education application.
3. Submission of transcripts for all coursework.
4. Oral Interview with Childhood Education faculty.
5. Submission of Writing Sample.
6. Submission of passing score on Math, Reading, and Writing sections of the Praxis Core Exam.
7. Current background check

Stage III: Requirements for Program Continuation

1. Declaration of endorsement area of ESL, GT, Reading, or STEM.
2. Maintain a cumulative GPA of 3.0 or better.
3. Passing score on Praxis II, Elementary Education: Multiple Subjects
4. All non-methods math, science, social studies and English Language Arts courses must be completed prior to senior year.

†All program courses must have a grade of "C" or better. No teaching methods courses may be taken as self-paced (correspondence) courses.

For licensure, students must continue in the Master of Arts in Teaching program, which has limited enrollment. Find out more about the M.A.T. Program (<http://catalog.uark.edu/graduatecatalog/programsofstudy/elementaryeducationmat/>) in the Graduate Catalog.

Childhood Education Requirements

Students in the Childhood Education program must choose one of four concentrations: English as a Second Language Concentration, a Gifted and Talented Concentration, a Reading Concentration, or a STEM Concentration.

EASL Concentration (EASL)

Pre-Elementary Education (PELED) requirements [†]

University Core (State Minimum Core) 35

The following are specifically required for CHED program

ENGL 1013	Composition I (ACTS Equivalency = ENGL 1013)
ENGL 1023	Composition II (ACTS Equivalency = ENGL 1023)
MATH 1203	College Algebra (ACTS Equivalency = MATH 1103)

BIOL 1543 & BIOL 1541L	Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
GEOS 1113 & GEOS 1111L	General Geology (ACTS Equivalency = GEOL 1114 Lecture) and General Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab)
HIST 2003	History of the American People to 1877 (ACTS Equivalency = HIST 2113)
GEOS 1123	Human Geography (ACTS Equivalency = GEOG 1113)
or ANTH 102	Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013)
HIST 2013	History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123)
HIST 1113	Institutions and Ideas of World Civilizations I (ACTS Equivalency = HIST 1113)
or HIST 112	Institutions and Ideas of World Civilizations II (ACTS Equivalency = HIST 1123)
ARHS 1003	Basic Course in the Arts: Art Lecture (ACTS Equivalency = ARTA 1003)
or MLIT 1003	Experiencing Music (ACTS Equivalency = MUSC 1003)
COMM 1233	Media, Community and Citizenship
or WLIT 111	World Literature I (ACTS Equivalency = ENGL 2113)
or PHIL 200	Introduction to Philosophy (ACTS Equivalency = PHIL 1103)
or PHIL 210	Introduction to Ethics (ACTS Equivalency = PHIL 1003)
or PHIL 220	Logic (ACTS Equivalency = PHIL 1003)
or PHIL 310	Ethics and the Professions
Additional PELED requirements 28	
CIED 1013	Introduction to Education
CIED 2943	Foundations of Language and Literacy [†]
COMM 1313	Public Speaking (ACTS Equivalency = SPCH 1003)
or COMM 23	Interpersonal Communication
HIST 3383	Arkansas and the Southwest (or any 3 hr Arkansas history course)
MATH 2213	Survey of Mathematical Structures I
MATH 2223	Survey of Mathematical Structures II
ENSC 1003 & ENSC 1001L	Environmental Science and Environmental Science Laboratory
PLSC 2003	American National Government (ACTS Equivalency = PLSC 2003)
STAT 2303	Principles of Statistics (ACTS Equivalency = MATH 2103) (or any 3 hour statistics course)
Childhood Education major requirements 49	
To be completed following admission to CHED program:	
3 hr. MATH Elective	
3 hour Elective (Linguistics or Phonology focus recommended)	
ENGL 2003	Advanced Composition
PHYS 1034	Physics for Elementary Education Majors
or ASTR 2003/2001L	Survey of the Universe (ACTS Equivalency = PHSC 1204 Lecture)

or STEM 41(Astronomy for Educators)	
ECON 3053	Economics for Elementary Teachers
or ECON 2143	Basic Economics: Theory and Practice
CIED 3013	Development and Learning Theories in the K-6 Classroom [†]
CIED 3023	Survey of Exceptionalities [†]
CIED 3053	The Emerging Adolescent [†]
CIED 3113	Emergent Literacy [†]
CIED 3123	Mathematics Methods in the K-6 Classroom [†]
CIED 3133	Integrated Social Studies for the K-6 Classroom [†]
CIED 3143	Teaching Science in the Elementary Grades [†]
CIED 3453	Developmental Literacy [†]
CIED 4153	Classroom Management in the Elementary Grades [†]
CIED 4183	Instruction and Assessment of Writing [†]
CIED 4533	Reading Comprehension Through Children's and Adolescent Literature [†]
EASL Concentration requirements 12	
General Elective	
STEM 4033	Introduction to STEM Education [†]
CIED 4403	Understanding Cultures in the Classroom
CIED 4413	Acquiring a Second Language
Total Hours	124

[†] Must have a grade of 'C' or better to award degree credit

Childhood Education B.S.E. (EASL concentration) Eight-Semester Plan

Because this program requires admission to progress, it does not qualify for the university's Eight-Semester Degree Program; however, students who qualify to finish a degree in four years can follow the suggested order of classes below.

First Year	Units	
	Fall	Spring
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)	3	
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher)	3	
BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) & BIOL 1541L Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)	4	
CIED 1013 Introduction to Education	3	
Choose one of the following:	3	
COMM 1233 Media, Community and Citizenship		
WLIT 1113 World Literature I (ACTS Equivalency = ENGL 2113)		
PHIL 2003 Introduction to Philosophy (ACTS Equivalency = PHIL 1103)		
PHIL 2103 Introduction to Ethics (ACTS Equivalency = PHIL 1003)		
PHIL 2203 Logic (ACTS Equivalency = PHIL 1003)		

PHIL 3103 Ethics and the Professions		
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)	3	
HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113)	3	
HIST 1113 Institutions and Ideas of World Civilizations I (ACTS Equivalency = HIST 1113) or HIST 1123 Institutions and Ideas of World Civilizations II (ACTS Equivalency = HIST 1123)	3	
GEOS 1113 General Geology (ACTS Equivalency = GEOL 1114 Lecture) & GEOS 1111L General Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab)	4	
MATH 2213 Survey of Mathematical Structures I	3	
Year Total:	16	16

Second Year

	Fall	Units Spring

--------------------------	-----

Changes to the B.S.E. in Childhood Education have been included pending approval by the Arkansas Higher Education Coordinating Board.

Requirements for B.S.E. in Childhood Education with Gifted and Talented Concentration

Admission to the B.S.E. in Childhood Education is competitive and consists of a three-stage process; simply meeting the minimum requirements will not guarantee admission to the program. Admission will be determined by the Childhood Education faculty based on the seven items listed below in Stage II.

Stage I: Pre-Elementary Education (PELED)

Complete either 63 hours of program pre-requisites for CHEDBS or 47 hours of program pre-requisites for ELELBS:

1. Obtain a GPA of 3.0 or better on UA coursework.
2. †Complete all program courses with a "C" or better.

3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT.
4. Complete a background check.

Stage II: Admission to the Childhood Education Program (CHED)

Admission to the Childhood Education Program is competitive and completion of all Pre-Elementary Education requirements must occur prior to entering the Childhood Education Program of Study the following fall term. Not all applicants meeting the minimum requirements will be admitted to the program. Applications to the Childhood Education (CHED) program must be submitted by Jan. 30.

The application process includes:

1. Submission of the application to teacher education (see the Teacher Education Application Fee (p. 73)) through the university-wide Teacher Education Office.
2. Submission of Childhood Education application.
3. Submission of transcripts for all coursework.
4. Oral Interview with Childhood Education faculty.
5. Submission of Writing Sample.
6. Submission of passing score on Math, Reading, and Writing sections of the Praxis Core Exam.
7. Current background check

Stage III: Requirements for Program Continuation

1. Declaration of endorsement area of ESL, GT, Reading, or STEM.
2. Maintain a cumulative GPA of 3.0 or better.
3. Passing score on Praxis II, Elementary Education: Multiple Subjects
4. All non-methods math, science, social studies and English Language Arts courses must be completed prior to senior year.

†All program courses must have a grade of "C" or better. No teaching methods courses may be taken as self-paced (correspondence) courses.

For licensure, students must continue in the Master of Arts in Teaching program, which has limited enrollment. Find out more about the M.A.T. Program (<http://catalog.uark.edu/graduatecatalog/programsofstudy/elementaryeducationmat/>) in the Graduate Catalog.

Childhood Education Requirements

Students in the Childhood Education program must choose one of four concentrations: English as a Second Language Concentration, a Gifted and Talented Concentration, a Reading Concentration, or a STEM Concentration.

Changes to the B.S.E. in Childhood Education have been included pending approval by the Arkansas Higher Education Coordinating Board.

Requirements for B.S.E. in Childhood Education with STEM Concentration

Admission to the B.S.E. in Childhood Education is competitive and consists of a three-stage process; simply meeting the minimum requirements will not guarantee admission to the program. Admission will be determined by the Childhood Education faculty based on the seven items listed below in Stage II.

Stage I: Pre-Elementary Education (PELED)

Complete either 63 hours of program pre-requisites for CHEDBS or 47 hours of program pre-requisites for ELELBS:

1. Obtain a GPA of 3.0 or better on UA coursework.
2. †Complete all program courses with a "C" or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT.
4. Complete a background check.

Stage II: Admission to the Childhood Education Program (CHED)

Admission to the Childhood Education Program is competitive and completion of all Pre-Elementary Education requirements must occur prior to entering the Childhood Education Program of Study the following fall term. Not all applicants meeting the minimum requirements will be admitted to the program. Applications to the Childhood Education (CHED) program must be submitted by Jan. 30.

The application process includes:

1. Submission of the application to teacher education (see the Teacher Education Application Fee (p. 73)) through the university-wide Teacher Education Office.

2. Submission of Childhood Education application.
3. Submission of transcripts for all coursework.
4. Oral Interview with Childhood Education faculty.
5. Submission of Writing Sample.
6. Submission of passing score on Math, Reading, and Writing sections of the Praxis Core Exam.
7. Current background check

Stage III: Requirements for Program Continuation

1. Declaration of endorsement area of ESL, GT, Reading, or STEM.
2. Maintain a cumulative GPA of 3.0 or better.
3. Passing score on Praxis II, Elementary Education: Multiple Subjects
4. All non-methods math, science, social studies and English Language Arts courses must be completed prior to senior year.

†All program courses must have a grade of "C" or better. No teaching methods courses may be taken as self-paced (correspondence) courses.

For licensure, students must continue in the Master of Arts in Teaching program, which has limited enrollment. Find out more about the M.A.T. Program (<http://catalog.uark.edu/graduatecatalog/programsofstudy/elementaryeducationmat/>) in the Graduate Catalog.

Childhood Education Requirements

Students in the Childhood Education program must choose one of four concentrations: English as a Second Language Concentration, a Gifted and Talented Concentration, a Reading Concentration, or a STEM Concentration.

An undergraduate major in communication sciences and disorders leads to the B.S. degree and prepares students for graduate studies (master's level) in speech-language pathology and/or the professional doctorate in audiology. The minimum requirements for all students in the college are listed under general studies (p. 447).

Admission to the B.S. Major Degree Program in Communication Sciences and Disorders is competitive and consists of a three-stage process.

Students must apply for formal admission and be accepted to the undergraduate B.S.E. degree program in Communication Sciences and Disorders prior to taking junior- and senior-level classes in the major.

Stage I: Pre-Communication Sciences and Disorders (PCDIS)

All students declaring a major in communication sciences and disorders are accepted as tentative candidates to the undergraduate program and assigned the pre-communication code - PCDIS.

The PCDIS program includes:

1. Complete all program pre-requisites courses.
2. Obtain a minimum cumulative grade-point average of 3.0 on all college level coursework.
3. Complete the following courses with a "C" or better: ENGL 1013 and ENGL 1023, MATH 1203 or equivalent, and COMM 1313.
4. Obtain passing scores on the *Core Academic Skills for Educator: Math, Reading, and Writing* sections of the Praxis Core Exam.

Students who do not meet admission criteria for the B.S. degree program in communication sciences and disorders in any given year may reapply in subsequent years.

Stage II: Admission to the Communication Sciences and Disorders Program (CDIS)

Admission to the Communication Sciences and Disorders Program is competitive and occurs after completion of all Pre-Communication Sciences and Disorders requirements and prior to the beginning of the fall semester of the junior year.

Applications to the Communication Sciences and Disorders (CDIS) program must be submitted by January 30th.

The application process includes:

1. Submission of Communication Sciences and Disorders Application, Form, Letter of Intent, and Curriculum Guide Form.
2. Submission of transcripts for all coursework
3. Submission of passing score on Math, Reading, and Writing sections of Praxis Core Exam
4. Satisfactory completion of an admission interview with designated faculty

As a result of the competitive process, not all applicants meeting the minimum requirements will be admitted to the program.

Stage III: Requirements for Program Continuation and Completion

1. Maintain a minimum cumulative GPA of 3.0.
2. In order to enroll in CDIS 4001 Clinical Practicum: Undergraduate, students must have an overall GPA of 3.0 in the following courses: CDIS 2253, CDIS 3124, CDIS 3213, CDIS 3223, CDIS 3203, CDIS 4223 and a "B" in CDIS 3233. Clinical Practice is an elective for undergraduates and is taken for course credit hours, not a grade.
3. Meet all university requirements for graduation.

Requirements for Communication Sciences and Disorders (CDIS)

University Core (State Minimum Core) 35

Of which Communication Sciences and Disorders requires the following specific courses:

BIOL 1543 & BIOL 1541L	Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)
PSYC 2003	General Psychology (ACTS Equivalency = PSYC 1103)
ANTH 1023	Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013)

Select one of the following:

PHYS 1023 & PHYS 1021L	Physics and Human Affairs and Physics and Human Affairs Laboratory
PHYS 2013 & PHYS 2011L	College Physics I (ACTS Equivalency = PHYS 2014 Lecture) and College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab)
CHEM 1073 & CHEM 1071L	Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture) and Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab)

Program specific course requirements for Communication Sciences and Disorders - 9 hours total

Select one of the following: 3

ENGL 2003	Advanced Composition
ENGL 2013	Essay Writing

Email: cmurphy@uark.edu

Curriculum and Instruction Website (<https://cied.uark.edu/>)

The Department of Curriculum and Instruction sponsors initial teacher licensure programs in the areas of career and technical education (p. 452), elementary education (p. 485), childhood education (p. 459) and special education (p. 507). The department also offers additional licensure plans in ESL, gifted and talented, special education and selected other areas (please see College Web Site licensure link). The Special Education Program also offers a Graduate Certificate in Autism Spectrum Disorders (ASD) as well as a Graduate Certificate in STEM education for Childhood Education candidates.

Five teacher licensure majors also lead to Bachelor of Arts in Teaching degrees: English Education (p. 487), French Education (p. 492), German Education (p. 493), Social Sciences Education (p. 503) and Spanish Education (p. 505). Additional secondary school licensure programs are made available with the cooperation of the Department of Health Science, Kinesiology, Recreation, and Dance; the Department of Rehabilitation, Human Resources and Communication Disorders; the J. William Fulbright College of Arts and Sciences; and the Dale Bumpers College of Agricultural, Food and Life Sciences.

The department offers a non-licensure program in educational studies (p. 473) for students wishing to focus on general theory and practice of learning and teaching. This major gives students the cognitive ability to apply teaching strategies to a variety of employers in private sector businesses, nonprofit organizations, and community agencies.

The department also offers a minor in Secondary Mathematics and/or Science Teacher Education (p. 511) through the UAteach program.

Dance Activity (DEAC)

The Department of Health, Human Performance and Recreation offers coursework in Dance Activity but has no degree program in dance.

Educational Studies (EDST)

The Bachelor of Science in Education in Educational Studies (B.S.E.) is a customizable degree for all students within the College of Education and Health Professions. It focuses on the general theory and practice of learning and teaching. This degree, in itself, does not include licensure. Students completing this program will have the cognitive ability to apply teaching strategies to a variety of employers such as private sector businesses, nonprofit organizations and community agencies. With additional training and licensure, students can also work in school settings.

Educational Studies (EDST) requirements

University Core (State Minimum Core) ^{*} 35

PSYC 2003	General Psychology (ACTS Equivalency = PSYC 1103) ¹	
-----------	--	--

Eleanor Mann School of Nursing (NURS)

Susan Kane Patton

Director

Epley Center for Health Professions

479-575-3904

Email: nursing@uark.edu

Eleanor Mann School of Nursing Website (<https://nurs.uark.edu/>)

The Eleanor Mann School of Nursing contributes to the three purposes of the university: education, research and service. The mission of Eleanor Mann School of Nursing is to transform lives through nursing education and inspire leadership in nursing practice and academics to improve the health and well-being of society.

Professional nursing begins with a Bachelor of Science in Nursing (B.S.N.) degree. Nursing education offers a research base for nursing practice that promotes the ability of the nurse to effect change needed to improve health. In the study of professional nursing, the student builds on a planned general education for the academic disciplines and acquires theoretical and specific knowledge to meet health care needs of diverse clients in various settings.. In addition, the curriculum provides opportunity for students with technical nursing education to expand their knowledge and scope of practice. The baccalaureate program establishes a foundation for graduate education in nursing and for continued personal and professional development.

Graduates of the pre-licensure B.S.N. program are eligible to apply to take the National Council Licensure Examination (NCLEX-RN) for licensure as a registered nurse (R.N.).

Pre-Licensure B.S.N. Program (PNURS)

Admission Policies

Conditional Admission to the Pre-Licensure B.S.N. Program

Students interested in nursing will be admitted to the University of Arkansas as pre-nursing majors. Admission to the Eleanor Mann School of Nursing requires an application in addition to the application to the University of Arkansas. In line with initiatives of the university and the College of Education and Health Professions, as well as the philosophy of the Eleanor Mann School of Nursing, this holistic admission process is utilized to enhance a diverse academic experience for all students and results in additional expertise in providing care to an increasingly diverse patient population. Admission is competitive, not all applicants who meet the minimum requirements will be admitted to the program.

- We value communication skills, leadership experience, initiative, community service, and clinical experience, as well as accomplishments in athletics, employment, and research. The school's goal is to recruit and educate a class which will serve the needs of a diverse population.
- We consider factors not reflected in the academic record, such as evidence of extracurricular achievement or work experience; evidence of having overcome social, economic, or physical barriers; evidence of exceptional motivation, maturity, or responsibility.

Conditional admission will be determined by the Eleanor Mann School of Nursing's holistic admission committee. To be eligible to apply, students must have a cumulative GPA of 3.0 or more.

The holistic admission process for the professional program of study is as follows:

1. Application to the Eleanor Mann School of Nursing completed. Please refer to current dates for the application window that can be located on our website. Please note that students need to apply almost a full year in advance of when they plan to start.
2. Students transferring from another nursing program must provide a letter from the nursing program indicating that they are eligible to return and are in good standing to be considered for admission.
3. Final transcripts will need to be submitted for any non-University of Arkansas coursework by the end of the application semester. (official dates on website)
4. Upon review of these transcripts, the holistic admission committee will review the following:

Stage I: Primary Academic Factors (50% of total score)

1. Nursing prerequisite GPA of 3.0 or more (GPA X 7) = up to 28 points
2. Completion of 4 required science courses (see below) with at least a C grade in each. Points will be awarded as follows: 4 points for each course taken at the UA, and 4 points for 1st attempt As and 2 points for first attempt Bs = up to 32 points

CHEM 1073 & CHEM 1071L	Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture) and Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab)	4
BIOL 2013 & BIOL 2011L	General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)	4
BIOL 2213 & BIOL 2211L	Human Physiology (ACTS Equivalency = BIOL 2414 Lecture) and Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab)	4
BIOL 2443 & BIOL 2441L	Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture) and Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab)	4

3. Admitted Honors Program students with 18 or more honors credit hours and a 3.75 GPA = 5 points
4. Successful completion of required* nursing prerequisite courses

- 20 points for 75% completion of the required* nursing prerequisite courses at UA excluding electives
- 10 points for 50% required* nursing prerequisite courses at UA excluding electives
- 25 points for previous Bachelor's degree
- 30 points for previous Master's degree (points awarded for highest degree)
 - a. *Required nursing prerequisite courses include: English 6 credits, Mathematics/Statistics 6 credits, Sciences 16 credits, Fine Arts/Humanities 6 credits, U.S. History 3 credits, Social Sciences 9 credits, Pre-Nursing 6 credits.
 - b. For students entering the University of Arkansas as freshmen, credits transferred in from high school dual enrollment or AP/IB credit will be counted in the required nursing prerequisite courses at the UA.

Secondary Admission Factors (20% of total score)

5. Personal Statement / Diversity in Nursing (part of your application)

All of the above items are scored and calculated into the first 70% of the overall candidate score. The candidates are then ranked. The top 50% (or more depending on the total number of applicants) will then be invited to move on to Stage II and attend an interview.

Stage II: Non-academic Factors (30% of total score)

- Structured Interviews
 - Knowledge of Nursing/Motivation
 - Interpersonal Skills/Communication
 - Life Experiences/Problem Solving
 - Initiative/Leadership/Service
 - Realistic Self-Appraisal/Long Term Goals

Remaining candidates are ranked by total score and the cohort (selected by rank for total scores) will be invited for conditional admission to the program.

Students who are conditionally accepted into the nursing program must maintain their GPA.

PNURS Requirements for Pre-Licensure Bachelor of Science in Nursing:

University Core (State Minimum Core)		35
English		
ENGL 1013	Composition I (ACTS Equivalency = ENGL 1013) ¹	
ENGL 1023	Composition II (ACTS Equivalency = ENGL 1023) ¹	
Mathematics		
MATH 1203	College Algebra (ACTS Equivalency = MATH 1103) ¹	
Science with Labs (8 hours) must include:		
4 hours of CHEM including a lab (Must be CHEM 1073/CHEM 1071L or higher) ¹		
BIOL 2443 & BIOL 2441L	Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture) and Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab) ^{1,2}	
Fine Arts (3 hours) ¹		
Humanities (3 hours) Select one of the following: ¹		
PHIL 2003	Introduction to Philosophy (ACTS Equivalency = PHIL 1103)	
	or PHIL 210: Introduction to Ethics (ACTS Equivalency = PHIL 1003)	
	or PHIL 220: Logic (ACTS Equivalency = PHIL 1003)	
	or PHIL 310: Ethics and the Professions	
History/Government (3 hours) ¹		
Social Sciences (9 hours) ¹		
Additional General Studies		
BIOL 2213 & BIOL 2211L	Human Physiology (ACTS Equivalency = BIOL 2414 Lecture) and Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab) ¹	4
BIOL 2013 & BIOL 2011L	General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) and General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab) ¹	4
Select one of the following:		
ESRM 2403	Statistics in Nursing ¹	3
	or PSYC 2013 Introduction to Statistics for Psychologists	
	or STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103)	
	or STAT 2023 Biostatistics	
NURS 2012	Nursing Informatics ¹	2
NURS 2032	Therapeutic and Interprofessional Communication ¹	2
NURS 3321L	Health Assessment Practicum	1
NURS 3342	Health Assessment	2
Electives		8
Total Hours		61

¹ Denotes required nursing pre-requisite courses.

² BIOL 1543/BIOL 1541L is a prerequisite for BIOL 2013/BIOL 2011L and BIOL 2443/BIOL 2441L and may be used as part of the elective hours.

Full Admission to the Pre-Licensure B.S.N. Program (NURSBS-PLRN)

Full admission to the Eleanor Mann School of Nursing is contingent upon meeting all the conditional requirements and successfully meeting the following requirements:

1. All prerequisite coursework for a fall admission into the Professional Program of Study in Nursing must be completed by the end of the spring semester. All coursework for spring admission must be completed by the end of the fall semester prior to entering the Professional Program of Study in Nursing.
2. Maintain the individual GPA that was present at the time of conditional admission. Any decrease in GPA is subject to review by the nursing school's faculty.
3. Provide proof of all required clinical paperwork as requested by the school of nursing. Please note that a criminal background check and regular drug screens are required. (The most current clinical requirements can be located in the student handbook.)

Requirements for the Bachelor of Science in Nursing Pre-Licensure Option (NURSBS-PLRN)

Completion of all PNURS requirements		61
Professional Nursing Program (59 hours)		
Role Development (Level I)		
NURS 3313	Pharmacology in Nursing	3
NURS 3314	Pathophysiology	4
NURS 3402	Nursing Concepts: Older Adult	2
NURS 3422	Nursing Concepts: Foundations of Professional Practice	2
NURS 3424	Professional Role Implementation I: Caregiver	4
NURS 3634	Nursing Concepts: Adult Health and Illness I	4
NURS 3644	Professional Role Implementation II: Caregiver	4
NURS 3742	Nursing Concepts: Mental Health and Illness	2
NURS 3752	Professional Role Implementation III: Caregiver	2
NURS 3842	Foundations of Scientific Evidence in Nursing Practice	2
Role Concentration (Level II)		
NURS 4112	Nursing Concepts: Teaching and Health Promotion	2
NURS 4154	Nursing Concepts: Children and Family	4
NURS 4164	Professional Role Implementation IV: Teacher	4
NURS 4242	Leadership in Nursing	2
NURS 4252	Professional Role Implementation V: Manager	2
NURS 4262	Nursing Concepts: Adult Health and Illness II	2
NURS 4442	Nursing Concepts: Critical Care	2
NURS 4452	Professional Role Implementation VI: Role Synthesis	2
NURS 4603	Nursing Concepts: Community	3
NURS 4613	Professional Role Implementation VII: Role Synthesis	3
NURS 4712	Seminar in Nursing	2

NURS 4722	Professional Role Implementation VIII: Role Synthesis	2
Total Hours		120

The minimum number of hours required to receive a baccalaureate degree at the University of Arkansas is 120 semester hours. The nursing major is exempt from the eight-semester degree plan since the program is admission-based. There is no guarantee that a student meeting the minimal GPA requirement will be admitted. Please refer to the College of Education and Health Professions website for specific information related to the admission criteria.

Progression, Withdrawal, and Dismissal

1. For progression in the nursing program, only grades of "C" or above will be accepted. Students who make less than a "C" may not progress into courses for which that course is a prerequisite until the course is repeated and the required minimum grade attained.
2. If a student earns a "D", "F", or "W" in a course, the course may be repeated. The course must be passed on the second attempt. If a student earns a "D", "F", or "W" in a second course, the student will be dismissed from the program and may not be eligible for re-admission.
3. If the student does not earn a grade of at least "C" upon repeating the nursing course, the student may not enroll in any nursing courses or continue in the School of Nursing or be eligible for re-admission.
4. The one "D" policy includes only pre-nursing and nursing courses. Independent Study courses are NOT counted in the one "D" policy.
5. Students who do not pass the medication calculation examination with a 100 percent on the second attempt will be administratively withdrawn from all clinical courses and associated co-requisite didactic courses.

Didactic/Professional Role Implementation Courses

1. A student who needs to repeat a course must make petition to the Student Affairs Committee in nursing and are encouraged to do so as soon as they are aware of the need to repeat a course.
2. Students will be readmitted on a space-available basis according to the following priority system:

Priority Groups for Placement in Required Clinical Courses

- a. First Priority – Continuing full-time students in good academic standing.
 - b. Second Priority – Continuing part-time students in good academic standing
 - c. Third Priority – Students repeating a course due to an academic or clinical failure or were administratively withdrawn with a "W" for failing the medication calculation test who were unable to repeat a course for one or more semesters.
 - d. Fourth Priority – Students repeating a course due to an academic or clinical failure or were administratively withdrawn with a "W" for failing the medication calculation test who were in the preceding semester.
3. Spaces in clinical courses are limited and tightly controlled by accreditation, the Arkansas State Board of Nursing, and clinical agency policies. Space in Didactic courses are limited to space available. A student re-enrolling in a Professional Role Implementation Course (whether due to illness, course failure, or other reasons) will not be assured a clinical placement space in subsequent courses.
 4. Readmission will not be considered for any student dismissed from the School of Nursing who obtained a "D" or "F" in one nursing

course and was unable to make a "C" or better upon repeating this course. Also, a student dismissed from a Professional Role Implementation Course due to safety, ethical, or dishonesty issues will be administratively withdrawn from a course, and may be subject to administrative withdrawal from the School of Nursing following a full review. Readmission is not guaranteed to these students.

5. Students should note that a flagrant or established pattern of disregard to Eleanor Mann School of Nursing policies can result in failure of the course and/or dismissal from the program without prior warnings.

Readmission Policies

Any student whose enrollment in the professional program of study has been interrupted may seek readmission following the steps below:

1. Seek readmission into the University of Arkansas (if applicable).
2. Complete Readmission Application to the School of Nursing during the application periods. (Readmission is limited by space availability).
3. Readmission will not be considered for any student dismissed from the School of Nursing who obtained a "D" or "F" in one nursing course and was unable to make a "C" or better upon repeating this course or who was dismissed from a Professional Role Implementation Course due to safety, ethical, or dishonesty issues. Exceptions to this policy will be considered by the Student Affairs Committee in nursing on an individual basis.

Exit Policies

1. Students must complete the requirements for the degree within five years of enrolling in the first upper-division nursing course. If the student does not complete the Professional Program of Study within the five-year limit, nursing credits must be reevaluated.
2. All University of Arkansas requirements must be met.

In addition to the program requirements, students must meet the university and college graduation requirements. This curriculum is subject to change to comply with national accreditation and the Arkansas State Board of Nursing Standards.

Progression, Withdrawal, and Dismissal

1. For progression in the nursing program, only grades of "C" or above will be accepted. Students who make less than a "C" may not progress into courses for which that course is a prerequisite until the course is repeated and the required minimum grade attained.
2. If a student earns a "D", "F", or "W" in a course, the course may be repeated. The course must be passed on the second attempt. If a student earns a "D", "F", or "W" in a second course, the student will be dismissed from the program and may not be eligible for re-admission.
3. If the student does not earn a grade of at least "C" upon repeating the nursing course, the student may not enroll in any nursing courses or continue in the School of Nursing or be eligible for re-admission.
4. The one "D" policy includes only pre-nursing and nursing courses. Independent Study courses are NOT counted in the one "D" policy.
5. Students in their J2, S1, or S2 level who do not pass the medication calculation examination with a 100 percent on the second attempt will be administratively withdrawn from all clinical courses and associated co-requisite didactic courses.
6. For students enrolled in NURS 3424 Professional Role Implementation 1: Caregiver - Failure to pass the Dosage Calculation Exam on the third attempt in NURS 3424 Professional Role

Implementation 1 course will result in a failing grade for the course and will count in the one "D" policy.

Didactic/Professional Role Implementation Courses

1. A student who needs to repeat a course must make petition to the Student Affairs Committee and are encouraged to do so as soon as they are aware of the need to repeat a course.
2. Students will be readmitted on a space-available basis according to the following priority system:

Priority Groups for Placement in Required Clinical Courses

- a. First Priority – Continuing full-time students in good academic standing.
 - b. Second Priority – Continuing part-time students in good academic standing.
 - c. Third Priority – Students repeating a course due to an academic or clinical failure or were administratively withdrawn with a "W" for failing the medication calculation test who were unable to repeat a course for one or more semesters.
 - d. Fourth Priority – Students repeating a course due to an academic or clinical failure or were administratively withdrawn with a "W" for failing the medication calculation test who were in the preceding semester.
3. Spaces in clinical courses are limited and tightly controlled by accreditation, the Arkansas State Board of Nursing, and clinical agency policies. Space in Didactic courses are limited to space available. A student re-enrolling in a Professional Role Implementation Course (whether due to illness, course failure, or other reasons) will not be assured a clinical placement space in subsequent courses.
 4. NOTE: Readmission will not be considered for any student dismissed from the School of Nursing who obtained a "D" or "F" in one (1) nursing course and was unable to make a "C" or better upon repeating this course. Also, a student dismissed from a Professional Role Implementation Course due to safety, ethical, or dishonesty issues will be administratively withdrawn from a course, and may be subject to administrative withdrawal from the School of Nursing following a full review. Readmission is not guaranteed to these students.
 5. Students should note that a flagrant or established pattern of disregard to Eleanor Mann School of Nursing policies can result in failure of the course and/or dismissal from the program without prior warnings (See Counseling Record Guidelines (http://nurs.uark.edu/Counseling_Record_Guidelines.pdf)).

Readmission Policies

Any student whose enrollment in the professional program of study has been interrupted may seek readmission following the steps below:

1. Seek readmission into the University of Arkansas (if applicable).
2. Complete Readmission Application to the School of Nursing during the application periods. (Readmission is limited by space availability).
3. Readmission will not be considered for any student dismissed from the School of Nursing who obtained a "D" or "F" in one (1) nursing course and was unable to make a "C" or better upon repeating this course or who was dismissed from a Professional Role Implementation Course due to safety, ethical, or dishonesty issues. Exceptions to this policy will be considered by the Student Affairs Committee on an individual basis.

Exit Policies

1. Students must complete the requirements for the degree within five years of enrolling in the first upper-division nursing course. If the student does not complete the Professional Program of Study within the five-year limit, nursing credits must be reevaluated.
2. All University of Arkansas requirements must be met.

NOTE: In addition to the program requirements, students must meet the university and college graduation requirements. This curriculum is subject to change to comply with national accreditation and the Arkansas State Board of Nursing Standards.

Bachelor of Science in Nursing Pre-Licensure Option (NURBSBS-PLRN)

Because this program requires admission to progress, it does not qualify for the university's Eight-Semester Degree Program; however, students who qualify to finish a degree in four years can follow the suggested order of classes below.

First Year	Units	
	Fall	Spring
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)	3	
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher)	3	
Elective ¹	4	
Any Chemistry 1073/1071L or higher with lab	4	
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)		3
Social Science core elective ²		3
U.S. History core elective ²		3
BIOL 2443 Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture)		4
& BIOL 2441L Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab)		
Elective		3
Year Total:	14	16

Second Year	Units	
	Fall	Spring
Social Science core elective ²	3	
Fine Arts core elective ²	3	
PHIL 2003 Introduction to Philosophy (ACTS Equivalency = PHIL 1103)	3	
or PHIL 2103 Introduction to Ethics (ACTS Equivalency = PHIL 1003)		
or PHIL 2203 Logic (ACTS Equivalency = PHIL 1003)		
or PHIL 3103 Ethics and the Professions		
BIOL 2213 Human Physiology (ACTS Equivalency = BIOL 2414 Lecture)	4	
& BIOL 2211L Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab)		

ESRM 2403 Statistics in Nursing or PSYC 2013 Introduction to Statistics for Psychologists or STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103) or STAT 2023 Biostatistics	3	
BIOL 2013 General Microbiology (ACTS Equivalency = BIOL 2004 Lecture) & BIOL 2011L General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab)	4	
NURS 2012 Nursing Informatics	2	
NURS 2032 Therapeutic and Interprofessional Communication	2	
Social Science core elective ²	3	
NURS 3321L Health Assessment Practicum	1	
NURS 3342 Health Assessment	2	
Elective	1	
Year Total:	16	15

Third Year	Units	
	Fall	Spring
NURS 3402 Nursing Concepts: Older Adult	2	
NURS 3313 Pharmacology in Nursing	3	
NURS 3314 Pathophysiology	4	
NURS 3422 Nursing Concepts: Foundations of Professional Practice	2	
NURS 3424 Professional Role Implementation I: Caregiver	4	
NURS 3634 Nursing Concepts: Adult Health and Illness I	4	
NURS 3644 Professional Role Implementation II: Caregiver	4	
NURS 3742 Nursing Concepts: Mental Health and Illness	2	
NURS 3752 Professional Role Implementation III: Caregiver	2	
NURS 3842 Foundations of Scientific Evidence in Nursing Practice	2	
NURS 4112 Nursing Concepts: Teaching and Health Promotion	2	
Year Total:	15	16

Fourth Year	Units	
	Fall	Spring
NURS 4154 Nursing Concepts: Children and Family	4	
NURS 4164 Professional Role Implementation IV: Teacher	4	
NURS 4242 Leadership in Nursing	2	
NURS 4252 Professional Role Implementation V: Manager	2	
NURS 4262 Nursing Concepts: Adult Health and Illness II	2	
NURS 4442 Nursing Concepts: Critical Care	2	
NURS 4452 Professional Role Implementation VI: Role Synthesis	2	

NURS 4603 Nursing Concepts: Community	3	
NURS 4613 Professional Role Implementation VII: Role Synthesis	3	
NURS 4712 Seminar in Nursing	2	
NURS 4722 Professional Role Implementation VIII: Role Synthesis	2	
Year Total:	14	14

Total Units in Sequence: 120

¹ BIOL 1543/BIOL 1541L suggested due to prerequisite required for BIOL 2443/BIOL 2441L and BIOL 2013/BIOL 2011L.

² Core areas must be completed as outlined in University Core (p. 97).

R.N. to B.S.N. Option (NURSBS-RNBN)

Admission Policies

- Complete university admission requirements.
- Complete R.N. to B.S.N. Program application with supporting R.N. licensure documentation and practice experience verification as indicated below.
 - R.N.s with 12-months or greater since nursing program completion:
 - Documentation from current and/or recent employer(s) where applicant is hired as an R.N. including institution or organization name, address, and supervisor contact information, area or unit of service, position title, and employment status (e.g. full-time, part-time, per diem). Applicants should include documentation of one of the following:
 - Employer verification of 1,000-R.N. practice-hours completed within 12-24 months of beginning the program.
 - Completion of a state board of nursing approved R.N.-refresher courses within 12-24 months of beginning the program.
 - Nursing students enrolled in final semester of an accredited nursing program may be eligible for conditional program admission pending R.N. licensure. Supporting documents required with program application are listed below:
 - A letter of good standing from the director or dean of the respective nursing program from which the applicant is transferring from.
 - In addition, students may enroll in a maximum of 6 credit hours of course work within the R.N. to B.S.N. program of study and enrollment duration may not exceed one academic semester or 6 months following Pre-R.N. Licensure program completion.
- Complete pre-admission advising with online B.S.N. academic counselor to evaluate general education requirements. It is preferred that all prerequisite courses be complete. Students missing credit hours will be considered on an individual basis. If approved for conditional admission, the missing credit hours must be completed in the beginning of the program of study. All students must have completed all 6 hours of English prior to admission.
- Completion of an accredited and state board approved R.N. program.
- Verification and maintenance of, unencumbered licensure to practice as a R.N. in Arkansas and /or any other state. Not all state boards of nursing will accept outside of state education. See program website for current list of allowed states.

6. Credit for courses listed below will be held in escrow. The student will receive credit for these courses upon successful completion of the program.

NURS 2032	Therapeutic and Interprofessional Communication	2
NURS 3313	Pharmacology in Nursing	3
NURS 3422 & NURS 3424	Nursing Concepts: Foundations of Professional Practice and Professional Role Implementation I: Caregiver	6
NURS 3634 & NURS 3644	Nursing Concepts: Adult Health and Illness I and Professional Role Implementation II: Caregiver	8
NURS 3742 & NURS 3752	Nursing Concepts: Mental Health and Illness and Professional Role Implementation III: Caregiver	4
NURS 4154 & NURS 4164	Nursing Concepts: Children and Family and Professional Role Implementation IV: Teacher	8
NURS 4262	Nursing Concepts: Adult Health and Illness II	2
NURS 4442 & NURS 4452	Nursing Concepts: Critical Care and Professional Role Implementation VI: Role Synthesis	4
Total Hours		37

7. Professional nursing courses for R.N. to B.S.N. students are delivered online through Global Campus.
8. Students will be required to identify a qualified mentor (B.S.N. level or higher) for the NURS 4092 Practicum course.

Total Hours		120

¹ Denotes required nursing pre-requisite courses.

The minimum number of hours required to receive a baccalaureate degree at the University of Arkansas is 120 semester hours. The Nursing major is exempt from the eight-semester degree plan since the program is admissions-based. There is no guarantee that a student meeting the minimal GPA requirement will be admitted. Please refer to the College of Education and Health Profession's website (<http://nurs.uark.edu/prospective-nursing-students/>) for specific information related to the admission criteria.

Progression, Withdrawal, and Dismissal

- For progression in the nursing program, only grades of "C" or above will be accepted. Students who make less than a "C" may not progress into courses for which that course is a prerequisite until the course is repeated and the required minimum grade attained.
- If a student earns a "D" or "F" in a course, the course may be repeated once. The course must be passed on the second attempt. If a student earns a "D" or "F" in a second course, the student will be dismissed from the program and may not be eligible for re-admission.
- If the student does not earn a grade of at least "C" upon repeating the nursing courses, the student may not enroll in any nursing courses or continue in the School of Nursing or be eligible for re-admission.
- If a student withdraws from a course, the course may be repeated. No more than two withdraws from the same course will be allowed. If

not passed in the third attempt, the student will be dismissed from the program.

5. The one "D" policy includes only nursing courses.

Didactic/Clinical Practicum Courses

1. A student who needs to repeat a course must make petition to the Student Affairs Committee in nursing and are encouraged to do so as soon as they are aware of the need to repeat a course.
2. Students will be readmitted on a space-available basis according to the following priority system:
Priority Groups for Placement in Required Courses
 - a. First Priority – Continuing full-time students in good academic standing.
 - b. Second Priority – Continuing part-time students in good academic standing.
 - c. Third Priority – Students repeating a course due to an academic or clinical failure.
3. Spaces in clinical practicum courses are limited and tightly controlled by accreditation, the State Boards of Nursing, and clinical agency policies. Space in Didactic courses are limited to space available. A student re-enrolling in a Clinical Practicum Course (whether due to illness, course failure, or other reasons) will not be assured a clinical placement space in subsequent courses.
4. NOTE: Readmission will not be considered for any student dismissed from the School of Nursing who obtained a "D" or "F" in one nursing course and was unable to make a "C" or better upon repeating this course. Also, a student dismissed from a Clinical Practicum Course due to safety, ethical, or dishonesty issues will be administratively withdrawn from a course, and may be subject to administrative withdrawal from the School of Nursing following a full review. Readmission is not guaranteed to these students.
5. Students should note that a flagrant or established pattern of disregard to Eleanor Mann School of Nursing policies can result in a failure of the course and/or dismissal from the program without prior warnings. (see Forms page for performance improvement plan guidelines)

Readmission Policies

Any student whose enrollment in the professional program of study has been interrupted may seek readmission following the steps below:

1. Seek readmission into the University of Arkansas (if applicable).
2. Complete Readmission Application to the School of Nursing (Readmission is limited by space availability).
3. Readmission will not be considered for any student dismissed from the School of Nursing who obtained a "D" or "F" in one nursing course and was unable to make a "C" or better upon repeating this course or who was dismissed from a Clinical Practicum Course due to safety, ethical, or dishonesty issues. Exceptions to this policy will be considered by the Student Affairs Committee in nursing on an individual basis.

Exit Policies

1. Students must complete the requirements for the degree within five years of enrolling in the first upper-level nursing course. If the student does not complete the Professional Program of Study within the five-year limit, nursing credits must be reevaluated.
2. All University of Arkansas requirements must be met.

In addition to the program requirements, students must meet the university and college graduation requirements. This curriculum is subject to change to comply with national accreditation and the Arkansas State Board of Nursing Standards.

R.N. to B.S.N. Option Semester Degree Program

The nature of the R.N. to B.S.N. major excludes it from ACT 1014 eight-semester degree-completion program requirements. The degree is a 120-hour degree in accordance with ACT 747.

Presented below is a typical plan for completing this degree in four semesters; individual student plans may vary significantly.

Students are not required to complete courses during the summer, but courses may be offered. Students may be able to finish the program sooner if they enroll in summer courses.

First Year	Units	
	Fall	Spring
RNBN Prerequisite courses	53	
Year Total:	53	

Second Year	Units	
	Fall	Spring
NURS 4003 Transition to Professional Nursing Practice	3

Year Total: 37

Total Units in Sequence: 120

L.P.N. to B.S.N. Option (NURSBS-LNBN)

Admission Policies

1. Complete university admission requirements.
2. Complete L.P.N. to B.S.N. program application with supporting L.P.N. licensure documentation and practice experience verification as indicated below.
 - Documentation from current and/or recent employer(s) where applicant is hired as an L.P.N. including institution or organization name, address, and supervisor contact information, area or unit of service, position title, and employment status (e.g., full-time, part-time, per diem). Employer verification of 2,000-L.P.N. practice-hours have been completed in the 24 months prior to the beginning of the program (form provided by the School of Nursing during the application process).
3. All prerequisite coursework completed prior to admission is preferred. Students missing credits will be considered on an individual basis. If approved for conditional admission, the missing hours must be completed in the beginning of the program of study. All students must have completed all science and English credit hours prior to being admitted to the professional program of study.
4. Completion of an accredited and state board approved L.P.N., L.V.N., or L.P.T.N. program.
5. Proof of, and maintenance of, an unencumbered license to practice as an L.P.N., L.V.N., or L.P.T.N. in the United States. Not all state boards of nursing will accept outside of state education. See program website for current list of allowed states.
6. Provide proof of all required clinical paperwork as requested by the school of nursing. Please note that a criminal background check and regular drug screens are required. (The most current clinical requirements can be located in the student handbook.)
7. Complete pre-admission advising with online B.S.N. academic counselor to evaluate general education requirements.
8. Credit for courses listed below will be held in escrow. The student will receive credit for these courses upon successful completion of the program.

NURS 2032	Therapeutic and Interprofessional Communication	2
NURS 3313	Pharmacology in Nursing	3

NURS 3422	Nursing Concepts: Foundations of Professional Practice	2
NURS 3424	Professional Role Implementation I: Caregiver	4
NURS 3644	Professional Role Implementation II: Caregiver	4
Total Hours		15

9. L.P.N. to B.S.N. students may also receive credit for NURS 4154/NURS 4164, NURS 3742/NURS 3752, and/or NURS 3402 through validation examination. Qualification for these exams is based on setting of nursing practice hours.
10. Professional nursing courses for L.P.N. to B.S.N. students are delivered online through Global Campus. Students will need to come to campus for one clinical experience and standardized testing only. The remaining clinical practicum hours can be completed with a qualified (BSN level or higher) student-selected preceptor in the student's geographic area.

Requirements for Bachelor of Science in Nursing L.P.N. to B.S.N. Option (NURSBS-LNBN)

University Core and Pre-Program prerequisites 48

English (Comp 1 & 2) - 6 credits

Mathematics (College Algebra or higher) - 3 credits

Sciences with labs (16 credits) must include:

Chemistry - 4 credits

Anatomy - 4 credits

Physiology - 4 credits

Microbiology - 4 credits

Fine Arts - 3 credits

Humanities - 3 credits

American History/American Government - 3 credits

Social Sciences - 9 credits

Statistics - 3 credits

Electives - 2 credits

Total Hours		120

The minimum number of hours required to receive a baccalaureate degree at the University of Arkansas is 120 semester hours. The nursing major is exempt from the eight-semester degree plan since the program is admission-based. There is no guarantee that a student meeting the minimal GPA requirement will be admitted. Please refer to the College of Education and Health Professions website for specific information related to the admission criteria.

Progression, Withdrawal, and Dismissal

1. For progression in the nursing program, only grades of "C" or above will be accepted. Students who make less than a "C" may not progress into courses for which that course is a prerequisite until the course is repeated and the required minimum grade attained.
2. If a student earns a "D" or "F" in a course, the course may be repeated once. The course must be passed on the second attempt. If a student earns a "D" or "F" in a second course, the student will be dismissed from the program and may not be eligible for re-admission.
3. If the student does not earn a grade of at least "C" upon repeating the nursing course, the student may not enroll in any nursing courses or continue in the School of Nursing or be eligible for re-admission.
4. If a student withdraws from a course, the course may be repeated. No more than two withdraws from the same course will be allowed. If not passed in the third attempt, the student will be dismissed from the program.
5. The one "D" policy includes only nursing courses.
6. Students who do not pass the medication calculation examination with a 100 percent will be administratively withdrawn from all clinical courses and associated co-requisite didactic courses.

Didactic/Clinical Practicum Courses

1. A student who needs to repeat a course must make petition to the Student Affairs Committee in nursing and are encouraged to do so as soon as they are aware of the need to repeat a course.
2. Students will be readmitted on a space-available basis according to the following priority system: Priority Groups for Placement in Required Courses
 - a. First Priority - Continuing full-time students in good academic standing.
 - b. Second Priority - Continuing part-time students in good academic standing.
 - c. Third Priority - Students repeating a course due to an academic or clinical failure or were administratively withdrawn with a "W" for failing the medication calculation test who were unable to repeat a course for one or more semesters.

d. Fourth Priority - Students repeating a course due to an academic or clinical failure or were administratively withdrawn with a "W" for failing the medication calculation test who were in the preceding semester

3. Spaces in clinical practicum courses are limited and tightly controlled by accreditation, the State Boards of Nursing, and clinical agency policies. Space in Didactic courses are limited to space available. A student re-enrolling in a Clinical Practicum Course (whether due to illness, course failure, or other reasons) will not be assured a clinical placement space in subsequent courses.
4. NOTE: Readmission will not be considered for any student dismissed from the School of Nursing who obtained a "D" or "F" in one nursing course and was unable to make a "C" or better upon repeating this course. Also, a student dismissed from a Clinical Practicum Course due to safety, ethical, or dishonesty issues will be administratively withdrawn from a course and may be subject to administrative withdrawal from the School of Nursing following a full review. Readmission is not guaranteed to these students.
5. Students should note that a flagrant or established pattern of disregard to Eleanor Mann School of Nursing policies can result in failure of the courses and/or dismissal from the program without prior warnings (see Forms page for performance improvement plan guidelines).

Readmission Policies

Any student whose enrollment in the professional program of study has been interrupted may seek readmission following the steps below:

1. Seek readmission into the University of Arkansas (if applicable).
2. Complete Readmission Application to the School of Nursing (Readmission is limited by space availability).
3. Readmission will not be considered for any student dismissed from the School of Nursing who obtained a "D" or "F" in one nursing course and was unable to make a "C" or better upon repeating this course or who was dismissed from a Clinical Practicum Course due to safety, ethical, or dishonesty issues. Exceptions to this policy will be considered by the Student Affairs Committee in nursing on an individual basis.

Exit Policies

1. Students must complete the requirements for the degree within five years of enrolling in the first upper-level nursing course. If the student does not complete the Professional Program of Study with the five-year limit, nursing credits must be reevaluated.
2. All University of Arkansas requirements must be met.

In addition to the program requirements, students must meet the university and college graduation requirements. This curriculum is subject to change to comply with national accreditation and the Arkansas State Board of Nursing Standards.

L.P.N. to B.S.N. Option (NURSBS-LNBN)

The nature of the L.P.N. to B.S.N. major excludes it from ACT 1014 eight-semester degree-completion program requirements. The degree is a 120 hour degree in accordance with ACT 747.

Presented below is a typical plan for completing this degree in five semesters; individual student plans may vary significantly.

Students are not required to complete courses during the summer, but courses may be offered. Students may be able to finish the program sooner if they enroll in summer courses.

First Year	Units	
	Fall	Spring
Pre-program requirements	48	
Year Total:	48	

Second Year	Units

Agana, Carol E., M.N.Sc. (University of Arkansas for Medical Sciences), B.S.E. (University of Arkansas), Instructor, 1998.

Ballentine, Hope, M.S. (Vanderbilt University), B.A. (Harding University), Clinical Assistant Professor, 2014.

Bowling, Hilary, M.S.N., B.S.N. (University of Arkansas), Instructor, 2014.

Dunbar, Diana, M.S.N. (University of Central Arkansas), B.S.N. (University of Central Oklahoma), Instructor, 2015.

Emory, DeAnna Jan, Ph.D. (University of Arkansas), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Associate Professor, 2012.

Franks, Lisa, M.S.N., B.S.N. (University of Arkansas), Instructor, 2014.

Garrett, B. J., M.S.N. (Angelo State University), Instructor, 2018.

Gilmet, Kelsey, Ph.D. (University of Illinois-Chicago), M.S.N. (University of Minnesota), B.A. (Kalamazoo College), Instructor, 2016.

Hale, Cathy J., M.S.N. (University of Arkansas), M.S. (University of Central Arkansas), B.S.N. (Arkansas Tech University), Clinical Instructor, 2013.

Henderson, Jaye, M.S.N., B.S.N. (Arkansas Tech University), Clinical Instructor, 2013.

Hentzen, Jane, M.S.N. (University of Texas at Austin), B.S.N. (University of Nebraska), Clinical Instructor, 2017.

Holloway, Ginger L., M.S.N. (Walden University), B.S.N. (Northeastern State University), Instructor, 2013.

Jarrett, Anna Lee, Ph.D., M.S.N. (University of Missouri-Columbia), B.S.N. (Missouri Southern State College), Associate Professor, 2012.

Kilmer, Michele, D.N.P. (University of Alabama), M.S.N. (Texas Tech University), B.S.N. (Harding University), Assistant Professor, 2017.

Kippenbrock, Thomas A., Ed.D. (Indiana University at Bloomington), M.S. (Indiana University-Purdue University-Indianapolis), B.S.N. (Indiana State University), Professor, 2003.

Lee, Peggy B., Ed.D. (University of Arkansas), M.S. (University of Southern Mississippi), B.S.N. (Mississippi College), Clinical Assistant Professor, 2009.

Liu, Tingting, Ph.D. (Emory University), Assistant Professor, 2018.

Lofton, Annelle L., M.S.N. (University of Arkansas), B.S.N. (University of Arkansas), Clinical Instructor, 2013.

Miller, Bettie Gale, M.S.N. (University of Phoenix), M.S., B.S.E., B.S.N. (University of Arkansas), Instructor, 2003.

Murray, Lori M., D.N.P. (University of Kansas Medical Center), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Clinical Assistant Professor, 2015.

Osborne, Cara, Sc.D., M.S. (Harvard University), M.S.N. (Vanderbilt University), B.A. (Transylvania University), Assistant Professor, 2018.

Patton, Susan Kane, Ph.D., M.S.N. (University of Arkansas), M.H.S.A. (University of Arkansas at Little Rock), B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, 2010.

Sabatini, Lindsey Rachel, D.N.P., M.S., B.S.N., B.S. (University of Arkansas), Instructor, 2012.

Scott, Allison L., D.N.P. (University of Missouri-Kansas City), M.S.N., B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, 2006.

Shreve, Marilou D., D.N.P., M.S.N. (University of Missouri-Kansas City), B.S.N. (University of Arkansas), Assistant Professor, 2013.

Stewart, Angela, D.N.P. (University of Arkansas), M.N.Sc., B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, 2015.

Teal, Tabatha, M.S.N. (University of Arkansas), B.S.N. (Arkansas Tech University), Instructor, 2014.

Van Winkle, Holly M., M.S.N., B.S. (University of Arkansas), Instructor, 2013.

Vowell-Johnson, Kelly, Ed.D. (University of Arkansas), M.N.Sc. (University of Arkansas for Medical Sciences), B.S.N. (Arkansas Tech University), Assistant Professor, 2011.

Young, Kelly, D.N.P. (University of South Alabama), M.S. (University of Oklahoma), B.S.N. (Southwestern Oklahoma State University), B.A. (Grinnell College), Assistant Professor, 2018.

Young, Christopher, M.S.N. (University of Oklahoma), B.S.N. (Southwestern Oklahoma State University), Instructor, 2018.

Elementary Education (ELEL)

The Department of Curriculum and Instruction offers programs that prepare candidates for initial teacher licensure in Elementary Education (K-6).

Admission to the Elementary Licensure B.S.E. is competitive and consists of a three-stage process; simply meeting the minimum admission requirements will not guarantee admission. Admission will be determined by the Elementary Education faculty based on the seven items listed below in Stage II.

The Bachelor of Science in Education for Elementary Education K-6 has been added pending approval of the Arkansas Higher Education Coordinating Board.

Requirements for B.S.E. in Elementary Education

Stage I: Pre-Elementary Education (PELED)

Complete either 63 hours of program pre-requisites for CHEDBS or 47 hours of program pre-requisites for ELELBS:

1. Obtain a GPA of 3.0 or better on UA coursework.
2. †Complete all program courses with a "C" or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT.
4. Complete a background check.

Stage II: Admission to the Elementary Licensure B.S.E. (ELEL)

Admission to the Elementary Licensure Program is competitive and occurs after completion of all Pre-Elementary Education requirements and prior to the beginning of the spring semester of the sophomore year. Not all applicants who meet the minimum requirements will be admitted to the program. Applications to the Elementary Licensure (ELEL) program must be submitted by September 15.

The application process includes:

1. Submission of the application to teacher education (see the Teacher Education Application Fee (p. 73)) through the university-wide Teacher Education Office.
2. Submission of Elementary Education application
3. Submission of transcripts for all coursework
4. Oral interview with Elementary Education faculty
5. Submission of Writing Sample

6. Submission of passing score on Math, Reading, and Writing sections of the Praxis Core Exam or ACT
7. Current background check

Stage III: Requirements for Program Continuation and Student Teaching/ Internship

1. Maintain a cumulative GPA of 3.0 or better
2. Submission of Internship Application
3. Passing score on Praxis II, Elementary Education, Multiple Subjects
4. Successful teaching audition
5. Submission of letters of recommendation
6. Maintain a current background check
7. Earn a CPR card
8. Passing score on Praxis II, Principles of learning and Teaching for graduation.

This B.S.E. (4-year) degree includes approximately 9 months of student teaching/internship experience in public elementary schools. Senior-level students must therefore attend full-time.

Requirements for teacher licensure vary from state to state and may differ in teacher preparation programs. Please note that Arkansas requires all applicants to successfully complete a criminal background check. Arkansas Teacher Licensure requirements can be found at <http://arkansased.org/teachers/licensureinitial.html>.

†All program courses must have a grade of "C" or better. No teaching methods courses may be taken as self-paced (correspondence) courses. A grade of "B" or better must be earned in both the fall and spring semesters of CIED 4173 Student Teaching.

Elementary Education Requirements (ELEL)

Pre-Elementary Education (PELED) requirements [†]

University Core (State Minimum Core)		35
Courses specifically required for ELEL program		
ENGL 1013	Composition I (ACTS Equivalency = ENGL 1013)	
ENGL 1023	Composition II (ACTS Equivalency = ENGL 1023)	
MATH 1203	College Algebra (ACTS Equivalency = MATH 1103)	
BIOL 1543 & BIOL 1541L	Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)	
GEOS 1113 & GEOS 1111L	General Geology (ACTS Equivalency = GEOL 1114 Lecture) and General Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab)	
HIST 2003	History of the American People to 1877 (ACTS Equivalency = HIST 2113)	
GEOS 1123 or ANTH 1023	Human Geography (ACTS Equivalency = GEOG 1113) or Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013)	
HIST 2013	History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123)	

HIST 1113	Institutions and Ideas of World Civilizations I (ACTS Equivalency = HIST 1113)
or HIST 112	Institutions and Ideas of World Civilizations II (ACTS Equivalency = HIST 1123)
ARHS 1003	Basic Course in the Arts: Art Lecture (ACTS Equivalency = ARTA 1003)
or MLIT 1003	Experiencing Music (ACTS Equivalency = MUSC 1003)
COMM 1233	Media, Community and Citizenship
or WLIT 111	World Literature I (ACTS Equivalency = ENGL 2113)
or PHIL 200	Introduction to Philosophy (ACTS Equivalency = PHIL 1103)
or PHIL 210	Introduction to Ethics (ACTS Equivalency = PHIL 1003)
or PHIL 220	Logic (ACTS Equivalency = PHIL 1003)
or PHIL 310	Ethics and the Professions

Additional PELED requirements 12

CIED 1013	Introduction to Education
CIED 2943	Foundations of Language and Literacy
COMM 1313	Public Speaking (ACTS Equivalency = SPCH 1003)
or COMM 231	Interpersonal Communication
MATH 2213	Survey of Mathematical Structures I

Elementary Education 76

To be completed following admission to ELEL program:

3 hour Math Elective [†]	
ECON 3053	Economics for Elementary Teachers [†]
or ECON 2143	Basic Economics: Theory and Practice
HIST 3383	Arkansas and the Southwest (or any 3hr Arkansas history course) ^{1,†}
MATH 2223	Survey of Mathematical Structures II [†]
PHYS 1034	Physics for Elementary Education Majors [†]
or ASTR 2003/2001L	Survey of the Universe (ACTS Equivalency = PHSC 1204 Lecture)
or STEM 411	Astronomy for Educators
PLSC 2003	American National Government (ACTS Equivalency = PLSC 2003) [†]
CIED 3013	Development and Learning Theories in the K-6 Classroom [†]
CIED 3023	Survey of Exceptionalities [†]
CIED 3053	The Emerging Adolescent [†]
CIED 3113	Emergent Literacy [†]

Total Units in Sequence: 123

** Course may be taken in summer following 3rd year spring.

³ Must have a grade of "B" or better for graduation.

English Education (EGED)

Freddie Bowles
Program Coordinator
3066 Peabody Hall
479-575-3035
Email: fbowles@uark.edu

Curriculum and Instruction Website (<https://cied.uark.edu/>)

The Department of Curriculum and Instruction offers a Bachelor of Arts in Teaching in English Education that leads to licensure for 7-12 instruction. The program focuses on developing reflective practitioners based on the constructivist perspective that teachers are life-long learners, reflective practitioners themselves, and scholar researchers. The coursework is designed to develop these attributes so that students graduate as effective teachers with the knowledge, skills, and dispositions to engage students with meaningful and authentic instruction. The Bachelor of Arts in Teaching degree will also prepare students in the humanities with the pedagogical skills, the content knowledge, and the dispositions for teaching and learning in 21st century classrooms.

B.A.T. in English Education

Stage I: Pre-English Education (PEGED)

Complete all 46 hours of program pre-requisites for each content area (see below).

1. Obtain a GPA of 3.0 or better on UA coursework.
2. Complete all content and pedagogy courses with a "C" or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT/SAT/GRE as defined by the Arkansas Department of Education.
4. Complete a background check.

Stage II: Admission to the B.A.T. program

Admission to the Bachelor of Arts in Teaching program (B.A.T.) occurs the semester after the candidate has completed all pre-B.A.T. requirements, including the first three courses in education — CIED 1013, CIED 1003, and CIED 2173 — prior to a student entering one of the individual programs of study the following fall term. The B.A.T. program is competitive, and meeting the minimum requirements does not guarantee admission to the program. Applications to the B.A.T. program must be submitted by January 30.

The application process includes:

1. Students must complete the application to teacher education (see the Teacher Education Application Fee (p. 73)) through the Teacher Education Office during spring semester of sophomore year. This includes completing and passing the criminal background check* and also passing Praxis Core academic subjects test or equivalent tests by meeting or exceeding the Arkansas Department of Education cut-off scores.
2. Submission of B.A.T. application.
3. Submission of writing sample to content area faculty.
4. Submission of transcripts for all coursework.

* Another background check will be required prior to graduation in order to be eligible for licensure.

Stage III: Requirements for Program Continuation and Internship

1. Maintain a cumulative GPA of 3.0 or better.
2. All professional education courses and content courses must have a grade of 'C' or better (except SEED 3282 below). No teaching methods courses may be taken as self-paced (correspondence) courses.

Stage IV: Requirements for Internship Semester (spring, senior year) and Program Completion

All students in the B.A.T. program must complete the following requirements prior to being admitted to the spring semester of their senior year.

1. Students must earn a 'B' or better in the fall semester, senior year SEED 3282 practicum course.
2. Earn a cumulative GPA of 3.0 or better by the end of the fall semester, senior year. Students are not permitted to intern in the spring if the GPA requirement has not been met.
3. Students must have taken the appropriate Praxis II-Content Knowledge exam to be admitted to the spring semester, senior year.
4. Candidate must complete a successful internship admission interview with B.A.T. faculty. Note these interviews are scheduled with all senior students during the fall semester.
5. Satisfactorily complete the internship/student teaching experience that has been approved by the Director of Field Placement.

All students seeking licensure in the state of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

English Education Requirements (EGEDBA)**Pre-English Education Requirements**

University Core (State Minimum Core)	35
--------------------------------------	----

Courses specifically required for the English Education B.A.T. program

ENGL 1013	Composition I (ACTS Equivalency = ENGL 1013)
ENGL 1023	Composition II (ACTS Equivalency = ENGL 1023)
MATH 1203	College Algebra (ACTS Equivalency = MATH 1103) (or higher)

Exercise Science (EXSC)

The program in exercise science is designed to prepare candidates for a variety of career options, including teaching physical education, coaching, analyzing and prescribing fitness programs, athletic training, or preparation for professional programs in allied health.

Graduates of this program should be well prepared to enter graduate programs of study in such areas as exercise physiology, biomechanics, athletic training, sport management, medical school, physical therapy school, and other allied health professional schools.

Requirements for B.S. in Exercise Science

Requirements for the B.S. in Exercise Science

Students must have 40 hours of 3000/4000-level classes to graduate.

University Core (State Minimum Core) 35

MATH – A prerequisite course, MATH 1203, may be required.

MATH 1213 Plane Trigonometry (ACTS Equivalency = MATH 1203)

or MATH 1284 Calculus Mathematics (ACTS Equivalency = MATH 1305)

or MATH 2552 Calculus I (ACTS Equivalency = MATH 2405)

BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL & BIOL 1541L 1014 Lecture)
and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)

CHEM 1103 & CHEM 1101L	University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture) and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)	
or CHEM 1203 & CHEM 1201L	Chemistry for Majors I and Chemistry for Majors I Laboratory	

PSYC 2003	General Psychology (ACTS Equivalency = PSYC 1103)	
-----------	---	--

Additional Required Sciences (20 hours)

BIOL 2443 & BIOL 2441L	Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture) and Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab)	4
---------------------------	---	---

BIOL 2213 & BIOL 2211L	Human Physiology (ACTS Equivalency = BIOL 2414 Lecture) and Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab)	4
---------------------------	---	---

CHEM 1123 & CHEM 1121L	University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture) and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)	4
or CHEM 1223 & CHEM 1221L	Chemistry for Majors II and Chemistry for Majors II Laboratory	

CHEM 2613 & CHEM 2611L	Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture) and Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab)	4
or CHEM 3603 & CHEM 3601L	Organic Chemistry I and Organic Chemistry I Laboratory	

PHYS 2013 & PHYS 2011L	College Physics I (ACTS Equivalency = PHYS 2014 Lecture) and College Physics I Laboratory (ACTS Equivalency = PHYS 2014 Lab)	4
---------------------------	---	---

Additional Non-EXSC Requirements (18 hours)

NUTR 1213	Fundamentals of Nutrition	3
-----------	---------------------------	---

COMM 1313	Public Speaking (ACTS Equivalency = SPCH 1003)	3
-----------	--	---

STAT 2303	Principles of Statistics (ACTS Equivalency = MATH 2103)	3
or PSYC 2013 or SOCI 3303	Introduction to Statistics for Psychologists Social Data and Analysis	

PBHL 2663	Terminology for the Health Professions	3
-----------	--	---

PSYC 3023	Abnormal Psychology	3

French Education (FRED)

Freddie Bowles
Program Coordinator
3066 Peabody Hall
479-575-3035
Email: fbowles@uark.edu

Curriculum and Instruction Website (<https://cied.uark.edu/>)

The Department of Curriculum and Instruction offers a Bachelor of Arts in Teaching in French Education that leads to licensure for K-12 instruction. The program focuses on developing reflective practitioners based on the constructivist perspective that teachers are life-long learners, reflective practitioners themselves, and scholar researchers. The coursework is designed to develop these attributes so that students graduate as effective teachers with the knowledge, skills, and dispositions to engage students with meaningful and authentic instruction. The Bachelor of Arts in Teaching degree will also prepare students in the humanities with the pedagogical skills, the content knowledge, and the dispositions for teaching and learning in 21st century classrooms.

B.A.T. in French Education

Stage I: Pre-French Education (PFRED)

Complete all 46 hours of program pre-requisites for each content area (see below).

1. Obtain a GPA of 3.0 or better on UA coursework.
2. Complete all content and pedagogy courses with a "C" or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT/SAT/GRE as defined by the Arkansas Department of Education.
4. Complete a background check.

Stage II: Admission to the B.A.T. program

Admission to the Bachelor of Arts in Teaching program (B.A.T.) in the five content areas occurs the semester after the candidate has completed all pre-B.A.T. requirements including the first three courses in education — CIED 1013, CIED 1003, and CIED 2173 — prior to a student entering the individual program of study the following fall term. The B.A.T. program is competitive, and meeting the minimum requirements does not guarantee admission to the program. Applications to the B.A.T. program must be submitted by January 30.

The application process includes:

1. Students must complete the application to teacher education (see the Teacher Education Application Fee (<http://teacher-education.uark.edu/admissions/>)) through the Teacher Education Office during spring semester of sophomore year. This includes completing and passing the criminal background check* and also passing Praxis Core academic subjects test or equivalent tests by meeting or exceeding the Arkansas Department of Education cut-off scores.
2. Submission of B.A.T. application.

3. Submission of writing sample to content area faculty.
4. Submission of transcripts for all coursework.

* Another background check will be required prior to graduation in order to be eligible for licensure.

Stage III: Requirements for Program Continuation and Internship

1. Maintain a cumulative GPA of 3.0 or better.
2. All professional education courses and content courses must have a grade 'C' or better (except SEED 3282 below). No teaching methods courses may be taken as self-paced (correspondence) courses.

Stage IV: Requirements for Internship Semester (spring, senior year) and Program Completion

All students in the B.A.T. program must complete the following requirements prior to being admitted to the spring semester of their senior year.

1. Students must earn a "B" or better in the fall semester, senior year SEED 3282 practicum course.
2. Earn a cumulative GPA of 3.0 or better by the end of the fall semester, senior year. Students are not permitted to intern in the spring if the GPA requirement is not met.
3. Students must have taken the appropriate Praxis II-Content Knowledge exam to be admitted to the spring semester, senior year.
4. Candidate must complete a successful "internship admission interview" with B.A.T. faculty. Note these interviews are scheduled with all senior students during the fall semester.
5. Satisfactorily complete the internship/student teaching experience that has been approved by the Director of Field Placement.

All students seeking licensure in the state of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

German Education (GRED)

Freddie Bowles
Program Coordinator
3066 Peabody Hall
479-575-3035

Email: fbowles@uark.edu

Curriculum and Instruction Website (<https://cied.uark.edu/>)

The Department of Curriculum and Instruction offers a Bachelor of Arts in Teaching in German Education that leads to licensure for K-12 instruction. The program focuses on developing reflective practitioners based on the constructivist perspective that teachers are life-long learners, reflective practitioners themselves, and scholar researchers. The coursework is designed to develop these attributes so that students graduate as effective teachers with the knowledge, skills, and dispositions to engage students with meaningful and authentic instruction. The Bachelor of Arts in Teaching degree will also prepare students in the humanities with the pedagogical skills, the content knowledge, and the dispositions for teaching and learning in 21st century classrooms.

B.A.T. in German Education

Stage I: Pre-Admission German Education

Complete all 46 hours of program pre-requisites for each content area.

1. Obtain a GPA of 3.0 or better on UA coursework.
2. Complete all content and pedagogy courses with a grade of "C" or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT/SAT/GRE as defined by the Arkansas Department of Education.
4. Complete a background check.

Stage II: Admission to the B.A.T. program

Admission to the Bachelor of Arts in Teaching program (B.A.T.) occurs the semester after the candidate has completed all pre-B.A.T. requirements including the first three courses in education — CIED 1013, CIED 1003, and CIED 2173 — prior to a student entering the individual program of study the following fall term. The B.A.T. program is competitive, and meeting the minimum requirements does not guarantee admission to the program. Applications to the B.A.T. program must be submitted by January 30.

The application process includes:

1. Students must complete the application to teacher education (see the Teacher Education Application Fee (p. 73)) through the Teacher Education Office during spring semester of sophomore year. This includes completing and passing the criminal background check* and also passing Praxis Core academic subjects test or equivalent tests by meeting or exceeding the Arkansas Department of Education cut-off scores.
2. Submission of B.A.T. application.
3. Submission of writing sample to content area faculty.
4. Submission of transcripts for all coursework.

* Another background check will be required prior to graduation in order to be eligible for licensure.

Stage III: Requirements for Program Continuation and Internship

1. Maintain a cumulative GPA of 3.0 or better.
2. All professional education courses and content courses must have a grade 'C' or better (except SEED 3282 below). No teaching methods courses may be taken as self-paced (correspondence) courses.

Stage IV: Requirements for Internship Semester (spring, senior year) and Program Completion

All students in the B.A.T. program must complete the following requirements prior to being admitted to the spring semester of their senior year.

1. Students must earn a 'B' or better in the fall semester, senior year SEED 3282 practicum course.
2. Earn a cumulative GPA of 3.0 or better by the end of the fall semester, senior year. Students are not permitted to intern in the spring if the cGPA requirement is not met.
3. Students must have taken the appropriate Praxis II-Content Knowledge exam to be admitted to the spring semester, senior year.
4. Candidate must complete a successful "internship admission interview" with B.A.T. faculty. Note these interviews are scheduled with all senior students during the fall semester.
5. Satisfactorily complete the internship/student teaching experience that has been approved by the Director of Field Placement.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

The department offers programs leading to the B.S. degree with majors in exercise science (p. 489), public health (p. 498), or recreation and sport management (p. 500). and teaching K-12 physical education and health (p. 509). The department also offers coursework in dance activity (p. 473).

Bonacci, Jeff, D.A. (Middle Tennessee State University), M.S. (West Virginia University), B.S. (University of Akron), Clinical Associate Professor, 2000.

Calleja, Paul C., Ph.D., M.S. (University of Arkansas), B.S. (San Jose State University), Clinical Professor, 2003.

Davis, Robert, Ph.D., M.S., B.S. (University of Mississippi), Assistant Professor, 2018.

DiBrezzo, Rosalie, Ph.D. (Texas Woman's University), M.S. (Indiana University), B.S. (Brooklyn College), University Professor, 1983.

Dittmore, Stephen W., Ph.D. (University of Louisville), M.A., B.A. (Drake University), Professor, 2008.

Edmonston, Craig, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, 2016.

Elbin, R. J., Ph.D. (Michigan State University), M.A., B.A. (University of New Orleans), Associate Professor, 2013.

Forbess, Janet B., M.Ed. (University of Florida), B.S.E. (Georgia Southern College), Instructor, 1978.

Gallagher, Kaitlin, Ph.D., B.Sc. (University of Waterloo, Canada), Assistant Professor, 2015.

Ganio, Matthew Stueck, Ph.D. (University of Connecticut), M.S., B.S. (University of Georgia), Associate Professor, 2011.

Gorman, Dean Richard, Ph.D. (University of Kansas), M.S., B.A. (Arizona State University), Professor, 1979.

Gray, Michelle, Ph.D. (University of Arkansas), M.S. (Ball State University), B.S. (University of Tennessee, Chattanooga), Associate Professor, 2010.

Greene, Nicholas P., Ph.D. (Texas A&M University), M.S., B.S. (University of South Carolina), Associate Professor, 2013.

Hammig, Bart, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, 2008.

Henry, Leah Jean, Ph.D. (Texas Woman's University), M.A. (Michigan State University), B.S. (Texas A&M University), Associate Professor, 2008.

Howie, Erin, Ph.D. (University of South Carolina), B.S. (University of Maryland), Assistant Professor, 2016.

Jones, Ches, Ph.D. (University of Alabama at Birmingham), B.S.E. (Pittsburg State University), Professor, 1994.

Jozkowski, Kristen N., Ph.D., M.S. (Indiana University at Bloomington), B.S. (Pennsylvania State University), Associate Professor, 2011.

Kern, Jack C., Ph.D. (Texas Woman's University), M.Ed. (Texas State University-San Marcos), B.S. (University of Wisconsin-LaCrosse), Clinical Professor, 1996.

Langsner, Steve, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, 1989.

Lens, Joshua, J.D. (University of Iowa), B.A. (University of Northern Iowa), Clinical Assistant Professor, 2018.

Lirgg, Cathy D., Ph.D. (Michigan State University), M.S. (Indiana State University), B.A. (Muskingum College), Professor, 1991.

McDermott, Brendon P., Ph.D. (University of Connecticut), M.S. (Indiana University at Bloomington), B.S. (Northeastern University), Associate Professor, 2012.

Moiseichik, Merry Lynn, J.D. (University of Arkansas), R.Ed. (Indiana University at Bloomington), M.S., B.S.E. (State University of New York at Cortland), Professor, 1989.

Smith-Nix, Angela, Ph.D. (University of Arkansas), M.Ed., B.S.E. (Arkansas State University), Clinical Assistant Professor, 1989.

Stokowski, Sarah, Ph.D. (University of Tennessee), M.Ed. (University of Oklahoma), B.S.E. (University of Kansas), Assistant Professor, 2014.

Sullivan, Amanda Lynn, Ph.D., M.A.T., B.S.E. (University of Arkansas), Clinical Associate Professor, 2010.

Vandermark, Lesley, Ph.D., M.S. (University of Connecticut), B.S. (California University of Pennsylvania), Clinical Assistant Professor, 2016.

Washington, Tyrone A., Ph.D., B.S. (University of South Carolina at Columbia), Associate Professor, 2011.

Human Resource and Workforce Development Education (HRWD)

Academic Adviser, Undergraduate HRWD

106 Graduate Education Building

479-575-4690

hrwd@uark.edu (pgerke@uark.edu)

The undergraduate Human Resource and Workforce Development Education (HRWD) program is specifically designed for adults who want to complete a bachelor's degree that opens doors to opportunity and personal growth. HRWD curriculum prepares individuals to apply integrated training, organizational development, and career planning and counseling skills to the design, management, and evaluation of programs to improve individual productivity, employability, job satisfaction, and organizational effectiveness. Undergraduates also obtain a solid academic base to pursue a graduate degree. This major does not lead to traditional licensure for teachers in Arkansas.

All students start the program as pre-HRWD majors. To be admitted into the HRWD major, the students must meet the following criteria:

1. Have three or more years of full-time work experience or equivalent.
2. Complete all 35 hours of university core courses, including the Pre-HRWD requirement:

Math course chosen from:	3
MATH 1313 Quantitative Reasoning (ACTS Equivalency = MATH 1113)	
MATH 2053 Finite Mathematics	
MATH 2183 Mathematical Reasoning in a Quantitative World	
STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103)	
Economics course or courses chosen from:	3-6
ECON 2143 Basic Economics: Theory and Practice	
ECON 2013 Principles of Macroeconomics (ACTS Equivalency & ECON 2023 = ECON 2103)	
and Principles of Microeconomics (ACTS Equivalency = ECON 2203)	

3. Have a 2.5 or higher GPA, or have a 2.5 or higher GPA on HRWD required courses after completing 12 hours of HRWD coursework.

Human Resource and Workforce Development (HRWD) Major

University Core Requirements 35

3-6 hours Pre-HRWD Economics Requirement chosen from:	
ECON 2143 Basic Economics: Theory and Practice	
or ECON 2013 Principles of Macroeconomics (ACTS Equivalency = & ECON 2023 = ECON 2103)	
and Principles of Microeconomics (ACTS Equivalency = ECON 2203)	
3 hours Pre-HRWD Math requirement chosen from:	
MATH 2183 Mathematical Reasoning in a Quantitative World	
or MATH 2053 Finite Mathematics	
or STAT 2303 Principles of Statistics (ACTS Equivalency = MATH 2103)	
or MATH 1313 Quantitative Reasoning (ACTS Equivalency = MATH 1113)	

Electives 40

Up to 19 credit hours of electives can include technical credit that can be obtained through experiential learning credits and/or faculty approved courses.¹

Suggested HRWD electives:

HRWD 4113 The Generational Dynamics in the Workplace

HRWD 4323 Instructional Technology and Design

HRWD Required Courses

Career Development Pillar (15 hours)	
HRWD 3113 Foundations of Human Resource Development	3
HRWD 3123 Career Development	3
HRWD 3133 Writing for Human Resource and Workforce Development Professionals	3
HRWD 4123 Strategic Human Resource Development	3
HRWD 4133 International Human Resource Development and Cultural Differentiation	3
Organization Development Pillar (15 hours)	
HRWD 3213 Organization Development	3
HRWD 3223 Managing Human Resource Development Programs	3
HRWD 4213 Workplace Diversity and Human Resource Development	3

HRWD 4223 Professional and Leadership Development	3
HRWD 4233 HRD Legal and Ethical Issues	3
Training and Development Pillar (15 hours)	
HRWD 3313 Training and Development	3
HRWD 3323 Designing and Developing Human Resource Development Programs	3
HRWD 3333 Communication in Human Resource and Workforce Development	3
HRWD 4313 Human Resource Development Program and Product Evaluation	3
HRWD 4333 Human Resource Development Capstone	3
Total Hours	120

- ¹ 1. **Experiential Learning** HRWD 450V
 - a. Credits from HRWD faculty approved National Occupational Competency Testing Institute (NOCTI) assessments accepted and assessed by the HRWD faculty NOCTI coordinator.
 - b. American Council on Education (ACE) and Council on Adult and Experiential Learning (CAEL) credits as accepted by the University of Arkansas' undergraduate policy will also be accepted by the undergraduate HRWD program for Experiential Learning HRWD 450V credits.
 - c. 3 credit hours will be awarded for recognition from the American Society for Training and Development (ASTD) as a Certified Professional in Learning and Performance (CPLP).
 - d. Credits will be given for earning from Society for Human Resource Management (SHRM) Professional in Human Resources (PHR) and Senior Professional in Human Resources (SPHR) certification. 1 credit hour will be awarded for PHR certification. 3 credit hours for SPHR certification. If a student enters the undergraduate HRWD program with PHR certification and obtains SPHR certification while in the program, they will be given an additional 2 credit hours for a maximum of 3 credit hours.
 - e. A maximum of 3 credit hours of Continuing Education Unit (CEU) will be accepted. 15 hours of continuing education equals 1 CEU and equals 1 credit hour. Acceptable CEU's must be in training and development, career development, or organization development.
 - f. A maximum of 6 hours of ROTC credit will be granted for military service in accordance with the current University of Arkansas Policy.
2. **Faculty Approved courses**
 - a. Sanctioned by HRWD faculty.
 - b. Related to one of the HRWD areas, including psychology, organizational behavior, adult education, occupational counseling, skill testing and evaluation, program design and evaluation, consulting practice, organizational development, training, management, development, customer service, or total quality management.
 - c. Suggested HRWD electives: HRWD 4113 and HRWD 4323.

Human Resource and Workforce Development Education Semester Plan

The nature of the Human Resource Development major excludes it from ACT 1014 eight-semester degree-completion program requirements. The HRWD degree is a 120 hour degree in accordance with ACT 747.

Presented below is a typical plan for completing this degree in four semesters; individual student plans may vary significantly.

If fewer credits than needed are earned through technical credits, completing additional appropriate coursework will require heavier course loads and/or additional semesters to graduate. The 19 hours of technical requirements can be completed at any time during the four semester program. Students are not required to complete courses during the

summer, but courses may be offered. Students may be able to finish the program sooner if they enroll in summer courses.

Earned prior to Fall Semester Year 1

University Core	35
Must specifically include:	
PSYC 2003	General Psychology (ACTS Equivalency = PSYC 1103)
MATH 1203	College Algebra (ACTS Equivalency = MATH 1103)
Pre-HRWD Core	21
To include:	
COMM 1313	Public Speaking (ACTS Equivalency = SPCH 1003)
ECON 2143	Basic Economics: Theory and Practice
or ECON 2013	Principles of Macroeconomics (ACTS Equivalency = ECON 2103)
or ECON 2023	Principles of Microeconomics (ACTS Equivalency = ECON 2203)
ENGL 3053	Technical and Report Writing (ACTS Equivalency = ENGL 2023)
MATH 2183	Mathematical Reasoning in a Quantitative World
6 hours of General Electives	
Total Hours	56

Hughes, Claretha, Ph.D. (Virginia Polytechnic Institute and State University), M.S. (North Carolina State University), M.B.A. (University of Arkansas), B.A. (Clemson University), Professor, 2004.
Samuels, Mandel, M.B.A. (University of Arkansas), B.A. (Oklahoma State University), Assistant Professor, 2012.

Public Health (PBHL)

Public health is an exciting, diverse major that focuses on disease prevention and health promotion needs at the community level. Public health work is conducted by teams of clinicians, epidemiologists, behavioral scientists, environmental scientists, health education specialists, health inspectors, statisticians, and health administrators. Students receiving a B.S. in Public Health will be trained for entry-level public health positions found in government agencies, health corporations, and community non-profit organizations. Graduates are employed in a variety of settings, including: public health departments, non-governmental agencies, hospitals, health care management organizations, and health care accrediting agencies. The public health degree at the University of Arkansas is specifically focused on health promotion, health behavior and health education. In accordance, graduates are eligible for the Certified Health Education Specialist credential.

Public health is delivered in a variety of capacities to:

- Impact behavioral factors that are linked to chronic diseases, such as heart disease, diabetes, and cancer.
- Promote behaviors that positively impact outcomes related to issues such as physical activity, nutrition, and sexual health.
- Prevent and control the spread of infectious diseases
- Improve access to health care
- Affect issues related to the health of the environment
- Prevent violent and unintentional injuries
- Participate in global health endeavors
- Prevent drug use and abuse

- Assure the safety of our food supply
- Manage the delivery of health services

An undergraduate major in public health leads to the Bachelor of Science degree. The minimum requirements for all students in the college are listed under general studies.

Requirements for a Major in Public Health

University Minimum Core (State Minimum Core) 35

Required General Core Studies

PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)

¹ Course requires C or better for degree award.

² If a student earns a "D", "F", or "W" in this course, the course must be repeated. The course must be passed on the second attempt (i.e., "A", "B", or "C"). If a student earns a "D", "F", or "W" in a second attempt, the student will be unable to obtain their degree in Public Health.

Hammig, Bart, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, Department of Health, Human Performance and Recreation, 2008.

Henry, Leah Jean, Ph.D. (Texas Woman's University), M.A. (Michigan State University), B.S. (Texas A&M University), Associate Professor, Department of Health, Human Performance and Recreation, 2008.

Jones, Ches, Ph.D. (University of Alabama at Birmingham), B.S.E. (Pittsburg State University), Professor, Department of Health, Human Performance and Recreation, 1994.

Jozkowski, Kristen N., Ph.D., M.S. (Indiana University at Bloomington), B.S. (Pennsylvania State University), Associate Professor, Department of Health, Human Performance and Recreation, 2011.

Recreation and Sport Management (RESM)

The program in recreation and sport management is designed to prepare candidates for a variety of career opportunities in the field of recreation and sport management. Career opportunities may include park and recreation directors for a city, college and professional sports management, fitness center managers, state and national park managers, camp administrators, or work in YMCAs, Boys and Girls Clubs, or other youth-serving agencies. Graduates of this program should be well prepared to enter the recreation and sport workforce at an entry level position or pursue graduate studies in such areas as recreation management and sport management.

All students must complete the University Core requirements. In addition, all students must take the required general studies for the recreation and sport management core requirements listed. Recreation and sport management majors must obtain a 'C' or better in all courses beginning with the alpha code RESM. To enroll in RESM 440V, students must have a 2.50 GPA or better in RESM core and professional elective courses, have senior standing and have completed RESM 3873 and two RESM 2011 practicums.

There are several experiential requirements within the recreation and sport management core. Students are required to do three practicum experiences (RESM 2011). Each experience totals 45 hours. A more intense experience of an internship (RESM 440V) requires a minimum of

400 hours or work full time for 12-15 weeks in an agency with a qualified park, recreation, or sport management professional.

An undergraduate major in Recreation and Sport Management leads to the Bachelor of Science degree. The minimum requirements for all students in the college are listed under general studies.

Curriculum for a Major in Recreation and Sport Management

University Minimum Core (State Minimum Core) 35

Required University Core for Major in Recreation and Sport Management:

PLSC 2003	American National Government (ACTS Equivalency = PLSC 2003)
PSYC 2003	General Psychology (ACTS Equivalency = PSYC 1103)
SOCI 2013	General Sociology (ACTS Equivalency = SOCI 1013)
ECON 2143	Basic Economics: Theory and Practice

Recreation and Sport Management Major Requirements 54

Three Hours Literature/History/World Civilization Elective	
COMM 1313	Public Speaking (ACTS Equivalency = SPCH 1003)
RESM 1003	Professional Foundations of Recreation and Sport Management
RESM 2011	Recreation and Sport Practicum (three enrollments of one hour each)
RESM 2063	Commercial Recreation and Sport
RESM 2093	Inclusive and Special Recreation and Sport
RESM 2813	Recreation and Sport Leadership
RESM 2853	Leisure and Society
RESM 3833	Program Planning in Recreation and Sport

Total Hours 120

The Recreation and Sport Management major is exempt from eight-semester degree plans, because students are recommended to register for RESM 440V Internship after the completion of their course work, because the recreation and sport management agencies have their busiest season in the summer. The following nine-semester plan, however, will guide students who wish to graduate in four years.

First Year	Units		
	Fall	Spring	Summer
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)	3		
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher)	3		
Fine Arts Core or Humanities Core	3		
PLSC 2003 American National Government (ACTS Equivalency = PLSC 2003)	3		
Literature/History/World Civilizations elective	3		
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)		3	
COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003)		3	
Science Core w/lab		4	
RESM 1003 Professional Foundations of Recreation and Sport Management		3	
RESM 2853 Leisure and Society		3	
Year Total:	15	16	

Second Year	Units		
	Fall	Spring	Summer
SOCI 2013 General Sociology (ACTS Equivalency = SOCI 1013)	3		
ECON 2143 Basic Economics: Theory and Practice	3		
RESM 2813 Recreation and Sport Leadership	3		
RESM 2063 Commercial Recreation and Sport	3		
General elective or HHPR departmental elective**	3		
Science Core w/lab		4	
PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)		3	
Humanities Core or Fine Arts Core		3	
RESM 2093 Inclusive and Special Recreation and Sport		3	
General elective		1	
Year Total:	15	14	

Third Year	Units		
	Fall	Spring	Summer
RESM elective*	3		
HHPR departmental elective or General elective**	3		

RESM 3883 Marketing and Promotion in Recreation and Sport Management	3	
RESM Related elective***	3	
HHPR departmental elective**		3
RESM Related elective***		3
RESM 3833 Program Planning in Recreation and Sport		3
RESM 3843 Recreation and Sport Facilities		3
RESM 2011 Recreation and Sport Practicum		1
Year Total:	12	13

Fourth Year	Units		
	Fall	Spring	Summer
RESM 3873 Sport and Recreation Risk Management	3		
RESM 4003 Management in Recreation and Sport	3		
RESM Related elective***	3		
RESM 2011 Recreation and Sport Practicum	1		
RESM Related elective***	3		
RESM 4083 Research in Recreation and Sport		3	
RESM 4013 Contemporary Issues in Leisure and Sport		3	
RESM Related elective***		3	
RESM Related elective***		3	
RESM 2011 Recreation and Sport Practicum		1	
Year Total:	13	13	

Fifth Year	Units		
	Fall	Spring	Summer
RESM 440V Internship			9
Year Total:			9

Total Units in Sequence: 120

Dittmore, Stephen W., Ph.D. (University of Louisville), M.A., B.A. (Drake University), Professor, Department of Health, Human Performance and Recreation, 2008.

Edmonston, Craig, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, Department of Health, Human Performance and Recreation, 2016.

Langsner, Steve, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, Department of Health, Human Performance and Recreation, 1989.

Moiseichik, Merry Lynn, J.D. (University of Arkansas), R.Ed. (Indiana University at Bloomington), M.S., B.S.E. (State University of New York at Cortland), Professor, Department of Health, Human Performance and Recreation, 1989.

Stokowski, Sarah, Ph.D. (University of Tennessee), M.Ed. (University of Oklahoma), B.S.E. (University of Kansas), Assistant Professor, Department of Health, Human Performance and Recreation, 2014.

Rehabilitation, Human Resources, and Communication Disorders (RHRC)

Michael Stephen Hevel
Interim Department Head
100 Graduate Education Building
479-575-4924
hevel@uark.edu (%20hevel@uark.edu)

The Department of Rehabilitation, Human Resources, and Communication Disorders offers two degree programs:

- B.S.E. in Human Resource and Workforce Development (p. 496)
- B.S.E. in Communication Disorders (p. 469)

At the graduate level, the department also offers an M.S. with an emphasis in speech-language pathology, M.S. and Ed.D. in higher education (<http://catalog.uark.edu/graduatecatalog/programsofstudy/highereducation/>), M.S. and Ed.D. in human resource and workforce development (<http://catalog.uark.edu/graduatecatalog/programsofstudy/humanresourceandworkforcedevelopmenteducation/>), M.S. and Ph.D. in counselor education (<http://catalog.uark.edu/graduatecatalog/programsofstudy/counseloreducation/>).

Adams, Justin J., Ph.D. (University of South Carolina, M.Ed., B.A. (Winthrop University), Assistant Professor, 2018.

Aslin, Larry W., M.A., B.A. (University of Missouri-Columbia), Instructor, 1975.

Biggs, Bobbie T., Ph.D. (Texas A&M University), M.S., B.S. (University of Arkansas), Professor, 1979.

Blisard, Paul, Ed.D. (University of Arkansas), M.C., B.S., B.S. (Southwest Missouri State University), Clinical Assistant Professor, 2014.

Bowers, Lisa Marie, Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (Louisiana State University), Associate Professor, 2012.

Bowers, Andrew L., Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (University of Tennessee), Associate Professor, 2012.

Boykin, Allison, Ph.D. (University of North Carolina-Greensboro), Assistant Professor, 2019.

Camargo, Elsa, Ph.D. (Virginia Polytechnic Institute and State University), M.A., B.A. (University of Illinois at Chicago), Assistant Professor, 2018.

Cao, Chunhua, Ph.D. (University of South Florida-Tampa), Teaching Assistant Professor, 2019.

Christian, David, Ph.D., M.S. (University of North Texas), B.A. (University of Texas at Dallas), Assistant Professor, 2015.

Cook, Aletha, M.S., B.A. (University of Arkansas), Clinical Instructor, 2015.

Dieffenderfer, Vicki, Ph.D., M.S., B.S. (University of Tennessee), Clinical Assistant Professor, 2015.

Frazier, Kimberly Frances, Ph.D. (University of South Carolina-Columbia), M.S., B.S.E. (University of Arkansas), Associate Professor, 2007.

Gearhart, G. David, Ed.D., J.D. (University of Arkansas), B.A. (Westminster College), Professor, 1998.

Gilbertson, Margie, Ph.D. (University of Memphis), M.S.E., B.A. (University of Central Arkansas), Clinical Instructor, 2016.

Glade, Rachel E., Ph.D. (University of Arkansas), M.S. (University of Arkansas for Medical Sciences), M.A. (University of Arkansas), B.S. (University of Arkansas at Little Rock), Assistant Professor, 2015.

Grover, Kenda Shea, Ed.D. (University of Arkansas), M.S., B.A. (Northeastern State University), Associate Professor, 2003.

Hagstrom, Fran W., Ph.D. (Clark University), M.S. (University of Texas Health Science Center-Houston), M.A. (St. Louis University), B.A. (Southwest Baptist University), Associate Professor, 2002.

Hevel, Michael Stephen, Ph.D. (University of Iowa), M.A. (Bowling Green State University), B.A. (University of Kansas), Associate Professor, 2012.

Higgins, Kristin Kay, Ph.D., M.S. (University of Arkansas), B.A. (Vanderbilt University), Associate Professor, 2006.

Holfield, Christine, Ph.D. (Pennsylvania State University), M.A. (University of Kansas), B.S. (Central Michigan University), Assistant Professor, 2017.

Holyfield, Christine E., Ph.D. (Pennsylvania State University), M.A. (University of Kansas), B.S. (Central Michigan University), Assistant Professor, 2017.

Kacirek, Kit, Ed.D., M.Ed. (University of Arkansas), B.S. (University of Texas), Associate Professor, 1997.

Koch, Lynn C., Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Arizona), Professor, 2006.

Liang, Xinya, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Assistant Professor, 2014.

Lo, Wen-Juo, Ph.D., M.A. (Arizona State University), B.S. (Soochow University), Associate Professor, 2008.

Mamiseishvili, Ketevan, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Akaki Tsereteli State University), Professor, 2008.

McCray, Suzanne, Ph.D. (University of Tennessee), M.A., B.A. (University of Arkansas), Associate Professor, 2010.

Miller, Michael T., Ed.D. (University of Nebraska), M.S., B.A. (Southern Illinois University), Professor, 2003.

Murry, John, Ed.D., J.D., M.B.A., B.S.B.A., B.S. (University of Arkansas), Associate Professor, 1993.

Perry, Kim, M.S. (University of Arkansas), Instructor, 2007.

Perryman, Kristi Leann, Ph.D. (University of Arkansas), M.S., B.S. (Southwest Missouri State University), Assistant Professor, 2014.

Popejoy, Erin O., Ph.D. (University of Texas–San Antonio), M.A. (Texas State University), B.A. (Case Western Reserve University), Assistant Professor, 2015.

Roessger, Kevin, Ph.D., M.S., B.A. (University of Wisconsin-Milwaukee), Associate Professor, 2016.

Shelton, Leslie Jo, Ph.D. (Michigan State University), M.Ed., B.A. (Ohio University), Assistant Professor, 2014.

Turner, Ronna L., Ph.D. (University of Illinois-Urbana-Champaign), M.S.E. (Missouri State University), B.S.E. (Southwest Missouri State University), Professor, 1997.

Vajda, Anthony J., Ph.D. (Old Dominion University), M.S. (La Salle University), B.A. (University of Delaware), Assistant Professor, 2018.

Williams, Brent Thomas, Ph.D. (University of Illinois, Urbana-Champaign), M.S. (University of Texas Southwestern Medical School), B.A. (Austin College), Associate Professor, 2002.

Social Studies Education (SSED)

Freddie Bowles
Program Coordinator

Email: fbowles@uark.edu

Curriculum and Instruction Website (<https://cied.uark.edu/>)

The Department of Curriculum and Instruction offers a Bachelor of Arts in Teaching in Social Studies Education that leads to licensure for 7-12 instruction. The program focuses on developing reflective practitioners

based on the constructivist perspective that teachers are life-long learners, reflective practitioners themselves, and scholar researchers. The coursework is designed to develop these attributes so that students graduate as effective teachers with the knowledge, skills, and dispositions to engage students with meaningful and authentic instruction. The Bachelor of Arts in Teaching degree will also prepare students in the humanities with the pedagogical skills, the content knowledge, and the dispositions for teaching and learning in 21st century classrooms.

B.A.T. in Social Studies Education

Stage I: Pre-Admission Social Studies Education

Complete all 46 hours of program pre-requisites for each content area.

1. Obtain a GPA of 3.0 or better on UA coursework.
2. Complete all content and pedagogy courses with a grade of "C" or better.
3. Obtain a passing score on the Math, Reading, and Writing sections of the Praxis Core or ACT/SAT/GRE as defined by the Arkansas Department of Education.
4. Complete a background check.

Stage II: Admission to the B.A.T. program

Admission to the Bachelor of Arts in Teaching program (B.A.T.) occurs the semester after the candidate has completed all pre-B.A.T. requirements including the first three courses in education — CIED 1013, CIED 1003, and CIED 2173 — prior to a student's entering the individual programs of study the following fall term. The B.A.T. program is competitive, and meeting the minimum requirements does not guarantee admission to the program. Applications to the B.A.T. program must be submitted by January 30.

The application process includes:

1. Students must complete the application to teacher education (see the Teacher Education Application Fee (p. 73)) through the Teacher Education Office during spring semester of sophomore year. This includes completing and passing the criminal background check* and also passing Praxis Core academic subjects test or equivalent tests by meeting or exceeding the Arkansas Department of Education cut-off scores.
2. Submission of B.A.T. application.
3. Submission of writing sample to content area faculty.
4. Submission of transcripts for all coursework.

* Another background check will be required prior to graduation in order to be eligible for licensure.

Stage III: Requirements for Program Continuation and Internship

1. Maintain a cumulative GPA of 3.0 or better.
2. All professional education courses and content courses must have a grade 'C' or better (except SEED 3282 below). No teaching methods courses may be taken as self-paced (correspondence) courses.

Stage IV: Requirements for Internship Semester (spring, senior year) and Program Completion

All students in the BAT program must complete the following requirements prior to being admitted to the spring semester of their senior year.

1. Students must earn a 'B' or better in the fall semester, senior year SEED 3282 practicum course.
2. Earn a cumulative GPA of 3.0 or better by the end of the fall semester, senior year. Students are not permitted to intern in the spring if the GPA requirement is not met.
3. Students must have taken the appropriate Praxis II-Content Knowledge exam to be admitted to the spring semester, senior year.
4. Candidate must complete a successful internship admission interview with B.A.T. faculty. Note these interviews are scheduled with all senior students during the fall semester.
5. Satisfactorily complete the internship/student teaching experience that has been approved by the Director of Field Placement.

All students seeking licensure in the State of Arkansas are subject to a criminal background check. Background checks can take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities at least six months in advance of graduation (or six months prior to applying for a teaching license). Arkansas will not grant a teaching license to anyone who has been convicted of a felony.

Social Studies Education Requirements (SSEDBA)

Pre-Social Studies Education requirements

University Core (State Minimum Core) 35

Courses specifically required for the Social Studies Education B.A.T. program

ENGL 1013	Composition I (ACTS Equivalency = ENGL 1013)
ENGL 1023	Composition II (ACTS Equivalency = ENGL 1023)
MATH 1203	College Algebra (ACTS Equivalency = MATH 1103) (or higher)
HIST 2003	History of the American People to 1877 (ACTS Equivalency = HIST 2113)
HIST 1113	Institutions and Ideas of World Civilizations I (ACTS Equivalency = HIST 1113)
HIST 1123	Institutions and Ideas of World Civilizations II (ACTS Equivalency = HIST 1123)
HIST 2013	History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123)

Additional Pre-Social Studies Education requirements ¹ 9

CIED 1013	Introduction to Education
CIED 1003	Introduction to Technology in Education
CIED/ENGL 2173	Literacy in America

Educational Requirements ¹ 31

EDST 3223	American Educational History or HIST 489: Senior Capstone Seminar
CIED 3033	Classroom Learning Theory
CIED 4023	Teaching in Inclusive Secondary Settings
SEED 4063	Disciplinary and Interdisciplinary Literacies in Education
CIED 4286	Teaching Experience
CIED 4403	Understanding Cultures in the Classroom
SEED 3282	Teaching Experiences in Education

SEED 4022	Classroom Management Concepts
SEED 4103	Methods of Teaching Secondary Social Studies I
SEED 4113	Teaching History, Government and Economics
Social Studies Content ¹	
39	
Social Science electives (6 hours of 3000-level) ²	
Social Science electives (9 hours of 4000-level) ²	
ECON 3063	Economics for Secondary Educators
GEOS 1123	Human Geography (ACTS Equivalency = GEOG 1113) or ANTH 102: Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013)
GEOS 2003	World Regional Geography (ACTS Equivalency = GEOG 2103)
HIST 4583	Arkansas in the Nation or HIST 338: Arkansas and the Southwest
PLSC 2003	American National Government (ACTS Equivalency = PLSC 2003)
SOCI 2013	General Sociology (ACTS Equivalency = SOCI 1013)
6 hours Social Studies Diversity core chosen from courses below:	
HIST 3233	African American History to 1877
HIST 3243	African American History Since 1877
HIST 3093	Women in U.S. History
HIST 3263	History of the American Indian
HIST 3303	U.S. Immigration History
HIST 3313	Latinos and Latinas in the U.S.
PLSC 3263	Latino Politics
PLSC 3293	African American Politics
PLSC 4323	Racial Identity, Politics, and Public Policy
PLSC 4333	Southern Politics
PLSC 4593	Islam and Politics
PLSC 3853	American Foreign Policy
General Electives	
6	
Total Hours	
120	

¹ All professional education courses and content courses must have a grade "C" or better, except SEED 3282, which must have a "B" or better.

² A minimum of 6 hours with international/non-U.S. focus must be taken among the combined 15 hours of 3000- and 4000-level Social Science electives.

Social Studies Education B.A.T. Eight-Semester Plan

Because this program requires admission to progress, it does not qualify for the university's Eight-Semester Degree Program; however, students who qualify for admission to the program can finish a degree in four years by following the suggested order of classes below.

First Year	Units	
	Fall	Spring
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)	3	
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103) (or higher)		3

Humanities Core	3	
HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113)	3	
CIED 1013 Introduction to Education	3	
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)	3	3
Science Core with lab	4	4
HIST 1113 Institutions and Ideas of World Civilizations I (ACTS Equivalency = HIST 1113)	3	3
HIST 2013 History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123)	3	3
CIED 1003 Introduction to Technology in Education	3	3
Year Total:	15	16

Second Year	Units	
	Fall	Spring
Fine Arts Core	3	
HIST 1123 Institutions and Ideas of World Civilizations II (ACTS Equivalency = HIST 1123)	3	
GEOS 1123 Human Geography (ACTS Equivalency = GEOG 1113) or ANTH 1023 Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013)	3	
GEOS 2003 World Regional Geography (ACTS Equivalency = GEOG 2103)	3

Special Education (SPED)

Peggy Schaefer-Whitby
Program Coordinator
ARKA 308
479-575-3302
pschaefer@uark.edu (bgartin@uark.edu)

The Department of Curriculum and Instruction offers programs that prepare candidates for initial teacher licensure in Special Education. Graduates of the B.S.E. in Special Education will prepare students to teach special education to students with diverse disabilities from kindergarten to 12th grade.

Students wishing to pursue a major in Special Education declare the Pre-Special Education (PSPED) preparation emphasis until formal admission to the major is approved by program faculty.

General Requirements

1. Students must pass Praxis Core or ACT by meeting or exceeding the Arkansas Department of Education cut-off scores. This test should be taken after the student has completed 30 credit hours and upon completion of ENGL 1013, ENGL 1023, and MATH 1203. Enrollment for the spring semester, sophomore year is not permitted unless all three parts of Praxis Core are passed, and
2. All CIED courses must have a grade of "C" or higher. All SPED courses must have a "B" or higher prior to the student teaching semesters. No teaching methods courses may be taken by as self-paced (correspondence) courses.
3. Students must complete and successfully pass the criminal background check before beginning field experiences in the schools in the fall semester of the sophomore year and every year as needed.
4. Application to the Special Education Professional Course of Study is made through the Teacher Education Office (see the Teacher Education Application Fee (p. 73)) in the fall semester of the

sophomore year after completing the first 30 hours on the program of study. A maximum number of special education candidates will be accepted each year. Thus, admission is competitive and meeting minimum requirements does not automatically result in admission to the program. Candidates will be ranked according to the following:

- Praxis Core scores
 - Cumulative GPA
 - Criminal background check
 - Interview
5. Continuation to senior year Teaching Internship block is based on the following:
 6. Praxis II: Special Education: Core Knowledge and Applications scores
 7. Cumulative GPA
 8. Criminal background check
6. Licensure requirements include the following.
- Students must successfully complete the 2 semesters of Teaching Internship with a "B" or higher.
 - Students must have a cumulative GPA of 3.0 or higher.
 - Students must pass Praxis II: Special Education: Core Knowledge and Applications by meeting or exceeding the Arkansas Department of Education cut-off scores.

Teaching K-12 Physical Education and Health (PHED)

The major leading to a B.S.E. in Teaching K-12 Physical Education and Health provides students with the knowledge and skills to design quality physical education and health lessons and programs for K-12 school

children. Graduates will learn to effectively work as a teacher or coach in the K-12 school environment and have the skills needed to establish a class environment that promotes learning and engage students.

The program leads to licensure in teaching of K-12 physical education and health.

Requirements for B.S.E. in Teaching K-12 Physical Education and Health

Admission to K-12 Teaching Physical Education and Health, which prepares a student to teach in the public schools, requires the following:

- Must be admitted to the teacher education program in K-12 (see the Teacher Education Application Fee (p. 73)) after their sophomore year (45 hours of coursework).
- Passing scores on ACT, SAT, GRE or PRAXIS Core (see adviser)
- Successfully complete an Arkansas State Police and Arkansas Child Maltreatment Registry background check (Background checks must be current, there is a fee for this process.)
- Prior to taking the following pedagogical courses PHED 3003, PHED 3033, PHED 3043, students are required to have a cumulative grade point average of 2.5 or above
- Prior to taking the following pedagogical courses PHED 4703, PHED 4743, PHED 432V, students are required to have a cumulative grade point average of 2.7 or above.

To be eligible to enroll in the Senior Block Internship semester (PHED 4023, PHED 407V, PHED 4733), students are required to:

- Have a cumulative grade point average of 2.7 and maintain through degree completion
- Successfully complete an Arkansas State Police and Arkansas Child Maltreatment Registry background check if not completed at Stage II (Background checks must be current, there is a fee for this process.)
- Present scores for the Praxis II exams required by the Arkansas Department of Education licensure area of K-12 Physical Education, Wellness and Leisure

In order to complete the Teaching K-12 Physical Education and Health, students must maintain a 2.7 cumulative grade point average and complete all university requirements for graduation.

Students interested in obtaining an endorsement in coaching should contact the Coordinator of Teacher Education.

University Core (State Minimum Core) 35

PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)

BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) & BIOL 1541L and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab) (hours counted in the state minimum core)

BIOL 2443 Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture) & BIOL 2441L and Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab) (hours counted in the state minimum core)¹

Additional Requirements for Teaching K-12 Physical Education and Health (45 hours)

PBHL 1103	Personal Health and Safety	3
COMM 1313	Public Speaking (ACTS Equivalency = SPCH 1003)	3
PHED 1003	The Physical Education Profession: An Overview	3

Internship Semester		
PHED 4023	Class Management	3
PHED 407V	Physical Education Teaching Internship	6
PHED 4733	Senior Seminar	3
General Electives		11-12
As needed for total hours based on waivers, exemptions and transfer inequalities		
Total Hours		120

¹ Students may also count completion of the Anatomy and Physiology I course at another Arkansas institution for this requirement.

All students seeking licensure in the state of Arkansas are subject to a criminal background check. Forms for this procedure may be obtained at the office of the Teacher Certification Officer, at the State Department, or any police station, including the campus police. These background checks take up to six months to process; therefore, students are advised to complete and submit the forms to the proper authorities six months in advance of actually applying for a license. Arkansas will not certify anyone who has been convicted of a felony. Although not required for the Kinesiology concentration in Physical Education, Wellness and Leisure, students seeking coaching endorsement will need to take PHED 4001, take the appropriate standardized exams (ACT, SAT, GRE, or PRAXIS core) as designated by the Arkansas State Department of Education, and make a "C" or better in all courses required by the University of Arkansas for the Coaching Endorsement. Please see the College of Education

and Health Professions PDF (<http://coehp.uark.edu/CoachingALP.pdf>) for these specific course numbers.

Teaching K-12 Physical Education & Health Eight-Semester Degree Program (PHEDBS)

The teacher education program for Teaching K-12 Physical Education & Health does not qualify for the eight semester degree plan due to standardized exams (ACT, SAT, GRE, or PRAXIS core) and cumulative GPA requirements for progression. However, the following 8-semester sample plan shows how a first-year student could select their courses.

First Year	Units	
	Fall	Spring
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)	3	
Social Science (except PSYC 2003) ¹	3	
BIOL 1543 Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) & BIOL 1541L Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)	4	
PBHL 1103 Personal Health and Safety	3	
PHED 1003 The Physical Education Profession: An Overview	3	
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)		3
MATH 1203 College Algebra (ACTS Equivalency = MATH 1103)		3
COMM 1313 Public Speaking (ACTS Equivalency = SPCH 1003)		3
U.S. History or American National Government ¹		3
PHED 2023 Sport Skills ³		3
Year Total:	16	15

Second Year	Units	
	Fall	Spring
PHED 3223 Motor Development	3	
PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103)	3	
General Elective	3	
Fine Arts or Humanities ¹	3	
BIOL 2443 Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture) & BIOL 2441L Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab)	4	
Social Science (except PSYC 2003) ¹		3
Humanities or Fine Arts ¹		3
General Elective		6
PHED 2373 Elementary Physical Education		3
Year Total:	16	15

Third Year	Units	
	Fall	Spring
PHED 3003 Outdoor Education ⁴	3	
CIED 3033 Classroom Learning Theory	3	
PHED 3203 Principles and Problems of Coaching	3	

PHED 3903 Physical Education for Special Populations ⁴	3	
PHED 3163 Exercise Physiology: Theory and Application	3	
PHED 3033 Educational Rhythms and Gymnastics	3	
PHED 3043 Teaching Fitness ⁴	3	
EXSC 3353 Mechanics of Human Movement or EXSC 3013 Functional Anatomy for Exercise Science	3

PHED 4703 Assessment in Physical Education	3	
PHED 4743 Secondary Physical Education	3	
PHED 4023 Class Management		3
PHED 407V Physical Education Teaching Internship		6
PHED 4733 Senior Seminar		3
Year Total:	16	12

Total Units in Sequence: 120

¹ Core areas must be completed as outlined in University Core (p. 97).

² EXSC 3153 has additional prerequisites not included in program of study.

³ Must have grade 'C' or better to award degree credit.

⁴ Passing score on ACT, SAT, GRE, or PRAXIS core (see advisor)

UAteach

UAteach Program
 teach@uark.edu
 479-575-3280
 946 W. Clinton Drive
 Fayetteville, AR 72701

The Department of Curriculum and Instruction offers an undergraduate minor in Secondary Mathematics and/or Science Education through UAteach, a joint program between the College of Education and Health Professions, the Fulbright College of Arts and Sciences, and the College of Engineering.

Students pursuing teacher licensure in Mathematics, Biology, Chemistry, Physics, or Computer Science are eligible for the UAteach minor.

Minor in Secondary Mathematics and/or Science Teacher Education UAteach

STEM 2103	Knowing and Learning in Science and Mathematics	3
STEM 2203	Classroom Interactions	3

STEM 3303	Project Based Instruction for Secondary Mathematics and Science	3
STEM 4409	Supervised Clinical Teaching in Science and Mathematics Education	9
Total Hours		18

Please note, the minor alone does not represent completion of the teacher preparation program. In order for the university to recommend a teaching license, students must have sufficient content area coursework and successfully complete the following additional classes:

ARSC 1201	Inquiry Approaches to Teaching: UAteach Step I	1
ARSC 1221	Inquiry-Based Lesson Design: UAteach Step II	1
MATH 2903	Functions, Foundations and Models	3
BIOL 3273	UAteach Research Methods	3
or PHYS 3273	UAteach Research Methods	
or CHEM 3273	UAteach Research Methods	
STEM 4333	History and Philosophy of Science for Science Teachers	3

In addition to these courses, students must successfully pass the Praxis Core (Reading, Writing, and Math), Praxis II (Principles of Learning and Teaching), Praxis content tests, submit a portfolio, and pass a state criminal background check.

Please note that individuals may become teachers in a variety of subjects including mathematics and science through the Master of Arts in Teaching program at the graduate level. For more information about UAteach contact teach@uark.edu

Teacher Licensure for Computer Science 4-12

For initial teacher licensure in Computer Science, the following 47 hours of courses are required:

ARSC 1201	Inquiry Approaches to Teaching: UAteach Step I	1
ARSC 1221	Inquiry-Based Lesson Design: UAteach Step II	1
CSCE 2004	Programming Foundations I	4
CSCE 2014	Programming Foundations II	4
CSCE 2114	Digital Design	4
CSCE 3193	Programming Paradigms	3
BIOL 3273	UAteach Research Methods	3
or PHYS 3273	UAteach Research Methods	
or CHEM 3273	UAteach Research Methods	
Choose 3 hours from:		3

CATE 4073	Introduction to Teaching Programming in the Secondary Schools	
MATH 2903	Functions, Foundations and Models ^{1,2}	
SEED 5313	Theories of Learning Mathematics	
STEM 4333	History and Philosophy of Science for Science Teachers ¹	
Choose 6-7 hours from:		6

CSCE 2214	Computer Organization	
CSCE 3513	Software Engineering	
CSCE 3613	Operating Systems	
CSCE 4133	Algorithms	
CSCE 4523	Database Management Systems	
MATH 2564	Calculus II (ACTS Equivalency = MATH 2505)	

MATH 2903	Functions, Foundations and Models ^{1,2}	
MATH 3773	Foundations of Geometry I	
STEM 2103	Knowing and Learning in Science and Mathematics	3
STEM 2203	Classroom Interactions	3
STEM 3303	Project Based Instruction for Secondary Mathematics and Science	3
STEM 4409	Supervised Clinical Teaching in Science and Mathematics Education	9
Total Hours		47

¹ Also UAteach requirement

² Course cannot be counted in both elective areas

College of Engineering Mission and Objectives

Ever since people first began to use tools and manipulate their surroundings, engineering has been a vital aspect of human life, and these days, engineering is as important as it ever was. Society turns to engineers to solve a range of social, economic and environmental problems, and an engineering degree can prepare students to work as managers and leaders, in the public or private spheres. Engineering education combines math and science with creativity, innovation and a passion to change the world.

The College of Engineering adds personal, social and economic value to the region, the state, the nation, and the world through engineering education and cutting-edge research in emerging technologies.

Recognizing that the University of Arkansas, Fayetteville, is a land-grant institution with consequent responsibilities in teaching, research, and service, and realizing that these are mutually dependent and necessary responsibilities, the College of Engineering adopts and seeks to fulfill the following statements of purpose.

Undergraduate Education — Offer a high-quality and fully accredited course of instruction involving classroom, laboratory, and extracurricular activities that will result in professionals qualified to begin careers in the field of engineering and prepared to assume responsible places of leadership in society.

Graduate Education and Research — Offer state-of-the-art coursework and research experiences that result in all graduates being capable of independent analysis and design, and all Ph.D. graduates capable of extending the state-of-the-art in their areas of expertise.

Continuing Education — Provide local, regional, national, and international seminars, symposia, short courses, and credit courses to engineers and others in the technical community to help them further their formal education and keep abreast of new developments in technology.

Technology Development and Job Creation — Assist actively and vigorously in the growth and development of the state of Arkansas and the nation by performing research and developing innovative new technology, by updating the existing technology within industrial circles, by providing educational support services, and by attracting and creating new industry.

The College of Engineering focuses on research, teaching and outreach in the following areas:

- Health care and healthcare systems
- Cyber and Homeland Security
- Big Data and Data Analytics
- Sustainability and the built environment
- Electric power systems and advanced power electronics
- Electronics manufacturing
- Environmental and ecosystems analysis
- Mixed signal electric systems
- Materials and manufacturing
- Nanotechnologies
- Transportation, logistics and infrastructure

More information about the College of Engineering can be found at the College of Engineering website (<http://www.engr.uark.edu/>).

College of Engineering Strategic Plan “Preparing You for Your Tomorrow”

For more than 100 years, the College of Engineering has successfully fulfilled its primary mission: to provide an excellent engineering education to undergraduate and graduate students at the University of Arkansas.

The College of Engineering faculty, staff, alumni and students decided to accept the challenge to become one of the best. Specifically, the college's collective goal is:

To become and be recognized as one of the top tier graduate and undergraduate engineering programs in the U.S.

The College's strategic plan encompasses seven main goals. By successfully accomplishing these objectives, the College of Engineering will contribute to the University of Arkansas becoming a nationally competitive, student-centered research institution serving Arkansas and the world, effectively fulfilling its purpose.

Strategic Goals

1. Provide a student-centered educational experience that attracts diverse, high-quality students, helps them to realize their potential, inspires them to pursue excellence at all degree levels and grooms them to become leaders in their profession.
2. Create a supportive research environment that enhances and recognizes scholarship while stimulating entrepreneurship and economic development within Arkansas, the nation and world.
3. Recruit, mentor and retain high-quality and diverse faculty members who value and promote world-class scholarship.
4. Attract, develop and retain well-qualified, diverse and skilled staff members who are equipped to support the growth and potential of the College of Engineering.
5. Implement service and outreach to enhance the impact of the College of Engineering both within and outside the university through service and outreach.
6. Become a catalyst for economic development to achieve the long-term economic goals of Arkansas through entrepreneurship, research and collaboration with industry and government.
7. Cultivate corporate and alumni relationships to improve educational opportunities and assist in providing a high quality educational infrastructure.

College Admission Requirements

Undergraduate Students

Freshmen admitted to the University of Arkansas, Fayetteville, are eligible to enroll in the College of Engineering. The freshman curriculum stresses a basic foundation in mathematics, physics, and chemistry, which will be required in later years. The sophomore, junior, and senior years are spent in a strong concentration on the student's chosen field, with emphasis on industrial applications of classroom and laboratory work. By the selection of electives, a student can concentrate in depth in a particular subject, have the flexibility to study several subjects, and minor in an area of interest. Provisions are made for electives in the humanities and social sciences as a means of providing a well-rounded education.

International Students

Before being admitted all computer engineering applicants must submit a Test of Spoken English (TSE) score of at least 5.0, or a 7.0 on the spoken section of the IELTS, and an ACT score of 25 (or SAT score of 1140(R)) or above, to be eligible for admission.

Transfer Students

In addition to the university policies controlling the granting of credit for course work taken at other institutions, the College of Engineering specifies that advanced (3000- and 4000-level at the University of Arkansas) engineering courses may not normally be transferred from institutions that do not have engineering programs accredited by the Engineering Accreditation Commission or the Computing Accreditation Commission of ABET.

College Scholarships

The College of Engineering awards numerous scholarships, and most are based primarily on academic performance. However, scholarships may also be awarded on the basis of financial need and diversity. Scholarships are available from both the college and its individual departments. College scholarships are available to any engineering student, and departmental scholarships are meant for students enrolled in a particular discipline of engineering. College and departmental scholarships are not available for entering freshmen. Students must be admitted to the University of Arkansas and enrolled in the College of Engineering to qualify and receive either a college or departmental scholarship. The college has a one-step application process that allows a student to be considered for all college-level and departmental scholarships.

For more information concerning scholarship and diversity opportunities, contact the Engineering Student Affairs Office at 575-3051 or e-mail engrdean@uark.edu.

Facilities and Resources

Instructional, Computer, and Laboratory Facilities

Undergraduate instruction in engineering takes place in Bell Engineering Center, John H. White Jr. Engineering Hall, J.B. Hunt Center for Academic Excellence, and the Mechanical Engineering building. These facilities contain state-of-the-art classrooms and instructional equipment. Undergraduate laboratories are located both on the main campus as well as at the Engineering Research Center. Laboratories offer students hands-on experience relating to the subject matter addressed in the classroom.

The College of Engineering utilizes a wide variety of computing equipment to assist in engineering education. Students have easy access to

computers through general computer laboratories or computer facilities located in specialized laboratories within the college. The computers are networked so that all the computing power of the university, including the mainframe computers, can be accessed from the PCs or workstations provided for engineering students. Owning a personal computer is not required; however, it is beneficial.

Laboratory Fee

In order to maintain the college's state-of-the-art instructional and computer laboratories, each student enrolled in an engineering course is assessed a laboratory fee for that term. This fee is used only to purchase and maintain equipment and staff the engineering laboratories and classrooms to assist students.

Library

The books and references used by engineering students and faculty are housed principally in the University of Arkansas Mullins Library. This collection is the most useful and comprehensive engineering library in the state. Many publications pertinent to the engineering profession are being added continuously. Mullins Library is the depository for water resources papers, geological survey materials, and NASA publications, as well as other governmental and industrial series.

Engineering Research Center

The 178,000-square-foot Engineering Research Center is located approximately two miles south of the main campus. The center provides the facilities and support services for a wide variety of research activities. It houses the Engineering Experiment Station through which the research of individual departments in the college is administered. Centers and laboratories located at the Engineering Research Center include GENESIS, the High Density Electronics Center, the Center for Training Transportation Professionals, and the Chemical Hazards Research Center.

Distance Learning

A Master of Science in Engineering (M.S.E.) degree is available for students who wish to take a broad range of engineering courses. See the Graduate School Catalog for details.

Professional development and continuing education credits can be earned through the College of Engineering's Center for Distance Learning. These courses provide ongoing training on technical and engineering topics for professional engineers, land surveyors, and others in the technical and engineering professions.

The Master of Science in Operations Management (MSOM) degree program at the University of Arkansas offers students the philosophy, concepts, and techniques needed to manage available resources to achieve maximum efficiency and effectiveness in meeting operational goals. It provides the tools needed for successful management in industrial and/or military settings. Geared toward the working student, classes meet in the evenings in five 8-week terms per year. The program is offered at military installations at Little Rock Air Force Base (Jacksonville, Ark.), Naval Support Activity Mid-South (Millington, Tenn.), Hurlburt Field, Fla., and at in-state sites at Fayetteville, Bentonville, Camden, and Blytheville. Students in remote locations may also earn the MSOM degree by taking video courses. This is a non-engineering degree that is open to students from all undergraduate backgrounds. See the Graduate School catalog for details.

Student Organizations

The following are honor societies, social organizations and professional societies to which engineering students at the University of Arkansas may aspire:

- Alpha Chi Sigma (a professional chemistry fraternity)
- Alpha Epsilon (Biological/Agricultural Engineering)
- Alpha Pi Mu (Industrial Engineering)
- Chi Epsilon (Civil Engineering)
- Eta Kappa Nu (Electrical Engineering)
- Omega Chi Epsilon (Chemical Engineering)
- Order of the Engineer (professional engineering society)
- Phi Eta Sigma (freshmen)
- Phi Kappa Phi (juniors and seniors)
- Phi Sigma Rho, (professional engineering sorority)
- Pi Mu Epsilon (Mathematics)
- Pi Tau Sigma (Mechanical Engineering)
- Tau Beta Pi (Engineering)
- Theta Tau, (A professional engineering fraternity, it maintains a chapter house on the campus and is active in university and college affairs.)

Several national engineering societies are listed below that maintain student branches in the College of Engineering, each under the auspices of a professor in a related department.

- American Chemical Society
- American Concrete Institute
- American Ecological Engineering Society
- American Indian Science and Engineering Society
- American Institute of Aeronautics and Astronautics
- American Institute of Chemical Engineers
- American Nuclear Society
- Amateur Radio Club of the University of Arkansas
- American Society of Agricultural and Biological Engineers
- American Society of Civil Engineers
- American Society of Heating, Refrigeration, and Air-Conditioning
- American Society of Mechanical Engineers
- Association for Computing Machinery

College Academic Regulations

Students are expected to keep themselves informed concerning current regulations, policies, and program requirements in their fields of study and must meet all requirements of the degree programs in which they are enrolled. Courses that are modified or added to a curriculum and that are incorporated into the curriculum at a level beyond that at which a student is enrolled may become graduation requirements for that student. Courses that are incorporated into the curriculum at a level lower than the one at which the student is enrolled are not required for that student.

Eligibility

Only students enrolled in the College of Engineering or enrolled in programs in which curricula require engineering courses will be allowed to take engineering courses. Exceptions to this requirement must be approved by the dean of engineering. This does not apply to graduate students.

Code of Ethics

Students in the College of Engineering are obligated to comply with pertinent provisions of the Code of Ethics applicable to professional practice following graduation. The Code requires "honesty, impartiality, fairness, and equity," and "adherence to the highest principles of ethical conduct." Most particularly, it states that engineers shall:

1. Be objective and truthful in professional reports, statements, or testimony;
2. Not falsify or permit misrepresentation of their academic or professional qualifications;
3. Give credit for engineering work to those whom credit is due;
4. Not compete unfairly with other engineers by attempting to obtain employment or advancement by improper or questionable methods;
5. Avoid any act tending to promote their own interest at the expense of the dignity and integrity of the profession.

Degree Requirements

The basic requirement for a Bachelor of Science degree in engineering is 124-128 semester hours of academic work, depending on the career field chosen. Students coming from high school with adequate preparation will be able to satisfy this requirement in eight semesters; however, some students require preparatory courses, and others choose to enroll in slightly lighter loads and graduate in nine or ten semesters. Students enrolled in ROTC require an additional 19 semester hours to meet all graduation requirements and graduate in ten semesters (five years).

Engineering is a rapidly changing profession, and the departmental curricula are updated continuously to keep pace with these changes. Students entering under this catalog will be required to comply with such curriculum changes to earn their degree. However, the total number of semester hours required for the degree may not be increased, and all work completed in accordance with this catalog prior to the curriculum change will be applied toward the student's degree requirements. Former students of the college must meet the curriculum requirements in effect at the time of their readmission.

Graduation Requirements

In addition to university requirements for enrollment and graduation, the College of Engineering has these additional requirements. Individual departments may have additional requirements.

1. **Grade-Point Average** – A candidate for a degree from the College of Engineering must have earned a grade-point average of no less than 2.00 on all courses in the student's major area of study.
2. **Courses That Do Not Count Toward a Degree** – The following courses, which may be required, do not count toward degree credit for bachelor degrees in the College of Engineering: MATH 1203, MATH 1203C, MATH 1204, MATH 1213, GNEG 1514, GNEG 1515 and MATH 1284C or their equivalents.
3. **"D" Rule** – No student will be allowed to graduate if the student has "D" grades in more than 8 hours presented to meet the requirements for a degree.
4. **Transfer of Courses** – Advanced (3000- and 4000-level at the University of Arkansas) engineering courses may not normally be transferred from institutions that do not have programs accredited by the Engineering Accreditation Commission.
5. **Resident Requirements** – A candidate must earn a minimum of 20 credit hours at the 3000 level and above in the College of Engineering from the University of Arkansas.
6. **University Core (State Minimum Core)** – The University of Arkansas has adopted a University Core of 35 semester-credit-hours of general education courses that are required of all baccalaureate degree candidates. This is in compliance with Arkansas Act 98 of 1989 and the subsequent action of the Arkansas State Board of Higher Education. Beginning in the fall semester of 1991, all state institutions of higher education in Arkansas have a 35-hour minimum core requirement with specified hours in each of six academic areas. The university and the College of Engineering have identified those courses that meet the minimum requirement, and they are listed in the chart below.

Specific University Core Requirements for Engineering Students

English

ENGL 1013	Composition I (ACTS Equivalency = ENGL 1013)	3
ENGL 1023	Composition II (ACTS Equivalency = ENGL 1023)	3

Mathematics

MATH 2554	Calculus I (ACTS Equivalency = MATH 2405)	4
-----------	---	---

Science

PHYS 2054	University Physics I (ACTS Equivalency = PHYS 2034)	4
-----------	---	---

Select one of the following: 4

PHYS 2074	University Physics II (ACTS Equivalency = PHYS 2044 Lecture)	
-----------	--	--

CHEM 1123	University Chemistry II (ACTS Equivalency = & CHEM 1121L CHEM 1424 Lecture)	
	and University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab)	

BIOL 1543	Principles of Biology (ACTS Equivalency = BIOL & BIOL 1541L 1014 Lecture)	
	and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)	

U.S. History or Government

Select one of the following: 3

HIST 2003	History of the American People to 1877 (ACTS Equivalency = HIST 2113)
HIST 2103	History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123)
PLSC 2003	American National Government (ACTS Equivalency = PLSC 2003)

Fine Arts, Humanities and Social Sciences

Fine Arts *	3
Humanities *	3
Social Sciences *	9
Total Hours	36

* Must be selected from the university-approved list of lower level Humanities, Fine Arts and Social Science courses found in the main University Core (p. 97) list.

Minors in Other Colleges and Schools

Students in the College of Engineering may pursue an academic minor in other colleges. For example, a minor in business is popular among engineering students. For requirements regarding minors, check the catalog listing for the department offering the minor. Students must notify the College of Engineering dean's office of their intent to pursue a minor.

Requirements to Graduate with Honors

Students who have demonstrated exceptional academic performance in baccalaureate degree programs will be recognized at graduation by the honors designation of *cum laude*, *magna cum laude*, or *summa cum laude*. To earn this designation, the student must meet the following criteria:

1. Must have completed at least one-half of his or her degree work at the University of Arkansas;
2. Must have at least a 3.50 GPA on University of Arkansas course work, computed at graduation (students with grade-point averages lower than 3.50 do not receive honors designation at graduation);
3. Must successfully complete the Engineering Honors Program, which includes a minimum of 12 hours of honors courses (at least 6 of these hours in engineering), an undergraduate research experience and thesis, and any additional departmental requirements;
4. Research and thesis material shall be evaluated by each department;
5. For *cum laude*, the student must achieve a GPA of 3.50 or higher and have good or better performance on the undergraduate research and thesis;
6. For *magna cum laude*, the student must achieve a GPA of 3.75 or higher and have good or better performance on the undergraduate research and thesis;
7. For *summa cum laude*, the student must achieve a GPA of 3.90 or higher and have outstanding performance on the undergraduate research and thesis.

The criteria may be evaluated and changed periodically by the College of Engineering.

Requirements to Graduate with Distinction

Students who have not completed the Engineering Honors Program but have demonstrated excellent academic performance in baccalaureate degree programs will be recognized at graduation by the designation of "with distinction," "with high distinction," or "with highest distinction." To

earn these designations, the student must meet the following criteria on his or her University of Arkansas course work:

1. Must have completed at least one-half of his or her degree work at the University of Arkansas;
2. For "with distinction," the student must achieve a GPA of 3.60 or higher;
3. For "with high distinction," the student must achieve a GPA of 3.75 or higher;
4. For "with highest distinction," the student must achieve a GPA of 3.90 or higher.

The criteria may be evaluated and changed periodically by the College of Engineering.

Graduate Studies

The College of Engineering, in cooperation with the UA Graduate School, offers programs leading to the following graduate degrees:

- Master of Science in Biological Engineering (M.S.B.E.)
- Master of Science in Biomedical Engineering (M.S.Bm.E.)
- Master of Science in Chemical Engineering (M.S.Ch.E.)
- Master of Science in Civil Engineering (M.S.C.E.)
- Master of Science in Computer Engineering (M.S.Cmp.E.)
- Master of Science in Computer Science (M.S.)
- Master of Science in Electrical Engineering (M.S.E.E.)
- Master of Science in Engineering (M.S.E.)
- Master of Science in Environmental Engineering (M.S.En.E.)
- Master of Science in Industrial Engineering (M.S.I.E.)
- Master of Science in Mechanical Engineering (M.S.M.E.)
- Master of Science in Operations Management (M.S.O.M.)
- Doctor of Philosophy in Computer Science (Ph.D.)
- Doctor of Philosophy in Engineering (Ph.D.)

In addition, the College of Engineering supports the following interdisciplinary graduate programs:

- Master of Science in Cellular and Molecular Biology (M.S.)
- Master of Science in Microelectronics-Photonics (M.S.)
- Master of Science in Space and Planetary Sciences (M.S.)
- Doctor of Philosophy in Cellular and Molecular Biology (Ph.D.)
- Doctor of Philosophy in Microelectronics-Photonics (Ph.D.)
- Doctor of Philosophy in Space and Planetary Sciences (Ph.D.)

Further information concerning these programs may be found in the Graduate School Catalog or in the office of the dean of the Graduate School.

Accreditations

As the only comprehensive engineering program in Arkansas, the College of Engineering offers undergraduate, graduate, and doctoral degrees through eight academic departments. UA engineering programs have been continuously accredited by ABET since 1936.

The College of Engineering offers the following programs accredited by the Engineering Accreditation Commission of ABET. Visit <http://www.abet.org>.

- Bachelor of Science in Biological Engineering (B.S.B.E.)
- Bachelor of Science in Biomedical Engineering (B.S.Bm.E.)
- Bachelor of Science in Chemical Engineering (B.S.Ch.E.)
- Bachelor of Science in Civil Engineering (B.S.C.E.)
- Bachelor of Science in Computer Engineering (B.S.Cmp.E.)
- Bachelor of Science in Electrical Engineering (B.S.E.E.)
- Bachelor of Science in Industrial Engineering (B.S.I.E.)
- Bachelor of Science in Mechanical Engineering (B.S.M.E.)

The College Engineering offers the following program accredited by the Computing Accreditation Commission of ABET. Visit <http://www.abet.org>.

- Bachelor of Science in Computer Science (B.S.)

Degrees Offered

The College of Engineering offers programs leading to the following eight undergraduate degrees:

- Bachelor of Science in Biological Engineering (p. 518) (B.S.B.E.)
- Bachelor of Science in Biomedical Engineering (p. 522) (B.S.Bm.E.)
- Bachelor of Science in Chemical Engineering (p. 542) (B.S.Ch.E.)
- Bachelor of Science in Civil Engineering (p. 524) (B.S.C.E.)
- Bachelor of Science in Computer Engineering (p. 527) (B.S.Cmp.E.)
- Bachelor of Science in Computer Science (p. 527) (B.S.)
- Bachelor of Arts in Computer Science (p. 527) (B.A.)
- Bachelor of Science in Electrical Engineering (p. 531) (B.S.E.E.)
- Bachelor of Science in Industrial Engineering (p. 534) (B.S.I.E.)
- Bachelor of Science in Mechanical Engineering (p. 537) (B.S.M.E.)

Minors

- Data Analytics (p. 531)

Other Programs

Off-Campus Programs

The College of Engineering at the University of Arkansas (UofA) is offering the Bachelor of Science degrees in Electrical Engineering and Mechanical Engineering at the University of Arkansas at Fort Smith (UAFS). Upper-division courses are taught in person or through distance-learning technology by UAF faculty, and lower-division courses are taught by UAFS faculty. The degree is awarded by University of Arkansas (UofA), but all classes are offered at the UAFS campus.

Cooperative Education

Kelsey Lavigne

Career Development Center, College of Engineering, Bell 3158
(479) 575-6201, Fax: (479) 575-7744, klavigne@uark.edu

Cooperative education (co-op) is an academic program that allows students to gain practical work experience prior to graduation. Over the years thousands of engineering students have participated in the co-op program at the University of Arkansas, gaining experience related to their major locally, within the state, across the nation, and internationally. Students work either full- or part-time in paid, degree-related jobs, and the skills they acquire allow them to step into their first full-time positions ready to contribute in ways that other students cannot. The material below will give more information about the co-op program.

Forms of Cooperative Education: Alternating and Parallel

In an alternating plan, students alternate between semesters of on-campus study and semesters off-campus at their co-op work site. Students can take a maximum of 3 credit hours of course work during the off-campus co-op periods. In a parallel co-op, students work part-time for a local company (less than 25 hours each week) and attend school at least half-time (6 credit hours). In either plan the student is considered a full-time student.

By participating in Cooperative Education, students have the chance to:

- Gain hands-on experience in a real world setting
- Confirm the choice of their major
- Make valuable industry contacts
- Enhance their communication skills
- Make money while also taking classes
- Lay the foundations for a future full-time job

Requirements and Conditions

- GNEG 3801 (undergraduate students working part-time):
 - Must have completed 30 hours towards engineering degree.
 - Must have a minimum of 2.25 cumulative GPA.
 - Must be enrolled at least half-time and must be working part-time at co-op.
- GNEG 3811 (undergraduate students working full-time):
 - Must have completed 30 hours toward engineering degree.
 - Must have a minimum of a 2.25 cumulative GPA.
 - Must be working full-time and must not be enrolled in more than 3 credit hours.
 - Must have at least 12 hours of coursework in their major remaining upon return to campus.
- GNEG 5801 (graduate students working part-time):

- Completed at least 6 hours towards engineering degree.
- Have a minimum of a 3.0 cumulative GPA.
- Must be enrolled at least half-time and must be working part-time at co-op.
- Must have approval of their thesis/dissertation advisor prior to interviewing for co-op positions.
- GNEG 5811 (graduate students working full-time):
 - Completed at least 6 hours towards engineering degree.
 - Have a minimum of a 3.0 cumulative GPA.
 - Must be working full-time and must not be enrolled in more than 3 credit hours.
 - Must have at least 3 hours of non-thesis, -dissertation, or -research hours remaining upon return to campus.
 - Must have approval of their thesis/dissertation advisor prior to interviewing for co-op positions.
 - Students who are TA's, GA's, or RA's *in the term of their work experience* are not eligible for this course.
- Transfer Students
 - Must have completed one semester of full-time study in the College of Engineering.
 - Must meet all other co-op requirements.
- F-1 Students
 - Must have completed nine months of study in the United States.
 - Must meet all other co-op requirements.

Full-time co-op assignments consist of the following scenarios:

- One semester away from campus (Spring, Summer, or Fall).
- One summer and one semester away from campus (Spring & Summer OR Summer & Fall).
- Alternating Semesters between Spring, Summer, and Fall.

Students who are away from campus for 2 semesters in one year, are eligible for only one semester away the following year with no more than three co-op semesters in a 24-month period. (Exceptions to this must be approved in advance by their departmental co-op representative.) Students who are going to be away from campus for the Fall and Spring semester in the same academic must receive prior approval from their departmental co-op representative.

Study Abroad Programs

The College of Engineering actively encourages engineering students to obtain an international experience while pursuing an engineering degree. Students have several opportunities to join engineering faculty-led programs in India, Belize and Spain as well as opportunities within the Southeastern Conference Academic Consortium (SECAC). For more information on study abroad opportunities, contact the Assistant Dean for International Programs, 479-575-7236.

Dual-Degree Transfer Programs

The College of Engineering recognizes that a graduate engineer, to be of full service to community, must be educated in the social sciences and humanities as well as in technical subjects. The practice of industry to elevate engineers to managerial and administrative positions elevates the desirability of a broad educational background. Likewise, most universities within Arkansas do not offer a degree in engineering. Accordingly, the College of Engineering of the University of Arkansas has entered into a cooperative program with several Arkansas "partner" universities to provide for dual-degree programs that lead to a Bachelor of Science degree from the partner university and an engineering degree from the

University of Arkansas. Typically, a student spends two to three years at the partner university and then completes an engineering curriculum in two to three years at the University of Arkansas. The student is awarded the Bachelor of Art/Bachelor of Science degree by the partner university and the Bachelor of Science in an engineering discipline by the University of Arkansas. More information is available at www.engr.uark.edu/transfer (<http://www.engr.uark.edu/transfer.php>)

Honors Program

The College of Engineering has established an honors program to challenge superior students with a more in-depth academic program and research experience and to provide a structure for working more closely with faculty members and other students in a team environment. An honors program is highly recommended for individuals planning academic or research related careers that require considerable critical and original independent thinking. Admission requirements for the college's Honors Program are as follows: entering freshmen must have at least a 3.5 high school GPA and at least a 28 composite score on the ACT or SAT equivalent; entering transfer students must have at least a 3.5 GPA on their transfer work. Students not initially qualifying for the Engineering Honors Program are eligible if they earn a 3.500 cumulative GPA at the University of Arkansas.

Students must formally apply for admission to the Honors Program by completing the online application. The application is available at <http://honorscollege.uark.edu/195.php>. Once accepted into the program, Honors students take a minimum of 12 hours of Honors courses (a minimum of 6 of these 12 hours must be in engineering), participate in undergraduate research and write an undergraduate thesis, and must fulfill any additional departmental requirements. To receive Latin honors distinction at graduation, a student must hold a cumulative GPA of 3.500 or better (for all course work, computed at graduation).

Deadlines related to the Honors Program are as follows:

1. A Honors Advising Form is to be completed prior to a student earning 100 semester hours.
2. Honors College Graduation Certification is to be completed prior to one week before the last day of classes of the student's last semester.

All freshman enrolling in the College of Engineering may participate in an Eight-Semester Degree Completion Program (p. 87).

All students who want to pursue an engineering degree or a Bachelor of Science in Computer Science should follow the plan below for the first two semesters, at the end of which they may finish an eight-semester plan in Computer Science (p. 527) (B.S.) or choose from among any of the engineering fields: Biological Engineering (p. 518), Biomedical Engineering (p. 522), Chemical Engineering (p. 542), Civil Engineering (p. 524), Computer Engineering (p. 527), Electrical Engineering (p. 531), Industrial Engineering (p. 534), or Mechanical Engineering (p. 537).

Biological and Agricultural Engineering (BAEG)

Lalit Verma
Head of the Department
203 Engineering Hall
479-575-2351

Biological and Agricultural Engineering Website (<https://bio-ag-engineering.uark.edu/>)

Healthy Planet, Healthy People: this is the aspiration for the Biological Engineering program at the University of Arkansas. We improve people's lives today and help assure a prosperous world for tomorrow by designing sustainable water, food, and energy systems. Where challenges exist, we create solutions by optimizing the living systems of our world (the

interactions of human, plant, animal, environment, food, and microbes) using the tools of engineering and biotechnology. Biological engineers contribute significantly to human health and prosperity by ensuring a safe and readily available water supply, a safe and nutritious food supply, and a healthy ecosystem upon which both water and food depend.

The educational objectives of the Biological Engineering program at the University of Arkansas are to produce graduates who:

1. Competently and ethically practice engineering in the design and management of water, food, energy and related systems.
2. Make valuable and life-long contributions that benefit employers, clients and communities in Arkansas and the world.
3. Succeed in continuing professional development, including graduate studies, as needed for professional growth.

A Bachelor of Science degree in Biological Engineering is a job-ready degree with opportunities in a variety of industries, government agencies, and consulting firms. It is also excellent preparation for graduate studies (M.S. or Ph.D.) in engineering and related fields, as well as entry into other professional schools (e.g., medical, veterinary, dental, pharmacy, etc.).

The B.S. in Biological Engineering degree can lead immediately to careers in:

- Ecological engineering, such as water quality and watershed management, water resources and irrigation, low impact development in urban watersheds, stream and habitat restoration, and air quality remediation.
- Food and bio-product process engineering, such as food processing, forest products, biotechnology, biofuels, waste treatment and by-product utilization.
- Sustainable resource engineering, such as sustainable agriculture to expand the food supply for a growing population; renewable and bio-energy development; life cycle analysis to assess, design and manage complex biological systems; efficient utilization of organic residues and by-products; conservation of Earth's finite resources.

Completion of degree requirements provides graduates with the following learning outcomes:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions

- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Requirements for B.S. in Biological Engineering

The undergraduate program in biological engineering, leading to a Bachelor of Science degree in Biological Engineering, is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>). The B.S. in Biological Engineering degree is conferred by the College of Engineering and is granted after the successful completion of 128 hours of approved course work.

Diverse applications of biological engineering can be pursued through elective coursework. Each student is required to complete 12 semester hours of biological/engineering/technical electives that are relevant to their career goals. At least 3 hours must be selected from a list of acceptable biological electives. At least 3 hours must be engineering courses within BENG or other engineering programs. The remaining hours can be selected from engineering, math, biology, agriculture, sustainability, and other science/technical areas. A list of suggested electives is maintained by the department. Students may petition their adviser to seek approval of other electives that are not on this list. Courses must provide engineering or technical content that is value-added (i.e. not duplicating or remedial) and meets the career goals of the student.

Biological Engineering B.S.B.E. Eight-Semester Degree Program

The Bachelor of Science in Biological Engineering program is eligible for students who want to participate in an Eight Semester Degree Program. See the Eight-Semester Degree Policy (p. 87) for more details. The plan below lists a semester-by-semester sequence of courses to finish the degree in eight semesters. University core courses for engineering are listed at the bottom of this page. Students may submit a maximum of four (4) hours of "D" in BENG Courses for their degree.

Some courses are not offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course pre-requisites.

Requirements for B.S. in Biological Engineering with Environmental Concentration

The undergraduate program in biological engineering, leading to a Bachelor of Science degree in Biological Engineering, is accredited by the Engineering Accreditation Commission of ABET (<http://www.abet.org>). The B.S. in Biological Engineering degree is conferred by the College of Engineering and is granted after the successful completion of 128 hours of approved course work.

Diverse applications of biological engineering can be pursued through elective coursework. Each student is required to complete 12 semester hours of biological/engineering/technical electives that are relevant to their career goals. At least 3 hours must be selected from a list of acceptable biological electives. At least 3 hours must be engineering courses within BENG or other engineering programs. The remaining hours can be

selected from engineering, math, biology, agriculture, sustainability, and other science/technical areas. A list of suggested electives is maintained by the department. Students may petition their adviser to seek approval of other electives that are not on this list. Courses must provide engineering or technical content that is value-added (i.e. not duplicating or remedial) and meets the career goals of the student.

Requirements for Environmental Concentration

Complete 12 hours from the following courses:

CVEG 3243	Environmental Engineering	3
CVEG 4243	Environmental Engineering Design	3
Biological Electives ¹		3
Technical Electives ¹		3

¹ A list of Environmental Concentration electives is maintained by the department.

Biological Engineering B.S. with Environmental Concentration Eight-Semester Degree Program

The Bachelor of Science in Biological Engineering program is eligible for students who want to participate in an Eight Semester Degree Program. See the Eight-Semester Degree Policy for more details. The plan below lists a semester-by-semester sequence of courses to finish the degree in eight semesters. University core courses for engineering are listed at the bottom of this page. Students may submit a maximum of 4 hours of "D" in BENG Courses for their degree.

Some courses are not offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course pre-requisites.

First Year	Units	
	Fall	Spring
GNEG 1111 Introduction to Engineering I	1	
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)	3	
CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)	3	
MATH 2554 Calculus I (ACTS Equivalency = MATH 2405)	4	
PHYS 2054 University Physics I (ACTS Equivalency = PHYS 2034)	4	
GNEG 1121 Introduction to Engineering II		1
ENGL 1033 Technical Composition II (ACTS Equivalency = ENGL 1023) or ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)		3
Freshman Engineering Science Elective		4
CHEM 1123 University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture) & CHEM 1121L University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab) or PHYS 2074 University Physics II (ACTS Equivalency = PHYS 2044 Lecture)		

MATH 2564 Calculus II (ACTS Equivalency = MATH 2505)		4
HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113) or HIST 2013 History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123) or PLSC 2003 American National Government (ACTS Equivalency = PLSC 2003)		3
Year Total:	15	15

Sadaka, Sammy, Ph.D. (Dalhousie University, Canada, and Alexandria University, Egypt), M.S., B.S. (Alexandria University, Egypt), Associate Professor, 2007.

VanDevender, Karl, Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Professor, 1995.

Verma, Lalit R., Ph.D. (University of Nebraska-Lincoln), M.S. (University of Montana), B. Tech. (J.N. Agricultural University, Jabalpur, India), Professor, 2000.

Zhu, Jun, Ph.D. (University of Illinois at Urbana-Champaign), M.S., B.S. (Zhejiang University, Hangzhou, China), Professor, 2013.

Biomedical Engineering (BMEG)

Raj Rao

Department Head

120 John A. White Jr. Engineering Hall

479-575-8610

Biomedical Engineering Website (<http://biomedical-engineering.uark.edu/>)

Biomedical engineering encompasses the creation, design, and operation, of processes / technology related to the broad field of human healthcare. The profession traditionally has focused on applications related to the development of instrumentation and diagnostic equipment, discovery of novel treatment options, production of new therapeutics, and the elucidation of underlying biophysical phenomena. Newer applications of bioengineering take advantage of the ever deepening understanding of human physiology and molecular genetics, as related to prevention, detection, and treatment of medical conditions. The program objectives of the Biomedical Engineering undergraduate program are to produce graduates who are capable of:

- Succeeding in practice at the interface between life science and engineering, in other professional activities, or in post-baccalaureate studies, and
- Utilizing their engineering education/experience in creating new knowledge or enabling technologies for improvement of human health and healthcare, and
- Conducting themselves with high standards of professional ethics and integrity, and
- Being aware of the limits of their knowledge and initiate self-directed learning to create future professional opportunities for themselves in biomedical engineering.

Completion of the degree requirements provides for the following educational outcomes and ability to:

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- Communicate effectively with a range of audiences
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives

- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusion
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

These educational outcomes are experienced within the context of biology and physiology appropriate to solving problems at the interface of engineering and biology.

Requirements for B.S. in Biomedical Engineering

Technical Options in Biomedical Engineering

Each student in biomedical engineering is required to complete nine semester hours of biomedical engineering technical electives. Biomedical engineering technical elective courses must be selected from a faculty-approved list of courses found in the department's Undergraduate Advising Handbook, which is available on the department's website (<http://biomedical-engineering.uark.edu/>). Elective courses are chosen with the aid of an academic adviser to better prepare for employment or further study in areas such as:

- Bioengineering
- Pharmaceutical manufacturing or pharmacology
- Biomedical device design
- Medicine
- Business
- Law

Technical Elective Course

Each student in biomedical engineering is required to complete three semester hours of upper level science electives. Upper level (3000 and above) science electives will be chosen from courses in mathematics, engineering, and the sciences with the approval of their adviser. The department maintains a list of approved upper level science electives that may be found in the department's Undergraduate Advising Handbook, which is available on the department's website (<http://biomedical-engineering.uark.edu/>).

Biomedical Engineering B.S.Bm.E. Eight-Semester Degree Program

The following section contains the list of courses required for the Bachelor of Science in Biomedical Engineering degree and a suggested sequence for students who enter the College through the Freshman Engineering Program. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 87) in the Academic Regulations chapter for university requirements of the program.

First Year	Units	
	Fall	Spring
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)	3

BMEG 470V	Special Topics in Biomedical Engineering	1-4

Honors Program Requirements

Students enrolled in the Honors College who are to receive the Bachelor of Science in Biomedical Engineering must complete a minimum of 12 hours of honors credit. At least 6 hours must be completed within the Biomedical Engineering program including at least 3 hours resulting in an Honors Thesis. The BMEG honors courses are acceptable as engineering electives and in some cases may be substituted for required courses.

Balachandran, Kartik, Ph.D., M.S. (Georgia Institute of Technology), B.S. (National University of Singapore), Associate Professor, 2012.

Jensen, Morten O., Ph.D. (University of Aarhus, Denmark), M.Sc. (Georgia Institute of Technology), Associate Professor, 2014.

Jensen, Hanna Katariina, Ph.D. (University of Oulu, Finland), Research Assistant Professor, 2015.

Kim, Myunghee Michelle, Ph.D., B.S. (University of Texas at Austin), Clinical Assistant Professor, 2013.

Muldoon, Timothy J., M.D. (Baylor College of Medicine), Ph.D. (Rice University), B.S. (Johns Hopkins University), Associate Professor, 2012.

Puvanakrishnan, Priyaveena, Ph.D. (University of Texas at Austin), Instructor, 2015.

Qian, Xianghong, Ph.D., M.Phil. (George Washington University), B.S. (Nanjing University, P.R. China), Professor, 2011.

Quinn, Kyle P., Ph.D. (University of Pennsylvania), B.S. (University of Wisconsin), Assistant Professor, 2014.

Rajaram, Narasimhan, Ph.D. (University of Texas, Austin), B.E. (Anna University, India), Assistant Professor, 2014.

Rao, Raj R., Ph.D. (University of Georgia), M.S. (University of Texas), M.Sc., B.E. (Birla Institute of Technology and Sciences, India), Professor, 2016.

Wolchok, Jeffrey Collins, Ph.D. (University of Utah), M.S., B.S. (University of California at Davis), Associate Professor, 2011.

Civil Engineering (CVEG)

Micah Hale
Head of the Department
4190 Bell Engineering Center
479-575-4954

Department of Civil Engineering Website (<https://civil-engineering.uark.edu/>)

Civil engineering is the oldest of all engineering fields, yet it is as contemporary as the need to provide solutions to today's environmental, geotechnical, structural and transportation problems. The civil engineer plans, designs, builds, and operates projects for the advancement and well-being of society while coordinating and conserving human and natural resources. Civil engineering projects range from small to monumental and include public water systems, buildings, bridges, rail and highway networks, water and wastewater treatment plants, solid and hazardous waste disposal facilities, airports, and soil conservation and flood diversion controls.

The civil engineering profession offers a vast array of opportunities. Civil engineers may work in private employment or with public agencies. They may work indoors in activities such as planning and design, or outdoors in areas such as construction supervision. Employment is possible anywhere in the world.

The objective of the Civil Engineering undergraduate program is to produce graduates who are prepared to pursue:

- Careers in the broad field of civil engineering
- Licensure as a professional engineer
- Advanced education

To fulfill this objective, all students must take courses in geotechnical, environmental, transportation, and structural engineering. Courses are designed to present "real world" applications without sacrificing conceptual and theoretical basics. Students complete design problems in each of these areas; and, as part of the senior year, they participate in two major design projects.

Completion of degree requirements provides graduates with the following learning outcomes:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics

- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Requirements for B.S. in Civil Engineering Elective Courses

Students must select three 3-hour civil engineering elective courses in conference with their adviser. Normally, the civil engineering courses are selected from among the 4000-level elective CVEG courses. Exceptional students may be allowed to choose from the 5000 (graduate-level) course series.

Students must also choose one elective course in science, engineering, technology, or math (STEM) field.

Humanities and social science electives are selected from courses approved by the university which satisfy the University Core general education requirement. Lists of approved electives are on file in the department office.

Civil Engineering Design Electives

Students must complete two of the following four CVEG design project electives: CVEG 4812 Environmental Design Project, CVEG 4822 Geotechnical Design Project, CVEG 4832 Structural Design Project, and CVEG 4842 Transportation Design Project. Each design project elective is associated with a specific design-oriented course. The associated course must be taken at the same time as the design project elective. The associated courses may be taken alone but the design electives cannot.

STEM Electives

Students must also choose one elective course in science, engineering, technology, or math (STEM) from among the following:

CSCE 2004	Programming Foundations I	4
ELEG 3903	Electric Circuits and Machines	3
GNEG 3113	Special Topics-Study Abroad	3
GNEG 3811	Alternating Cooperative Education (must get 3 separate rotations)	1
MEEG 2013	Dynamics	3
MEEG 2403	Thermodynamics	3
MEEG 2703	Computer Methods in Mechanical Engineering	3
GEOS 3023	Introduction to Cartography	3
GEOS 3543	Geospatial Applications and Information Science	3
GEOS 4533	Introduction to Petroleum Geophysics	3

MATH 3083	Linear Algebra	3
MATH 4363	Numerical Analysis	3
Any 3000-level or above science, technology, engineering or math course. (It is recommended that students consult with their adviser when making this selection.)		3

Civil Engineering B.S.C.E. Eight-Semester Degree Program

The Civil Engineering B.S.C.E. program is eligible for freshman students who want to participate in an Eight-Semester Degree Program. See the Eight-Semester Degree Policy (p. 87) for details of the program.

The following section contains the list of courses required for the Bachelor of Science in Civil Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

See the list of university core courses (p. 97) available for engineering students.

Computer Science and Computer Engineering (CSCE)

Xiaoqing "Frank" Liu

Head of the Department

504 J.B. Hunt Center for Academic Excellence

479-575-6197

Department of Computer Science and Computer Engineering Website
(<https://computer-science-and-computer-engineering.uark.edu/>)

The faculty of the Computer Science and Computer Engineering Department is engaged in multidisciplinary academic research, course offerings, and student projects in areas such as: networking, data security, low power chip design, Web search, embedded systems, and graphics.

The educational objectives of the department are to produce graduates who are recruited in a competitive market and make valuable contributions to a wide variety of industries, particularly in computer and information technology; succeed in graduate or professional studies; pursue life-long learning and continued professional development; and undertake leadership roles in their profession, in their communities, and in the global society.

Accreditations

The B.S. in Computer Engineering is accredited by the Engineering Accreditation Commission of ABET ([www. ABET.org](http://www.abet.org)). The B.S. in Computer Science is accredited by the Computing Accreditation Commission of ABET ([www.ABET.org](http://www.abet.org) (<http://www.abet.org/>))

Requirements for B.S. in Computer Engineering

The computer engineering degree has required sequences of courses in both hardware and software aspects of computer applications and design. Since almost all of today's complex systems encompass hardware and software elements, computer engineering graduates must acquire the skills required to design, build, and test complex digital systems. At the advanced level, students are exposed to hands-on experience with open-ended problems with opportunities for research and design.

Humanities and social science electives are selected from the University Core Requirements listed in the Catalog of Studies. To satisfy the University Core, all CSCE students are required to take the following 18 hours of humanities/social science courses:

PHIL 3103	Ethics and the Professions	3
Fine Arts from Category "A"		3
U.S. History or Government		3
Social Science		9

The Undergraduate Handbook has a list of approved basic science, mathematics, and technical electives. Any course not included in these lists requires faculty approval.

The Bachelor of Arts in Computer Science degree has the same educational objectives as the Bachelor of Science degree. However, the course requirements differ greatly to allow students to double major or pursue other interests.

Completion of degree requirements provides graduates with the following learning outcomes:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Degree Program Changes

Students must meet all requirements of their degree programs and are expected to keep informed concerning current regulations, policies, and program requirements in their fields of study. Changes made in the curriculum at a level beyond that at which a student is enrolled might become graduation requirements for that student. Changes made in the curriculum at a level lower than the one at which a student is enrolled are not required of that student. Students should consult their departmental adviser for additional information.

Computer Engineering B.S.Cmp.E. Eight-Semester Degree Program

The following sections contain the list of courses required for the Bachelor of Science in Computer Engineering (B.S.Cmp.E.) with a suggested sequence below.

Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 87) in the Academic Regulations chapter for university requirements of the program.

First Year	Units	
	Fall	Spring

B.S.C.S. in Computer Science

A degree in computer science provides a wide variety of career choices. Computer science graduates can design, implement, or manage computer systems, as well as adapt computers to new applications.

Completion of the degree requirements provides graduates with the ability to:

- Analyze a complex computing problem and to apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

Requirements for B.S.C.S. in Computer Science

Computer science core courses include the fundamentals of programming concepts, data structures, operating systems, algorithms, formal languages, and database management systems.

The Bachelor of Science programs in Computer Engineering and Computer Science culminate in a capstone project completed in two consecutive semesters. In the first semester, students form teams and develop a project proposal. In the second semester, students develop, implement, and present the final project.

Humanities and social science electives are selected from the University Core Requirements listed in the Catalog of Studies. To satisfy the University Core, all CSCE students are required to take the following 18 hours of humanities/social science courses:

PHIL 3103	Ethics and the Professions	3
Fine Arts From Category "A"		3
U.S. History or Government		3
Social Science		9

The Undergraduate Handbook has a list of approved basic science, mathematics, and technical electives. Any course not included in these lists requires faculty approval.

Student Learning Outcomes

- Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions.
- Design, implement, and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline.
- Communicate effectively in a variety of professional contexts.
- Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles.
- Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline.

Degree Program Changes

Students must meet all requirements of their degree programs and are expected to keep informed concerning current regulations, policies, and program requirements in their fields of study. Changes made in the

curriculum at a level beyond that at which a student is enrolled might become graduation requirements for that student. Changes made in the curriculum at a level lower than the one at which a student is enrolled are not required of that student. Students should consult their departmental adviser for additional information.

Requirements for Departmental Honors in Computer Science and Computer Engineering

The Honors Program in Computer Science and Computer Engineering is designed for the superior student and is intended to help the student develop a more comprehensive view of Computer Science and Computer Engineering. The program provides a vehicle for the recognition of achievements beyond the usual course of study. Higher degree distinctions are recommended only in truly exceptional cases and are based upon the candidate's whole program of honors studies. A minimum of 12 hours of honors coursework is required.

The following requirements are necessary for graduation with honors in either the Computer Engineering or Computer Science Bachelor of Science program:

1. The candidate must satisfy the requirements set forth by the College of Engineering.
2. The student must obtain at least a 3.50 grade-point average in required Computer Engineering and/or Computer Science courses.

3. The student must complete 6 hours of Honors credit in the major, which includes 3 hours of Honors Thesis taken as successive semesters of CSCE 491VH and 3 hours of CSCE coursework.

Andrews, David, Ph.D. (Syracuse University), M.S., B.S.E.E. (University of Missouri-Columbia), Professor, 2008.

Beavers, M. Gordon, Ph.D. (Indiana University at Bloomington), M.A., B.A. (University of Texas at Austin), Associate Professor, 1999.

Bobda, Christophe, Ph.D., M.S. (University of Paderborn, Germany), B.S. (University of Yaounde, Cameroon), Professor, 2010.

Di, Jia, Ph.D. (University of Central Florida), M.S., B.S. (Tsinghua University), Professor, 2004.

Gashler, Michael S., Ph.D., M.S., B.S. (Brigham Young University), Assistant Professor, 2012.

Gauch, Susan E., Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen's University, Canada), Professor, 2007.

Gauch, John Michael, Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen's University, Canada), Professor, 2008.

Huang, Miaoqing, Ph.D. (George Washington University), B.S. (Fudan University), Associate Professor, 2010.

Li, Wing Ning, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (University of Iowa), Professor, 1989.

Li, Qinghua, Ph.D. (Pennsylvania State University), M.S. (Tsinghua University), B.E. (Xi'an Jiaotong University), Assistant Professor, 2013.

Liu, Xiaoqing Frank, Ph.D. (Texas A&M University), M.S. (Southeast University, China), B.S. (National University of Defense Technology, China), Professor, 2015.

Luu, Khoa, Ph.D. (Concordia University), Assistant Professor, 2018.

Moustafa, Rida, Ph.D., M.S. (George Mason University), B.S. (Zagazig University, Egypt), Visiting Lecturer, 2015.

Nelson, Alexander H., Ph.D. (University of Maryland), M.S., B.S. (University of Arkansas), Assistant Professor, 2017.

Panda, Brajendra Nath, Ph.D. (North Dakota St. University), M.S. (Utkal University, India), Professor, 2001.

Parkerson, Pat, Ph.D., B.S. (University of Arkansas), Associate Professor, 1990.

Patitz, Matthew J., Ph.D., M.S., B.S. (Iowa State University), Associate Professor, 2012.

Peng, Yarui, Ph.D., M.S. (Georgia Institute of Technology), B.S. (Tsinghua University), Assistant Professor, 2017.

Thompson, Dale R., Ph.D. (North Carolina State University), M.S., B.S. (Mississippi State University), Associate Professor, 2000.

Wu, Xintao, Ph.D. (George Mason University), M.E. (Chinese Academy of Space Technology), B.S. (University of Science and Technology), Professor, 2014.

Data Analytics (DATA)

A minor in Data Analytics is offered through the Department of Industrial Engineering in the College of Engineering.

Requirements for the minor in Data Analytics: The minor requires completion of 15-17 credits of coursework, including:

One course from Applied Statistics and Math Modeling group	3
INEG 2333 Applied Probability and Statistics for Engineers II	
ELEG 3143 Probability & Stochastic Processes	
STAT 2023 Biostatistics	
STAT 3013 Introduction to Probability	
Two courses from Computing and Informatics group	6-8
CSCE 2004 Programming Foundations I	

CSCE 2014	Programming Foundations II
INEG 4683	Decision Support in Industrial Engineering
INEG 4833	Introduction to Database Concepts for Industrial Engineers
ISYS 2263	Principles of Information Systems
STAT 4003	Statistical Methods
STAT 4001L	Statistics Methods Laboratory
Two courses from the Analytics group	6
ECON 4743	Introduction to Econometrics
ECON 4753	Forecasting
ISYS 4193	Business Analytics and Visualization
ISYS 4293	Business Intelligence
STAT 4333	Analysis of Categorical Responses
Total Hours	15-17

Electrical Engineering (ELEG)

Juan Carlos Balda
Head of Department
3217 Bell Engineering Center
479-575-3009

Department of Electrical Engineering Website (<http://electrical-engineering.uark.edu/>)

Electrical engineering is a professional engineering discipline that in its broader sense covers the study and application of electricity, electronics and electromagnetism. Electrical engineers are in charge of designing and utilizing electrical and electronic components, integrated circuits and computer chips, and electronic assemblies to benefit mankind. Fields of electrical engineering include analog and mixed-signal circuit design/test, biomedical, communications, computer hardware and digital circuit design, control systems, electronic packaging, embedded systems design, microwave and radar engineering, nanophotonics, nanotechnology/microelectronics/optoelectronics, pattern recognition and artificial intelligence, power electronics, and renewable energy/power.

The electrical engineering graduate is at the forefront of technologies leading to accelerated use of electric power, applications of real time embedded control systems for smart highways, smart vehicles and smart gadgets, global communications, the dominating influence of the computer and electronics on modern society, the use of electronic equipment for medical diagnosis, the use of wireless chemical and biological nanosensors for hazard detection, the miniaturization of electronics, microwave and optical technology for national defense, and a host of other developments. Therefore, the use of electrical and electronic equipment has spread into such diverse areas as agricultural production, automobiles, computer hardware and networks, health care, information technology, manufacturing, marketing, recreation, renewable energy resources, outer space and underwater exploration, transportation, and many others. As a result, electrical engineering is the largest of all scientific disciplines and assures a continuing demand for electrical engineering graduates throughout private industry and government.

The University of Arkansas, the state land-grant university, is a nationally competitive, student-centered, research university serving Arkansas and the world. As such, the department's mission is education, research, and service. Hence, the electrical engineering program is designed to offer a high-quality course of instruction involving classroom, laboratory, and extracurricular activities that results in graduates qualified and prepared to meet the demands of a professional career in the present and future work

places as well as to assume a responsible role of leadership in a complex technological society.

Completion of the degree requirements provides graduates with the following learning outcomes:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The department also actively participates in the Honors Program to challenge superior students with a more in-depth academic program and research experience. The Honors program enables students to work more closely with faculty members and other students in a team environment. Please see the requirements given below.

The educational mission of the department is conducted through both the undergraduate and graduate programs.

Accreditation

The Electrical Engineering Department offers undergraduate, graduate, and doctoral degrees. The Department has offered a BSEE degree for over 100 years, and has been continuously accredited by the Engineering Accreditation Commission of ABET. For more information visit www.abet.org (<http://www.abet.org/>).

Graduate Program in Electrical Engineering

The graduate program offers a Master of Science degree in Electrical Engineering (on campus and online) and a Doctor of Philosophy degree in Engineering. The graduate program provides additional instruction and hands-on experience beyond the undergraduate level, and produces graduates who are prepared to promptly address critical issues and assume advanced positions in the profession, including management, design, teaching, research and development.

The research mission of the department is conducted mainly through the graduate program. Internal and external funded research projects serve to:

1. Discover new knowledge, address technical problems, and develop new electrical/electronic technologies;
2. Provide the tools and resources which keep the faculty at the cutting edge of electrical engineering;

3. Provide financial support for graduate students and gifted undergraduate students; and
4. Improve the quality of life for citizens of Arkansas and the world.

The graduate program supports the undergraduate program by giving top undergraduate students access to research laboratories with state-of-the-art equipment and software. Topics covered in graduate courses often migrate into senior undergraduate technical elective courses and eventually into required undergraduate courses.

Departmental Service Mission

Faculty, administrators, and staff work to provide the education necessary to establish the best foundation for electrical engineering students at all degree levels, and prepare them to be competitive local and national leaders, skillful at undertaking the current and future challenges facing our world. Everyone is encouraged to provide services to both the community and the profession. Hence, they are active in local, state, national, and international professional and service organizations, as well as public and private schools involving grades K-12

Degree Program Changes

A student must meet all requirements of the degree program and is expected to stay informed concerning current regulations, policies, and program requirements in a chosen field of study. Changes made in the electrical engineering curriculum at a level beyond that at which a student is enrolled may become graduation requirements for that student. Changes made in the curriculum at a level lower than the one at which a student is enrolled are not normally required for that student. Students should consult their adviser for additional information.

Potential Minors

Although ELEG students can pursue any minor they desire, there are several minors that require a minimal number of extra courses, such as Computer Science, Mathematics, Microelectronics-Photonics, Physics, etc. Students are advised to review the specific rules pertaining to the minor of interest in the section of the UA Catalog of Studies corresponding to the department granting that minor.

Undergraduate Program in Electrical Engineering

The educational objectives for the undergraduate program, which leads to a Bachelor of Science degree in electrical engineering, are to produce graduates who:

1. Are recruited in a competitive market and valued as reliable and competent employees by a wide variety of industries, in particular, electrical and computer engineering industries;
2. Succeed, if pursued, in graduate studies such as engineering, science, law, medicine, business, and other professions;
3. Understand the need for life-long learning and continued professional development for a successful and rewarding career; and
4. Accept responsibility for leadership roles in their profession, in their communities, and in the global society.

Therefore, the electrical engineering curriculum is designed to provide students with knowledge of scientific principles and methods of engineering analysis to form a solid foundation for a career in design, research and development, manufacturing and processing, measurement and characterization, or management. Students progressively build their design experience throughout the curriculum and demonstrate this ability in the senior electrical engineering design laboratories. The curriculum

also introduces students to subjects in the humanities, social sciences, and ethics so they may better understand the interaction of technology and society.

The electrical engineering curriculum is divided into three phases. The first year concentrates on the development of a sound understanding of basic sciences and mathematics. The second and third years further develop scientific principles and cover the basic core of electrical engineering. The fourth year is composed primarily of senior-level elective courses. At this time, the students in consultation with their advisers may choose classes related to one or more of the major areas of electrical engineering detailed (e.g., analog and mixed-signal circuit design/test, biomedical, communications, computer hardware and digital circuit design, control systems, electronic packaging, embedded systems design, microwave and radar engineering, nanophotonics, nanotechnology/microelectronics/optoelectronics, pattern recognition and artificial intelligence, power electronics, and renewable energy and power). This final year permits the student to tailor a program suited to her or his individual career objectives. The graduation requirement in electrical engineering is 125 semester hours as given below.

Recommended Technical Studies

Students in electrical engineering are required to complete 21 semester hours of technical electives of which a minimum of 9 semester hours must be 4000- or 5000-level electrical engineering elective courses. A student may select the remaining 12 semester hours from 4000- or 5000-level electrical engineering elective courses or upper-division technical courses in mathematics, engineering, and the sciences with the approval of an adviser. One of these courses may be an approved Math/Science Elective and another may be an approved Engineering Science Elective. History and social science courses taught by Math and Science departments are not eligible for technical elective credit. Not more than 6 semester hours total of ELEG 488V and ELEG 400VH may be credited toward technical electives. Students who have taken full-time co-op experiences under GNEG 3811, and whose grades in these courses were A or B, may get credit for not more than three hours of non-ELEG technical electives if the work performed is of comparable quality to a technical elective; consult with the Department Co-op Coordinator. Descriptions of all electrical engineering courses are in the Course Descriptions chapter of this Catalog of Studies. The schedule of technical electives offered in a given semester is determined the previous semester since the selection depends on a number of varying factors such as student interest in a particular topic, the importance of a particular technology for the student's professional career, and teaching faculty availability.

Electrical Engineering B.S.E.E. Eight-Semester Degree Program

The following section contains the list of courses required for the Bachelor of Science in Electrical Engineering and a suggested eight-semester sequence. See the Eight-Semester Degree Policy (p. 87) for more details. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites.

First Year	Units	
	Fall	Spring
GNEG 1111 Introduction to Engineering I	1	
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)	3	
MATH 2554 Calculus I (ACTS Equivalency = MATH 2405)	4	

CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)	3	
PHYS 2054 University Physics I (ACTS Equivalency = PHYS 2034)	4	
GNEG 1121 Introduction to Engineering II		1
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)		3
MATH 2564 Calculus II (ACTS Equivalency = MATH 2505)		4
Select one of the following:		3
HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113)		
HIST 2013 History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123)		
PLSC 2003 American National Government (ACTS Equivalency = PLSC 2003)		
Freshman Science Elective II*		4
Year Total:	15	15

Second Year	Units	
	Fall	Spring
ELEG 2104 Electric Circuits I	4	
ELEG 2904 Digital Design	4	
Sophomore Science Elective**	4	
MATH 2584 Elementary Differential Equations	4	
CSCE 2004 Programming Foundations I		4
ELEG 2114 Electric Circuits II		4
MATH 2574 Calculus III (ACTS Equivalency = MATH 2603)		4
Humanities Elective (from University/State Core List)		3
Year Total:	16	15

Third Year	Units	
	Fall	Spring
ELEG 3124 System & Signal Analysis	4	
ELEG 3214 Electronics I	4	
ELEG 3924 Microprocessor Systems Design	4	
ELEG 3704 Applied Electromagnetics	4	
ELEG 3143 Probability & Stochastic Processes		3
ELEG 3224 Electronics II		4
ELEG 3304 Energy Systems		4
Social Science Elective (from University/State Core List)		3
Math/Science/Technical Elective		3
Year Total:	16	17

Fourth Year	Units	
	Fall	Spring
Engineering Science/Technical Elective***	3	
Two Electrical Engineering Technical Elective****	6	
ELEG 4063 Electrical Engineering Design I	3	
Select one of the following:	3	

ECON 2013 Principles of Macroeconomics (ACTS Equivalency = ECON 2103)	
ECON 2023 Principles of Microeconomics (ACTS Equivalency = ECON 2203)	
ECON 2143 Basic Economics: Theory and Practice	
Electrical Engineering Technical Elective****	3
ELEG 4071 Electrical Engineering Design II	1
Two Technical Elective	6
Social Science Elective (from University/State Core List)	3
Fine Arts Elective (from University Core)	3
Year Total:	15 16
<hr/>	
Total Units in Sequence:	125

- * Freshman Science Elective -CHEM 1123/CHEM 1121L University Chemistry II or PHYS 2074 University Physics II (ACTS Equivalency = PHYS 2044 Lecture)
- ** If CHEM 1123/CHEM 1121L University Chemistry II was taken for Freshman Science Elective, then PHYS 2074 University Physics II. If PHYS 2074 University Physics II was taken for the Freshman Science Elective, then CHEM 1123/CHEM 1121 University Chemistry II or BIOL 1543/BIOL 1541L Principles of Biology or BIOL 2213/BIOL 2211L Human Physiology, PHYS 2094 University Physics III
- *** Engineering Science/Technical Elective: MEEG 2103 Introduction to Machine Analysis, MEEG 2303 Introduction to Materials, MEEG 2403 Thermodynamics, CHEG 2313 Thermodynamics of Single-Component Systems, INEG 2413 Engineering Economic Analysis (Sp, Fa), or another Technical Elective
- **** CSCE 4114, CSCE 4613, CSCE 4233 are approved ELEG Technical Electives for students pursuing a dual ELEG / CSCE undergraduate degree.

Students should become very familiar with the Academic Regulations chapter for university requirements that apply to the electrical engineering program as well as the College of Engineering requirements (in particular the "D rule" and the "Transfer of Credit" for courses taken at another institution). In addition to these graduation requirements, candidates for an electrical engineering degree must have earned a grade-point average of no less than 2.00 on all ELEG courses.

Electrical Engineering Honors Program

To graduate with Honors in electrical engineering, students must be a member of the Honors College, have a minimum cumulative GPA of 3.50, and complete a minimum of 12 hours of honors credit of which 6 hours must be Electrical Engineering Honors courses that include the following: ELEG 4063H Honors Electrical Engineering Design I, ELEG 4071H Honors Electrical Engineering Design II, and ELEG 400VH Honors Senior Thesis. Special problems credit hours (ELEG 488V) will not be counted in the requirement for graduation with Honors in Electrical Engineering.

Electrical Engineering Honors Courses:

ELEG 3124H, ELEG 3143H, ELEG 3214H, ELEG 3224H, ELEG 3304H, ELEG 3704H, ELEG 3924H: Required ELEG junior courses with Honors section (all junior required courses include honors sections).

ELEG 4061H Honors Electrical Engineering Design I (Sp, Fa)

ELEG 4073H Honors Electrical Engineering Design II

ELEG 400VH Honors Senior Thesis (Sp, Su, Fa)

ELEG 4203H, ELEG 4233H, ELEG 4403H, ELEG 4503H, ELEG 4703H, ELEG 4783H, ELEG 4914H, ELEG 4963H: ELEG technical elective courses that have an Honors section (Please check the offering of these Honors Sections for a particular semester).

ELEG 5000 or above: Any graduate level course.

Ang, Simon S., Ph.D. (Southern Methodist University), M.S.E.E. (Georgia Institute of Technology), B.S.E.E. (University of Arkansas), Professor, 1988.

Balda, Juan Carlos, Ph.D. (University of Natal), B.S. (Universidad Nacional del Sur), University Professor, 1989.

Chen, Zhong, Ph.D. (North Carolina State University), M.Eng. (National University of Singapore), B.S. (Zhejiang University), Assistant Professor, 2015.

Dix, Jeffrey, Ph.D., M.S., B.S.E.E., (University of Tennessee, Knoxville), Assistant Professor, 2018.

El-Ghazaly, Samir M., Ph.D. (University of Texas at Austin), M.S., B.S. (Cairo University), Distinguished Professor, 2007.

El-Shenawee, Magda O., Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Assiut University, Egypt), Professor, 2001.

Luo, Fang, Ph.D. (Huazhong University of Science and Technology), Assistant Professor, 2017.

Manasreh, Omar, Ph.D. (University of Arkansas), M.S. (University of Puerto Rico-Rio Piedras), B.S. (University of Jordan), Professor, 2003.

Mantooth, Alan, Ph.D. (Georgia Institute of Technology), M.S., B.S. (University of Arkansas), Distinguished Professor, 1998.

Martin, Terry W., Ph.D., M.S.E.E., B.S.E.E. (University of Arkansas), Professor, 1990.

McCann, Roy A., Ph.D. (University of Dayton), M.S.E.E., B.S.E.E. (University of Illinois), Professor, 2003.

Naseem, Hameed A., Ph.D., M.S. (Virginia Polytechnic State University), M.Sc. (Panjab University), University Professor, 1985.

Saunders, Robert F., M.S.E.E., M.S. (University of Arkansas), Instructor, 2012.

Spiesshoefer, Silke, Ph.D., M.S.E.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, 2014.

Ware, Morgan, Ph.D. (North Carolina State University), B.S. (Florida State University), Assistant Professor, 2005.

Wu, Jingxian, Ph.D. (University of Missouri-Columbia), M.S. (Tsinghua University), B.S. (Beijing University of Aeronautics and Astronautics), Associate Professor, 2008.

Yu, Fisher, Ph.D. (Arizona State University), M.S., B.S. (Peking University), Associate Professor, 2008.

Zhao, Yue, Ph.D. (University of Nebraska-Lincoln), B.S. (Beijing University), Assistant Professor, 2015.

Industrial Engineering (INEG)

Ed Pohl

Head of the Department

4207 Bell Engineering Center

479-575-3156

Industrial Engineering Website (<http://www.ineg.uark.edu/>)

The mission of the industrial engineering department at the University of Arkansas is to be a nationally competitive, student-centered industrial engineering program serving Arkansas and the world through undergraduate and graduate studies and leading-edge research programs.

Industrial engineers are concerned with improving organized activity. The physical arrangement of people, equipment, and material significantly influences the effectiveness of any organization – whether the organization is industrial, governmental, or commercial.

Today's industrial engineers develop applications of new processing automation and control technology; install data processing systems, performance measures and standards, job evaluation and wage and salary programs; research new products and product applications; devise ways to improve productivity through application of technology and human factors; select operating processes and methods to accomplish a given task using proper tools and equipment; design facilities, management systems, operations procedures, storage systems; improve allocation of resources, planning and control systems for distribution of goods and services, production, inventory, quality and plant maintenance; enhance plant environment and the quality of working life; evaluate reliability and quality performance; implement office systems, procedures, and policies; analyze complex business problems through operations research; conduct long-range organization studies, plant location surveys, system effectiveness studies; and study potential markets for goods and services, raw material sources, labor supply, energy resources, financing and taxes.

Industrial engineers integrate engineering skills with mathematics and computer science tools, providing systematic ways to maximize productivity and quality while minimizing time and cost.

Completion of the degree requirements provides graduates with the following learning outcomes:

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

The goal of the Industrial Engineering Undergraduate Program at the University of Arkansas is to prepare men and women for professional careers and graduate studies in Industrial Engineering. We provide a foundation in mathematics, science, humanities and social sciences, engineering science, and engineering design to produce Industrial

Engineers with the intellectual, technical, and professional competence to develop, implement, and manage industrial engineering solutions to complex problems in industry, government, and society.

The program's objectives have been developed to address the needs of the industrial engineering constituencies and to be consistent with and supportive of the department's mission and programmatic goals. The IE program educational objectives represent and describe the expected accomplishments of graduates resulting from participation within the program within the first few years after graduation. The program's objectives have been developed to address the needs of departmental constituencies and to be consistent with and support the mission and programmatic goals.

Within 3-5 years of graduation, graduates of the U of A undergraduate program in industrial engineering will have:

1. Successfully applied core industrial engineering knowledge and skills for industrial or public sector organizations.
2. Successfully pursued advanced professional degrees, graduate studies in industrial engineering, professional training, or engineering certification.
3. Demonstrated professional and intellectual growth as managers and leaders in industrial engineering, society, and their communities.

Requirements for B.S. in Industrial Engineering

The total graduation requirement in industrial engineering is 126 hours. For further information please visit the departmental website (<http://www.ineg.uark.edu/>).

Humanities/Social Science Electives

Although any elective included on the approved University Core humanities/social science list may be selected, PSYC 2003 General Psychology (ACTS Equivalency = PSYC 1103) is recommended for industrial engineers.

Science Electives

The approved list of science electives is available in the industrial engineering departmental office.

Technical Electives

The purpose of technical electives is to provide students with the opportunity to expand their education within a particular area of interest. The approved list of technical electives is available in the industrial engineering department. At least 12 hours must be selected from INEG courses.

Each student is responsible for his or her technical elective program. Students may seek specific advice on technical elective selections from their adviser. Courses satisfying technical elective requirements cannot fulfill more than one industrial engineering degree requirement.

A minimum of 18 credit hours from the approved technical elective course list must be taken to satisfy technical elective requirements within the Industrial Engineering program. At least 12 of these 18 credit hours must be chosen from INEG courses. No more than 3 of these credits may be based in individual/independent study, no more than 3 of these credits may be based in honors thesis, and no more than 3 of these credits may be based in cooperative education.

Approved Technical Elective Course List

- Any BENG, BIOL, BMEG, CHEG, CHEM, CVEG, CSCE, ELEG, GNEG, INEG, MATH, MEEG, and PHYS course that is at the 3000 level or above and not required for the B.S.I.E. is approved.
Exceptions are:
 - GNEG 3801 is not approved.
 - GNEG 3811 is approved only if the student has completed at least three semesters of GNEG 3811.
 - CVEG 4513 is not approved if the student is also seeking technical elective credit for INEG 4443.
 - MATH 3013 and MATH 3133 are not approved.
 - PHYS 3603, PHYS 4103, and PHYS 4203 are not approved.
- Courses at the 3000 level or above that are explicitly listed (not part of a blanket statement like "... 3000-to-4000-level ...") in the Catalog of Studies under Minors for Non-Business Students (p. 445) are approved. Exceptions are:
 - ISYS 3393 is not approved if the student is also seeking technical elective credit for INEG 4683
- Courses at the 3000 level or above that are explicitly listed on the Sustainability Minor Courses website (<http://sustainability.uark.edu/academics/minor/>) under Natural, Managed, or Built Systems are approved.
- Additional approved courses are CSCE 2014, EXSC 3153, and EXSC 3353.

Industrial Engineering B.S.I.E. Eight-Semester Degree Program

The following section contains the list of courses required for the Bachelor of Science in Industrial Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 87) in the Academic Regulations chapter for university requirements of the program.

At least 12 hours of technical electives must be selected from INEG courses.

First Year	Units	
	Fall	Spring
MATH 2554 Calculus I (ACTS Equivalency = MATH 2405)	4	
CHEM 1103 University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture)	3	
PHYS 2054 University Physics I (ACTS Equivalency = PHYS 2034)	4	
GNEG 1111 Introduction to Engineering I	1	
ENGL 1013 Composition I (ACTS Equivalency = ENGL 1013)	3	
MATH 2564 Calculus II (ACTS Equivalency = MATH 2505)		4
Freshman Science Elective ^{1,5}		4
Select one of the following:		3
HIST 2003 History of the American People to 1877 (ACTS Equivalency = HIST 2113)		

HIST 2003 History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123)

PLSC 2003 American National Government (ACTS Equivalency = PLSC 2003)

GNEG 1121 Introduction to Engineering II		1
ENGL 1023 Composition II (ACTS Equivalency = ENGL 1023)		3
Year Total:	15	15

Second Year	Units	
	Fall	Spring
INEG 2001 Industrial Engineering Seminar	1	
INEG 2103 Introduction to Industrial Engineering	3	
INEG 2313 Applied Probability and Statistics for Engineers I	3

ELEG 3903 Electric Circuits and Machines	3	
Fine Arts (from University/State Core List)	3	
Technical Elective ³	3	
INEG 3714 Work Methods and Ergonomics	4	
INEG 3613 Introduction to Operations Research		3
INEG 3513 Manufacturing Processes		3
Select one option from the following:		3
ECON 2143 Basic Economics: Theory and Practice		
ECON 2013 Principles of Macroeconomics (ACTS Equivalency = ECON 2103) & ECON 2023 Principles of Microeconomics (ACTS Equivalency = ECON 2203)		
Technical Elective		3
MEEG 2003 Statics		3
Year Total:	16	15

Fourth Year	Units	
	Fall	Spring
INEG 4433 Systems Engineering and Management	3	
INEG 4553 Production Planning and Control	3	
Two Technical Elective ³	6	
Social Science (from University/State Core List) ⁴	3	

INEG 4911 Industrial Engineering Capstone Experience I	1	
INEG 4923 Industrial Engineering Capstone Experience II	3	
Two Technical Electives ³	6	
Humanities (from University/State Core List) ⁴	3	
Social Science (from University/State Core List) ⁴	3	
Year Total:	16	15
Total Units in Sequence:		126

- ¹ CHEM 1123/CHEM 1121L University Chemistry II or PHYS 2074 University Physics II
- ² If the student selected CHEM 1123/CHEM 1121L as their freshman science elective then this course must be PHYS 2074 University Physics II; otherwise see the approved list of IE science electives.
- ³ The purpose of technical electives is to provide students with the opportunity to expand their education along lines of particular interest to them. The approved list of technical electives is available in the industrial engineering department. At least 12 hours must be selected from INEG courses.
- ⁴ Although any elective included on the humanities/social science list may be selected, PSYC 2003 General Psychology is recommended for industrial engineers.
- ⁵ The approved list of science electives is available in the industrial engineering departmental office.

Minor in Data Analytics

Requirements for the minor in Data Analytics: The minor requires completion of 15-17 credits of coursework, including:

One course from Applied Statistics and Math Modeling group	3
INEG 2333 Applied Probability and Statistics for Engineers II	
ELEG 3143 Probability & Stochastic Processes	
STAT 2023 Biostatistics	
STAT 3013 Introduction to Probability	
Two courses from Computing and Informatics group	6-8
CSCE 2004 Programming Foundations I	
CSCE 2014 Programming Foundations II	
INEG 4683 Decision Support in Industrial Engineering	
INEG 4833 Introduction to Database Concepts for Industrial Engineers	
ISYS 2263 Principles of Information Systems	
STAT 4003 Statistical Methods	
STAT 4001L Statistics Methods Laboratory	
Two courses from the Analytics group	6
ECON 4743 Introduction to Econometrics	
ECON 4753 Forecasting	
ISYS 4193 Business Analytics and Visualization	
ISYS 4293 Business Intelligence	
STAT 4333 Analysis of Categorical Responses	
Total Hours	15-17

Cassady, Richard, Ph.D., M.S.I.S.E., B.S.I.S.E. (Virginia Polytechnic Institute and State University), Professor, 2000.

Chaovalitwongse, Wanpracha Art, Ph.D., M.S. (University of Florida), B.Eng. (King Mongkut Institute of Technology, Ladkrabang, Thailand), Professor, 2016.

Chimka, Justin Robert, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Associate Professor, 2002.

Eksioglu, Sandra, Ph.D. (University of Florida), M.S.E.M.S. (Mediterranean Agronomic Institute of Chania), B.S.B.A. (University of Tirana), Professor, 2019.

Eksioglu, Burak, Ph.D. (University of Florida), M.S.E.B.M. (University of Warwick), B.S.I.E. (Bogazici University), Professor, 2019.

English, John R., Ph.D. (Oklahoma State University) P.E., M.S.O.R., B.S.E.E. (University of Arkansas), Professor, 1991.

Liao, Haitao, Ph.D., M.S., M.S.I.S.E. (Rutgers University), B.S.E.E. (Beijing Institute of Technology), Professor, 2015.

Liu, Xiao, Ph.D. (National University of Singapore), B.S.M.E. (Harbin Institute of Technology, China), Assistant Professor, 2017.

Milburn, Ashlea R., Ph.D. (Georgia Institute of Technology), M.S.I.E. (Virginia Polytechnic Institute and State University), B.S.I.E. (University of Arkansas), Associate Professor, 2010.

Nachtmann, Heather, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Professor, 2000.

Needy, Kim LaScola, Ph.D. (Wichita State University), P.E., M.S.I.E., B.S.I.E. (University of Pittsburgh), Professor, 2008.

Nurre, Sarah, Ph.D., M.Eng., B.S. (Rensselaer Polytechnic Institute), Assistant Professor, 2015.

Parnell, Gregory S., Ph.D. (Stanford University), M.S. (University of Southern California), M.E.I.S.E. (University of Florida), B.S. (University of New York at Buffalo), Research Professor, 2013.

Pierson, Harry A., Ph.D. (The Ohio State University), M.S.E.M., B.S.M.E. (University of Missouri, Rolla), Assistant Professor, 2014.

Pohl, Edward A., Ph.D., M.S.R.E. (University of Arizona), M.S.S.E. (Air Force Institute of Technology), M.S.E.M. (University of Dayton), B.S.E.E. (Boston University), Professor, 2004.

Pohl, Letitia, Ph.D. (University of Arkansas), M.S.S.E. (Air Force Institute of Technology), B.S.M.E. (Tulane University), Clinical Assistant Professor, 2013.

Rainwater, Chase E., Ph.D. (University of Florida), B.S.I.E. (University of Arkansas), Associate Professor, 2009.

Rossetti, Manuel D., Ph.D., P.E., M.S.I.S. (The Ohio State University), B.S.I.E. (University of Cincinnati), Professor, 1999.

Sullivan, Kelly M., Ph.D. (University of Florida), M.S.I.E., B.S.I.E. (University of Arkansas), Assistant Professor, 2012.

White, John A., Ph.D. (The Ohio State University), M.S.I.E. (Virginia Polytechnic Institute and State University), B.S.I.E. (University of Arkansas), Distinguished Professor, 1997.

Zhang, Shengfan, Ph.D., M.I.E. (North Carolina State University), B.M. (Fudan University, Shanghai), Assistant Professor, 2011.

Department of Mechanical Engineering Website (<http://mechanical-engineering.uark.edu>)

The mechanical engineering program is designed to offer a high-quality course of instruction involving classroom, laboratory, and extracurricular activities that results in graduates who are qualified and prepared to meet the demands of a professional career in the present and future work place and be able to assume a responsible place of leadership in a complex technological society.

The mission of the department is three-fold:

- Teaching — To provide a high-quality educational experience for undergraduate and graduate students that enables them to become leaders in their chosen professions.
- Research — To create, explore, and develop innovations in engineering and science through undergraduate and graduate research.
- Service — To provide beneficial service to the local, state, national, and international industries and communities via educational, technical, entrepreneurial, and professional activities.

The courses offered in mechanical engineering provide the student with a broad understanding of fundamental scientific principles that serve as a background for many fields of specialization. The undergraduate curriculum is designed to stress basic engineering principles and to assist in developing creative thinking. Emphasis is placed on the science and art of designing machines and systems, of converting energy into useful forms, and developing a basic understanding of engineering mechanics.

Completion of the degree requirements provides graduates with the following learning outcomes and ability to:

- Identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- Communicate effectively with a range of audiences
- Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- Acquire and apply new knowledge as needed, using appropriate learning strategies.

The faculty of the Biological Engineering program seeks to provide a challenging technical education in a safe, secure and inclusive learning environment that promotes a desire for service and prepares graduates to:

- Successfully practice engineering involving the design and management of sustainable water, food, energy and related biological systems,
- Make ethical, valuable and sustained contributions that benefit employers, communities, Arkansas and the world, and
- Succeed in graduate education or continuing professional development, as needed for professional growth and licensure.

Requirements for B.S. in Mechanical Engineering

Requirements for the B.S.M.E.: The Bachelor of Science in Mechanical Engineering curriculum includes, in addition to the required 18 hours of history, government, fine arts/humanities/social science elective courses, a total of 12 hours of technical and science electives. A student must select all electives with the approval of his or her adviser. The fine arts/humanities/social science electives must be selected from the University Core (p. 97) in the Academic Regulations chapter for university requirements for the program. It is expected that technical and science electives will be chosen to provide a coherent program within one or more areas of specialization or options available to mechanical engineers. Traditional areas of specialization are available in mechanical systems, materials, and energy systems. Other areas include pre-medical, management, and aerospace.

The first-year curriculum is essentially the same as prescribed for all engineering freshmen. Students entering the mechanical engineering program are required to take two, four hour laboratory based science electives. One of the four hour science electives must be PHYS 2074. The other four hour science elective must be chosen from one of the following:

ASTR 2003 & ASTR 2001L	Survey of the Universe (ACTS Equivalency = PHSC 1204 Lecture) and Survey of the Universe Laboratory (ACTS Equivalency = PHSC 1204 Lab)	4
BIOL 1543 & BIOL 1541L	Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)	4
BIOL 2213 & BIOL 2211L	Human Physiology (ACTS Equivalency = BIOL 2414 Lecture) and Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab)	4
CHEM 1103 & CHEM 1101L	University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture) and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)	4
GEOS 1113 & GEOS 1111L	General Geology (ACTS Equivalency = GEOL 1114 Lecture) and General Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab)	4
PHYS 2094	University Physics III	4

PHYS 3603 & PHYS 360VL	Introduction to Modern Physics and Modern Physics Laboratory	4

Fine Arts/Humanities/Social Science Electives

Students must follow the University Core curriculum in selecting their history, government, fine arts, humanities, and social science

electives. Each student in the College of Engineering is required to complete 18 semester hours in the humanities and social sciences.

The courses taken must include:

HIST 2003	History of the American People to 1877 (ACTS Equivalency = HIST 2113)	3
or HIST 2013	History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123)	
or PLSC 2003	American National Government (ACTS Equivalency = PLSC 2003)	
ECON 2143	Basic Economics: Theory and Practice	3
or ECON 2013	Principles of Macroeconomics (ACTS Equivalency = ECON 2103)	
PHIL 3103	Ethics and the Professions	3

The remaining three courses must be selected from an approved list.

The humanities and social sciences chart from the University Core (p. 97) page should be used as a guide for selecting these courses.

Mechanical Engineering Concentration Electives

The purpose of technical/science electives is to provide students with the opportunity to expand their education along lines of particular interest to them.

As part of the mechanical engineering curriculum, students are required to complete 12 hours of technical/science electives. These electives can be categorized into three groups: Mechanical Engineering Electives, Other Engineering Electives, and Science-Math Electives.

1. Mechanical Engineering Electives. All mechanical engineering courses at or above the 4000 level not already required in the BSME curriculum are acceptable. Special Project courses, MEEG 491V, are allowed as electives only after approval in advance by the department head.
2. Other Engineering Electives. The rules governing the selection of engineering electives are:
Engineering or Computer Science/Computer Engineering courses at or above the 3000 level not already required in the BSME curriculum are allowed as technical-science electives. Courses with content remedial to required courses are not allowed, and courses considered redundant to required courses are not allowed.
3. Science-Math Electives. The approved list of science and math courses accepted as technical-science electives is available in the Mechanical Engineering department office.

Mechanical Engineering B.S.M.E. Eight-Semester Degree Program

The following section contains the list of courses required for the Bachelor of Science in Mechanical Engineering degree and a suggested sequence. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students interested in obtaining a sequencing schedule of courses may contact the Mechanical Engineering office.

Students wishing to follow the eight-semester degree plan should see the Eight-Semester Degree Policy (p. 87) in the Academic Regulations chapter for university requirements of the program.

Either the science elective in the second semester of Year 1 or the science elective in the first semester of Year 2 must include PHYS 2074. Other science electives should be chosen from an approved list. See the mechanical engineering office.

First Year		Units	
		Fall	Spring

B.S. in Mechanical Engineering with Aerospace Concentration

Requirements for the B.S.M.E.: The Bachelor of Science in Mechanical Engineering curriculum includes, in addition to the required 18 hours of history, government, fine arts/humanities/social science elective courses, a total of 12 hours of technical and science electives. A student must select all electives with the approval of his or her adviser. The fine arts/humanities/social science electives must be selected from the University Core (p. 97) in the Academic Regulations chapter for university requirements for the program. It is expected that technical and science electives will be chosen to provide a coherent program within one or more areas of specialization or options available to mechanical engineers. Traditional areas of specialization are available in mechanical systems, materials, and energy systems. Other areas include pre-medical, management, and aerospace.

The first-year curriculum is essentially the same as prescribed for all engineering freshmen. Students entering the mechanical engineering program are required to take two, four hour laboratory based science electives. One of the four hour science electives must be PHYS 2074. The other four hour science elective must be chosen from one of the following:

ASTR 2003 & ASTR 2001L	Survey of the Universe (ACTS Equivalency = PHSC 1204 Lecture) and Survey of the Universe Laboratory (ACTS Equivalency = PHSC 1204 Lab)	4
---------------------------	---	---

BIOL 1543 & BIOL 1541L	Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture) and Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab)	4
BIOL 2213 & BIOL 2211L	Human Physiology (ACTS Equivalency = BIOL 2414 Lecture) and Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab)	4
CHEM 1103 & CHEM 1101L	University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture) and University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab)	4
GEOS 1113 & GEOS 1111L	General Geology (ACTS Equivalency = GEOL 1114 Lecture) and General Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab)	4
PHYS 2094	University Physics III	4
PHYS 3544	Optics	4
PHYS 3603 & PHYS 360VL	Introduction to Modern Physics and Modern Physics Laboratory	4

Fine Arts/Humanities/Social Science Electives

Students must follow the University Core curriculum in selecting their history, government, fine arts, humanities, and social science electives. Each student in the College of Engineering is required to complete 18 semester hours in the humanities and social sciences.

The courses taken must include:

HIST 2003	History of the American People to 1877 (ACTS Equivalency = HIST 2113)	3
or HIST 2013	History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123)	
or PLSC 2003	American National Government (ACTS Equivalency = PLSC 2003)	
ECON 2143 or ECON 2013	Basic Economics: Theory and Practice Principles of Macroeconomics (ACTS Equivalency = ECON 2103)	3
PHIL 3103	Ethics and the Professions	3

The remaining three courses must be selected from an approved list.

The humanities and social sciences chart from the University Core (p. 97) page should be used as a guide for selecting these courses.

Requirements for Aerospace Concentration: The Aerospace Concentration in Mechanical Engineering provides students an opportunity to concentrate on engineering and scientific issues associated with aircraft, spacecraft, and space exploration. The Aerospace Concentration consists of the 112-credit hour Mechanical Engineering B.S. core and 12 hours of specified elective courses.

Choose at least two of the following courses:	6
MEEG 4503	Introduction to Flight
MEEG 4523	Astronautics
MEEG 4433	Aerospace Propulsion
MEEG 5503	Advanced Fluid Dynamics I
MEEG 5533	Fundamentals of Aerodynamics

Choose an additional 6 hours from any of the above courses not yet taken or any following technical elective: 6

MEEG 4903H	Honors Mechanical Engineering Research
MEEG 491V	Special Topics in Mechanical Engineering
MEEG 492V	Individual Study in Mechanical Engineering
MEEG 5473	Radiation Heat Transfer
ASTR 4033	Astrophysics I: Stars and Planetary Systems
ASTR 4043	Astrophysics II: Galaxies and the Large-Scale Universe
GEOS 3213	Principles of Remote Sensing
SPAC 5033	Astrophysics I: Stars and Planetary Systems

B.S.M.E. with Aerospace Concentration Eight-Semester Plan

First Year	Units	
	Fall	Spring

Ralph E. Martin Department of Chemical Engineering Website (<https://chemical-engineering.uark.edu/>)

Chemical engineering deals with the creation, design, operation, and optimization of processes that derive practical benefits from chemical or physical changes principally involving chemical and biochemical reactions. The profession is quite broad and has traditionally provided the technology for: supplying energy and fuel; synthesizing materials such as plastics, chemicals, fertilizers, and pharmaceuticals; and managing environmental and safety concerns of physical and chemical processes. Some new applications of the principles of chemical engineering at nanoscales are being made in sustainable energy production and detection of gene mutations, protein configurations, and virus serotypes as well as thermal destruction of cancer cells.

Chemical engineers have a variety of traditional job opportunities in industries such as petroleum production and processing, chemical manufacturing, food processing, pharmaceutical production, and process equipment manufacturing. Job opportunities may involve research, development, design, manufacturing, sales, or teaching as professional activities. The chemical engineer can also move easily into environmental engineering, nuclear engineering, oceanography, biomedical engineering, pharmacology, law, medicine, or other multidisciplinary fields.

In chemical engineering, students obtain a broad foundation in chemistry, mathematics, physics, communication skills, economics, and the humanities. Courses in material and energy balances, thermodynamics, reaction kinetics, fluid mechanics, heat and mass transfer, process control, computer methods, safety, and design provide students with the background and learning skills required of the practicing chemical engineer. The curriculum includes elective courses that enable a student to prepare for immediate employment or further study at the graduate level or the professional level, such as for medical school. The chemical engineering program also serves as an excellent preparation for dental, pharmacy, or law school.

The educational objective of the undergraduate program in the Ralph E. Martin Department of Chemical Engineering is to prepare students for careers and professional accomplishment after graduating, including:

- Successful practice as an engineer or in some other professional pursuit, including traditional or emerging fields of chemical engineering;
- Entrance and successful participation in a graduate or professional program (such as medical school) that continues their career development.

The program prepares graduates to achieve these educational objectives through development of their skills as outlined in our educational outcomes and taught in our curriculum.

Completion of the degree requirements provides graduates with the following learning outcomes:

Chemical Engineering (CHEG)

Dave Ford
Professor and Department Head
3202 Bell Engineering Center
479-575-3739

- An ability to identify, formulate, and solve complex engineering problems by applying principles of engineering, science, and mathematics
- An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety, and welfare, as well as global, cultural, social, environmental, and economic factors
- An ability to communicate effectively with a range of audiences
- An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental, and societal contexts
- An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks, and meet objectives
- An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
- An ability to acquire and apply new knowledge as needed, using appropriate learning strategies.

Requirements for B.S. in Chemical Engineering

Each student in chemical engineering is required to complete 128 hours of coursework including the 35-hour University Core. To be eligible for graduation, all students must complete at least 30 hours of Chemical Engineering (CHEG) classes at the University of Arkansas, Fayetteville that are required for the degree. Each student in chemical engineering is also required to complete six semester hours of technical electives, three semester hours of Advanced Science electives, three semester hours of Chemical Engineering electives, and three semester hours of Advanced Science or Chemical Engineering electives. As discussed in the department's Undergraduate Advising Manual, students can select elective courses to better prepare for employment or further study in areas such as:

- Biotechnology
- Biomedical engineering
- Environmental engineering
- Food process engineering
- Materials engineering
- Microelectronics
- Nanotechnology
- Nuclear engineering
- Pre-medicine
- Simulation and optimization

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

Chemical Engineering B.S.Ch.E. Eight-Semester Degree Program

The following section contains the list of courses required for the Bachelor of Science in Chemical Engineering degree. Not all courses are offered every semester, so students who deviate from the suggested sequence must pay careful attention to course scheduling and course prerequisites. Students wishing to follow the eight-semester degree plan should see

the Eight-Semester Degree Policy (p. 87) in the Academic Regulations chapter for university requirements of the program. Entering freshmen will be required to participate in selected Freshman Engineering Student Services.

Elective Options in Chemical Engineering

Each student in chemical engineering is required to complete six semester hours of technical electives, three semester hours of Advanced Science electives, three semester hours of Chemical Engineering

electives, and three semester hours of Advanced Science or Chemical Engineering electives.

Technical Electives

In general, any upper level (3000-level or above) course in the sciences, math or engineering may serve as a technical elective, with prior approval by your academic adviser. BIOL 2013, BIOL 2213, BIOL 2323 and BIOL 2443 are 2000-level courses that can also serve as technical electives, and are also useful for students applying to medical school. INEG 2313, INEG 2333, INEG 2413 and INEG 3513 are statistics-oriented classes, and may be used for technical elective credit. Upper-level courses in non-technical areas such as business may also serve as technical electives with prior approval by your academic adviser. There is no specific list of approved technical electives.

Advanced Science and Chemical Engineering Electives

A list of the approved Advanced Science or Chemical Engineering courses is shown below. Once again, each student in chemical engineering is required to complete three semester hours of Advanced Science electives, three semester hours of Chemical Engineering electives, and three semester hours of Advanced Science or Chemical Engineering electives. Courses not on the list *may* satisfy the requirement with student appeal and approval by the Chemical Engineering faculty.

Advanced Science Electives

CHEM 2263	Analytical Chemistry Lecture	3
CHEM 2261L	Analytical Chemistry Laboratory	1
CHEM 3453	Elements of Physical Chemistry	3
CHEM 3451L	Elements of Physical Chemistry Laboratory	1
CHEM 3504	Physical Chemistry I	4
CHEM 3514	Physical Chemistry II	4
CHEM 4213	Instrumental Analysis	3
CHEM 4211L	Instrumental Analysis Laboratory	1
CHEM 4843H	Honors Biochemistry II	3
CHEM 4853	Biochemical Techniques	3
PHYS 3113	Analytical Mechanics	3
PHYS 3544	Optics	4
PHYS 3613	Modern Physics	3
PHYS 4333	Thermal Physics	3
PHYS 361VL	Modern Physics Laboratory	1-3
PHYS 4734	Introduction to Laser Physics	4
FDSC 4304	Food Chemistry	4

Chemical Engineering Electives

CHEG 4273	Corrosion Control	3
CHEG 5273	Corrosion Control	3
CHEG 5013	Membrane Separation and System Design	3
CHEG 488V	Special Problems	1-6
CHEG 5033	Technical Administration	3
CHEG 5043	Colloid and Interface Science	3
CHEG 5113	Transport Processes I	3
CHEG 5133	Advanced Reactor Design	3
CHEG 5213	Advanced Chemical Engineering Calculations	3
CHEG 5333	Advanced Thermodynamics	3

CHEG 5353	Advanced Separations	3
CHEG 5513	Biochemical Engineering Fundamentals	3

Students are encouraged to select elective courses to better prepare for employment or further study in areas such as:

- Biotechnology
- Biomedical engineering
- Environmental engineering
- Food process engineering
- Materials engineering
- Microelectronics
- Nanotechnology
- Nuclear engineering
- Pre-medicine
- Simulation and optimization

Additional opportunities are available to enhance the educational experience of students in these areas. Students should consult their academic adviser for recommendations.

Honors Program Requirements

Chemical engineering students enrolled in the Honors College are encouraged to complete the requirements to graduate with honors. In addition to grade point requirements, Honors College students must complete a total of at least 12 hours of honors course credits including a minimum of 6 hours of honors course credits in chemical engineering. The student must also participate in a design or research project culminating in an Honors Thesis. Thesis credit in the department will be satisfied by Honors College students in one of the following ways:

- Completion of the American Institute of Chemical Engineers Design Competition Problem individually following contest rules as part of CHEG 4443 Design II;
- Completion of a design contest problem as part of a team, such as the WERC competition in CHEG 4443 Design II; or
- Completion of CHEG 488V Special Problems at the direction of a faculty mentor.

Regardless of the thesis project, an Honors Thesis and oral presentation will be prepared by the student and approved by the Department Honors Committee and the faculty mentor.

Ackerson, Michael D., Ph.D. (University of Arkansas), M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), Associate Professor, 1986.

Almodovar Montanez, Jorge L., Ph.D. (Iowa State University), Assistant Professor, 2018.

Beitle, Robert R., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Pittsburgh), Professor, 1993.

Clausen, Ed, Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), University Professor, 1981.

Ford, David M., Ph.D., M.S., B.S.Ch.E. (University of Pennsylvania), Professor, 2017.

Greenlee, Lauren F., Ph.D., M.S. (University of Texas, Austin), BSChE (University of Michigan), Associate Professor, 2015.

Hestekin, Jamie A., Ph.D. (University of Kentucky), B.S.Ch.E. (University of Minnesota-Duluth), Professor, 2006.

Hestekin, Christa, Ph.D. (Northwestern University), B.S.Ch.E. (University of Kentucky), Associate Professor, 2006.

Servoss, Shannon, Ph.D. (Northwestern University), B.S.Ch.E. (University of Michigan-Ann Arbor), Associate Professor, 2007.

Souto Melgra, Nacacha, Ph.D. (University of Puerto Rico, Mayaguez), Clinical Assistant Professor, 2018.

Spicer, Tom O., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Professor, 1981.

Thoma, Greg, Ph.D. (Louisiana State University), M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Professor, 1993.

Thompson, Audie K., Ph.D. (University of Mississippi Medical Center), Assistant Professor, 2018.

Walker, Heather L., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, 2008.

Wickramasinghe, Ranil, Ph.D. (University of Minnesota-Twin Cities), M.S., B.S. (University of Melbourne, Australia), Professor, 2011.

School of Law Website (<http://law.uark.edu/>)

This page provides undergraduate students with information about the School of Law. Find out more in the School of Law Catalog (<http://catalog.uark.edu/lawcatalog/>).

Mission and Objectives

The primary goal of the University of Arkansas School of Law is to prepare lawyers who will render high-quality professional service to their clients, who are interested in and capable of advancing legal progress and reform, and who are prepared to be leaders in their communities. These objectives can best be realized by a talented and dedicated full-time faculty working in partnership with an interested and involved bench and bar. The faculty and administrative staff at the School of Law strive to maintain mutually beneficial relationships with judges and practicing lawyers. Appellate courts regularly schedule cases at the School of Law, and the judges meet with students informally after the arguments. Full-time faculty members teach first-year courses and other required substantive law courses, while practice skill courses such as legal clinic and activities such as moot court and client counseling depend on the assistance of the practicing bar.

The University of Arkansas School of Law also has a strong sense of responsibility to the people of Arkansas. Members of the faculty and

student body are active in numerous public service activities. Legal counsel to the indigent is provided through the clinical education program and by special court appointments from time to time. Students and faculty also serve on the bar, in civic and legislative committees, and on task forces. A number of faculty and students contribute time and expertise to state agencies and law reform groups. All of these activities offer students real legal work, serving the people of Arkansas.

Teaching Methods

Legal training teaches principles through discussion and skills through practice. The student must be, by definition, an active participant in that process.

The Socratic "case method" is the basic tool of traditional American legal education. This method involves the study and discussion of litigated cases. The teacher calls upon students to respond in a stimulating question-and-answer dialogue, frequently involving several class members and often including more questions than answers. The learning experience occurs not only in the interchange between teacher and student, but also among the students themselves. This process, applied skillfully by expert teachers and by students possessing a sense of awareness and curiosity, hones the minds of students, develops their respect for facts, and creates a sensitivity to essential differences among issues, policies, reasons, and arguments. Intensive and consistent daily preparation is necessary for students to participate effectively in this process.

In some of the first-year courses, and in many later courses, students are given practical legal problems to solve. These problems may involve drafting legal documents or formulating a course of action for a hypothetical client.

By the time students reach their third year, they will be prepared to engage in significant legal research in selected areas of specialization. A primary source for such experience will be seminars taught informally in small groups by professors who are experts in selected subjects. Frequently, a student will be expected to defend a seminar paper before classmates under circumstances that provide lively and constructive discussion. During the second and third years, students are also permitted to engage in research and writing projects for credit under the supervision and consultation of a selected faculty member, in an area of particular interest to the student.

Of increasing importance in legal education is the role of practical, on-the-job training involving legal problems of actual clients. Legal clinic courses provide valuable client counseling experience, as well as participation in actual trials and appeals under the supervision of a member of the faculty who is also a licensed attorney. Representation is provided for students and indigent local residents. Both civil and certain referred criminal cases are accepted by the clinic.

Many classes in the School of Law involve a significant skills component in which students are placed in a simulated client-based situation and asked to respond appropriately. The curriculum includes a number of specially designated-skills classes that focus on practice skills. All law students are required to take at least one skills class prior to graduation.

Facilities and Resources

Robert A. Leflar Law Center

Additions to the Robert A. Leflar Law Center were completed in spring 2008, and the building was dedicated in October 2008 by former Associate Supreme Court Justice Sandra Day O'Connor. A new addition

was opened for students in fall 2006, and faculty and staff moved into new offices in August 2007. The expanded facilities include a new entry hall facing the Arkansas Union and Mullins Library, a two-story lobby, four state-of-the-art classrooms on the third floor, a gourmet coffee shop on the second floor, the 203-seat E.J. Ball Courtroom and a new Student Services office. The Richard B. Atkinson Memorial Courtyard, designed by world-renowned artist and sculptor Jesús Morales, was completed in fall 2008.

Robert A. and Vivian Young Law Library

The Robert A. and Vivian Young Law Library includes more than 300,000 volumes, including cases and statutes from every American jurisdiction. The law library also contains a current and complete collection of legal encyclopedia, digests, tests, treatises, law reviews, reports of administrative agencies, and other government publications.

The Young Law Library is a depository for federal, state, and United Nations documents. It is the only U.N. documents library in the state and one of a few in the Midwest. The library includes a growing collection of agricultural law materials developed with assistance from the National Agricultural Law Center.

Students researching legal problems use traditional printed resources and electronic resources available across the Internet. Portals such as Loislaw.com, LEXIS, WESTLAW, the State of Arkansas Web page, the National Agriculture Law Center Web page, and the Young Law Library's Web page help students identify and use appropriate resources. Computer labs are available for student use. The School of Law also has a wireless network accessible to all students, faculty, and staff.

While primarily designed for the use of Arkansas students, the Young Law Library also serves the research needs of the bench, the bar, and the University community. The Young Law Library provides an attractive and comfortable atmosphere for study and research. Included within the Young Law Library is the Barrett Hamilton Law Library Mezzanine, a particularly attractive study and shelf space area. In addition, the main campus library, Mullins Library, is located near the Young Law Library. The two libraries work closely together to identify, acquire, and share resources throughout the campus.

Law Faculty

- Robert A. Leflar Professor Bailey (C.)
- Vincent Foster University Professor of Legal Ethics and Professional Responsibility Brill
- Clayton N. Little Professor Goforth
- E.J. Ball Professor Judges
- Wylie H. Davis Distinguished Professor Killenbeck (M.)
- Ben J. Altheimer Professor of Legal Advocacy Leflar
- Sidney Parker Davis Jr. Professor of Business and Commercial Law Matthews
- Nathan G. Gordon Professor Nance
- William H. Enfield Distinguished Professor Sheppard
- Professors Beard, Brummer, Circo, Ewelukwa, Flaccus, Leeds, Moberly, Norvell, Schneider
- Associate Professors Buehler, Foster, Gallini, Hughes, Kelley, Killenbeck (A.), Sacharoff, Tarvin, Thompson, Young
- Assistant Professor Sampson
- Visiting Clinical Assistant Professors Doss, Gaithe
- Professor of Law Emeritus Witte

Other Programs

Joint J.D./M.B.A. Program (Business Administration)

The School of Law and the Sam M. Walton College of Business offer students a juris doctor (J.D.) degree and a master's of business administration (M.B.A.) degree concurrently. Students working to pursue their degrees in this joint program must gain admission to both the School of Law and the Graduate School and be accepted into the program of study leading to the M.B.A. degree. If the student is accepted into both programs, a maximum of six hours of approved upper-level elective law courses may be used as duplicate credit toward the M.B.A. degree and a maximum of six hours of approved graduate courses in business administration may be used as duplicate credit toward the J.D. degree, thus reducing the total time necessary for completion of the degrees.

Joint J.D./M.P.A. Program (Public Administration)

The department of political science, the Graduate School, and the School of Law cooperate in a dual-degree program that allows a student to pursue a juris doctor (J.D.) degree and a master's of public administration (M.P.A.) degree concurrently. Students must be admitted to the M.P.A. program, the School of Law, and the dual-degree program. If students enter the dual-degree program after enrolling in either the School of Law or the M.P.A. program, they must obtain admission to the other degree program and the dual-degree program during the first year of study.

The School of Law accepts a maximum of nine hours of M.P.A. courses to satisfy requirements for the J.D. degree. To qualify for J.D. credit, the M.P.A. courses must come from a set of core courses and must be approved by the School of Law. For purposes of the M.P.A. degree, 15 hours of elective courses may be taken in the School of Law, provided they are in an area of concentration approved by the director of the M.P.A. program. Students must earn a grade of B or higher in any M.P.A. course offered for credit toward the J.D.

Students admitted to the dual-degree program may commence their studies in either the School of Law or in the M.P.A. program but must complete first year course requirements before taking courses in the other degree program. If they do not maintain the academic or ethical standards of either degree program, students may be terminated from the dual degree program. Students in good standing in one degree program but not the other may be allowed to continue in the program in which they have good standing and must meet the degree requirements of that program. If for any reason a student admitted to the dual degree program does not complete the M.P.A. degree, he or she cannot count any hours of M.P.A. courses toward the J.D. degree. Likewise, M.P.A. students may not be able to count certain law courses if they decide to discontinue their studies in the School of Law. The J.D. degree will be awarded upon completion of all degree requirements; the M.P.A. will be awarded upon completion of the comprehensive examination and the internship (and internship report), or alternately, six hours of additional coursework.

Joint J.D./M.A. Program

The School of Law and the Department of Political Science provide a dual J.D./M.A. in International Law and Politics. This program's students must be admitted both to the School of Law and the Graduate School in the Department of Political Science.

A maximum of 12 hours of approved, upper-level elective law courses may be used as credit toward the M.A. and a maximum of nine hours of

approved graduate courses in political science may be used as credit toward the J.D. degree, reducing the time necessary to complete both degrees by about one academic year. The M.A. program offers a six-hour thesis or a paid, six-month internship option designed to prepare students for a career in international politics or law.

The 12 hours of M.A. courses taken in the School of Law must relate to the study of international law and be approved by the student's M.A. adviser and the Law School's Associate Dean of Academic Affairs. The nine hours of approved graduate courses in political science may include: Comparative Political Analysis; Seminar in International Politics; Seminar in Contemporary Problems; International Political Economy; and International Trade Policy. Other political science and graduate-level courses may be taken by permission. Paid internship credits cannot be applied toward the juris doctorate.

School Admission Requirements

For complete details concerning admission to the School of Law, go to the school's admission page (<http://law.uark.edu/academics/jd/>) or write to School of Law Office of Admissions, Leflar Law Center, University of Arkansas, Fayetteville, AR 72701, or telephone 479-575-3102.

General Information

The School of Law's deadline for receiving a completed application is April 1. The school does not charge an application fee. Admission is only for the fall of each year, and only a full-time program is offered.

The School of Law prefers online applications. The school may request more information than is listed below, but please do not send additional materials unless requested. Each student application file will be reviewed when it is completed.

Prerequisites

Except for students in the 3/3 programs, applicants must have completed all requirements for a bachelor's degree from an accredited institution prior to the date of enrolling in the School of Law.

CAS

Applicants must participate in the Credential Assembly Service (CAS) and be registered with CAS during the application year. Through CAS, applicants are required to send the Law School Admission Council (LSAC) official transcripts from all higher education institutions that the applicant has attended.

LSAT

Applicants also must take the Law School Admission Test (LSAT) before the end of February and within the five years preceding the date of application. Applications may be submitted prior to taking the LSAT. The School of Law will use an applicant's highest LSAT score in calculating the applicant's prediction index.

Prediction Index

The School of Law will grant index admission to non-residents who have a prediction index of 205 or above and to Arkansas residents who have a prediction index of 200 or above. If space permits, we may offer index admissions to other applicants. All admitted students must satisfy the legal profession's character and fitness requirements.

The prediction index is calculated as follows: (LSAT score) + (13.4 x UGPA) = Prediction Index. For example, if you have an LSAT score of 160 and a 3.00 UGPA, your prediction index would be 202.

Transfer Students

A law student who has completed one year of legal studies with satisfactory scholarship in a law school accredited by the American Bar Association is eligible to be considered for transfer to the University of Arkansas School of Law. The amount of transfer credit to be granted will depend on the quality of performance and the relation of completed courses to this school's program. A maximum of 30 credits may be accepted for transfer credit. Credit or units only (not grades) are transferable. Credits will not be accepted for any course or other work in which a grade below 2.00 or equivalent is given at another law school. Failure to disclose attendance at another college or law school or expulsion or suspension is sufficient grounds to require withdrawal from the School of Law.

Pre-Law Study

No pre-law curriculum is prescribed at the University of Arkansas School of Law or at any other American law school. Experience has shown that students do equally well in law school and in law practice regardless of their differing educational backgrounds. As a result, no single "pre-law major" is required or even recommended. Students in a position to structure their college curricula should select courses that emphasize analytical and problem-solving skills and courses in which written work is vigorously edited. Arkansas admits applicants from a wide variety of college majors. The resulting diversity enhances and enriches the educational experience of all students.

LSAT: The Law School Admission Test (LSAT) is given four times per year in Fayetteville and at other locations throughout Arkansas and in other states. Registration may be arranged online at www.lsac.org (<http://www.lsac.org>). Applicants for admission are urged to take the test at least nine months prior to expected entrance in the School of Law.

3/3 Programs

The School of Law and the J. William Fulbright College of Arts and Sciences have collaborated in developing a program that will enable outstanding students to enter the School of Law after their third year of undergraduate studies. A student enrolled in the Fulbright College is eligible to begin study in the UA School of Law after the completion of at least 94 hours of college work if the following criteria are met:

1. Completion of all University, college, and major course requirements for their undergraduate degrees;
2. A cumulative grade-point average of at least 3.50; and
3. A score of at least 159 on the LSAT.

Such students will receive a Bachelor of Arts or a Bachelor of Science after the completion of sufficient hours at the School of Law in order to meet the regular requirements of Fulbright College. These students will then receive a juris doctor (J.D.) degree after completing the required number of hours at the School of Law.

In addition to the 3/3 program with the J. William Fulbright College of Arts and Sciences, the School of Law has a similar program with the department of agricultural economics and agribusiness in the Dale Bumpers College of Agricultural, Food, and Life Sciences. Exceptional students may enroll in the Law School in their fourth year of undergraduate study. Students will be required to have (1) completed at least 95 credit hours in the pre-law program, (2) a cumulative grade-

point average in all college or University course work of at least 3.50 without grade renewal, and (3) an LSAT score of at least 159. The B.S.A. Agricultural Business degree will be granted after successfully completing 29 credit hours from the first-year School of Law course work.

It is a requirement of the School of Law's accreditation standards that no student be admitted to the University of Arkansas School of Law until they have completed at least three-fourths of the work necessary for the baccalaureate degree. The requirements embodied in these 3/3 programs satisfy this requirement.

College Scholarships

Students are expected to make sufficient financial arrangements for the first year of study without the necessity of seeking employment. All law students are required to be full-time students, and no law student is permitted more than 20 hours per week of employment. First-year students are strongly discouraged from working while enrolled in classes. First-year students are expected to adhere to a standard curriculum; some courses in the upper-division curriculum are also required.

Applications for financial aid may be obtained from the Office of Financial Aid, University of Arkansas, Hunt Hall 114, Fayetteville, AR 72701, 479-575-3806. You may also find more information about financial aid opportunities online at the Financial Aid website (<http://www.uark.edu/admin/fininfo/>). Applications for financial aid must be submitted to the Office of Financial Aid by April 1. Specific fees and costs are listed in the School of Law Catalog.

Degree Requirements

For course information and degree requirements, see the School of Law Catalog (<http://catalog.uark.edu/lawcatalog/>) or by writing or calling the University of Arkansas School of Law, Leflar Law Center, Waterman Hall 147, Fayetteville, AR 72701, 479-575-7645.

Graduate Studies

The University of Arkansas School of Law is a professional degree program. In addition to the law degree, the Law School offers a graduate degree in agricultural law. The Graduate Program in Agricultural Law at the University of Arkansas is the only program in the United States that offers a Master of Laws (LL.M.) degree in agricultural law. Students enrolled in this unique and selective program have the opportunity for advanced study, creative research, and specialized professional training in the legal issues involved with agricultural production, marketing, and distribution. Graduates of the program are among the leaders of today's agricultural law community, working in private practice, government, agribusiness, public policy, and academia. For more information, visit the Agricultural Law page (<http://catalog.uark.edu/lawcatalog/llminagriculturalandfoodlaw/>) or e-mail the graduate program at llm@uark.edu.

Accreditations

The degree programs in the School of Law on the Fayetteville campus are accredited by both the American Bar Association and the Association of American Law Schools.

ROTC

The Reserve Officers' Training Corps (ROTC) programs at the University of Arkansas provide physical and mental challenges that are not offered anywhere else on campus. The ROTC programs prepare young men and women for careers as professional military officers. In addition to academic studies, each service requires that all students attend a weekly leadership laboratory.

The freshman and sophomore courses are electives offered to male and female students who may earn four hours of academic credit in Aerospace Studies or up to six hours in Military Science. Absolutely no military obligation is incurred by non-scholarship students as a result of their enrollment in or completion of any or all of their freshman or sophomore ROTC courses.

Air Force ROTC

Professor of Aerospace Studies

Lieutenant Colonel Marc E. Wolfe

319 Memorial Hall, 479-575-3651

Email: rotc030@uark.edu

Air Force ROTC Website (<http://afrotc.uark.edu/>)

The University of Arkansas hosts the award-winning Air Force ROTC Detachment 030, ThunderHawks, part of a nationwide program that allows students to pursue commissions as officers in the United States Air Force while simultaneously attending college. Students can register through normal course registration processes.

Air Force ROTC consists of four years of Aerospace Studies classes:

AERO 1011	Heritage and Values of the United States Air Force I	1
AERO 1021	Heritage and Values of the United States Air Force II	1
AERO 2011	Team and Leadership Fundamentals I	1
AERO 2021	Team and Leadership Fundamentals II	1
AERO 3013	Leading People and Effective Communication I	3
AERO 3023	Leading People and Effective Communication II	3
AERO 4013	National Security Affairs and Preparation for Active Duty I	3
AERO 4023	National Security Affairs and Preparation for Active Duty II	3

And a corresponding Leadership Laboratory for each year, at which students apply leadership skills, demonstrate command and effective communication, develop physical fitness, and practice military customs and courtesies.

College students enrolled in the Air Force ROTC program (known as "cadets") who successfully complete both Air Force ROTC training and college degree requirements will graduate and simultaneously commission as Second Lieutenants in the Active Duty Air Force.

Additional information about Air Force ROTC can be found on the web at www.afrotc.com (<http://www.afrotc.com/>).

Army ROTC

Professor of Military Science and Leadership

Lieutenant Colonel Chad B. Quayle

106 Army ROTC Building, 479-575-4251

Toll Free: 1-866-891-5538, Fax: 479-575-5855

Email: armyrotc@cavern.uark.edu

World Wide Web: armyrotc.uark.edu (<http://armyrotc.uark.edu/>)

Army ROTC teaches you how to lead. It is one of the best leadership courses in the country and you can make it a part of your academic curriculum here at the University of Arkansas. Army ROTC is an elective curriculum you take along with your required college courses that gives you the tools, training and experiences that will help you succeed in any competitive environment. Participation in the Army ROTC program while pursuing your academic degree offers you the opportunity to earn a commission as a second lieutenant and serve on active duty or in the National Guard or Army Reserve upon graduation.

The traditional four-year Army ROTC Program is divided into a two-year basic course (1000- and 2000-level Military Science classes) and a two-year advanced course (3000- and 4000-level Military Science classes). Students may enroll in the basic course without incurring any military service obligation.

Basic Course Requirements

The first two years of instruction introduce the student to fundamental military and leadership subjects. Students normally take the basic course sequence over four successive semesters, but the basic courses can be completed in as few as two semesters. Students should discuss available options with the Recruitment and Operations Officer before registering for courses if they have fewer than four semesters to complete the basic course.

The regular curriculum consists of a lecture and lab each semester. Freshmen are encouraged to take MILS 1001 Introduction to the Army in the fall and MILS 1011 Foundations of Agile and Adaptive Leadership in the spring. Both classes are 1 credit hour classes that have 1 hour of classroom instruction and 2 hours of lab per week. Sophomores are encouraged to take MILS 2002 Leadership and Decision Making in the fall and MILS 2012 Army Doctrine and Team Development in the spring. Both of the 2000-level classes are 2 credit hour classes that have 2 hours of classroom instruction and 3 hours of lab per week. Labs provide the opportunity for the practical application of leadership concepts and tactical military skills training such as map reading, land navigation, field training, and rifle/pistol marksmanship.

Advanced Course Requirements

Students who have completed the basic course sequence or an equivalency (see Two-Year Program), have met all enrollment eligibility criteria continue into the advanced course. To enroll in the advanced course, students must meet eligibility and age requirements, be physically qualified, have two academic years to complete before graduation or reception of a graduate degree, have a minimum grade point average of 2.0, be accepted by the professor of military science, and be a U.S. citizen. This advanced course curriculum consists of the following courses that include corresponding leadership labs, physical fitness training sessions, and a four-week summer camp (Advanced Camp) at Fort Knox, Kentucky.

Course List

MILS 3004	Applied Leadership I	4
MILS 3014	Applied Leadership II	4
MILS 4004	Advanced Leadership I	4
MILS 4014	Advanced Leadership II	4

During labs and physical training sessions students receive practical leadership opportunities to prepare them for summer camp and their future military careers. Students normally attend Advanced Camp in the summer between their junior and senior years. Students must complete all of the courses listed above and satisfactorily complete Advanced Camp to earn a commission.

Army ROTC students who receive an Army ROTC scholarship or enter the Army ROTC Advanced Course must agree to complete a period of service with the U.S. Army. You can serve full time in the Army for three years (four years for scholarship winners). Selected cadets may choose to serve part time in the U.S. Army Reserve or Army National Guard while pursuing a civilian career.

Two-Year Program

Students who are veterans, members of the Army National Guard/Army Reserve, or who have participated in the Junior Reserve Officers' Training Corps Program in high school may qualify for direct entry into the advanced course with the approval of the Professor of Military Science. Students who did not complete the ROTC basic course curriculum (see above) but have two years of academic study remaining may be eligible to attend Basic Camp to satisfy the basic course requirements. Basic Camp, held at Fort Knox, Kentucky, during the summer, introduces the student to the Army and covers the requirements for the basic course in 28 days. Students who believe they qualify for this program should consult with the Scholarship and Enrollment Officer for more information.

Scholarships

Qualified students may compete for Army ROTC scholarships ranging from two to four years in duration. The Army provides scholarships for those who desire to serve on Active Duty, in the National Guard, or in the Army Reserve. Students must be enrolled and participating in Army ROTC to be eligible for scholarships. Scholarships are merit based and pay full tuition and fees (both in and out-of-state) or room and board (capped at \$5,000/semester) but not both, \$600 per semester for textbooks and laboratory expenses, and a tax free subsistence stipend of \$300–\$500 for each month of the regular school year depending on Military Science level. Interested students should consult with the Scholarship and Enrollment Officer for more detailed information concerning the scholarship eligibility requirements. For additional information about Army ROTC, students may contact Mr. Oscar Rayford in the Department of Military Science, 479-575-5853, olrayfor@uark.edu.

The Service Learning Initiative

The Service Learning Initiative is a joint initiative between the University of Arkansas Provost Office, the Honors College, and the Division of Student Affairs. Service learning builds critical thinking skills while engaging in academic courses that promote experiential, community-based activities.

Formalized service learning courses must meet the committee-approved service learning definition and criteria, and be approved for designation by the Service Learning Committee.

Service Learning Definition

Service learning is a credit-bearing, faculty-directed, teaching-learning experience that is course specific. Service Learning strengthens academic content knowledge and sense of civic responsibility. Students build critical thinking skills as they engage in experiential, community-based activities that are aligned with and integral to academic course work. At the same time, the community (real people in real situations) benefits from assistance that would otherwise not be available.

Courses Page

Students can visit the Service Learning program course page (<https://servicelearning.uark.edu/courses/>) to find courses that have been designated with service-learning components. Faculty can find criteria (<http://servicelearning.uark.edu/>) to develop courses that will be considered for designation as service learning courses.

Service Learning Steering Committee

- Alison Turner, Fay Jones School of Architecture and Design
- Casey Kayser, J. William Fulbright College of Arts and Sciences
- Fran Hagstrom, College of Education and Health Professions
- Sarah Hernandez, College of Engineering
- Lisa Wood, Dale Bumpers College of Agricultural, Food and Life Sciences
- Molly Jensen, Department of Marketing, Sam M. Walton College of Business
- Veronica Mobley, Office of Study Abroad
- Chelsea Hodge and Katie Wilson, Honors College
- Angela M. Doss, School of Law

- Lora Lennertz, University Libraries
- Lori Holyfield and Jack Kern, Teaching and Faculty Support Center

Undergraduate Faculty

Faculty and instructional staff are listed in alphabetical order. The first date after the listing of each name indicates the year of first appointment at the University of Arkansas; the second date indicates the year of appointment to present faculty rank. Where they coincide, only one date is given.

A

Abrahams, Daniel, Ph.D. (Oakland University), M.M. (University of Nebraska at Omaha), B.M.E. (Temple University), Assistant Professor, Department of Music, 2016.

Ackerson, Michael D., Ph.D. (University of Arkansas), M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 1986.

Acrey, Cash, M.B.A. (University of Arkansas), B.A. (University of Arkansas at Little Rock), Clinical Assistant Professor, Department of Finance, 2013.

Adams, Douglas James, Ph.D., M.A. (University of Arizona), Associate Professor, Department of Sociology and Criminology, 1995.

Adams, Paul D., Ph.D. (Case Western Reserve University), B.S. (Louisiana State University), Associate Professor, Department of Chemistry and Biochemistry, 2006.

Adams, Justin J., Ph.D. (University of South Carolina), M.Ed., B.A. (Winthrop University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2018.

Adler, Jacob, Ph.D., A.B. (Harvard University), Associate Professor, Department of Philosophy, 1984.

Agana, Carol E., M.N.Sc. (University of Arkansas for Medical Sciences), B.S.E. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 1998.

Ahrendsen, Bruce L., Ph.D., M.S. (North Carolina State University), B.S. (Iowa State University), Professor, Department of Agricultural Economics and Agribusiness, 1990.

Ahrens, Chelsey, Ph.D. (Texas Tech), M.S. (University of Georgia), B.S.A. (University of Arkansas), Assistant Professor, Department of Animal Science, 2015.

Akeroyd, John R., Ph.D., M.A. (Indiana University at Bloomington), B.A. (University of Louisville), Professor, Department of Mathematical Sciences, 1986.

Al Faouri, Radwan A., Ph.D. (University of Arkansas), Research Assistant Professor, Nanotechnology, 2015.

Alam, M. Sarwar, Ph.D. (University of Arkansas), M.S. (Pittsburg State University), M.S. (University of Chittagong, Bangladesh), B.A. (University of Chittagong), Instructor, Middle East Studies, 2010.

Alecusan, Melanie, M.B.A. (John Brown University), Instructor, Department of Accounting, 2014.

Allbright, Sara, M.S.W. (University of Arkansas), B.S. (John Brown University), Lecturer, School of Social Work, 2018.

Allee, Kristian, Ph.D., M.B.A. (Indiana University), B.S. (Brigham Young University), Associate Professor, Department of Accounting, 2016.

Allen, Myria, Ph.D., M.A., B.A. (University of Kentucky), Professor, Department of Communication, 1993.

Allen, Amy L., M.L.I.S. (University of Alabama), B.A. (University of Arkansas), Assistant Librarian, University Libraries, 2008.

Allen, Bradley, Ph.D. (University of Texas at San Antonio), B.S. (Brigham Young University), Assistant Professor, Department of Marketing, 2017.

Allison, Neil T., Ph.D. (University of Florida), B.S. (Georgia College), Associate Professor, Department of Chemistry and Biochemistry, 1980.

Almenara, Erika, Ph.D. (University of Michigan), M.A. (University of Wisconsin-Milwaukee), B.A. (Feminine University of the Sacred Heart), Assistant Professor, Department of World Languages, Literatures and Cultures, 2015.

Almodovar Montanez, Jorge L., Ph.D. (Iowa State University), Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2018.

Aloia, Lindsey S., Ph.D. (Pennsylvania State University), M.A. (University of Delaware), B.A. (College of New Jersey), Assistant Professor, Department of Communication, 2017.

Aloysius, John, Ph.D. (Temple University), B.S. (University of Colombo, Sri Lanka), Professor, Department of Supply Chain Management, 1995.

Alrubaye, Adnan Ali Khalaf, Ph.D., M.Ed. (University of Arkansas), M.S., B.V.M. (University of Baghdad, Iraq), Clinical Assistant Professor, Department of Biological Sciences, 2013.

Altom, Carol, M.B.A. (San Diego State University), B.S. (United States Naval Academy), Instructor, Program in Operations Management, 2012.

Alverson, Andrew James, Ph.D. (University of Texas at Austin), M.S. (Iowa State University), B.S. (Grand Valley State University), Associate Professor, Department of Biological Sciences, 2012.

Alwood, Nancy D., Ph.D., M.S. (University of Arkansas), Instructor, Department of Psychological Science, 2012.

Aly, Mohamed H., Ph.D. (Texas A&M), M.S., B.S. (Zagazig University), Assistant Professor, Department of Geosciences, 2013.

Amason, Trish, Ph.D. (Purdue University), M.A. (University of Kentucky), B.S.E. (University of Arkansas), Associate Professor, Department of Communication, 1994.

Anand, Vikas, Ph.D. (Arizona State University), M.B.A. (Indian Institute of Foreign Trade), M.Sc. (Birla Institute of Technology), Professor, Department of Management, 1999.

Anand, Abhijith, Ph.D. (University of Waikato), M.I.S. (University of Wollongong), B.E. (K.S. Institute of Technology), Assistant Professor, Department of Information Systems, 2017.

Anderson, Paula, M.S., B.S. (University of Arkansas), Instructor, Department of Geosciences, 2014.

Andree, David, M.F.A. (State University of New York), B.F.A. (Minneapolis College of Art and Design), Assistant Professor, School of Art, 2015.

Andree, Kara M., M.F.A. (State University of New York at Buffalo), B.F.A. (Minneapolis College of Art and Design), Instructor, School of Art, 2016.

Andrews, David, Ph.D. (Syracuse University), M.S., B.S.E.E. (University of Missouri-Columbia), Professor, Department of Computer Science and Computer Engineering, 2008.

Ang, Simon S., Ph.D. (Southern Methodist University), M.S.E.E. (Georgia Institute of Technology), B.S.E.E. (University of Arkansas), Professor, Department of Electrical Engineering, 1988.

Angel, Christopher C., M.A. (University of Arkansas), B.A. (Arkansas Tech University), Instructor, Middle East Studies, 2015.

Anthony, Nick, Ph.D. (Virginia Polytech Institute and State University), M.S., B.S. (The Ohio State University), Professor, Department of Poultry Science, 1990.

Antov, Nikolay Atanasov, Ph.D. (University of Chicago), M.A. (Bilkent University, Turkey), B.A. (American University in Bulgaria), Associate Professor, Department of History, 2011.

Apple, Laurie Marie McAlister, Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Associate Professor, School of Human Environmental Sciences, 2000.

Apple, Jason, Ph.D., M.S. (Kansas State University), B.S.A. (Oklahoma State University), Professor, Department of Animal Science, 1995.

Arellano, Betina, M.A. (University of Arkansas), B.A. (Universidad Nacional del Sur, Argentina), Instructor, Department of World Languages, Literatures and Cultures, 2016.

- Arenberg, Nancy M.**, Ph.D. (University of Arizona), M.A. (University of Illinois, Champaign-Urbana), B.A. (Grinnell College), Associate Professor, Department of World Languages, Literatures and Cultures, 1996.
- Arnold, Mark E.**, Ph.D., B.S. (Northern Illinois University), A.S. (Rock Valley College), Associate Professor, Department of Mathematical Sciences, 1993.
- Ashour, Samar**, Ph.D. (University of Texas at Arlington), M.B.A. (Tanta University), B.S.B.A. (Tanta University), Clinical Assistant Professor, Department of Finance, 2017.
- Ashton, Dub**, Ph.D. (University of Georgia), M.B.A., B.S.B.A. (Memphis State University), Associate Professor, Department of Marketing, 1981.
- Aslin, Larry W.**, M.A., B.A. (University of Missouri-Columbia), Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 1975.
- Atungulu, Griffiths Odhiambo**, Ph.D., M.S. (Iwate University, Japan), B.S. (Jomo Kenyatta University of Agriculture and Technology, Kenya), Associate Professor, Department of Food Science, 2013.
- Atwood, T. J.**, Ph.D. (University of Illinois), M.B.A. (University of Texas at Austin), B.S. (Western Kentucky University), Associate Professor, Department of Accounting, 2014.
- Atwood, Casey**, B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2013.
- Austin, Shawn**, Ph.D., M.A. (University of New Mexico), B.A. (Brigham Young University-Idaho), Assistant Professor, Department of History, 2015.
- Avalos, Lisa**, Ph.D. (Northwestern University), J.D. (New York University), M.A., B.A. (Northwestern University), Associate Professor, School of Law, 2013.
- ## B
- Bacon, Robert Keith**, Ph.D. (Purdue University), M.S., B.S.A., (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1984.
- Bailey, Carlton**, J.D. (University of Chicago), B.A. (Talladega College), Professor, School of Law, 1978.
- Bailey, Mechelle**, M.S. (University of Tennessee), B.S. (University of Arkansas), Clinical Instructor, School of Human Environmental Sciences, 2012.
- Bailey, Clayton**, Ph.D. (University of Arizona), M.S., B.S. (University of Arkansas), Adjunct Assistant Professor, Department of Animal Science, 2015.
- Bailey, Constance**, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Alcorn State University), Assistant Professor, Department of English, 2016.
- Bailey, Tameka A.**, Ph.D. (University of Arkansas), B.S. (University of Arkansas-Pine Bluff), Clinical Assistant Professor, Department of Biological Sciences, 2017.
- Baird, Douglas H.**, D.V.M. (Louisiana State University), Adjunct Professor, Department of Animal Science, 2011.
- Baker, Emily**, M.Arch. (Cranbrook Academy of Art), B.Arch. (University of Arkansas), Assistant Professor, Department of Architecture, 2017.
- Balachandran, Kartik**, Ph.D., M.S. (Georgia Institute of Technology), B.S. (National University of Singapore), Associate Professor, Department of Biomedical Engineering, 2012.
- Balasubramanian, Mahendran**, Ph.D. (Oklahoma State University), M.S. (Auburn University), B.Tech. (Anna University), Assistant Professor, School of Human Environmental Sciences, 2017.
- Balda, Juan Carlos**, Ph.D. (University of Natal), B.S. (Universidad Nacional del Sur), University Professor, Department of Electrical Engineering, 1989.
- Ballentine, Hope**, M.S. (Vanderbilt University), B.A. (Harding University), Clinical Assistant Professor, Eleanor Mann School of Nursing, 2014.
- Balthrop, Andrew**, Ph.D. (Georgia State University), Visiting Assistant Professor, Department of Economics, 2017.
- Banton, Caree A.**, Ph.D. (Vanderbilt University), M.A. (University of Ghana), M.A. (University of New Orleans), B.A./B.P.A. (Grambling State University), Associate Professor, Department of History, 2013.
- Banton, Jeffrey**, M.S.O.M, B.S. (University of Arkansas), Instructor, Program in Operations Management, 2018.
- Baranello, Micaela**, Ph.D., M.A. (Princeton University), B.A. (Swarthmore College), Assistant Professor, Department of Music, 2017.
- Barber, Thomas**, Ph.D., M.S., B.S. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 2007.
- Barnett, Tracey**, Ph.D. (University of Texas at Arlington), M.S.W. (University of Alabama), Assistant Professor, School of Social Work, 2018.
- Barnum, Anthony Justin**, Ph.D. (Howard University), M.A. (University of Arkansas), B.A. (Hendrix College), Visiting Assistant Professor, Department of Sociology and Criminology, 2016.
- Barraza-Lopez, Salvador**, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (Instituto Politecnico Nacional de Mexico), Associate Professor, Department of Physics, 2011.
- Barrett, David A.**, B.A. (Hendrix College), Instructor, Department of Philosophy, 2006.
- Barta, Kathleen M.**, Ed.D. (University of Arkansas), M.S. (Boston College), B.S. (Marquette University), Associate Professor, 1984.
- Barth, Daniel**, Ph.D., M.A. (Claremont Graduate University), B.S. (Eureka College), Clinical Assistant Professor, Department of Curriculum and Instruction, 2014.
- Bartlett, Andrew**, Ph.D., M.S. (University of Georgia), M.S. (College of Charleston), B.S. (Coastal Carolina University), Clinical Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2016.
- Barton, Ariel**, Ph.D., M.S. (University of Chicago), B.S. (Harvey Mudd College), Assistant Professor, Department of Mathematical Sciences, 2016.
- Bateman, Nick**, Ph.D. (Mississippi State University), B.S. (University of Arkansas-Monticello), Assistant Professor, Department of Entomology and Plant Pathology, 2016.
- Baum, Jamie I.**, Ph.D., B.S. (University of Illinois-Urbana-Champaign), Associate Professor, Department of Food Science, 2011.
- Bavon, Al**, Ph.D., M.S. (Florida State University), Professor, Clinton School of Public Service, 2008.
- Bayram, A. Burcu**, Ph.D. (Ohio State University), M.I.S. (North Carolina State University), B.A. (Middle East Technical University), Assistant Professor, Department of Political Science, 2016.
- Beam, Caroline**, Ph.D., M.S. (University of California), B.S. (Princeton University), Clinical Assistant Professor, Program in Operations Management, 2013.
- Bean, Jeffrey**, M.B.A. (University of Arkansas), B.A. (Rhodes College), Instructor, Program in Operations Management, 2008.
- Beard, Lonnie Ray**, LL.M. (New York University), J.D. (University of Arkansas), B.A. (Arkansas State University), Professor, School of Law, 1983.
- Beasley, Jennifer G.**, Ed.D. (University of Virginia), M.A. (Wichita State University), B.A. (Kansas State University), Clinical Associate Professor, Department of Curriculum and Instruction, 2009.
- Beauchemin, Faythe**, Ph.D. (Ohio State University), M.Ed. (Boston College), B.S. (Lesley University), Associate Professor, Department of Curriculum and Instruction, 2019.
- Beaulieu, Jeremy M.**, Ph.D. (Yale University), M.S., B.S. (California Polytechnic State University), Assistant Professor, Department of Biological Sciences, 2016.

- Beaupre, Steven J.**, Ph.D. (University of Pennsylvania), M.S., B.S. (University of Wisconsin), Professor, Department of Biological Sciences, 1995.
- Beavers, M. Gordon**, Ph.D. (Indiana University at Bloomington), M.A., B.A. (University of Texas at Austin), Associate Professor, Department of Computer Science and Computer Engineering, 1999.
- Bechtel, Don**, B.A. (Lebanon Valley College), Instructor, Department of Supply Chain Management, 2006.
- Beck, Paul Arthur**, Ph.D. (University of Arkansas), M.S., B.S. (Oklahoma State University), Professor, Department of Animal Science, 1997.
- Beck, Dennis E.**, Ph.D. (University of Florida), B.S. (Pennsylvania State University), Associate Professor, Department of Curriculum and Instruction, 2010.
- Becknell, Natalie K.**, M.S.C.E., B.S.C.E. (University of Arkansas), Instructor, Department of Civil Engineering, 2012.
- Becnel, Jennifer N.**, Ph.D. (Arizona State University), M.A. (University of California-San Francisco), B.A. (San Diego State University), Assistant Professor, School of Human Environmental Sciences, 2014.
- Behrend, Douglas A.**, Ph.D. (University of Minnesota), B.A. (Kalamazoo College), Professor, Department of Psychological Science, 1989.
- Beike, Denise R.**, Ph.D., B.A. (Indiana University), Professor, Department of Psychological Science, 1995.
- Beitle, Robert R.**, Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Pittsburgh), Professor, Ralph E. Martin Department of Chemical Engineering, 1993.
- Bell, Steven M.**, Ph.D. (University of Kansas), M.A. (University of Kentucky), B.A. (University of Kansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1992.
- Bell, Karmen V.**, M.Ed. (Indiana Wesleyan University), Clinical Instructor, Department of Curriculum and Instruction, 2015.
- Bellaiche, Laurent**, Ph.D., M.S., B.S. (University of Paris VI, France), Distinguished Professor, Department of Physics, 1999.
- Benamara, Mourad**, Ph.D., M.S. (University of Toulouse III, France), Assistant Professor, Nanotechnology, 2007.
- Bengtson, Ed**, Ph.D. (University of Georgia), Ed.S. (George Washington University), M.A. (California State University-Sacramento), B.S. (Pennsylvania State University), Associate Professor, Department of Curriculum and Instruction, 2010.
- Benton, Hilda Morayma**, M.A. (University of Arkansas), B.A. (Foreign Institution), Instructor, Department of World Languages, Literatures and Cultures, 2009.
- Bergman-Lanier, Leyah**, Ph.D. (Claremont Graduate University), Instructor, English Language and Cultural Studies, 2014.
- Berkovich, Nadja**, Ph.D. (University of Illinois), M.A. (Boston College), B.A. (St. Petersburg Pedagogical Herzen University), Clinical Assistant Professor, Department of World Languages, Literatures and Cultures, 2015.
- Bernhardt-Barry, Michelle**, Ph.D., M.S.C.E., B.S.C.E. (Texas A&M University), Assistant Professor, Department of Civil Engineering, 2013.
- Beyzavi, M. Hassan**, Ph.D. (Freie Universität Berlin, Germany), Assistant Professor, Department of Chemistry and Biochemistry, 2017.
- Bhattacharya, Puja**, Ph.D., M.A. (Ohio State University), M.S. (Indian Statistical Institute), B.S. (Presidency College), Assistant Professor, Department of Economics, 2019.
- Biehle, Scott**, M.L.A. (University of Texas at Austin), B.A. (St. Olaf College), Clinical Assistant Professor, Department of Landscape Architecture, 2012.
- Biggs, Bobbie T.**, Ph.D. (Texas A&M University), M.S., B.S. (University of Arkansas), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1979.
- Billig, Noah Scott**, Ph.D. (Clemson University), M.Ur.P., M.L.A., B.A. (University of Minnesota), Associate Professor, Department of Landscape Architecture, 2011.
- Bills, Ken**, Ph.D. (University of Oklahoma), M.A., B.A. (Southern Utah University), Associate Professor, Department of Accounting, 2015.
- Bingham, D. James**, M.B.A. (Northwestern University), B.S. (Brigham Young University), Instructor, Program in Operations Management, 2013.
- Bivins, Bob**, M.S. (Air Force Institute of Technology), M.S. (University of Southern California), M.A. (University of Northern Colorado), B.S. (United States Air Force Academy), Instructor, Program in Operations Management, 2014.
- Blackwell, Marlon**, M.Arch. (Syracuse University), B.Arch. (Auburn University), Distinguished Professor, Department of Architecture, 1992.
- Blalock, Lydia**, Ph.D., M.S. B.G.S. (Louisiana State University), Instructor, School of Human Environmental Sciences, 2016.
- Blisard, Paul**, Ed.D. (University of Arkansas), M.C., B.S., B.S. (Southwest Missouri State University), Clinical Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.
- Bluhm, Burt H.**, Ph.D., M.S. (Purdue University), B.S. (University of Oklahoma), Associate Professor, Department of Entomology and Plant Pathology, 2008.
- Bobda, Christophe**, Ph.D., M.S. (University of Paderborn, Germany), B.S. (University of Yaounde, Cameroon), Professor, Department of Computer Science and Computer Engineering, 2010.
- Boelkins, Jonathan**, M.Arch. (Washington University in St. Louis), B.Arch. (University of Arkansas), Instructor, Department of Architecture, 2017.
- Bonacci, Jeff**, D.A. (Middle Tennessee State University), M.S. (West Virginia University), B.S. (University of Akron), Clinical Associate Professor, Department of Health, Human Performance and Recreation, 2000.
- Booker, M. Keith**, Ph.D. (University of Florida), M.S., M.A. (University of Tennessee), B.A. (Vanderbilt University), Professor, Department of English, 1990.
- Boss, Steve K.**, Ph.D. (University of North Carolina at Chapel Hill), M.S. (Utah State University), B.S. (Bemidji State University), Professor, Department of Geosciences, 1996.
- Boston, Paisley L.**, M.P.P., B.A. (Mississippi Valley State University), Instructor, Department of World Languages, Literatures and Cultures, 2016.
- Bottje, Walter G.**, Ph.D. (University of Illinois-Urbana-Champaign), M.S. (Southern Illinois University), B.S. (Eastern Illinois University), Professor, Department of Poultry Science, 1985.
- Bourland, Fred**, Ph.D. (Texas A&M University), M.S., B.S.A. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1988.
- Bowers, Lisa Marie**, Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (Louisiana State University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.
- Bowers, Andrew L.**, Ph.D. (University of Tennessee Health Science Center), M.A., B.A. (University of Tennessee), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.
- Bowles, Freddie A.**, Ph.D., M.A. (University of Arkansas), B.A. (Arkansas State University), Associate Professor, Department of Curriculum and Instruction, 2004.
- Bowling, Hilary**, M.S.N., B.S.N. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2014.
- Bowman, Margaret Warigia**, Ph.D. (Harvard University), Professor, 2012.
- Boykin, Allison**, Ph.D. (University of North Carolina-Greensboro), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2019.

- Bradshaw, Zachary**, Ph.D. (University of Virginia), B.S. (Virginia Commonwealth University), Assistant Professor, Department of Mathematical Sciences, 2017.
- Brady, Laurie**, M.A. (University of Arkansas), Instructor, Department of Communication, 1997.
- Brady, Robert M.**, Ph.D. (University of Michigan-Ann Arbor), M.A. (Western Kentucky University), B.S. (Murray State University), Associate Professor, Department of Communication, 1979.
- Brady, Kevin P.**, Ph.D. (University of Illinois-Champaign-Urbana), M.A. (Columbia University), B.A. (Binghamton University), Associate Professor, Department of Curriculum and Instruction, 2014.
- Braham, Andrew F.**, Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Wisconsin-Madison), Associate Professor, Department of Civil Engineering, 2010.
- Brandon, Jamie**, Ph.D. (University of Texas), M.A. (University of Arkansas), B.A. (University of Memphis), Associate Research Professor, Department of Anthropology, 2014.
- Breaux-Soignet, Denise**, Ph.D. (Florida State University), M.B.A., B.S. (Nicholls State University), Clinical Assistant Professor, Department of Management, 2010.
- Breen, Gina Marie**, Ph.D. (Louisiana State University), M.A., B.A. (Southern Illinois University, Carbondale), Instructor, Department of World Languages, Literatures and Cultures, 2016.
- Bresnick, Terry A.**, M.S. (Stanford University), M.B.A. (George Mason University), B.S. (United States Military Academy), Instructor, Program in Operations Management, 2014.
- Brewer, Lorraine C.**, M.S. (University of Wisconsin-Madison), Instructor, Department of Chemistry and Biochemistry, 1997.
- Brewer, Dennis W.**, Ph.D., M.A. (University of Wisconsin), B.A. (Sterling College), Professor, Department of Mathematical Sciences, 1975.
- Bridges, Ana Julia**, Ph.D. (University of Rhode Island), M.S. (Illinois State University), B.S. (University of Illinois-Urbana-Champaign), Associate Professor, Department of Psychological Science, 2007.
- Bright, Brittany Michelle**, M.I.S. (University of Arkansas), B.S. (University of Arkansas, Fort Smith), Instructor, Department of Information Systems, 2010.
- Brill, Howard W.**, J.D. (University of Florida), LL.M. (University of Illinois at Chicago), B.A. (Duke University), University Professor, School of Law, 1975.
- Bristow, Susan E.**, Ed.D., M.B.A., B.S.B.A. (University of Arkansas), Clinical Assistant Professor, Department of Information Systems, 1997.
- Brito, Edvan P.**, Ph.D., M.S. (Georgetown University), M.A. (Howard University), B.A. (Universidade de São Paulo, Brazil), Assistant Professor, Department of World Languages, Literatures and Cultures, 2016.
- Brock, Geoffrey Arthur**, Ph.D. (University of Pennsylvania), M.F.A. (University of Florida), M.A. (University of Pennsylvania), B.A. (Florida State University), Professor, Department of English, 2005.
- Brogi, Alessandro**, Ph.D. (Ohio University), Ph.D. (University of Florence, Italy), M.A. (Ohio University), B.A. (University of Florence, Italy), Professor, Department of History, 2002.
- Brown, Lucy M.**, Ph.D., M.A. (University of Texas, Austin), M.S. (Pratt Institute), Dip.G.A. (Edna Manley School for the Visual Arts, Jamaica), Clinical Assistant Professor, School of Journalism and Strategic Media, 2013.
- Brown, Brandon**, M.S., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2006.
- Brown, Kendrick**, Ph.D., (Jackson State University), M.S. (Meharry Medical College), B.S. (Southern Illinois University), Instructor, Program in Operations Management, 2017.
- Brownback, Andrew P.**, Ph.D. (University of California, San Diego), B.A. (Kansas State University), Assistant Professor, Department of Economics, 2015.
- Brubaker, Robert P.**, Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Wisconsin-Milwaukee), B.A. (Grinnell College), Instructor, Department of History, 2009.
- Bruce, David E.**, M.I.S. (University of Arkansas), Lecturer, Department of Information Systems, 1999.
- Bryant, Kelly J.**, Ph.D. (Texas A&M), M.S., B.S. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 1993.
- Brye, Kristofor R.**, Ph.D., M.S. (University of Wisconsin-Madison), B.S. (University of Wisconsin-Stevens Point), Professor, Department of Crop, Soil and Environmental Sciences, 2001.
- Bryson, Sarah J.**, M.S.W. (Colorado State University), Lecturer, School of Social Work, 2014.
- Buckley, Nancy**, M.S., B.S. (University of Arkansas), Instructor, School of Human Environmental Sciences, 2014.
- Buege, David**, M.A. (Princeton University), Professor, Department of Architecture, 2009.
- Burgin, James**, M.B.A. (Golden Gate University), B.S. (University of Arkansas), Instructor, Program in Operations Management, 2012.
- Burgin, Stephen**, Ph.D., Ed.S., M.Ed., B.S. (University of Florida), Assistant Professor, Department of Curriculum and Instruction, 2014.
- Burgos, Nilda Roma**, Ph.D., M.S. (University of Arkansas), B.S. (Visayas State College of Agriculture-Philippines), Professor, Department of Crop, Soil and Environmental Sciences, 1998.
- Burris, Sidney J.**, Ph.D., M.A. (University of Virginia), B.A. (Duke University), Professor, Department of English, 1986.
- Burrow, Jason E.**, M.M. (Ohio University), B.M. (University of Arkansas), Assistant Professor, Department of Theatre, 2015.
- Burson, Claudia**, , Lecturer, 1998.
- Burton, Scot**, Ph.D. (University of Houston), M.B.A., B.S.B.A. (University of Texas), Distinguished Professor, Department of Marketing, 1993.
- Bustamante, Juan Jose**, Ph.D. (Michigan State University), M.S., B.A. (University of Texas Pan American), Associate Professor, Department of Sociology and Criminology, 2012.
- Butler, Kaitlyn**, M.A., B.A. (University of Arkansas), Instructor, Department of World Languages, Literatures and Cultures, 2017.
- C**
- Calabretta-Sajder, Ryan C.**, Ph.D. (Middlebury College), M.A. (Indiana University-Bloomington), B.A. (Dominican University), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013.
- Caldwell, Stephen E.**, D.M.A. (Rutgers State University-New Brunswick), M.M. (Temple University), B.M.E. (University of Northern Colorado), Assistant Professor, Department of Music, 2012.
- Callander, Adrienne**, M.F.A. (Rutgers University), B.A. (Reed College), Visiting Assistant Professor, School of Art, 2017.
- Callander, Neil**, M.F.A. (Rutgers University), B.F.A. (Indiana University at Bloomington), Assistant Professor, School of Art, 2017.
- Calleja, Paul C.**, Ph.D., M.S. (University of Arkansas), B.S. (San Jose State University), Clinical Professor, Department of Health, Human Performance and Recreation, 2003.
- Camargo, Elsa**, Ph.D. (Virginia Polytechnic Institute and State University), M.A., B.A. (University of Illinois at Chicago), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2018.
- Candido, Joseph D.**, Ph.D. (Indiana University at Bloomington), M.A. (University of New Hampshire), B.A. (Colby College), Professor, Department of English, 1979.
- Cao, Chunhua**, Ph.D. (University of South Florida-Tampa), Teaching Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2019.

- Carbonero, Franck**, Ph.D. (University of Warwick, U.K.), M.S. (Université Blaise Pascal, France), B.S. (Université Joseph Fourier, France), Assistant Professor, Department of Food Science, 2013.
- Carpenter, Dale**, M.A. (Emory University), B.A. (Vanderbilt University), Professor, School of Journalism and Strategic Media, 1994.
- Carson, Janet B.**, M.S. (University of Arkansas), Associate Professor, Department of Horticulture, 1992.
- Carter, Vinson R.**, Ph.D., M.A.T., B.S. (University of Arkansas), Associate Professor, Department of Curriculum and Instruction, 2008.
- Cartwright, Richard D.**, Ph.D. (University of California at Davis), M.S., B.S. (University of Arkansas), Extension Professor, Department of Entomology and Plant Pathology, 1993.
- Cassady, Richard**, Ph.D., M.S.I.S.E., B.S.I.S.E. (Virginia Polytechnic Institute and State University), Professor, Department of Industrial Engineering, 2000.
- Cassell, Cory A.**, Ph.D. (Texas A&M University), M.S., B.S. (Trinity University), Associate Professor, Department of Accounting, 2009.
- Castro Salas, Raquel**, M.A. (University of Arkansas), B.A. (John Brown University), Instructor, Department of World Languages, Literatures and Cultures, 2014.
- Catanzaro, Donald G.**, Ph.D. (University of Arkansas), A.B. (University of California, Los Angeles), Research Assistant Professor, Department of Biological Sciences, 2014.
- Catron-Ping, Peggy Lee**, Ed.D. (University of Arkansas), M.A. (Missouri State University), Instructor, Department of Communication, 2004.
- Cavell, Timothy A.**, Ph.D. (Louisiana State University), M.S. (Texas A&M University), B.A. (Louisiana State University), Professor, Department of Psychological Science, 2002.
- Ceballos, Ruben M.**, Ph.D. (University of Montana), M.A. (University of Alabama-Birmingham), B.S. (University of Alabama-Huntsville), Assistant Professor, Department of Biological Sciences, 2016.
- Chaffin, David J.**, Ph.D. (University of Tennessee), Assistant Professor, High-Performance Computing Center, 2009.
- Chakraborty, Avishek**, Ph.D. (Duke University), M.S., B.S. (Indian Statistical Institute), Assistant Professor, Department of Mathematical Sciences, 2014.
- Chaovalitwongse, Wanpracha Art**, Ph.D., M.S. (University of Florida), B.Eng. (King Mongkut Institute of Technology, Ladkrabang, Thailand), Professor, Department of Industrial Engineering, 2016.
- Chapman, Kate M.**, Ph.D., M.S. (Penn State University), B.A. (New Florida College), Teaching Assistant Professor, Department of Psychological Science, 2016.
- Chen, Jingyi**, Ph.D. (University of Washington), M.A. (State University College at Buffalo), B.S. (Zhongshan University), Associate Professor, Department of Chemistry and Biochemistry, 2010.
- Chen, Zhong**, Ph.D. (North Carolina State University), M.Eng. (National University of Singapore), B.S. (Zhejiang University), Assistant Professor, Department of Electrical Engineering, 2015.
- Chen, Yue**, Ph.D. (Vanderbilt University), M.S. (Hong Kong Polytechnic University), B.S. (Hunan University), Assistant Professor, Department of Mechanical Engineering, 2017.
- Chen, Jialie**, Ph.D. (Cornell University), B.A. (Shanghai University of Finance and Economics), Assistant Professor, Department of Marketing, 2018.
- Cheng, Albert**, Ph.D. (University of Arkansas), M.A. (Biola University), B.A. (University of California-Berkeley), Assistant Professor, Department of Education Reform, 2018.
- Cheramie, Lance M.**, Ph.D., M.S. (University of Arkansas), B.S. (Nicholls State University), Instructor, School of Human Environmental Sciences, 2002.
- Chevrier, Vincent Francois**, Ph.D. (CEREGE, Aix-en-Provence, France), M.E.S. (University Paris VII), B.S. (Academy of Versailles, France), Assistant Professor, Space and Planetary Sciences, 2005.
- Chewning, Jeffrey**, Ph.D. (University of Arkansas), M.S. (University of Missouri), B.S. (Western Kentucky University), Adjunct Professor, Department of Animal Science, 1997.
- Chick, Cathy**, M.L.S. (Louisiana State University at Shreveport), B.A. (Louisiana Tech University), Associate Librarian, University Libraries, 1983.
- Chimka, Justin Robert**, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Associate Professor, Department of Industrial Engineering, 2002.
- Chioffi, David Charles**, M.A. (Wesleyan University), B.F.A. (The Rochester Institute of Technology), Professor, School of Art, 2013.
- Cho, Eunjoo**, Ph.D. (Iowa State University), M.S., B.S. (Hanyang University, Seoul), Assistant Professor, School of Human Environmental Sciences, 2013.
- Cholthitchanta, Nophachai**, D.M.A. (University of Missouri-Kansas City), M.M. (University of Northern Colorado), B.M. (Chulalongkorn University, Thailand), Associate Professor, Department of Music, 2001.
- Christian, David**, Ph.D., M.S. (University of North Texas), B.A. (University of Texas at Dallas), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.
- Christiansen, Hope L.**, Ph.D. (University of Kansas), M.A., B.A. (Kansas State University), Associate Professor, Department of World Languages, Literatures and Cultures, 1990.
- Christy, Kameri**, Ph.D., M.S.W. (University of Kansas), B.A. (University of Missouri-Kansas City), Professor, School of Social Work, 2003.
- Chung, Jee-Young**, Ph.D. (University of Alabama), M.A. (University of Houston), B.S., B.A. (Seoul Women's University), Assistant Professor, School of Journalism and Strategic Media, 2015.
- Churchill, Hugh O.H.**, Ph.D., A.M. (Harvard University), B.A. (Oberlin College), B.M. (Oberlin Conservatory of Music), Assistant Professor, Department of Physics, 2015.
- Cilli, Matthew**, Ph.D. (Stevens Institute of Technology), M.S. (New York University Polytechnic), M.S. (University of Pennsylvania), B.S. (Villanova University), Instructor, Program in Operations Management, 2015.
- Circo, Carl J.**, J.D., B.A. (University of Nebraska), Professor, School of Law, 2003.
- Civelli, Andrea**, Ph.D., M.A. (Princeton University), B.A. (Bocconi University, Milan), Associate Professor, Department of Economics, 2010.
- Clark, John R.**, Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Distinguished Professor, Department of Horticulture, 1983.
- Clark, Fred D.**, Ph.D., D.V.M., M.S., B.S. (Texas A&M University), Extension Professor, Department of Poultry Science, 1994.
- Clausen, Ed**, Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Missouri-Rolla), University Professor, Ralph E. Martin Department of Chemical Engineering, 1981.
- Clay, Matt**, Ph.D., M.S. (University of Utah), B.S. (University of Oregon), Associate Professor, Department of Mathematical Sciences, 2012.
- Cleaveland, Lynn L.**, Ed.D. (University of Arkansas), M.S. (Clemson University), Instructor, Department of Mathematical Sciences, 1997.
- Cleveland, Todd**, Ph.D. (University of Minnesota), M.A., B.A. (University of New Hampshire), Associate Professor, Department of History, 2015.
- Clingan, Shelley Diane**, M.S.W. (University of Arkansas at Little Rock), Lecturer, School of Social Work, 2014.
- Clowney, Stephen**, J.D. (Yale University), A.B. (Princeton University), Associate Professor, School of Law, 2014.
- Clowney, Nicole**, J.D. (Yale University), M.A. (University of Kentucky), B.A. (University of Chicago), Lecturer, Department of World Languages, Literatures and Cultures, 2014.

- Cochran, Robert Brady**, Ph.D. (University of Toronto), M.A., B.S. (Northwestern University), Professor, Department of English, 1976.
- Cochran, Mark J.**, Ph.D., M.S. (Michigan State University), B.S. (New Mexico State University), Professor, Department of Agricultural Economics and Agribusiness, 1982.
- Coffey, Ken**, Ph.D. (University of Missouri-Columbia), M.S. (University of Kentucky), B.S. (University of Tennessee), Professor, Department of Animal Science, 1996.
- Coffman, Rick**, Ph.D. (University of Missouri-Columbia), M.S. (University of Texas at Austin), B.S. (University of Wyoming), Associate Professor, Department of Civil Engineering, 2009.
- Cohea, Ashley**, B.A. (University of Arkansas), Instructor, Department of Theatre, 2013.
- Colangelo, Jessica L.**, M.Arch. (Princeton University), B.Arch. (Rice University), Assistant Professor, Department of Architecture, 2018.
- Cole, John Walker**, M.B.A., B.A. (University of Arkansas), Instructor, Department of Marketing, 1997.
- Coleman, James S.**, Ph.D., M.S., M.Phil (Yale University), B.S. (University of Maine), Professor, Department of Biological Sciences, 2017.
- Collet, Vicki S.**, Ph.D. (State University of New York at Buffalo), M.A. (University of Northern Colorado), B.A. (University of Utah), Associate Professor, Department of Curriculum and Instruction, 2012.
- Collie, Sara J.**, M.S.W. (University of Arkansas at Little Rock), B.A. (University of Arkansas), Associate Professor, School of Social Work, 2011.
- Collins, Kathleen**, Ph.D., M.A., B.A. (University of California-Santa Barbara), Professor, Department of Curriculum and Instruction, 2002.
- Collins, Joshua**, Ed.D. (Florida International University), M.S., B.A. (Texas A&M University-College Station), Assistant Professor, 2014.
- Collins, Jamie**, Ph.D. (University of New Mexico-Albuquerque), Instructor, Department of Curriculum and Instruction, 2019.
- Comfort, Kathy**, Ph.D. (University of Kansas), M.A., B.A. (Illinois State University), Associate Professor, Department of World Languages, Literatures and Cultures, 2001.
- Comstock, James**, M.S. (Virginia Polytechnic Institute and State University), B.S. (United States Military Academy), Instructor, Program in Operations Management, 2018.
- Condray, Kathleen**, Ph.D., M.A.. (University of Illinois-Urbana-Champaign), B.A. (University of Arkansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1999.
- Conge, Patrick J.**, Ph.D. (University of Texas at Austin), M.A., B.S. (Arizona State University), Associate Professor, Department of Political Science, 1995.
- Conley, Nathaniel**, Ph.D. (University of Arkansas), M.A., B.A. (Arkansas State University), Instructor, Department of History, 2018.
- Connors, Sean P.**, Ph.D. (The Ohio State University), M.S. (Elmira College), B.A. (SUNY Geneseo), Associate Professor, Department of Curriculum and Instruction, 2010.
- Cook, Aletha**, M.S., B.A. (University of Arkansas), Clinical Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.
- Coon, Lynda L.**, Ph.D., M.A. (University of Virginia), B.A. (James Madison University), Professor, Department of History, 1990.
- Coon, Craig N.**, Ph.D., M.S., B.S. (Texas A&M University), Professor, Department of Poultry Science, 1997.
- Coridan, Robert**, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.S. (The Ohio State University), Assistant Professor, Department of Chemistry and Biochemistry, 2015.
- Correll, Jim**, Ph.D., M.S. (University of California-Berkeley), B.S. (Pennsylvania State University), Distinguished Professor, Department of Entomology and Plant Pathology, 1989.
- Corrigan, Lisa**, Ph.D., M.A. (University of Maryland-College Park), B.A. (University of Pittsburgh), Associate Professor, Department of Communication, 2007.
- Costello, Thomas A.**, Ph.D. (Louisiana State University), M.S.Ag.E., B.S.Ag.E. (University of Missouri-Columbia), Associate Professor, Department of Biological and Agricultural Engineering, 1986.
- Costello, Michael**, Ed.D., M.S., M.B.A., B.S. (Wilmington University), Instructor, Program in Operations Management, 2012.
- Coston, Corey**, M.A., B.S.B.A. (University of Arkansas), Instructor, Department of Accounting, 2010.
- Costrell, Robert M.**, Ph.D. (Harvard University), B.A. (University of Michigan), Professor, Department of Education Reform, 2006.
- Cothren, Jackson David**, Ph.D., M.S. (The Ohio State University), B.S. (United States Air Force Academy), Associate Professor, Department of Geosciences, 2004.
- Cotton, Marge**, M.A. (University of Arkansas), Assistant Professor, 2012.
- Counce, Paul Allen**, Ph.D. (University of Georgia), M.S. (Purdue University), B.S. (University of Tennessee-Martin), Professor, Department of Crop, Soil and Environmental Sciences, 1983.
- Council, Julie**, M.S.W. (University of Arkansas at Little Rock), B.A. (University of Arkansas), Lecturer, School of Social Work, 2012.
- Couvillion, Rick J.**, Ph.D., M.S.M.E. (Georgia Institute of Technology), B.S.M.E. (University of Arkansas), Associate Professor, Department of Mechanical Engineering, 1981.
- Covey, Joe**, M.A., B.A. (University of Arkansas), Instructor, Department of World Languages, Literatures and Cultures, 2015.
- Covington, Matthew D.**, Ph.D. (University of California-Santa Cruz), B.A. (University of Arkansas), Associate Professor, Department of Geosciences, 2012.
- Cox, Nicole R.**, M.B.A. (University of Arkansas), B.S. (College of the Ozarks), Instructor, Department of Marketing, 2003.
- Cox, Casandra Kay**, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2003.
- Crabtree, Susan**, M.A., B.A. (University of Northern Colorado), Instructor, Department of Theatre, 2016.
- Crandall, Philip G.**, Ph.D., M.S. (Purdue University), B.S. (Kansas State University), Professor, Department of Food Science, 1989.
- Crawley, Michael**, Ph.D. (University of Texas at Austin), M.B.A., B.S. (Indiana University), Assistant Professor, Department of Accounting, 2016.
- Crisel, Brandon L.**, M.S., B.S. (Arkansas State University), Instructor, Department of Mathematical Sciences, 2009.
- Cromer, Jonathan Barrett**, M.F.A. (University of Arkansas), Instructor, School of Art, 2016.
- Cronan, Timothy P.**, Ph.D. (Louisiana Tech University), M.S. (South Dakota State University), B.S. (University of Southwestern Louisiana), Professor, Department of Information Systems, 1979.
- Cummings, Michael**, Ph.D. (University of Minnesota), J.D. and M.P.A. (Brigham Young University), B.S. (Utah Valley), Assistant Professor, Department of Management, 2017.
- ## D
- D'Alisera, JoAnn**, Ph.D., A.M. (University of Illinois-Urbana-Champaign), B.A. (State University of New York at New Paltz), Associate Professor, Department of Anthropology, 1999.
- Daily, Cynthia**, D.B.A. (Louisiana Tech University), M.B.A., B.B.A. (Henderson State University), Clinical Associate Professor, Department of Accounting, 2016.
- Daniels, Donna E.**, M.L.S., B.A. (Western Michigan University), Associate Librarian, University Libraries, 1982.

- Daniels, Michael B.**, Ph.D., M.S. (University of Arkansas), B.S. (Pennsylvania State University), Professor, Department of Crop, Soil and Environmental Sciences, 1996.
- Datta, Jyotishka**, Ph.D. (Purdue University), M.Stat., B.Stat. (Indian Statistical Institute, Kolkata, India), Assistant Professor, Department of Mathematical Sciences, 2016.
- Daugherty, Michael**, Ed.D., M.S., B.S. (Oklahoma State University), Professor, Department of Curriculum and Instruction, 2005.
- Davidson, Fiona M.**, Ph.D., M.A. (University of Nebraska-Lincoln), B.A. (Newcastle Upon Tyne Polytechnic), Associate Professor, Department of Geosciences, 1992.
- Davies, David G.**, M.P.A., B.A. (University of Arkansas), Associate Professor, Vice Provost for Student Affairs, 2010.
- Davis, James Allen**, Ph.D., M.S.M.E., B.S.M.E. (University of Arkansas), Teaching Assistant Professor, Department of Mechanical Engineering, 1997.
- Davis, Ralph K.**, Ph.D., M.S., B.S. (University of Nebraska, Lincoln), Professor, Department of Geosciences, 1994.
- Davis, Geoffrey**, Ph.D., M.F.A., M.A. (Penn State University), B.A. (Oregon State University), Assistant Professor, Department of English, 2014.
- Davis, Robert**, Ph.D., M.S., B.S. (University of Mississippi), Assistant Professor, Department of Health, Human Performance and Recreation, 2018.
- Day, Matthew B.**, Ph.D., M.S. (University of Chicago), B.S. (University of Texas), Associate Professor, Department of Mathematical Sciences, 2011.
- Dean, Jason W.**, M.S. (Syracuse University), B.B.S. (Hardin-Simmons University), Assistant Librarian, University Libraries, 2013.
- Deaton, Sheri**, M.A.T., B.S. (University of Arkansas), Instructor, Department of Curriculum and Instruction, 2016.
- DeGrange, Walter**, M.S. (Naval Postgraduate School), B.E. (Vanderbilt University), Adjunct Assistant Professor, Program in Operations Management, 2014.
- DeGregorio, Brett A.**, Ph.D. (University of Illinois at Urbana-Champaign), M.S. (Purdue University), B.S. (University of Massachusetts at Amherst), Research Associate Professor, Department of Biological Sciences, 2019.
- Del Gesso, Emilio**, B.A. (University of Rome), Assistant Professor, Department of Architecture, 1997.
- Delaplain, Theresa R.**, D.M.A. (University of Cincinnati), M.M. (Bowling Green State University), B.M. (University of Michigan), Instructor, Department of Music, 1997.
- DelCastillo, David**, M.A.S. (Embry Riddle Aeronautical University), B.S. (Embry Riddle Aeronautical University), Instructor, Program in Operations Management, 2005.
- Delery, John**, Ph.D. (Texas A&M University), M.S. (Memphis State University), B.S. (Tulane University of Louisiana), Professor, Department of Management, 1992.
- Delezenne, Lucas**, Ph.D., M.A. (Arizona State University), B.S. (Emory University), Instructor, Department of Anthropology, 2011.
- Dempsey, Sean A.**, Ph.D., M.A. (Boston University), B.A. (Connecticut College), Assistant Professor, Department of English, 2009.
- Denison, Sarah**, M.A. (University of Arkansas), B.S. (University of Texas at Tyler), Instructor, Department of Communication, 2007.
- Dennis, Norman D.**, Ph.D. (University of Texas at Austin), M.B.A. (Boston University), M.S.C.E., B.S.C.E. (Missouri University of Science and Technology), University Professor, Department of Civil Engineering, 1996.
- Devich, Claudia Maria**, M.A., B.A. (University of Arkansas), Instructor, Department of World Languages, Literatures and Cultures, 2011.
- DeWitt, Dylan**, M.F.A. (Yale University), Assistant Professor, School of Art, 2014.
- Di, Jia**, Ph.D. (University of Central Florida), M.S., B.S. (Tsinghua University), Professor, Department of Computer Science and Computer Engineering, 2004.
- Diallo, Anne B.**, Ph.D., M.P.A., B.A. (University of Arkansas), Visiting Assistant Professor, Department of Political Science, 2012.
- Diaz, Eva I.**, Ph.D., M.Ed. (Pennsylvania State University), B.A. (University of Puerto Rico), Research Associate, Department of Curriculum and Instruction, 2014.
- DiBrezza, Rosalie**, Ph.D. (Texas Woman's University), M.S. (Indiana University), B.S. (Brooklyn College), University Professor, Department of Health, Human Performance and Recreation, 1983.
- Dickerson, Elizabeth B.**, B.S. (Mississippi State University), Lecturer, Department of Mathematical Sciences, 2013.
- Dieffenderfer, Vicki**, Ph.D., M.S., B.S. (University of Tennessee), Clinical Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.
- Dingman, Shannon Wayne**, Ph.D., M.S. (University of Missouri-Columbia), M.S. (Pittsburg State University), Associate Professor, Department of Mathematical Sciences, 2007.
- DiPippa, Nikolai Shiro**, B.S. (Hendrix College), Instructor, Clinton School of Public Service, 2006.
- Dittmore, Stephen W.**, Ph.D. (University of Louisville), M.A., B.A. (Drake University), Professor, Department of Health, Human Performance and Recreation, 2008.
- Ditzfeld, Christopher**, M.S. (University of Oklahoma), Instructor, Department of Psychological Science, 2011.
- Dix, Jeffrey**, Ph.D., M.S., B.S.E.E., (University of Tennessee, Knoxville), Assistant Professor, Department of Electrical Engineering, 2018.
- Dixon, Bruce Lawrence**, Ph.D., M.S. (University of California-Davis), B.A. (University of California-Santa Barbara), Professor, Department of Agricultural Economics and Agribusiness, 1984.
- Dominick, John Andrew**, Ph.D., M.S. (University of Alabama), B.S.B.A. (Louisiana Polytechnic Institute), Professor, Department of Finance, 1970.
- Domínguez, Freddy C.**, Ph.D., M.A. (Princeton University), B.A. (Brown University), Assistant Professor, Department of History, 2014.
- Domínguez Barajas, Elías**, Ph.D., M.A., B.A. (University of Illinois at Chicago), Associate Professor, Department of English, 2011.
- Donatelli, David**, M.A. (Central Michigan University), B.A. (University of Pittsburgh), Instructor, Program in Operations Management, 2014.
- Donoghue, Dan**, Ph.D. (Texas A&M University), M.S. (Brigham Young University), B.S. (Medical University of South Carolina), Professor, Department of Poultry Science, 2000.
- Donoghue, Annie**, Ph.D. (F. Edward Herbert School of Medicine), M.S. (Texas A&M University), B.S. (San Diego State University), Research Professor, Department of Poultry Science, 2000.
- Dopp, Alex R.**, Ph.D., M.A. (University of Missouri), B.A. (University of Michigan), Assistant Professor, Department of Psychological Science, 2016.
- Dorjee, Thupten**, Ph.D. (Foreign Institution), Instructor, Humanities, 2008.
- Dorogan, Vitaliy**, Ph.D. (University of Arkansas), Assistant Professor, Nanotechnology, 2011.
- Douglas, David**, Ph.D., M.S.I.E., B.S.I.E. (University of Arkansas), University Professor, Department of Information Systems, 1975.
- Douglas, Michael Edward**, Ph.D. (University of Georgia), M.S., B.S. (University of Louisville), Professor, Department of Biological Sciences, 2011.
- Douglas, Marlis R.**, Ph.D., M.S., B.S. (University of Zurich), Professor, Department of Biological Sciences, 2012.
- Dowdle, Andrew J.**, Ph.D. (Miami University), M.A. (University of Iowa), B.A. (University of Tennessee), Professor, Department of Political Science, 2003.

Dowdy, Gary, M.B.A. (Purdue University), B.S. (University of Arkansas), Instructor, Department of Management, 2014.

Dowe, Pearl Karen, Ph.D. (Howard University), M.A. (Georgia Southern University), B.S. (Savannah State University), Associate Professor, Department of Political Science, 2008.

Dowling, Ashley Patrick Gregg, Ph.D. (University of Michigan-Ann Arbor), B.S. (University of Arizona), Associate Professor, Department of Entomology and Plant Pathology, 2008.

Drawve, Grant R., Ph.D. (University of Arkansas at Little Rock), M.A., B.A. (Southern Illinois University), Assistant Professor, Department of Sociology and Criminology, 2016.

Dridi, Sami, Ph.D., M.S. (National Polytechnic Institute of Lorraine, France), B.S. (Superior Institute of Mateur, Tunisia), Professor, Department of Poultry Science, 2013.

Driver, Nelson G., B.S. (University of Arkansas), Instructor, Department of Finance, 1997.

Drolen, Rebecca, M.F.A., B.A. (Indiana University, Bloomington), Assistant Professor, School of Art, 2015.

Du, Yuchun, Ph.D. (Kagoshima University, Japan), B.S. (Shaanxi University of Technology, China), Associate Professor, Department of Biological Sciences, 2007.

Dumond, Gregory, Ph.D. (University of Massachusetts), M.S. (Texas Tech University), B.S. (University of Texas El Paso), Associate Professor, Department of Geosciences, 2010.

Dunavant, Kristen, M.S.W. (Augsburg College), B.S.W. (St. Olaf College), Lecturer, School of Social Work, 2017.

Dunbar, Diana, M.S.N. (University of Central Arkansas), B.S.N. (University of Central Oklahoma), Instructor, Eleanor Mann School of Nursing, 2015.

Duncan, Jamal, D.M.A., B.M. (University of Michigan), Instructor, Department of Music, 2013.

Durand-Morat, Alvaro, Ph.D., M.S. (University of Arkansas), B.S.E. (National University of Entre Rios), Assistant Professor, Department of Agricultural Economics and Agribusiness, 2016.

DuRant, Sarah Elizabeth, Ph.D. (Virginia Polytechnic Institute and State University), B.S. (University of South Carolina), Assistant Professor, Department of Biological Sciences, 2017.

Durdik, Jeannine M., Ph.D. (Johns Hopkins University), B.S. (Purdue University), Professor, Department of Biological Sciences, 1994.

DuVal, John Tabb, Ph.D., M.F.A., M.A. (University of Arkansas), M.A. (University of Pennsylvania), A.B. (Franklin and Marshall College), Professor, Department of English, 1982.

Dwyer, Mavourneen, M.F.A. (University of Texas at Austin), B.A. (University of Montreal), Associate Professor, Department of Theatre, 1998.

E

Edmonston, Craig, M.S. (University of Kansas), B.S. (Kansas State University), Instructor, Department of Health, Human Performance and Recreation, 2016.

Edwards, Findlay, Ph.D. (New Mexico State University), M.S. (University of New Mexico), M.S.C.E. (New Mexico State University), Associate Professor, Department of Civil Engineering, 1999.

Edwards, Vincent A., M.F.A. (Herron School of Art and Design), B.F.A. (Indiana University), Instructor, School of Art, 2016.

Egan, Martin J., Ph.D., B.Sc. (University of Exeter, United Kingdom), Assistant Professor, Department of Entomology and Plant Pathology, 2016.

Ehrhardt, Joseph, M.I.S. (University of Arkansas), Instructor, Department of Information Systems, 2014.

Eichler, Jeanne, Ed.D. (St. Louis University), Assistant Professor, Department of Occupational Therapy, 2019.

Eidelman, Scott H., Ph.D. (University of Kansas), B.A. (University of Wisconsin-Madison), Associate Professor, Department of Psychological Science, 2008.

Eilers, Linda Hale, Ph.D. (Louisiana State University at Shreveport), M.Ed., B.S.E. (University of Arkansas at Little Rock), Clinical Associate Professor, Department of Curriculum and Instruction, 2001.

Eksioglu, Sandra, Ph.D. (University of Florida), M.S.E.M.S. (Mediterranean Agronomic Institute of Chania), B.S.B.A. (University of Tirana), Professor, Department of Industrial Engineering, 2019.

Eksioglu, Burak, Ph.D. (University of Florida), M.S.E.B.M. (University of Warwick), B.S.I.E. (Bogazici University), Professor, Department of Industrial Engineering, 2019.

El-Ghazaly, Samir M., Ph.D. (University of Texas at Austin), M.S., B.S. (Cairo University), Distinguished Professor, Department of Electrical Engineering, 2007.

El-Shenawee, Magda O., Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Assiut University, Egypt), Professor, Department of Electrical Engineering, 2001.

Elbin, R. J., Ph.D. (Michigan State University), M.A., B.A. (University of New Orleans), Associate Professor, Department of Health, Human Performance and Recreation, 2013.

Elkin, Daniel, M.A., B.A. (University of San Diego), Instructor, Department of History, 2018.

Ellixson, Marita, M.B.A. (Andrew Jackson University), B.S. (University of Central Florida), Instructor, Program in Operations Management, 2002.

Ellstrand, Alan E., Ph.D. (Indiana University at Bloomington), M.B.A. (North Illinois University), B.S. (University of Illinois-Urbana), Professor, Department of Management, 2000.

Elsass, Angela Carlton, Ed.D., Ed.S. (University of Arkansas), M.Ed. (Harding University), B.S.E. (University of Central Arkansas), Clinical Associate Professor, Department of Curriculum and Instruction, 2010.

Embaye, Abel, Ph.D. (Georgia State University), M.A. (Tilburg University), B.A. (University of Asmara), Clinical Assistant Professor, Department of Economics, 2010.

Emory, DeAnna Jan, Ph.D. (University of Arkansas), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Associate Professor, Eleanor Mann School of Nursing, 2012.

Endacott, Jason L., Ph.D., M.S. (University of Kansas), B.S. (Kansas State University), Associate Professor, Department of Curriculum and Instruction, 2011.

Engen, Mindy Sue, Ph.D., M.A. (Pennsylvania State University), B.S. (Georgia State University), Professor, Department of Sociology and Criminology, 2005.

Engen, Rodney L., Ph.D. (University of Washington), M.S., B.S. (University of Wisconsin-Milwaukee), Associate Professor, Department of Sociology and Criminology, 2009.

English, John R., Ph.D. (Oklahoma State University) P.E., M.S.O.R., B.S.E.E. (University of Arkansas), Professor, Department of Industrial Engineering, 1991.

Erdman, Kimball Douglas, M.L.A. (University of Oregon), B.L.A. (Utah State University), Associate Professor, Department of Landscape Architecture, 2009.

Erf, Gisela F., Ph.D. (Cornell University), M.S., B.S. (University of Guelph, Canada), Professor, Department of Poultry Science, 1994.

Erickson, Kirstin C., Ph.D., M.A. (University of Wisconsin-Madison), B.A. (St. Olaf College), Associate Professor, Department of Anthropology, 2001.

Eskitch, Paolo, M.M. (Brooklyn College), Lecturer, Department of Music, 2012.

Esper, Terry L., Ph.D., M.B.A. (University of Arkansas), B.A. (Philander Smith College), Associate Professor, Department of Supply Chain Management, 2013.

Espinoza, Leonel A., Ph.D., M.S. (University of Florida), B.S. (Iowa State University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2003.

Estes, Hanna, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2014.

Etges, William J., Ph.D. (University of Rochester), M.S. (University of Georgia), B.S. (North Carolina State University), Professor, Department of Biological Sciences, 1987.

Evans, Timothy A., Ph.D. (Indiana University), B.S. (Slippery Rock University), Assistant Professor, Department of Biological Sciences, 2013.

Evans-White, Michelle Allayne, Ph.D. (University of Notre Dame), M.S., B.S. (Kansas State University), Professor, Department of Biological Sciences, 2008.

Eveleth, William, M.B.A., B.B. (University of North Texas), Instructor, Program in Operations Management, 2012.

Ewelukwa, Uche U., S.J.D., LL.M. (Harvard University), LL.M. (University College, London), J.D. equivalent (University of Nigeria), Professor, School of Law, 2001.

F

Fairey, Julian, Ph.D., M.S.C.E. (University of Texas at Austin), B.S.C.E. (University of Alberta, Canada), Associate Professor, Department of Civil Engineering, 2008.

Fan, Chenguang, Ph.D. (Iowa State University), B.S. (Nanjing University), Assistant Professor, Department of Chemistry and Biochemistry, 2016.

Fang, Di, Ph.D., W.P. (Arizona State University), B.A. (Nankai University), Assistant Professor, Department of Agricultural Economics and Agribusiness, 2015.

Farmer, Amy Lynn, Ph.D., M.A. (Duke University), B.S. (Purdue University), University Professor, Department of Economics, 1999.

Faske, Travis, Ph.D. (Texas A&M University), M.S. (Oklahoma State University), B.S. (Tarleton State University), Associate Professor, Department of Entomology and Plant Pathology, 2015.

Feldman, William A., Ph.D. (Queen's University), M.S. (Northwestern University), B.S. (Tufts University), Professor, Department of Mathematical Sciences, 1971.

Feldner, Matthew T., Ph.D. (University of Vermont), M.A. (West Virginia University), B.S. (University of Wisconsin-Stevens Point), Professor, Department of Psychological Science, 2005.

Feng, Song, Ph.D., M.S. (Chinese Academy of Sciences), B.S. (Yunnan University), Associate Professor, Department of Geosciences, 2013.

Ferguson, Alishia Juanelle, Ph.D., M.S., B.A. (University of Texas Arlington), Clinical Assistant Professor, School of Social Work, 2008.

Fernstrom, Eric, Ph.D. (University of Arkansas), Instructor, Department of Civil Engineering, 2014.

Ferrier, Gary D., Ph.D. (University of North Carolina-Chapel Hill), B.A. (University of Wisconsin-Madison), University Professor, Department of Economics, 1993.

Fincher, Samuel Mack Edwin, M.S. (University of Arkansas), B.S. (University of the Ozarks), Instructor, Department of Mathematical Sciences, 2009.

Fitzpatrick, Lynn, M.Arch. (Rice University), B.S. (Cornell University), Assistant Professor, Department of Architecture, 1999.

Fitzpatrick, Kevin M., Ph.D. (State University of New York at Albany), M.A. (University of South Carolina at Columbia), B.A. (Susquehanna University), University Professor, Department of Sociology and Criminology, 2005.

Fitzpatrick, Ellen Therese, Ph.D. (Michigan State University), Professor, Clinton School of Public Service, 2012.

Flaccus, Janet A., LL.M. (University of Illinois-Urbana-Champaign), J.D., M.A. (University of California-Davis), Professor, School of Law, 1984.

Flanigan, J. Michael, Ph.D. (University of Arkansas), M.P.H., M.A., B.A. (University of Minnesota), Lecturer, Department of Political Science, 2016.

Fleck, Mary, , Instructor, Department of Civil Engineering, 2007.

Flynn, John, M.B.A., J.D. (Case Western Reserve University), B.S. (John Carroll University), Instructor, Program in Operations Management, 2012.

Foley, Larry D., M.S. (University of Central Arkansas), B.A. (University of Arkansas), Professor, School of Journalism and Strategic Media, 1993.

Foote, Rebecca K., Ph.D. (University of Illinois at Urbana-Champaign), M.A. (Rice University), B.A. (University of Houston), Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.

Forbes, Kristian M., Ph.D. (University of Jyväskylä), M.P.H. (Latrobe University), B.Sc. (Latrobe University), Assistant Professor, Department of Biological Sciences, 2018.

Forbess, Janet B., M.Ed. (University of Florida), B.S.E. (Georgia Southern College), Instructor, Department of Health, Human Performance and Recreation, 1978.

Ford, David M., Ph.D., M.S., B.S.Ch.E. (University of Pennsylvania), Professor, Ralph E. Martin Department of Chemical Engineering, 2017.

Forscher, Patrick, Ph.D. (University of Wisconsin), B.A. (Macalester College), Assistant Professor, Department of Psychological Science, 2017.

Foster, Sharon Elaine, Ph.D., LL.M. (University of Edinburgh, Scotland), J.D. (Loyola Marymount University), B.A. (University of California-Los Angeles), Associate Professor, School of Law, 2000.

Foster, William, LL.M. (New York University), J.D. (University of Arkansas), B.S. (University of Central Arkansas), Assistant Professor, School of Law, 2014.

Foster, Bobbie, M.A., B.A. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 2015.

Fosu, Ignatius, Ph.D., M.A. (University of Alabama), B.A. (University of Ghana, Accra), Associate Professor, School of Journalism and Strategic Media, 2005.

Fowler, Jason, M.B.A. (John Brown University), B.S.B.A. (University of Arkansas), Instructor, Department of Accounting, 2015.

Frank, Kate L., M.F.A. (University of Arkansas), B.F.A. (California State University-Los Angeles), Lecturer, Department of Theatre, 2006.

Franklin, Carly T.S., M.S.W. (University of Arkansas), Clinical Assistant Professor, School of Social Work, 2014.

Franks, Lisa, M.S.N., B.S.N. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2014.

Frazier, Kimberly Frances, Ph.D. (University of South Carolina-Columbia), M.S., B.S.E. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2007.

Fredrick, David Charles, Ph.D. (University of Southern California), M.A., B.A. (University of Kansas), Associate Professor, Department of World Languages, Literatures and Cultures, 1991.

Freeman, Katherine, M.S.W. (University of Georgia), B.A. (University of Arkansas), Lecturer, School of Social Work, 2017.

Freeze, Ron, Ph.D. (Arizona State University), M.B.A. (University of Missouri-Kansas City), B.S. (General Motors Institute), Clinical Associate Professor, Department of Information Systems, 2015.

French, Mandy, B.B.A. (University of Oklahoma), Instructor, Department of Accounting, 2015.

Frentz, Tom, Ph.D., M.S., B.S. (University of Wisconsin-Madison), Professor, Department of Communication, 1985.

Friscoe, Louis F., M.S., B.S. (Embry Riddle Aeronautical University), Instructor, Program in Operations Management, 2014.

Fritsch, Ingrid, Ph.D. (University of Illinois-Urbana-Champaign), B.S. (University of Utah), Professor, Department of Chemistry and Biochemistry, 1992.

Fritz, Angela I., Ph.D. (Loyola University), M.A. (University of Wisconsin-Madison), B.A. (University of Iowa), Associate Librarian, University Libraries, 2014.

Fu, Huaxiang, Ph.D., M.S. (Fudan University), B.S. (University of Science and Technology of China), Professor, Department of Physics, 2002.

Fugate, Brian, Ph.D., M.B.A., B.S. (University of Tennessee), Professor, Department of Supply Chain Management, 2015.

Fukushima, Tatsuya, Ph.D., M.A. (Oklahoma State University), B.A. (Kanto Gakuin University, Japan), Associate Professor, Department of World Languages, Literatures and Cultures, 2000.

Fuller, Serena M., Ph.D. (University of California, Davis), Associate Professor, School of Human Environmental Sciences, 2014.

Funkhouser, Eric M., Ph.D. (Syracuse University), M.A., B.A. (University of Nebraska-Lincoln), Professor, Department of Philosophy, 2002.

Furlong, Kimberley J., M.Arch. (U. Texas at Austin), B.F.A. (Pratt Institute), Associate Professor, Department of Interior Design, 2013.

G

Gaber, John, Ph.D. (Columbia University), M.A. (University of Southern California), B.A. (University of California-Los Angeles), Professor, Department of Political Science, 2009.

Gadberry, M. Shane, Ph.D., M.S., B.S. (University of Arkansas), Associate Professor, Department of Animal Science, 2006.

Gaduh, Arya, Ph.D. (University of Southern California), M.Phil. (Cambridge University), B.A. (University of California-Berkeley), Associate Professor, Department of Economics, 2013.

Gage, Justin, Ph.D., M.A., B.A. (University of Arkansas), Instructor, Department of History, 2016.

Gallagher, Kaitlin, Ph.D., B.Sc. (University of Waterloo, Canada), Assistant Professor, Department of Health, Human Performance and Recreation, 2015.

Gallagher, John M., Ph.D., M.S.W. (Arizona State University), B.A. (State University of New York at Plattsburgh), Assistant Professor, School of Social Work, 2016.

Gallini, Brian R., J.D. (University of Michigan-Ann Arbor), LL.M. (Temple University), B.A. (College of the Holy Cross), Professor, School of Law, 2008.

Gamble, James S., Ph.D., M.A., M.F.A. (University of Arkansas), B.A. (Middlebury College), Instructor, Department of English, 2006.

Ganio, Matthew Stueck, Ph.D. (University of Connecticut), M.S., B.S. (University of Georgia), Associate Professor, Department of Health, Human Performance and Recreation, 2011.

Ganson, Judy, M.P.A. (University of California-Riverside), M.S. (University of Illinois-Urbana-Champaign), B.A. (Purdue University), Associate Librarian, University Libraries, 2001.

Garcia, M. Elena, Ph.D., M.S. (University of Arkansas), B.A. (University of Arkansas at Little Rock), Professor, Department of Horticulture, 2005.

Garcia-Dastugue, Sebastian, Ph.D., M.A. (The Ohio State University), M.B.A. (Instituto de Altos Estudios, Universidad Austral), Clinical Assistant Professor, Department of Supply Chain Management, 2015.

Garner, Jerald, M.S. (University of Arkansas), B.S. (Park University), Instructor, Program in Operations Management, 1997.

Garrett, B. J., M.S.N. (Angelo State University), Instructor, Eleanor Mann School of Nursing, 2018.

Garrison, Mary Elizabeth, Ph.D., M.S. (Iowa State University), B.S. (Benedictine College), Professor, School of Human Environmental Sciences, 2014.

Gashler, Michael S., Ph.D., M.S., B.S. (Brigham Young University), Assistant Professor, Department of Computer Science and Computer Engineering, 2012.

Gastineau, Jana M., M.S., M.A., B.S. (Arkansas State University), Instructor, Department of Mathematical Sciences, 2011.

Gattis, J. L., Ph.D. (Texas A&M University), M.S.C.E. (University of Texas Arlington), B.S.C.E. (University of Arkansas), Professor, Department of Civil Engineering, 1993.

Gauch, Susan E., Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen's University, Canada), Professor, Department of Computer Science and Computer Engineering, 2007.

Gauch, John Michael, Ph.D. (University of North Carolina at Chapel Hill), M.Sc., B.Sc. (Queen's University, Canada), Professor, Department of Computer Science and Computer Engineering, 2008.

Gauri, Dinesh K., Ph.D., M.A. (State University of New York-Buffalo), M.S. (Indian Institute of Technology, New Delhi), Professor, Department of Marketing, 2016.

Gbur, Edward E., Ph.D., M.S. (The Ohio State University), B.S. (Saint Francis University), Professor, Department of Crop, Soil and Environmental Sciences, 1987.

Gea-Banacloche, Julio R., Ph.D. (University of New Mexico), Licenciado en Ciencias Fisicas (Universidad Autonoma de Madrid), Professor, Department of Physics, 1989.

Gearhart, G. David, Ed.D., J.D. (University of Arkansas), B.A. (Westminster College), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1998.

Geng, Difei, Ph.D. (Vanderbilt University), M.A. (Southern Methodist University), M.A. (Nankai University), B.A. (Tianjin University of Finance and Economics), Assistant Professor, Department of Economics, 2016.

Ghadbian, Najib, Ph.D. (City University of New York), M.A. (Rutgers University), M.A. (City University of New York), B.Sc. (United Arab Emirates University), Associate Professor, Department of Political Science, 1999.

Gibeault, Michelle J., M.S. (University of North Carolina), B.A. (University of California, Berkeley), Assistant Librarian, University Libraries, 2013.

Gibson, Tess, M.A. (University of South Dakota), M.L.S. (Emporia State University), B.A. (Baker University), Associate Librarian, University Libraries, 2005.

Gibson, Kristen Elizabeth, Ph.D. (Johns Hopkins University), B.S. (University of Central Florida), Associate Professor, Department of Food Science, 2012.

Gigantino, Jim, Ph.D. (University of Georgia), B.A. (University of Richmond), Professor, Department of History, 2010.

Gilbertson, Mary A., M.L.S. (University of North Texas), B.A. (University of Arkansas), A.A. (NorthWest Arkansas Community College), Associate Librarian, University Libraries, 2001.

Gilbertson, Margie, Ph.D. (University of Memphis), M.S.E., B.A. (University of Central Arkansas), Clinical Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2016.

Gilchrist, Ellen Louise, B.A. (Millsaps College), Clinical Professor, Department of English, 2002.

Gilmet, Kelsey, Ph.D. (University of Illinois-Chicago), M.S.N. (University of Minnesota), B.A. (Kalamazoo College), Instructor, Eleanor Mann School of Nursing, 2016.

Girshner, Joshua M., M.A., B.A. (University of Arkansas), Instructor, Department of Mathematical Sciences, 2012.

Glade, Rachel E., Ph.D. (University of Arkansas), M.S. (University of Arkansas for Medical Sciences), M.A. (University of Arkansas), B.S. (University of Arkansas at Little Rock), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.

Glazer, Trip, Ph.D. (Georgetown University), M.A. (Georgia State University), B.A. (American University), Visiting Assistant Professor, Department of Philosophy, 2017.

Goering, Christian Z., Ph.D., M.S. (Kansas State University), B.A. (Washburn University), Professor, Department of Curriculum and Instruction, 2007.

- Goforth, Carol Rose**, J.D., B.A. (University of Arkansas), University Professor, School of Law, 1993.
- Goggin, Fiona**, Ph.D. (University of California-Davis), B.S. (Cornell University), Professor, Department of Entomology and Plant Pathology, 2001.
- Goodman-Strauss, Chaim**, Ph.D., B.S. (University of Texas at Austin), Professor, Department of Mathematical Sciences, 1994.
- Goodstein-Murphree, Ethel S.**, Ph.D. (University of Michigan-Ann Arbor), B.Arch., B.S. (City University of New York), Professor, Department of Architecture, 1992.
- Goodwin, Harold L.**, Ph.D., M.S., B.S. (Oklahoma State University), Professor, Department of Agricultural Economics and Agribusiness, 1996.
- Gordon, Joel Samuel**, Ph.D. (University of Michigan-Ann Arbor), B.A. (University of Illinois), Professor, Department of History, 1999.
- Gordon, Ronald J.**, Ph.D. (University of Arkansas), Instructor, Department of History, 2014.
- Gorman, Dean Richard**, Ph.D. (University of Kansas), M.S., B.A. (Arizona State University), Professor, Department of Health, Human Performance and Recreation, 1979.
- Gosman, Sara**, J.D., M.P.A. (Harvard University), A.B. (Princeton University), Assistant Professor, School of Law, 2014.
- Gosman, Alan R.**, Ph.D. (Harvard University), Associate Professor, Department of Music, 2014.
- Gould, Kara**, Ph.D. (University of Utah), M.A. (Wheaton College), B.A. (Wheaton College), Assistant Professor, School of Journalism and Strategic Media, 2016.
- Goussevskaia, Anna**, Ph.D. (University of Warwick, United Kingdom), B.Sc. (Federal University of Minas, Brazil), Clinical Assistant Professor, Department of Management, 2013.
- Graham, Donna Lucas**, Ph.D. (University of Maryland-College Park), M.Ed., B.S. (University of Arkansas), University Professor, Department of Agricultural Education, Communications and Technology, 1985.
- Grant, Alphonso W.**, Ph.D. (Pennsylvania State University), Assistant Professor, School of Art, 2017.
- Gray, Laura Virginia**, M.F.A. (University of Arkansas), M.A. (University of Montevallo), B.A. (University of North Alabama), Instructor, Department of English, 2000.
- Gray, Michelle**, Ph.D. (University of Arkansas), M.S. (Ball State University), B.S. (University of Tennessee, Chattanooga), Associate Professor, Department of Health, Human Performance and Recreation, 2010.
- Greathouse, Denise A.**, Ph.D. (University of Arkansas), Research Associate Professor, Department of Chemistry and Biochemistry, 1997.
- Greene, Jay Phillip**, Ph.D., A.M. (Harvard University), B.A. (Tufts University), Distinguished Professor, Department of Education Reform, 2005.
- Greene, Aleza R.S.**, Ph.D., M.A. (Brandeis University), B.A. (Tufts University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2006.
- Greene, Nicholas P.**, Ph.D. (Texas A&M University), M.S., B.S. (University of South Carolina), Associate Professor, Department of Health, Human Performance and Recreation, 2013.
- Greenhaw, William Karl**, J.D. (University of Arkansas), B.A. (Westminster College), Instructor, Department of Accounting, 2001.
- Greenlee, Lauren F.**, Ph.D., M.S. (University of Texas, Austin), BSChE (University of Michigan), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 2015.
- Griffith, Lauren Miller**, Ph.D., M.A. (Indiana University), B.A. (Texas A&M University), Visiting Assistant Professor, Department of Anthropology, 2013.
- Grover, Kenda Shea**, Ed.D. (University of Arkansas), M.S., B.A. (Northeastern State University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2003.
- Grover, Varun**, Ph.D. (University of Pittsburgh), M.B.A. (Southern Illinois University), B.S. (Indian Institute of Technology), Distinguished Professor, Department of Information Systems, 2017.
- Gruenwald, Jeffrey A.**, Ph.D. (Michigan State University), Associate Professor, Department of Sociology and Criminology, 2019.
- Gu, Jingping**, Ph.D. (Texas A&M University), M.A. (Peking University), B.A. (Renmin University of China, Beijing), Associate Professor, Department of Economics, 2008.
- Gualandi, Richard**, M.B.A. (Tulane University), M.S. (Naval Postgraduate School), B.S. (College of Charleston), Instructor, Program in Operations Management, 2018.
- Gunter, Stacey A.**, Ph.D. (Oklahoma State University), M.S. (University of Nevada Reno), B.S. (Oregon State University), Adjunct Professor, Department of Animal Science, 1996.
- Gupta, Nina**, Ph.D., A.M. (University of Michigan-Ann Arbor), M.A., B.A. (University of Allahabad), Distinguished Professor, Department of Management, 1984.
- ## H
- Hackstadt, Angela**, M.L.I.S. (University of Alabama), B.A. (University of Arkansas), Assistant Professor, University Libraries, .
- Haggard, Brian Edward**, Ph.D. (Oklahoma State University), M.S. (University of Arkansas), B.S. (Missouri University of Science and Technology), Professor, Department of Biological and Agricultural Engineering, 2006.
- Hagstrom, Fran W.**, Ph.D. (Clark University), M.S. (University of Texas Health Science Center-Houston), M.A. (St. Louis University), B.A. (Southwest Baptist University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2002.
- Halbrook, Steve A.**, J.D. (Drake University), Ph.D. (Iowa State University), B.A. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 2008.
- Hale, Micah**, Ph.D., M.S.C.E., B.S.C.E. (University of Oklahoma), Professor, Department of Civil Engineering, 2002.
- Hale, Cathy J.**, M.S.N. (University of Arkansas), M.S. (University of Central Arkansas), B.S.N. (Arkansas Tech University), Clinical Instructor, Eleanor Mann School of Nursing, 2013.
- Hall, Kevin D.**, Ph.D. (University of Illinois-Urbana-Champaign), M.S.C.E., B.S.C.E. (University of Arkansas), Professor, Department of Civil Engineering, 1993.
- Hallett, LewEllyn**, M.F.A. (Bowling Green State University), B.A. (University of New Mexico), Instructor, Department of English, 2013.
- Halvorsen-Ganepola, Marie**, M.B.A. (University of Notre Dame), Instructor, Department of Management, 2018.
- Ham, Richard**, Ed.D. (University of Arkansas at Little Rock), M.A.S. (Embry-Riddle Aeronautical University), B.S. (Park University), Instructor, Program in Operations Management, 2014.
- Ham-Holm, Lindsay S.**, Ph.D., M.A., B.A. (University of Nebraska-Lincoln), Associate Professor, Department of Psychological Science, 2007.
- Hamilton, John H.**, M.S., B.S. (University of Arkansas), Instructor, Department of Mechanical Engineering, 2002.
- Hamm, Cora**, M.S. (New York University), Instructor, School of Human Environmental Sciences, 2016.
- Hammel, Alice**, D.M.A. (Shenandoah University), M.M. (Florida State University), B.M. (Shenandoah University), Instructor, Department of Music, 2016.

- Hammig, Bart**, Ph.D. (University of Kansas), M.P.H. (University of Kansas Medical Center), B.S. (University of Kansas), Professor, Department of Health, Human Performance and Recreation, 2008.
- Hammond, Kelly**, Ph.D. (Georgetown University), M.A. (Simon Fraser University), B.A. (Bishop's University), Assistant Professor, Department of History, 2015.
- Hanning, Casey Owens**, Ph.D., M.S., B.S. (Texas A&M University), Professor, Department of Poultry Science, 2000.
- Hanson, Alexander J.**, M.F.A. (University of Iowa), Instructor, School of Art, 2015.
- Happgood, Thomas Layley**, M.F.A., B.A. (University of Arizona), Associate Professor, School of Art, 2005.
- Harding, Lorna**, M.S. (University of Alberta, Canada), B.A. (University of Western Ontario, Canada), Instructor, School of Human Environmental Sciences, 2004.
- Hardke, Jarrod T.**, Ph.D. (Louisiana State University), B.S.A. (University of Arkansas), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2013.
- Hare, Laurence**, Ph.D., M.A. (University of North Carolina at Chapel Hill), B.A. (University of Tennessee at Chattanooga), Associate Professor, Department of History, 2010.
- Hargis, Billy M.**, Ph.D., D.V.M. (University of Minnesota-Twin Cities), M.S. (University of Georgia), B.S. (University of Minnesota), Distinguished Professor, Department of Poultry Science, 2000.
- Harper, Misti**, Ph.D., (University of Arkansas), M.A. (University of Central Arkansas), B.A. (University of the Ozarks), Instructor, Department of History, 2017.
- Harrington, Brett P.**, M.F.A. (University of Arkansas), B.A. (University of Houston-Clear Lake), Instructor, 2007.
- Harrington, Phil**, Ph.D., M.S. (University of Notre Dame), B.S. (Whitworth College), Associate Professor, Department of Mathematical Sciences, 2009.
- Harris, Casey Taggart**, Ph.D., M.A. (Pennsylvania State University), B.S. (Texas A&M University), Associate Professor, Department of Sociology and Criminology, 2011.
- Harriss, Edmund O.**, Ph.D. (Imperial College, London), M.M. (University of Warwick), Clinical Assistant Professor, Department of Mathematical Sciences, 2010.
- Harter, William G.**, Ph.D. (University of California-Irvine), B.S. (Hiram College), Professor, Department of Physics, 1986.
- Hason, Alexander**, M.F.A., M.A. (University of Iowa), B.F.A. (University of Minnesota, Duluth), Instructor, School of Art, 2015.
- Haydar, Paula Marie**, Ph.D., M.F.A. (University of Arkansas), M.Ed., B.S. (University of Massachusetts), Clinical Assistant Professor, Department of World Languages, Literatures and Cultures, 2006.
- Haydar, Adnan Fuad**, Ph.D. (University of California-San Diego), M.A., B.A. (American University of Beirut), Professor, Department of World Languages, Literatures and Cultures, 1993.
- Hayes, David**, M.S. (Murray State University), B.S. (University of Arkansas), Instructor, Department of Chemistry and Biochemistry, 2007.
- Hayes, Thomas P.**, Ph.D. (University of North Texas), MAcc. (University of Missouri), B.A. (Westminster College), Clinical Associate Professor, Department of Accounting, 2018.
- Hays, Phillip D.**, Ph.D., M.S. (Texas A&M University), B.S. (University of Arkansas), Research Professor, Department of Geosciences, 2000.
- Hearne, Brittany Nicole**, Ph.D., M.A., (Vanderbilt University), B.S. (Texas A&M), Assistant Professor, Department of Sociology and Criminology, 2018.
- Heffernan, Michael Joseph**, Ph.D., M.A. (University of Massachusetts), A.B. (University of Detroit), Professor, Department of English, 1986.
- Hemphill, Dewey**, M.S. (University of Arkansas), B.A. (Memphis State University), Instructor, Program in Operations Management, 2012.
- Henderson, Jaye**, M.S.N., B.S.N. (Arkansas Tech University), Clinical Instructor, Eleanor Mann School of Nursing, 2013.
- Henderson, Craig**, M.B.A. (University of Nevada), B.S. (United States Naval Academy), Instructor, Program in Operations Management, 2011.
- Henry, Ralph Leroy**, Ph.D., M.S. (University of Florida), B.S.E. (University of Kansas), Distinguished Professor, Department of Biological Sciences, 1996.
- Henry, Leah Jean**, Ph.D. (Texas Woman's University), M.A. (Michigan State University), B.S. (Texas A&M University), Associate Professor, Department of Health, Human Performance and Recreation, 2008.
- Henry, Christopher Garrett**, Ph.D. (University of Nebraska-Lincoln), M.S., B.S. (Kansas State University), Associate Professor, Department of Biological and Agricultural Engineering, 2011.
- Hentzen, Jane**, M.S.N. (University of Texas at Austin), B.S.N. (University of Nebraska), Clinical Instructor, Eleanor Mann School of Nursing, 2017.
- Herman, Greg**, M.Arch. (Rice University), B.Arch. (University of Cincinnati), Associate Professor, Department of Architecture, 1991.
- Hernandez, Sarah**, Ph.D., M.S. (University of California, Irvine), B.S. (University of Florida), Assistant Professor, Department of Civil Engineering, 2015.
- Hernandez-Miranda, Michael**, Ph.D., M.A. (Texas A&M University), B.A. (University of Oriente), Instructor, Department of World Languages, Literatures and Cultures, 2015.
- Herold, Warren**, Ph.D. (University of Michigan), Assistant Professor, Department of Philosophy, 2014.
- Herold, Laura K.**, Ph.D., M.A. (University of Michigan), B.A. (Oberlin College), Clinical Assistant Professor, School of Human Environmental Sciences, 2015.
- Hershberger, Margaret**, Ph.D., M.S. (University of Chicago), B.S. (The Ohio State University), Instructor, Department of Chemistry and Biochemistry, 2015.
- Herzberg, Amy**, M.F.A. (California Institute of the Arts), B.A. (Arizona State University), Distinguished Professor, Department of Theatre, 1989.
- Herzog, Jacob**, M.M. (Manhattan School of Music), B.M. (Berklee College of Music), Instructor, Department of Music, 2016.
- Hestekin, Jamie A.**, Ph.D. (University of Kentucky), B.S.Ch.E. (University of Minnesota-Duluth), Professor, Ralph E. Martin Department of Chemical Engineering, 2006.
- Hestekin, Christa**, Ph.D. (Northwestern University), B.S.Ch.E. (University of Kentucky), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 2006.
- Hettiarachchy, Navam S.**, Ph.D. (University of Hull, England), M.S. (Edinburgh University, Scotland), B.S. (University of Madras, India), University Professor, Department of Food Science, 1992.
- Hevel, Michael Stephen**, Ph.D. (University of Iowa), M.A. (Bowling Green State University), B.A. (University of Kansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2012.
- Heyes, Colin David**, Ph.D. (Georgia Institute of Technology), B.S. (Loughborough University), Associate Professor, Department of Chemistry and Biochemistry, 2008.
- Heysfield, Ernie**, Ph.D. (City University of New York), M.S.C.E. (Polytechnic University), Associate Professor, Department of Civil Engineering, 2001.
- Hicks, Morgan**, M.F.A. (University of Arkansas), M.A. (Missouri State University), B.F.A. (Arkansas State University), Assistant Professor, Department of Theatre, 2007.
- Higgins, Kristin Kay**, Ph.D., M.S. (University of Arkansas), B.A. (Vanderbilt University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2006.

- Hinds, Heather Rae**, M.A. (University of Arkansas), B.S. (University of Central Missouri), Instructor, Department of World Languages, Literatures and Cultures, 2008.
- Hinrichsen, Lisa**, Ph.D., M.A. (Boston University), B.A. (Wellesley College), Associate Professor, Department of English, 2008.
- Hodges, Amy M.**, B.A. (Louisiana Tech College Acadian Campus), Instructor, 2005.
- Hoehle, Hartmut**, Ph.D., B.Com. (Victoria University of Wellington), Associate Professor, Department of Information Systems, 2013.
- Hofer, Christian**, Ph.D. (University of Maryland University College), B.A. (European School of Business), Associate Professor, Department of Supply Chain Management, 2007.
- Hoffpauir, Susan Annette**, Ph.D. (University of Michigan-Ann Arbor), Distinguished Professor, Clinton School of Public Service, 2011.
- Hogan, Adam S.**, M.A., M.F.A. (Washington University in St. Louis), Assistant Professor, School of Art, 2014.
- Holfield, Christine**, Ph.D. (Pennsylvania State University), M.A. (University of Kansas), B.S. (Central Michigan University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2017.
- Holland, Edward C.**, Ph.D., M.A. (University of Colorado, Boulder), B.A. (Princeton University), Assistant Professor, Department of Geosciences, 2016.
- Holland, Brian**, M.Arch. (University of Pennsylvania), B.Arch. (California State Polytechnic University, Pomona), Assistant Professor, Department of Architecture, 2018.
- Holliday, Erica**, Ed.D., M.Ed., B.S.E. (University of Arkansas), Instructor, Department of Information Systems, 2014.
- Hollingsworth, Cathy A.**, M.A. (University of Arkansas), Instructor, Department of Communication, 2011.
- Holloway, Ginger L.**, M.S.N. (Walden University), B.S.N. (Northeastern State University), Instructor, Eleanor Mann School of Nursing, 2013.
- Holm, Jeremy**, M.A., B.S. (University of Nebraska), Instructor, Department of Psychological Science, 2008.
- Holyfield, Lori C.**, Ph.D. (University of Georgia), M.A., B.S.E. (University of Arkansas), Professor, Department of Sociology and Criminology, 1995.
- Holyfield, Christine E.**, Ph.D. (Pennsylvania State University), M.A. (University of Kansas), B.S. (Central Michigan University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2017.
- Hopkins, John D.**, Ph.D. (University of Arkansas), M.S., B.S. (Clemson), Associate Professor, Department of Entomology and Plant Pathology, 2002.
- Hori, Yoko**, M.A. (University of Kansas), B.A. (William Jewell College), Instructor, Department of World Languages, Literatures and Cultures, 2017.
- Horowitz, Andrew W.**, Ph.D., M.S. (University of Wisconsin-Madison), B.S. (University of Maryland), Professor, Department of Economics, 1998.
- Howard, Luke R.**, Ph.D., M.S. (University of Arkansas), B.S. (Purdue University), Professor, Department of Food Science, 2002.
- Howie, Erin**, Ph.D. (University of South Carolina), B.S. (University of Maryland), Assistant Professor, Department of Health, Human Performance and Recreation, 2016.
- Howlett, Kristina-Marie**, Ph.D. (University of Arkansas), M.P.S. (Manhattanville College), B.A. (University of Connecticut), Assistant Professor, Department of Curriculum and Instruction, 2016.
- Hoyer, Jennifer M.**, Ph.D., M.A. (University of Minnesota-Twin Cities), B.A. (University of Tulsa), Associate Professor, Department of World Languages, Literatures and Cultures, 2007.
- Hsu, Hung-Chia Scott**, Ph.D. (University of North Carolina-Chapel Hill), M.A. (University of Southern California), B.A. (National Taiwan University), Assistant Professor, Department of Finance, 2015.
- Hsu, V. Jo**, Ph.D., M.F.A. (Pennsylvania State University), B.A. (Rice University), Assistant Professor, Department of English, 2017.
- Hu, Jin**, Ph.D. (Tulane University), B.S. (University of Science and Technology of China), Assistant Professor, Department of Physics, 2017.
- Huang, Po-Hao Adam**, Ph.D., M.S., B.S. (University of California-Los Angeles), Associate Professor, Department of Mechanical Engineering, 2006.
- Huang, Miaoqing**, Ph.D. (George Washington University), B.S. (Fudan University), Associate Professor, Department of Computer Science and Computer Engineering, 2010.
- Huang, Quiqiong**, Ph.D. (University of California-Davis), B.S. (Remin University of China), Professor, Department of Agricultural Economics and Agribusiness, 2013.
- Huang, Yan**, Ph.D. (University of Wyoming), M.S. (Dankook University), B.S. (China Agricultural University), Assistant Professor, Department of Animal Science, 2015.
- Hubert, Stephanie K.**, M.S. (University of Arkansas), B.S. (Kansas State University), Instructor, School of Human Environmental Sciences, 2015.
- Hughes, Claretha**, Ph.D. (Virginia Polytechnic Institute and State University), M.S. (North Carolina State University), M.B.A. (University of Arkansas), B.A. (Clemson University), Professor, Department of Human Resource and Workforce Development Education, 2004.
- Huitink, David**, Ph.D., M.S.M.E., B.S.M.E. (Texas A&M University), Assistant Professor, Department of Mechanical Engineering, 2016.
- Hulen, Jeannie**, M.F.A. (Louisiana State University), B.F.A. (Kansas City Art Institute), Professor, School of Art, 2002.
- Hunt, Valerie H.**, Ph.D., J.D., B.A. (University of Arkansas), Associate Professor, Department of Political Science, 2005.
- Hunter, Justin R.**, Ph.D. (University of Hawai'i at Manoa), M.M., B.A. (University of Arkansas), Lecturer, Department of Music, 2017.
- Hurd, Debra**, Ph.D., M.P.A., B.A. (University of Arkansas), Clinical Professor, School of Social Work, 1992.
- Hutchins, Rhett J.**, Ph.D. (University of Georgia), M.Ed., B.S. (Clemson University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2014.
- Hutto, Gregory T.**, M.S. (Stanford University), B.S. (U.S. Naval Academy), Instructor, Program in Operations Management, 2014.
- Hyatt, David Graham**, M.B.A., B.S.B.A. (University of Arkansas), Research Associate Professor, Department of Supply Chain Management, 2011.
- Hyman, Jeremy S.**, C.Phil. (University of California, Los Angeles), M.A. (Princeton University), B.A. (University of Michigan), Instructor, Department of Philosophy, 2013.
- Imbeau, Marcia B.**, Ph.D. (University of Connecticut), M.Ed. (University of Arkansas at Little Rock), B.A. (Hendrix College), Professor, Department of Curriculum and Instruction, 1991.
- Irish, Shawn D.**, M.F.A. (University of Arkansas), B.A. (Missouri Southern State University), Assistant Professor, Department of Theatre, 2013.
- Irungu, David M.**, M.A. (University of Mississippi), B.Ed. (University of Nairobi, Kenya), Instructor, Department of World Languages, Literatures and Cultures, 2016.
- Isbell, Bradley**, M.S., B.S. (University of Arkansas), Instructor, Department of Agricultural Economics and Agribusiness, 2017.
- Ivey, Mack**, Ph.D., B.S. (University of Georgia), Associate Professor, Department of Biological Sciences, 1992.
- Iyer, Shilpa**, Ph.D. (University of Georgia), M.Sc., B.Sc. (University of Pune, India), Assistant Professor, Department of Biological Sciences, 2016.

J

Jackson, Brandon, Ph.D. (Florida State University), Associate Professor, Department of Sociology and Criminology, 2013.

Jacobs, Lynn Frances, Ph.D., M.A. (New York University), B.A. (Princeton University), Distinguished Professor, School of Art, 1989.

Jacobus, Frank R., M.Arch. (University of Texas at Austin), Associate Professor, Department of Architecture, 2012.

Jaduh, Arva, Ph.D. (University of Southern California), M.Phil. (Cambridge University), B.A. (University of California, Berkeley), Assistant Professor, Department of Economics, 2013.

Jandik, Tomas, Ph.D. (University of Pittsburgh), M.S., B.S. (Czech Technical University), Professor, Department of Finance, 2000.

Jandik, Dobrina, Ph.D. (University of Arkansas), M.Sc.Eng. (University of Chemical Technology), M.B.A. (University of Montana), Clinical Associate Professor, Department of Finance, 2017.

Janicke, Sophie H., Ph.D. (Florida State University), M.S. (Eberhard Karls University), B.A. (Friedrich Willhelms University), Visiting Assistant Professor, Department of Communication, 2014.

Jarnagin, Robyn, LL.M. (New York University), J.D., B.S. (University of Montana), Clinical Assistant Professor, Department of Accounting, 2016.

Jarrett, Anna Lee, Ph.D., M.S.N. (University of Missouri-Columbia), B.S.N. (Missouri Southern State College), Associate Professor, Eleanor Mann School of Nursing, 2012.

Jefferis, Neal, M.S.Ed. (Old Dominion University), B.E.S. (University of Missouri), Instructor, Program in Operations Management, 2017.

Jennings, John A., Ph.D. (University of Missouri), M.S. (University of Arkansas), B.S. (Southwest Missouri State University), Professor, Department of Animal Science, 1998.

Jennings, Tameka A., Ph.D. (University of Arkansas), B.S. (University of Arkansas-Pine Bluff), Clinical Assistant Professor, Department of Biological Sciences, 2017.

Jensen, Thomas D., Ph.D., M.A., B.A. (University of Arkansas), Professor, Department of Marketing, 1982.

Jensen, Molly R., Ph.D., M.A. (University of Arkansas), B.S. (Southwest Missouri State University), Clinical Associate Professor, Department of Marketing, 2003.

Jensen, Sarah, M.B.A., B.A. (Webster University), Instructor, Department of Marketing, 2009.

Jensen, David C., Ph.D., M.S., B.S. (Oregon State University), Assistant Professor, Department of Mechanical Engineering, 2012.

Jensen, Toni, Ph.D. (Texas Tech University), M.A., B.A. (University of South Dakota), Assistant Professor, Department of English, 2014.

Jensen, Morten O., Ph.D. (University of Aarhus, Denmark), M.Sc. (Georgia Institute of Technology), Associate Professor, Department of Biomedical Engineering, 2014.

Jensen, Hanna Katariina, Ph.D. (University of Oulu, Finland), Research Assistant Professor, Department of Biomedical Engineering, 2015.

Jilka, Elizabeth C., M.F.A., B.A. (University of Arkansas), Lecturer, Department of Theatre, 2017.

Joffe Minor, Tacy Marie, Ph.D. (Northwestern University), M.A., B.S. (University of Arkansas), Teaching Assistant Professor, Department of Physics, 2011.

Jogan, Kathleen, Ed.D., M.S. (University of Arkansas), B.S. (Ursinus College), Instructor, Department of Animal Science, 2015.

Johnson, Donald M., Ph.D. (University of Missouri-Columbia), M.A., B.S. (Western Kentucky University), Professor, Department of Agricultural Education, Communications and Technology, 1993.

Johnson, Normastel Mosby, M.L.S. (Simmons College), B.A. (Vanderbilt University), Associate Librarian, University Libraries, 1989.

Johnson, Jon, Ph.D. (Indiana University at Bloomington), M.B.A., B.S. (University of Arkansas), Professor, Department of Management, 1996.

Johnson, Donn T., Ph.D., M.S. (Michigan State University), B.S. (University of Minnesota, Duluth), Professor, Department of Entomology and Plant Pathology, 1978.

Johnson, Mark, Ph.D. (Michigan State University), M.S. (Purdue University), B.S. (City University of New York, Brooklyn College), Professor, Department of Mathematical Sciences, 1995.

Johnson, Michael, M.S.C.E. (University of Pittsburgh), B.S.C.E. (University of Minnesota), B.A. (Chapman College), Professor, Department of Civil Engineering, 2010.

Johnson, Michele, M.A., B.A. (Sam Houston State University), Instructor, Department of History, 2018.

Johnson-Carter, Charlene M., Ph.D. (Emory University), M.B.A. (Atlanta University), M.Ed., B.A. (University of Cincinnati), Associate Professor, Department of Curriculum and Instruction, 1992.

Jones, Joanne R., M.F.A., B.F.A. (University of Arkansas), Instructor, School of Art, 1997.

Jones, Linda Carol, Ph.D. (University of New Mexico), M.A. (University of Arkansas), M.A. (University of Arizona), B.A. (Northeast Louisiana University), Associate Professor, Department of World Languages, Literatures and Cultures, 1988.

Jones, Ches, Ph.D. (University of Alabama at Birmingham), B.S.E. (Pittsburg State University), Professor, Department of Health, Human Performance and Recreation, 1994.

Jones, Phillip J., M.S. (University of Illinois-Urbana-Champaign), M.A. (University of California-Irvine), B.A. (University of California-Santa Barbara), Associate Librarian, University Libraries, 2003.

Jones, Phillip, M.B.A., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2013.

Jones, Clinton, Ed.D. (Arkansas Tech University), Ed.S. (Harding University), Assistant Professor, Department of Curriculum and Instruction, 2019.

Jordan, Gerald Bernard, M.S.J. (Northwestern University), B.A. (University of Arkansas), Associate Professor, School of Journalism and Strategic Media, 1995.

Joshi, Neelendra, Ph.D. (Pennsylvania State University), Assistant Professor, Department of Entomology and Plant Pathology, 2015.

Jozkowski, Kristen N., Ph.D., M.S. (Indiana University at Bloomington), B.S. (Pennsylvania State University), Associate Professor, Department of Health, Human Performance and Recreation, 2011.

Judges, Donald P., Ph.D. (University of Tulsa), J.D. (University of Maryland University College), B.A. (Johns Hopkins University), Professor, School of Law, 1989.

Juhl, Beth, M.L.S. (Columbia University), B.A. (University of Texas at Austin), Librarian, University Libraries, 1993.

Jung, Hyunseok, Ph.D. (Syracuse University), M.A. (Korea Development Institute), B.A. (Seoul National University), Assistant Professor, Department of Economics, 2018.

K

Kacirek, Kit, Ed.D., M.Ed. (University of Arkansas), B.S. (University of Texas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1997.

Kahf, Mohja, Ph.D., B.A. (Rutgers State University-New Brunswick), Associate Professor, Department of English, 1995.

Kahng, Er-Gene, D.M. (Northwestern University), A.D., M.M. (Yale University), B.A. (University of California-Los Angeles), Associate Professor, Department of Music, 2007.

Kali, Raja, Ph.D., M.A. (University of Maryland University College), B.S.C. (University of Calcutta), Professor, Department of Economics, 1999.

Kaman, Tulin, Ph.D. (Stony Brook University), M.S. (Istanbul Technical University), B.S. (Yildiz Technical University), Assistant Professor, Department of Mathematical Sciences, 2017.

- Karcher, Douglas Edward**, Ph.D., M.S. (Michigan State University), B.S. (The Ohio State University), Professor, Department of Horticulture, 2000.
- Kashiwagi, Tomoko**, D.M.A. (University of Texas at Austin), M.M., B.M. (Indiana University), Assistant Professor, Department of Music, 2012.
- Kay, Marvin**, Ph.D. (University of Colorado-Boulder), M.A., B.A. (University of Missouri-Columbia), Professor, Department of Anthropology, 1980.
- Kayser, Casey Lee**, Ph.D. (Louisiana State University), M.A. (University of Missouri-Columbia), B.A. (Westminster College), Assistant Professor, Department of English, 2012.
- Kegley, Beth**, Ph.D., M.S. (North Carolina State University), B.S. (Virginia Polytech Institute and State University), Professor, Department of Animal Science, 1996.
- Keiffer, Elizabeth**, Ph.D., M.A. (University of Arkansas), B.S. (East Central University), Instructor, Department of Information Systems, 2016.
- Kellams, Kyle**, B.A. (University of Arkansas), Instructor, Campus Radio, 1989.
- Kelley, Donald R.**, Ph.D. (Indiana University at Bloomington), M.A., B.A. (University of Pittsburgh), Professor, Department of Political Science, 1980.
- Kelley, Christopher Rowand**, LL.M. (University of Arkansas), J.D. (Howard University), B.A. (Louisiana State University at Shreveport), Associate Professor, School of Law, 1998.
- Kelley, Jason**, Ph.D., M.S. (Oklahoma State University), B.S. (Kansas State University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2003.
- Kemper, Nathan**, M.S., B.S. (University of Arkansas), Clinical Professor, Department of Agricultural Economics and Agribusiness, 2014.
- Kennefick, Julia Dusk**, Ph.D. (California Institute of Technology), B.S. (University of Arkansas), Associate Professor, Department of Physics, 2003.
- Kennefick, Daniel John**, Ph.D., M.A. (California Institute of Technology), B.S. (University College Cork, Ireland), Associate Professor, Department of Physics, 2004.
- Kennemer, Jerilyn Laura**, M.A., B.S. (Oklahoma State University), Instructor, Department of Communication, 2013.
- Kent, Laura B.**, Ph.D. (University of Wisconsin-Madison), M.S. (Purdue University Calumet), B.S. (Purdue University), Associate Professor, Department of Curriculum and Instruction, 2006.
- Kent, John**, Ph.D. (University of Tennessee), M.B.A. (University of Dallas), B.S. (Henderson State University), Clinical Associate Professor, Department of Supply Chain Management, 2014.
- Kern, Jack C.**, Ph.D. (Texas Woman's University), M.Ed. (Texas State University-San Marcos), B.S. (University of Wisconsin-LaCrosse), Clinical Professor, Department of Health, Human Performance and Recreation, 1996.
- Kerr, Grace R.**, M.A. (Texas A&M University), B.A. (Sam Houston State University), Clinical Instructor, Department of Curriculum and Instruction, 2006.
- Kerr, Brinck**, Ph.D. (Texas A&M University), B.A. (University of Texas at Austin), Professor, Department of Political Science, 1994.
- Keskek, Sami**, Ph.D. (Texas A&M University), M.S. (Fatih University), B.S. (Bogazici University), Assistant Professor, Department of Accounting, 2011.
- Kidd, Michael T.**, Ph.D. (North Carolina State University), M.S., B.S.A. (University of Arkansas), Professor, Department of Poultry Science, 2010.
- Killenbeck, Mark R.**, J.D., Ph.D. (University of Nebraska-Lincoln), B.A. (Boston College), Distinguished Professor, School of Law, 1988.
- Killenbeck, Ann Mallatt**, Ph.D. (University of Michigan-Ann Arbor), J.D. (University of Nebraska-Lincoln), Associate Professor, School of Law, 2003.
- Killian, Timothy Scott**, Ph.D. (University of Missouri-Columbia), M.A. (Wheaton College), B.A. (Central Bible College), Associate Professor, School of Human Environmental Sciences, 2001.
- Kilmer, Michele**, D.N.P. (University of Alabama), M.S.N. (Texas Tech University), B.S.N. (Harding University), Assistant Professor, Eleanor Mann School of Nursing, 2017.
- Kilyanek, Stefan M.**, Ph.D., M.S. (University of Chicago), B.S. (Grand Valley State University), Assistant Professor, Department of Chemistry and Biochemistry, 2014.
- Kim, Jin-Woo**, Ph.D. (Texas A&M University), M.S. (University of Wisconsin-La Crosse), B.S. (University of Iowa), Professor, Department of Biological and Agricultural Engineering, 2001.
- Kim, Myunghee Michelle**, Ph.D., B.S. (University of Texas at Austin), Clinical Assistant Professor, Department of Biomedical Engineering, 2013.
- Kimbrough, Hanna A.D.**, M.S.W. (University of Arkansas), Lecturer, School of Social Work, 2014.
- Kindy, Phillip D.**, M.I.S. (University of Arkansas), B.S. (DeVry Institute of Technology), Instructor, Department of Information Systems, 2012.
- King, Michele S.**, M.L.S., B.F.A. (University of Oklahoma), Associate Librarian, University Libraries, 1987.
- King, Leldon Dale**, B.S. (University of Central Oklahoma), Instructor, 2010.
- King, Sam**, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Tulsa), Assistant Professor, School of Art, 2011.
- King, Tiffany**, M.A. (University of Arkansas), B.J. (University of Missouri), Instructor, School of Journalism and Strategic Media, 2014.
- King, Bonnie**, M.A.T., B.S.E. (University of Arkansas), Clinical Instructor, Department of Curriculum and Instruction, 2015.
- Kippenbrock, Thomas A.**, Ed.D. (Indiana University at Bloomington), M.S. (Indiana University-Purdue University-Indianapolis), B.S.N. (Indiana State University), Professor, Eleanor Mann School of Nursing, 2003.
- Kirkpatrick, Terry**, Ph.D. (North Carolina State University), M.S., B.S. (University of Arkansas), Professor, Department of Entomology and Plant Pathology, 1984.
- Kirkwood, Patricia Elaine**, M.S. (University of Illinois-Urbana-Champaign), B.S. (Pacific Lutheran University), Associate Librarian, University Libraries, 2004.
- Kish-Gephart, Jennifer**, Ph.D. (Pennsylvania State University), M.B.A., B.S. (Drexel University), Associate Professor, Department of Management, 2010.
- Knighten, Chris**, D.M.A., M.M. (University of Colorado), B.M. (Baylor University), Associate Professor, Department of Music, 2009.
- Knighten, Janet Whitman**, M.M., B.M. (East Carolina University), Assistant Professor, Department of Music, 2009.
- Koch, Lynn C.**, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Arizona), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2006.
- Koch, Mark**, O.T.D. (Saint Louis University), Clinical Assistant Professor, Department of Occupational Therapy, 2018.
- Koepp, Roger E.**, Ph.D. (California Institute of Technology), A.B. (Haverford College), Distinguished Professor, Department of Chemistry and Biochemistry, 1979.
- Koh, Dongy**, Ph.D. (Washington University-St. Louis), M.A. (Boston University), B.A. (Keio University), Assistant Professor, Department of Economics, 2014.
- Koltes, Dawn A.**, Ph.D. (Iowa State University), Adjunct Assistant Professor, Department of Animal Science, 2015.
- Kong, Byungwhi**, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (Korea University), Associate Professor, Department of Poultry Science, 2006.

Kopp, Steven W., Ph.D. (Michigan State University), M.B.A. (University of Southern Mississippi), B.S. (University of Missouri-Rolla), Associate Professor, Department of Marketing, 1992.

Korth, Ken L., Ph.D. (North Carolina State University), B.S. (University of Nebraska), Professor, Department of Entomology and Plant Pathology, 1999.

Korth, Deborah, Ed.D. (University of Arkansas), M.Ed. (North Carolina State University), B.S. (University of Nebraska-Lincoln), Clinical Associate Professor, J. William Fulbright College of Arts and Sciences, 2004.

Koski, Patricia, B.A., M.A., Ph.D. (Washington State University), Associate Professor, Department of Sociology and Criminology, 1984.

Kovacs, Kent F., Ph.D. (University of California-Davis), B.A. (Vassar College), Associate Professor, Department of Agricultural Economics and Agribusiness, 2012.

Kral, Timothy Alan, Ph.D. (University of Florida), B.S. (John Carroll University), Professor, Department of Biological Sciences, 1981.

Kristian, Allee, Ph.D., M.B.A. (Indiana University), B.S. (Brigham Young University), Associate Professor, Department of Accounting, 2016.

Kucharczyk, Suzanne, Ed.D. (Columbia University Teacher's College), M.Ed., B.S. (University of Illinois-Urbana-Champaign), Assistant Professor, Department of Curriculum and Instruction, 2014.

Kuenzel, Wayne J., Ph.D. (University of Georgia), M.S., B.S. (Bucknell University), Professor, Department of Poultry Science, 2000.

Kuilan, Susie S., Ph.D. (Louisiana State University), M.S. (Army War College), M.A. (Northwestern State University), B.A. (Henderson State University), Instructor, 2011.

Kulczak, Deborah E., M.L.S., B.A. (Kent State University), Librarian, University Libraries, 1988.

Kumar, Pradeep, Ph.D. (Boston University), M.Sc. (Indian Institute of Technology, Mumbai, India), Associate Professor, Department of Physics, 2013.

Kutz, Bryan Richard, M.S. (Western Kentucky University), B.S. (Oklahoma State University), A.S. (Northern Oklahoma College), Instructor, Department of Animal Science, 1997.

Kvamme, Kenneth L., Ph.D. (University of California-Santa Barbara), M.A., B.A. (Colorado State University), Professor, Department of Anthropology, 1999.

Kwon, Young Min, Ph.D. (Texas A&M University), M.S., B.S. (Seoul National University), Associate Professor, Department of Poultry Science, 2002.

L

Lacity, Mary, Ph.D. (University of Houston), B.S.B.A. (Pennsylvania State University), Professor, Department of Information Systems, 2018.

Laincz, Jozef, Ph.D. (University of Arkansas), Magister, B.S. (Comenius University Bratislava), Assistant Librarian, University Libraries, 2015.

Lamb, Andrew P., Ph.D. (Boise State University), M.S. (Florida Institute of Technology), B.S. (University of Dublin, Trinity), Assistant Professor, Department of Geosciences, 2017.

Lamm, Connie, Ph.D., M.A. (University of Toronto, Canada), B.A. (University of Waterloo), Assistant Professor, Department of Psychological Science, 2016.

Lampinen, James Michael, Ph.D., M.S. (Northwestern University), B.S. (Elmhurst College), Distinguished Professor, Department of Psychological Science, 1998.

Landman, Michael, M.F.A. (Columbia University), B.A. (State University of New York at Binghamton), Associate Professor, Department of Theatre, 2004.

Lane, Valerie Jean, M.F.A. (Pennsylvania State University), B.F.A. (Memphis College of Art), Instructor, Department of Theatre, 2008.

Lane, Marty Maxwell, M.G.D. (North Carolina State University), B.F.A. (University of Illinois at Chicago), Associate Professor, School of Art, 2014.

Langsner, Steve, Ph.D. (Indiana University at Bloomington), M.S. (University of Baltimore), B.S. (Springfield College), Associate Professor, Department of Health, Human Performance and Recreation, 1989.

LaPorte, Angela M., Ph.D. (Pennsylvania State University), M.A. (Arizona State University), B.S. (La Roche College), Professor, School of Art, 1998.

Lasater, Kara A., Ed.D. (University of Arkansas), Ed.S., M.S. (Pittsburg State University), B.A. (Drury University), Assistant Professor, Department of Curriculum and Instruction, 2014.

Lattanzi, Paula, J.D. (University of Arkansas), M.S. (West Virginia University), Instructor, Program in Operations Management, 2008.

Lau, Wing, Ph.D. (University of Oregon), M.M. (Indiana University), Lecturer, Department of Music, 2016.

Launder, John, M.A. (University of Missouri), B.A. (Westminster College), Instructor, Department of Management, 2011.

Lavery, Richard J., B.A. (University of South Florida), Assistant Professor, Air Force ROTC, 2016.

Lay, Jackson, Ph.D. (University of Nebraska-Lincoln), Professor, Department of Chemistry and Biochemistry, 2002.

Le, Kieu Ngoc, Ph.D. (North Carolina Agricultural and Technical State University), M.S. (North Carolina Agricultural and Technical State University), B.E., B.S. (Cantho University, Vietnam), Instructor, Department of Biological and Agricultural Engineering, 2017.

Lee, Richard N., Ph.D. (Stanford University), B.A. (Luther College), Associate Professor, Department of Philosophy, 1982.

Lee, Jeannie A., B.A. (University of Arkansas), Lecturer, Department of Theatre, 2000.

Lee, Wayne Y., Ph.D. (University of California-Los Angeles), M.B.A. (Santa Clara University), B.S.M.E. (De La Salle College, Philippines), Professor, Department of Finance, 1998.

Lee, Sun-Ok, Ph.D., M.S. (Iowa State University), M.S., B.S. (Dongduk Women's University), Associate Professor, Department of Food Science, 2008.

Lee, Peggy B., Ed.D. (University of Arkansas), M.S. (University of Southern Mississippi), B.S.N. (Mississippi College), Clinical Assistant Professor, Eleanor Mann School of Nursing, 2009.

Lee, Christine, Ph.D. (Arizona State University), Assistant Professor, Department of Anthropology, 2012.

Lee, Jacquelyn A., Ph.D., M.S. (University of Arkansas), B.S. (Arkansas Technical University), Associate Professor, Department of Horticulture, 2016.

Lee, Dou Young, B.A., B.S. (Korea University), Visiting Instructor, Department of Economics, 2016.

Lee, Jung Ae, Ph.D., M.S. (University of Georgia), M.A., B.A., (Ewha Womans University), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2016.

Lee, Yi-Jung, Ph.D. (University of Georgia), M.S. (National Taiwan Normal University), B.Ed. (National Taitung University), Assistant Professor, Department of Curriculum and Instruction, 2019.

Leeds, Stacy, LL.M. (University of Wisconsin-Madison), J.D. (University of Tulsa), M.B.A. (University of Tennessee), B.A. (Washington University in St. Louis), Professor, School of Law, 2011.

Leen-Feldner, Ellen Winifred, Ph.D. (University of Vermont), M.A. (West Virginia University), B.A. (University of Notre Dame), Professor, Department of Psychological Science, 2005.

Leflar, Rob, M.P.H., J.D., A.B. (Harvard University), Professor, School of Law, 1982.

Leflar, Charles Joseph, Ph.D., M.A. (University of Missouri-Columbia), B.S.B.A. (University of Arkansas), Clinical Professor, Department of Accounting, 1993.

- Leftwich, Gail**, B.S. (University of Arkansas), Lecturer, Department of Theatre, 1997.
- Lehman, Kathleen A.**, M.L.I.S. (University of Wisconsin-Milwaukee), M.A.T. (Webster University), B.A. (University of Iowa), Assistant Librarian, University Libraries, 2010.
- Lehmann, Michael Herbert**, Ph.D., Diploma in Biology (Philipps University of Marburg, Germany), Professor, Department of Biological Sciences, 2002.
- Lehmer, Bret Darby**, Ph.D. (Pennsylvania State University), B.S. (University of Iowa), Assistant Professor, Department of Physics, 2015.
- Lennertz, Lora**, M.I.S. (University of Arkansas), M.L.I.S., B.A. (University of Illinois-Urbana-Champaign), Librarian, University Libraries, 1991.
- Lens, Joshua**, J.D. (University of Iowa), B.A. (University of Northern Iowa), Clinical Assistant Professor, Department of Health, Human Performance and Recreation, 2018.
- Lessner, Daniel J.**, Ph.D. (University of Iowa), B.S. (University of Wisconsin-Stevens Point), Associate Professor, Department of Biological Sciences, 2008.
- Lessner, Faith H.**, Ph.D. (University of Iowa), B.S. (Cornell University), Teaching Assistant Professor, Department of Biological Sciences, 2016.
- Levenson, Abra**, Ph.D., M.A. (Princeton), B.A. (University of California, Berkeley), Assistant Professor, School of Art, 2018.
- Levine, Daniel**, Ph.D. (University of Cincinnati), B.A. (University of Minnesota), University Professor, Department of World Languages, Literatures and Cultures, 1980.
- Levine, William H.**, Ph.D., M.S. (State University of New York at Binghamton), B.S. (DePaul University), Associate Professor, Department of Psychological Science, 2001.
- Lewis, Jacob C.**, Ph.D. (University of Arkansas), M.A. (University of Arkansas), B.A. (University of Arkansas), Instructor, 2004.
- Lewis, Jeffrey A.**, Ph.D. (University of Wisconsin-Madison), B.S. (University of California-Santa Barbara), Assistant Professor, Department of Biological Sciences, 2013.
- Leylek, Jim**, Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Illinois at Chicago), Professor, Department of Mechanical Engineering, 2011.
- Li, Wing Ning**, Ph.D., M.S. (University of Minnesota-Twin Cities), B.S. (University of Iowa), Professor, Department of Computer Science and Computer Engineering, 1989.
- Li, Yanbin**, Ph.D. (Pennsylvania State University), M.S. (University of Nebraska-Lincoln), B.S. (Shenyang Agricultural University), Distinguished Professor, Department of Biological and Agricultural Engineering, 1989.
- Li, Jiali**, Ph.D., M.S. (City University of New York-City College), M.S. (University of Science and Technology of China), B.S. (Hei Long Jiang University), Professor, Department of Physics, 2002.
- Li, Qinghua**, Ph.D. (Pennsylvania State University), M.S. (Tsinghua University), B.E. (Xi'an Jiaotong University), Assistant Professor, Department of Computer Science and Computer Engineering, 2013.
- Li, Jing**, Ph.D., (University of Tennessee), Assistant Professor, Department of Economics, 2017.
- Li, Xi**, Ph.D. (Vanderbilt University), M.A. (Tulane University), B.S. (Hunan University), Associate Professor, Department of Finance, 2018.
- Li, Xin "Sherry"**, Ph.D. (University of Michigan), M.A. (Syracuse University), M.A., B.A. (Renmin People's University of China), Professor, Department of Economics, 2018.
- Liang, Yi**, Ph.D. (University of Alberta, Canada), M.S., B.S. (China Agricultural University, Beijing, China), Associate Professor, Department of Biological and Agricultural Engineering, 2007.
- Liang, Xinya**, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.
- Liao, Haitao**, Ph.D., M.S., M.S.I.S.E. (Rutgers University), B.S.E.E. (Beijing Institute of Technology), Professor, Department of Industrial Engineering, 2015.
- Limp, Fred**, Ph.D., M.A., B.A. (Indiana University at Bloomington), University Professor, Department of Geosciences, 1979.
- Liner, Christopher L.**, Ph.D. (Colorado School of Mines), M.S. (University of Tulsa), B.S. (University of Arkansas), Professor, Department of Geosciences, 2012.
- Lirgg, Cathy D.**, Ph.D. (Michigan State University), M.S. (Indiana State University), B.A. (Muskingum College), Professor, Department of Health, Human Performance and Recreation, 1991.
- Liu, Pu**, Ph.D., M.B.A. (Indiana University at Bloomington), B.S. (National Cheng Kung University), Professor, Department of Finance, 1984.
- Liu, Xiaoqing Frank**, Ph.D. (Texas A&M University), M.S. (Southeast University, China), B.S. (National University of Defense Technology, China), Professor, Department of Computer Science and Computer Engineering, 2015.
- Liu, Xiao**, Ph.D. (National University of Singapore), B.S.M.E. (Harbin Institute of Technology, China), Assistant Professor, Department of Industrial Engineering, 2017.
- Liu, Tingting**, Ph.D. (Emory University), Assistant Professor, Eleanor Mann School of Nursing, 2018.
- Livingston, Mark A.**, Ph.D. (University of Maryland), Instructor, Program in Operations Management, 2017.
- Lo, Wen-Juo**, Ph.D., M.A. (Arizona State University), B.S. (SooChow University), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2008.
- Loewer, Otto J.**, Ph.D. (Purdue University), M.S. (Michigan State University), B.S. (Louisiana State University), Professor, Department of Biological and Agricultural Engineering, 1996.
- Loftin, Kelly M.**, Ph.D. (New Mexico State University), M.S. (University of Arkansas), B.S. (Arkansas Tech), Associate Professor, Department of Entomology and Plant Pathology, 2002.
- Lofton, Annelle L.**, M.S.N. (University of Arkansas), B.S.N. (University of Arkansas), Clinical Instructor, Eleanor Mann School of Nursing, 2013.
- Long, Mary Beth**, Ph.D., M.A. (University of Massachusetts, Amherst), B.A. (Ouachita Baptist University), Assistant Professor, Department of English, 2014.
- Looney, Nathan C.**, J.D. (University of Arkansas at Little Rock), M.P.S. (University of Arkansas Clinton School of Public Service), B.A. (University of Arkansas), Lecturer, Department of Political Science, 2012.
- Looper, Michael L.**, Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Professor, Department of Animal Science, 2011.
- Lopez, Linda Nguyen**, M.F.A. (University of Colorado-Boulder), B.F.A. (California State University-Chico), Instructor, School of Art, 2012.
- Lorah, Elizabeth R.**, Ph.D., M.S.Ed., B.A. (Temple University), Associate Professor, Department of Curriculum and Instruction, 2013.
- Lorenz, Gus M.**, Ph.D., B.S.A., M.S. (University of Arkansas), Distinguished Professor, Department of Entomology and Plant Pathology, 1997.
- Lorenzo, Violeta**, Ph.D. (University of Toronto), M.A., B.A. (University of Florida), Assistant Professor, Department of World Languages, Literatures and Cultures, 2014.
- Lorenzo, Benjamin**, D.M.A., M.M. (University of Texas), B.M. (Florida International University), Assistant Professor, Department of Music, 2015.
- Lorince, Tammy**, M.A., B.S. (University of Arkansas), Instructor, Department of Biological Sciences, 2000.
- Lorne, Lorraine Kay**, J.D. (University of Detroit Mercy), M.A. (University of Denver), B.A. (Alma College), Associate Librarian, University Libraries, 1992.

Luckstead, Jeff A., Ph.D. (Washington State University), M.S., B.S. (University of Idaho), Associate Professor, Department of Agricultural Economics and Agribusiness, 2013.

Luecking, Daniel H., Ph.D., M.S., B.A. (University of Illinois-Urbana-Champaign), Professor, Department of Mathematical Sciences, 1981.

Luo, Fang, Ph.D. (Huazhong University of Science and Technology), Assistant Professor, Department of Electrical Engineering, 2017.

Luoni, Stephen D., M.Arch. (Yale University), B.S.Arch. (Ohio State University), Professor, Department of Architecture, 2003.

Luu, Khoa, Ph.D. (Concordia University), Assistant Professor, Department of Computer Science and Computer Engineering, 2018.

Lyons, Raina Smith, M.F.A., B.A. (University of Arkansas), Instructor, Department of English, 2006.

Lyons, Jack C., Ph.D. (University of Arizona), B.A. (Valparaiso University), Professor, Department of Philosophy, 2001.

Lyons, Vincent S., M.B.A. (University of Phoenix), M.S. (Stanford University), Instructor, Program in Operations Management, 2018.

M

Ma, Xiao, Ph.D. (University of Wisconsin), M.A. (Syracuse University), B.A. (Nanjing University), Assistant Professor, Department of Information Systems, 2014.

Ma, Weiyl, Ph.D., M.A. (University of Delaware), B.A. (China West Normal University), Assistant Professor, School of Human Environmental Sciences, 2017.

Mackay, Wayne A., Ph.D. (University of Maryland), M.S. (University of Delaware), B.S. (Virginia Polytechnic Institute and State University), Professor, Department of Horticulture, 2014.

MacKeith, Peter, M.Arch. (Yale University), B.A. (University of Virginia), Professor, Department of Architecture, 2014.

Mackey, Andrew, M.S. (University of Arkansas), Instructor, Department of Information Systems, 2014.

MacRae, Christopher J., D.M.A. (Boston University), Instructor, Department of Music, 2015.

Madison, Karen, Ph.D., M.A., B.A. (University of Arkansas), Instructor, Department of English, 2008.

Madison, Robert Durwood, Ph.D. (Northwestern University), M.A. (Clark University), B.A. (University of Rhode Island), Instructor, Department of English, 2009.

Magnetti, Brenda Monica, M.A. (University of Arkansas), B.A. (Ouachita Baptist University), Instructor, Department of World Languages, Literatures and Cultures, 2007.

Magoulick, Daniel D., Ph.D. (University of Pittsburgh), M.S. (Eastern Michigan University), B.S. (Michigan State University), Research Professor, Department of Biological Sciences, 2000.

Mahmoud, Rania, Ph.D. (University of Washington), M.A. (Old Dominion University), B.A., (University of Alexandria, Egypt), Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.

Mains, Ronda M., D.M.A. (University of Oregon), M.A., B.M. (Boise State University), Professor, Department of Music, 1987.

Maksymchuk, Oksana, Ph.D. (Northwestern University), B.A. (Bryn Mawr College), Assistant Professor, Department of Philosophy, 2013.

Malakhov, Alexey, Ph.D. (Northwestern University), Ph.D. (University of North Carolina at Charlotte), M.S. (Moscow State University), Associate Professor, Department of Finance, 2006.

Malis, David, M.M. (University of Cincinnati), Assistant Professor, Department of Music, 2013.

Malladi, Suresh, Ph.D. (University of Michigan), M.S. (Carnegie Mellon University), M.B.A. (National Institute of Technology), B.E. (Osmania University), Assistant Professor, Department of Information Systems, 2014.

Malshe, Ajay P., Ph.D., M.S., B.S. (University of Poona, India), Distinguished Professor, Department of Mechanical Engineering, 1995.

Malstrom, Derek, M.S.I.E., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2016.

Mamiseishvili, Ketevan, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Akaki Tsereteli State University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2008.

Manasreh, Omar, Ph.D. (University of Arkansas), M.S. (University of Puerto Rico-Rio Piedras), B.S. (University of Jordan), Professor, Department of Electrical Engineering, 2003.

Manasreh, Bothina H., Ph.D., M.Sc. (University of Jordan), Research Assistant Professor, Department of Physics, 2017.

Mantero, Paolo, Ph.D. (Purdue University), M.Sc., B.Sc. (University of Genova, Italy), Assistant Professor, Department of Mathematical Sciences, 2015.

Mantooth, Alan, Ph.D. (Georgia Institute of Technology), M.S., B.S. (University of Arkansas), Distinguished Professor, Department of Electrical Engineering, 1998.

Maranto, Robert Anthony, Ph.D. (University of Minnesota), B.S. (University of Maryland), Professor, Department of Education Reform, 2008.

Marcy, John A., Ph.D., M.S. (Iowa State), B.S. (University of Tennessee), Extension Professor, Department of Poultry Science, 1993.

Margaret, Hershberger, Ph.D., M.S. (University of Chicago), B.S. (The Ohio State University), Instructor, Department of Chemistry and Biochemistry, 2015.

Margulis, Jura, Graduate Performance Diploma (Peabody Conservatory of Music, Johns Hopkins University) M.M. (Musikhochschule Freiburg, Germany), B.M. (Musikhochschule Freiburg, Germany), Professor, Department of Music, 1999.

Margulis, Elizabeth Hellmuth, Ph.D., M.A., M.Phil. (Columbia University), B.M. (Peabody Conservatory), Professor, Department of Music, 2006.

Marion, Jonathan S., Ph.D., M.A. (University of California-San Diego), B.A. (University of Redlands), Associate Professor, Department of Anthropology, 2012.

Markham, Elizabeth Jane, Ph.D. (Cambridge University), B.A. (University of Otago, New Zealand), Professor, Department of History, 2000.

Marren, Susan M., Ph.D., M.A. (University of Michigan-Ann Arbor), B.A. (Cornell University), Associate Professor, Department of English, 1995.

Marshall, Jill A., Ph.D. (University of Oregon), Assistant Professor, Department of Geosciences, 2017.

Marshfield, Jonathan, LL.M. (New York University), J.D. (Rutgers University-Camden), B.A. (Cedarville University), Associate Professor, School of Law, 2013.

Martin, Kim I., M.A., B.S.Ed. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 1997.

Martin, Patricia, M.F.A. (Purdue University), B.A. (Rollins College), Professor, Department of Theatre, 1995.

Martin, Terry W., Ph.D., M.S.E.E., B.S.E.E. (University of Arkansas), Professor, Department of Electrical Engineering, 1990.

Marzolf, Steven, M.F.A. (University of San Diego), B.A. (University of Wisconsin-Green Bay), Lecturer, Department of Theatre, 2015.

Mason, Scott, Ph.D. (Arizona State University), M.S., B.S. (University of Texas), Instructor, Program in Operations Management, 2001.

Mason, Richard Esten, Ph.D., B.A. (Texas A&M University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2010.

Matlock, Marty D., Ph.D., M.S., B.S. (Oklahoma State University), Professor, Department of Biological and Agricultural Engineering, 2001.

Matthews, Mary Beth, J.D., B.S.E. (University of Arkansas), Professor, School of Law, 1981.

- Matthews, Carl W.**, M.S. (Pratt Institute), Professor, Department of Interior Design, 2012.
- Mauromoustakos, Andy**, Ph.D., M.S. (Oklahoma State University), B.S. (Oral Roberts University), Professor, Department of Crop, Soil and Environmental Sciences, 1989.
- Maxwell, Charles**, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Georgia), Professor, Department of Animal Science, 1996.
- Maxwell, Angie**, Ph.D., M.A. (University of Texas at Austin), B.A. (University of Arkansas), Associate Professor, Department of Political Science, 2008.
- Mazur, Yuriy**, Ph.D. (Institute of General Physics, Moscow), M.S. (Moscow Institute of Physics and Engineering, Russia), Professor, Nanotechnology, 2001.
- Mazzanti, Chris**, Ph.D., M.S. (University of Arkansas), B.S. (University of Arkansas at Monticello), Instructor, Department of Chemistry and Biochemistry, 2012.
- McBride, Wendy L.**, M.S. (Northern Illinois University), Instructor, English Language and Cultural Studies, 2015.
- McCaffrey, Raymond**, Ph.D. (University of Maryland), M.A. (University of Colorado), M.A. (Columbia University), B.A. (Fairfield University), Assistant Professor, School of Journalism and Strategic Media, 2014.
- McCann, Roy A.**, Ph.D. (University of Dayton), M.S.E.E., B.S.E.E. (University of Illinois), Professor, Department of Electrical Engineering, 2003.
- McCartney, Nancy Glover**, Ph.D., M.A., B.A. (University of Wisconsin-Madison), Assistant Curator, Assistant Professor, University Museum, 1974.
- McComas, William**, Ph.D. (University of Iowa), M.S. (West Chester University of Pennsylvania), B.S. (Lock Haven University of Pennsylvania), Distinguished Professor, Department of Curriculum and Instruction, 2006.
- McComas, Kim Krusen**, Ph.D. (University of Arkansas), M.A. (West Chester University of Pennsylvania), B.A. (University of Arizona), Clinical Assistant Professor, Department of Curriculum and Instruction, 2012.
- McCombs, Davis**, M.F.A. (University of Virginia), A.B. (Harvard), Professor, Department of English, 2002.
- McConnell, Mathew S.**, M.F.A. (University of Colorado-Boulder), B.F.A. (Valdosta State University), Associate Professor, School of Art, 2011.
- McCray, Suzanne**, Ph.D. (University of Tennessee), M.A., B.A. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2010.
- McDaniel, Beverly**, M.Ed., B.S. (University of Arkansas), Instructor, Department of Information Systems, 1993.
- McDermott, Brendon P.**, Ph.D. (University of Connecticut), M.S. (Indiana University at Bloomington), B.S. (Northeastern University), Associate Professor, Department of Health, Human Performance and Recreation, 2012.
- McDonald, Garry Vernon**, Ph.D., M.S., B.S.A. (Texas A&M University), Clinical Assistant Professor, Department of Horticulture, 2016.
- McGee, Peter J.**, Ph.D. (Ohio State University), B.S. (Tulane University), Associate Professor, Department of Economics, 2014.
- McGee, Joshua B.**, Ph.D., M.S., B.S. (University of Arkansas), Research Assistant Professor, Department of Education Reform, 2019.
- McGee-Anderson, Starlyn Yvette**, B.A. (Southern University & A&M College), Instructor, 2010.
- McGlynn, Moira**, Ph.D., M.B.A. (Union College of Union University), Instructor, Program in Operations Management, 2013.
- McIntosh, Matt**, Ph.D. (Pennsylvania State University), B.A. (Virginia Tech), Professor, Department of Chemistry and Biochemistry, 1996.
- McKee, Elizabeth Chadbourn**, M.L.S. (University of Oklahoma), B.A. (University of Arkansas), Librarian, University Libraries, 1974.
- McKenzie, Andrew Malcolm**, Ph.D. (North Carolina State University), M.Sc. (Stirling University), B.Admin. (University of Dundee), Professor, Department of Agricultural Economics and Agribusiness, 1998.
- McKenzie, Sarah C.**, Ph.D. (University of Arkansas), M.A. (Mills College), B.A. (Claremont McKenna College), Clinical Assistant Professor, Department of Education Reform, 2018.
- McKinney, Nathan**, Ph.D. (Kansas State University), M.S., B.S. (University of Arkansas), Professor, 2008.
- McKnight, Jennifer Ann**, M.F.A., B.A. (University of Alabama), Instructor, Department of Theatre, 2015.
- McKnight, Rebecca**, M.B.A. (University of Arkansas), Instructor, Department of Management, 2016.
- McMahon, Bree**, M.A., B.A. (North Carolina State University), Assistant Professor, School of Art, 2018.
- McNabb, David S.**, Ph.D. (Louisiana State University Health Sciences Center), B.S. (University of Texas at Arlington), Associate Professor, Department of Biological Sciences, 2000.
- McNally, Shelley Ann**, Ph.D. (University of Toledo), M.S., B.S. (Ohio University), Clinical Assistant Professor, School of Human Environmental Sciences, 2016.
- McNeal, Travis G.**, M.A. (University of Nevada), B.S. (Utah State University), Instructor, Program in Operations Management, 2014.
- McWhirt, Amanda L.**, Ph.D. (North Carolina State University), M.S. (Louisiana State University), B.S. (Tarleton State University), Assistant Professor, Department of Horticulture, 2016.
- Meade, Lynn**, Ed.D., M.A. (University of Arkansas), Instructor, Department of Communication, 2004.
- Meares, Ian**, M.F.A. (Penn State), M.F.A. (University of California at Irvine), Instructor, School of Art, 2017.
- Mears, Derrick**, Ph.D. (University of Arkansas), M.S., B.S. (University of Central Missouri), Clinical Associate Professor, Department of Curriculum and Instruction, 2014.
- Medina Vidal, D. Xavier**, Ph.D. (University of California-Riverside), M.A., B.A. (University of New Mexico), Assistant Professor, Department of Political Science, 2015.
- Meers, Matthew Thomas**, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Arkansas), Instructor, Department of Theatre, 2012.
- Melton, Kerry D.**, Ph.D. (Oklahoma State University), M.S., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2013.
- Meng, Xiangbo**, Ph.D. (University of Western Ontario), M.S.E.E. (China University of Petroleum), B.S.C.E. (Northwestern University), Assistant Professor, Department of Mechanical Engineering, 2016.
- Messadi, Tahar**, Ed.D., M.Arch. (University of Michigan-Ann Arbor), B.Arch. (Universite de Constantine, Algeria), Associate Professor, Department of Architecture, 2003.
- Meullenet, Jean-François**, Ph.D. (University of Georgia), M.S. (National Superior School of Agronomy and Food Science, Nancy, France), Professor, Department of Food Science, 1996.
- Meyer, Joseph Matthew**, M.A. (Hofstra University), Instructor, 2008.
- Michealson, Kirk**, M.S. (Naval Postgraduate School), B.S. (United States Naval Academy), Instructor, Program in Operations Management, 2014.
- Micheel, Tyler**, M.F.A., B.F.A. (Dakota State University), Instructor, Department of Theatre, 2016.
- Mihalka, Matthew W.**, Ph.D. (University of Minnesota), M.A. (University of Minnesota-Duluth), M.A. (University of Minnesota-Twin Cities), Instructor, Department of Music, 2011.
- Milburn, Ashlea R.**, Ph.D. (Georgia Institute of Technology), M.S.I.E. (Virginia Polytechnic Institute and State University), B.S.I.E. (University of Arkansas), Associate Professor, Department of Industrial Engineering, 2010.

- Miles, Rebecca S.**, Ph.D. (Oklahoma Christian University), M.Ed. (Central State University), B.S. (Oklahoma Christian College), Clinical Assistant Professor, Department of Marketing, 2007.
- Miller, David M.**, Ph.D. (University of Georgia), M.S., B.S. (Purdue University), Professor, Department of Crop, Soil and Environmental Sciences, 1988.
- Miller, Douglas James**, M.A. (University of Arkansas), B.A. (Johns Hopkins University), Instructor, Department of World Languages, Literatures and Cultures, 1999.
- Miller, Bettie Gale**, M.S.N. (University of Phoenix), M.S., B.S.E., B.S.N. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2003.
- Miller, Jefferson Davis**, Ph.D., M.A. (Oklahoma State University), B.A. (Northeastern State University), Professor, Department of Agricultural Education, Communications and Technology, 2001.
- Miller, Michael T.**, Ed.D. (University of Nebraska), M.S., B.A. (Southern Illinois University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2003.
- Miller, Wayne P.**, Ph.D. (University of Wisconsin), M.S. (University of Illinois), B.S. (Purdue University), Extension Professor, Department of Agricultural Economics and Agribusiness, 1992.
- Miller, Lance E.**, Ph.D. (University of Connecticut), M.S. (New Mexico State University), Assistant Professor, Department of Mathematical Sciences, 2013.
- Miller, Rene P.**, Ed.D. (Texas Tech University/Texas A&M University), Lecturer, Department of Agricultural Education, Communications and Technology, 2013.
- Millett, Francis**, Ph.D. (Columbia University), B.S. (University of Wisconsin), Distinguished Professor, Department of Chemistry and Biochemistry, 1972.
- Millett, Paul**, Ph.D., M.S. (University of Arkansas), B.E. (Vanderbilt University), Assistant Professor, Department of Mechanical Engineering, 2013.
- Millett, Joseph D.**, M.F.A. (University of Southern California), B.A. (Union College), Visiting Assistant Professor, Department of Theatre, 2015.
- Mills, Jonathan**, Ph.D. (University of Arkansas), M.A., B.S. (University of Missouri-Columbia), Research Associate, Department of Education Reform, 2018.
- Minar, Edward H.**, Ph.D., A.M. (Harvard University), M.A. (University of California at Los Angeles), A.B. (Harvard University), Professor, Department of Philosophy, 1994.
- Minor, Ray**, M.A. (Northwestern University), B.A. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 2012.
- Misenhelter, Dale D.**, Ph.D. (Florida State University), M.A. (University of Wyoming), B.M. (Florida State University), Professor, Department of Music, 2002.
- Mitchell, Joshua Lee**, Ph.D. (Southern Illinois University), M.P.A., B.S. (Murray State University), Assistant Professor, Department of Political Science, 2010.
- Mitchell, Marc E.**, M.F.A. (Boston University), Associate Professor, School of Art, 2014.
- Mixdorf, Cory**, D.M.A., M.M. (Indiana University), B.A. (University of Northern Iowa), Assistant Professor, Department of Music, 2013.
- Moiseichik, Merry Lynn**, J.D. (University of Arkansas), R.Ed. (Indiana University at Bloomington), M.S., B.S.E. (State University of New York at Cortland), Professor, Department of Health, Human Performance and Recreation, 1989.
- Moldenhauer, Karen Ann-Kuenzel**, Ph.D. (Iowa State University), M.S. (North Carolina State University), B.S. (Iowa State University), Professor, Department of Crop, Soil and Environmental Sciences, 1982.
- Montejo Pizarro, Martha**, Ph.D. (Texas A&M University), B.A. (Universidad de La Habana, Cuba), Instructor, Department of World Languages, Literatures and Cultures, 2015.
- Montgomery, Mike**, D.M.A. (University of Miami), M.M., B.M. (University of Southern Mississippi), Lecturer, Department of Music, 2017.
- Moon, Zola**, Ph.D., M.A. (University of Arkansas), B.A. (Hendrix College), Clinical Associate Professor, School of Human Environmental Sciences, 2001.
- Moore, Brian**, M.S.W., B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2004.
- Moore, John**, M.A. (Ball State University), B.B.A. (Kent State University), Instructor, Program in Operations Management, 2001.
- Moradi, Mahmoud**, Ph.D. (North Carolina State University), M.S., B.S. (Sharif University of Technology), Assistant Professor, Department of Chemistry and Biochemistry, 2015.
- Morawicki, Ruben O.**, Ph.D. (Pennsylvania State University), M.Eng. (State University of New York-Buffalo), B.S. (Universidad Nacional de Misiones, Argentina), Associate Professor, Department of Food Science, 2006.
- Morimoto, Shauna**, Ph.D., M.S. (University of Wisconsin-Madison), B.A. (University of Pittsburgh), Associate Professor, Department of Sociology and Criminology, 2008.
- Morris, Noel**, B.A. (Arkansas Tech University), Instructor, Department of Finance, 2007.
- Morris, Adam**, Ed.D. (University of Arkansas), M.S., B.S. (Friends University), B.S. (Newman University), Instructor, Program in Operations Management, 2011.
- Morris, Jack**, M.S., M.B.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, Program in Operations Management, 2012.
- Morrissey, Sean P.**, M.F.A. (University of Nebraska-Lincoln), B.F.A. (Bowling Green State University), Assistant Professor, School of Art, 2014.
- Mosley, Jacquelyn Dee**, Ph.D. (Texas Tech University), M.S. (Arizona State University), B.A. (University of Northern Iowa), Associate Professor, School of Human Environmental Sciences, 2010.
- Mounds, Denise Ann**, Ed.D. (Saint Louis University), B.S.E. (Northwest Missouri State University), Clinical Associate Professor, Department of Curriculum and Instruction, 2005.
- Moustafa, Rida**, Ph.D., M.S. (George Mason University), B.S. (Zagazig University, Egypt), Visiting Lecturer, Department of Computer Science and Computer Engineering, 2015.
- Moxley, Shari Coleman**, Ph.D. (University of North Carolina), Instructor, School of Human Environmental Sciences, 2013.
- Mozaffari, Morteza**, Ph.D. (University of Delaware), M.S., B.S. (University of Massachusetts), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2002.
- Mozzoni, Leandro**, Ph.D. (University of Arkansas), M.S. B.S. (Rosario National University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2017.
- Mueller, Robert K.**, D.M.A. (University of Cincinnati), M.M. (Bowling Green State University), B.A. (Northern Michigan University), Professor, Department of Music, 1988.
- Muir, Sherry**, Ph.D. (Walden University), Associate Professor, Department of Occupational Therapy, 2017.
- Muldoon, Timothy J.**, M.D. (Baylor College of Medicine), Ph.D. (Rice University), B.S. (Johns Hopkins University), Associate Professor, Department of Biomedical Engineering, 2012.
- Mullins, Jeff**, M.A., B.S. (University of Arkansas), Assistant Professor, Department of Information Systems, 2006.
- Muntz, Charles E.**, Ph.D. (Duke University), B.A. (Swarthmore College), Associate Professor, Department of History, 2008.

Murdock, Jeffrey A., Ph.D. (University of Memphis), M.M., B.M. (University of Southern Mississippi), Assistant Professor, Department of Music, 2015.

Murff, Zora J., M.F.A. (University of Nebraska), Assistant Professor, School of Art, 2018.

Murphey, William C., M.S. (National Defenses University), M.A. (George Washington University), Instructor, Department of Supply Chain Management, 2014.

Murphy, Cheryl Ann, Ed.D., M.A., B.A. (West Virginia University), Professor, Department of Curriculum and Instruction, 1996.

Murphy, Tiffany, J.D., B.A. (University of Michigan), Associate Professor, School of Law, 2014.

Murphy-Erby, Yvette, Ph.D. (University of North Carolina at Greensboro), M.S.W. (University of North Carolina, Chapel Hill), B.A. (University of North Carolina, Charlotte), Professor, School of Social Work, 2004.

Murray, Jeff B., Ph.D. (Virginia Polytechnic Institute and State University), M.A., B.A. (University of Northern Colorado), Professor, Department of Marketing, 1989.

Murray, Lori M., D.N.P. (University of Kansas Medical Center), M.S., B.S.N. (University of Oklahoma Health Sciences Center), Clinical Assistant Professor, Eleanor Mann School of Nursing, 2015.

Murry, John, Ed.D., J.D., M.B.A., B.S.B.A., B.S. (University of Arkansas), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1993.

Musnug, Kristin Ann, M.F.A. (Indiana University at Bloomington), B.A. (Williams College), Associate Professor, School of Art, 1991.

N

Na, Dominic K., D.M.A. (University of North Texas), A.D. (Southern Methodist University), Instructor, Department of Music, 2016.

Nachtmann, Heather, Ph.D., M.S.I.E., B.S.I.E. (University of Pittsburgh), Professor, Department of Industrial Engineering, 2000.

Nair, Arun, Ph.D. (Virginia Tech), M.S. (Colorado State University), B.T. (Mahatma Gandhi University), Assistant Professor, Department of Mechanical Engineering, 2013.

Naithani, Kusum, Ph.D. (University of Wyoming), M.Sc. (G.B. Pant University of Agriculture and Technology-India), B.Sc. (University of Lucknow-India), Assistant Professor, Department of Biological Sciences, 2014.

Nakamura, Brian S., Ph.D., M.P.A. (University of Southern California), B.A. (California State University), Lecturer, Department of Political Science, 2017.

Nakanishi, Nagayasu, Ph.D. (University of California, Los Angeles), B.S. (University of California, San Diego), Assistant Professor, Department of Biological Sciences, 2017.

Nalley, Lawton Lanier, Ph.D. (Kansas State University), M.S. (Mississippi State University), B.S. (The Ohio State University), Professor, Department of Agricultural Economics and Agribusiness, 2008.

Nance, Cynthia, M.A., J.D. (University of Iowa), B.S. (Chicago State University), Professor, School of Law, 1994.

Naseem, Hameed A., Ph.D., M.S. (Virginia Polytechnic State University), M.Sc. (Panjab University), University Professor, Department of Electrical Engineering, 1985.

Natarajan, Venkatesan Ram, Ph.D., M.A. (New York University), B.A. (Johns Hopkins University), Assistant Professor, Department of Anthropology, 2015.

Nayga, Rudy, Ph.D. (Texas A&M University), M.S. (University of Delaware), B.S. (Foreign Institution), Distinguished Professor, Department of Agricultural Economics and Agribusiness, 2009.

Naylor, Zoe E., J.D., M.A. (University of Arkansas), B.A. (Graceland University), Instructor, Department of Political Science, 2000.

Needy, Kim LaScola, Ph.D. (Wichita State University), P.E., M.S.I.E., B.S.I.E. (University of Pittsburgh), Professor, Department of Industrial Engineering, 2008.

Nelson, Alexander H., Ph.D. (University of Maryland), M.S., B.S. (University of Arkansas), Assistant Professor, Department of Computer Science and Computer Engineering, 2017.

Nethercutt, Leonard, M.B.A., B.S. (University of Arkansas), Instructor, Program in Operations Management, 1996.

Neville-Shepard, Meredith D., Ph.D. (University of Kansas), Clinical Assistant Professor, Department of Communication, 2016.

Neville-Shepard, Ryan M., Ph.D. (University of Kansas), Assistant Professor, Department of Communication, 2016.

Nichols, Emily M., M.Ed. (University of Arkansas), B.A. (University of Arkansas at Fort Smith), Instructor, Program in Operations Management, 2015.

Nickol, Benjamin T., B.A. (University of Notre Dame), Instructor, 2007.

Niu, Wenbo, Ph.D. (University of Illinois at Chicago), M.S., B.S. (Fudan University, China), Assistant Professor, Department of Mathematical Sciences, 2015.

Nolan, Justin Murphy, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Westminster College), Associate Professor, Department of Anthropology, 2002.

Nolan, Steve, Ph.D., M.A. (University of Missouri-Columbia), B.A. (Westminster College), Instructor, Department of Information Systems, 2017.

Norman, Richard J., Ph.D. (University of Illinois-Urbana-Champaign), M.S., B.S. (University of Missouri), Professor, Department of Crop, Soil and Environmental Sciences, 1983.

Norman, Mya A., Ph.D. (University of Colorado-Boulder), M.S., B.S. (University of Arkansas), Instructor, Department of Chemistry and Biochemistry, 2006.

Norris, Greg, Ph.D. (University of New Hampshire), M.S. (Indiana University-Purdue University-Indianapolis), B.S. (Massachusetts Institute of Technology), Professor, Walton College of Business, 2009.

Norsworthy, Jason Keith, Ph.D., M.S. (University of Arkansas), B.S. (Louisiana Tech University), Professor, Department of Crop, Soil and Environmental Sciences, 2006.

Norvell, Phillip E., J.D. (University of Oklahoma), B.A. (University of Oklahoma), Professor, School of Law, 1975.

Norwood, John Martel, J.D. (Tulane University), M.B.A., B.A. (Louisiana State University), Professor, Department of Accounting, 1981.

Nugent, Russell A., Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Pennsylvania State University), Adjunct Professor, Department of Animal Science, 2011.

Nurre, Sarah, Ph.D., M.Eng., B.S. (Rensselaer Polytechnic Institute), Assistant Professor, Department of Industrial Engineering, 2015.

Nutter, Darin W., Ph.D. (Texas A&M University), M.S.M.E., B.S.M.E. (Oklahoma State University), Professor, Department of Mechanical Engineering, 1994.

O

O'Brien, Catherine, Ph.D. (University of Illinois, Chicago), M.P.H. (San Diego State University), M.A. (University of California, San Diego), B.S.Ed. (University of Wisconsin, Madison), Instructor, School of Human Environmental Sciences, 2016.

O'Leary-Kelly, Anne M., Ph.D. (Michigan State University), B.A. (University of Michigan), Professor, Department of Management, 1997.

O'Loughlin, J. Brian, Ph.D. (University of Alabama), M.A. (Syracuse University), B.S. (Boston College), Visiting Assistant Professor, Department of Communication, 2016.

Oliver, William, Ph.D., M.S. (University of Colorado-Boulder), B.S. (University of Arizona), Associate Professor, Department of Physics, 1992.

Omura, Mafumi, M.A. (University of Iowa), B.A. (Kansai Gaidai University), Instructor, Department of World Languages, Literatures and Cultures, 2016.

Oommen, Thomas, Ph.D. (Tufts University), Visiting Assistant Professor, Department of Communication, 2015.

Orr, Betsy, Ed.D., M.Ed. (University of Arkansas), B.A. (University of Arkansas at Monticello), Associate Professor, Department of Curriculum and Instruction, 1989.

Ortega, Catalina, M.M. (University of Arkansas), B.A. (Pontificia Universidad Javeriana, Colombia), Instructor, Department of Music, 2014.

Osborn, G. Scott, Ph.D. (North Carolina State University), M.S., Ag.E., B.S. (University of Kentucky), Associate Professor, Department of Biological and Agricultural Engineering, 2001.

Osborne, Cara, Sc.D., M.S. (Harvard University), M.S.N. (Vanderbilt University), B.A. (Transylvania University), Assistant Professor, Eleanor Mann School of Nursing, 2018.

Owen, Donna S., M.S., B.S., B.A. (University of Arkansas), Clinical Instructor, Department of Curriculum and Instruction, 2005.

P

Padilla, Yajaira, Ph.D. (University of California, San Diego), B.A. (University of California, Santa Cruz), Associate Professor, Department of English, 2013.

Paez, Rocio Alejandra, Ph.D., M.A., B.A. (University of Arkansas at Little Rock), Visiting Assistant Professor, Department of Sociology and Criminology, 2018.

Page, Patricia, J.D. (University of Arkansas at Little Rock), M.S.W. (Florida State University), B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2014.

Panayotova, Miroslava Saifur, Ph.D. (University of Arizona), Instructor, Department of Music, 2014.

Panda, Brajendra Nath, Ph.D. (North Dakota St. University), M.S. (Utkal University, India), Professor, Department of Computer Science and Computer Engineering, 2001.

Paradise, Thomas R., Ph.D. (Arizona State University), M.A. (Georgia State University), F.G.A., G.G. (Gemological Institute of America), B.S. (University of Nevada), University Professor, Department of Geosciences, 2000.

Park, Moon, D.M.A. (University of Cincinnati), M.M. (Staatliche Hochschule fur Musik in Freiburg), B.M. (University of Seoul National), Assistant Professor, Department of Music, 2012.

Park, Joon, Ph.D. (University of Oregon), M.A., B.M. (Eastman School of Music), Assistant Professor, Department of Music, 2016.

Park, Kiwoong, Ph.D. (University of Albany), Assistant Professor, Department of Sociology and Criminology, 2019.

Parker, Martha A., M.L.I.S. (University of North Carolina at Greensboro), B.A. (Queens University of Charlotte), A.A. (Central Piedmont Community College), Assistant Librarian, University Libraries, 2012.

Parker, Betty, M.S.W., B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2013.

Parker-Gibson, Necia T., M.L.I.S. (Louisiana State University), B.S.A. (University of Arkansas), Librarian, University Libraries, 1991.

Parkerson, Pat, Ph.D., B.S. (University of Arkansas), Associate Professor, Department of Computer Science and Computer Engineering, 1990.

Parks, Nathan A., Ph.D., M.S. (Georgia Institute of Technology), B.A. (University of Virginia), Assistant Professor, Department of Psychological Science, 2012.

Parnell, Gregory S., Ph.D. (Stanford University), M.S. (University of Southern California), M.E.I.S.E. (University of Florida), B.S. (University of New York at Buffalo), Research Professor, Department of Industrial Engineering, 2013.

Parry, Janine A., Ph.D., M.A. (Washington State University), B.A. (Western Washington University), Professor, Department of Political Science, 1998.

Parsch, Janet H., M.P.A. (University of Arkansas), M.A., B.A. (University of Wisconsin-Madison), Librarian, University Libraries, 1983.

Paré, Adam C., Ph.D. (University of California, San Diego), B.S. (Cornell University), Assistant Professor, Department of Biological Sciences, 2019.

Patitz, Matthew J., Ph.D., M.S., B.S. (Iowa State University), Associate Professor, Department of Computer Science and Computer Engineering, 2012.

Patton, Susan Kane, Ph.D., M.S.N. (University of Arkansas), M.H.S.A. (University of Arkansas at Little Rock), B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, Eleanor Mann School of Nursing, 2010.

Paul, David W., Ph.D. (University of Cincinnati), B.S. (Southwestern University), Associate Professor, Department of Chemistry and Biochemistry, 1980.

Payne, Whitney, M.S.W. (University of Arkansas), B.S.W. (University of Alaska-Anchorage), Clinical Assistant Professor, School of Social Work, 2012.

Peng, Yarui, Ph.D., M.S. (Georgia Institute of Technology), B.S. (Tsinghua University), Assistant Professor, Department of Computer Science and Computer Engineering, 2017.

Penner-Williams, Janet, Ed.D., M.Ed., B.S.E. (University of Houston), Associate Professor, Department of Curriculum and Instruction, 2005.

Pepitone, Lauren, Ph.D., M.A. (Johns Hopkins University), B.A., Vassar University, Assistant Professor, Department of History, 2016.

Pereira, Andy, Ph.D. (Iowa State University), M.S. (Indian Agricultural Research Institute, India), B.Sc.Ag. (Govind Ballabh Pant University of Agriculture and Technology, India), Professor, Department of Crop, Soil and Environmental Sciences, 2011.

Perry, Kim, M.S. (University of Arkansas), Instructor, Department of Rehabilitation, Human Resource and Communication Disorders, 2007.

Perryman, Kristi Leann, Ph.D. (University of Arkansas), M.S., B.S. (Southwest Missouri State University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.

Peters, Gary F., Ph.D. (University of Oregon), M.S. (University of Missouri-Columbia), B.S. (Arkansas Tech University), Professor, Department of Accounting, 2003.

Peterson, David, Ph.D. (University of North Carolina), M.S. (Air Force Institute of Technology), B.S. (Iowa State University), Instructor, Program in Operations Management, 2018.

Petretic, Patricia Ann Louise, Ph.D., M.A. (Bowling Green State University), B.A. (Youngstown State University), Associate Professor, Department of Psychological Science, 1990.

Petris, Giovanni, Ph.D., M.S. (Duke University), B.S. (Università degli Studi di Milano, Italy), Professor, Department of Mathematical Sciences, 1999.

Petrone, Kim, J.D. (Northwestern University), B.A. (Southern Methodist University), Instructor, Department of Accounting, 2012.

Philipp, Dirk, Ph.D. (Texas Tech University), M.S., B.S. (University of Leizig, Germany), Associate Professor, Department of Animal Science, 2007.

Phillips, Jared, Ph.D., M.A., B.A. (University of Arkansas), Clinical Assistant Professor, International and Global Studies, 2017.

Pierce, Michael C., Ph.D., M.A. (The Ohio State University), B.A. (Kenyon College), Associate Professor, Department of History, 2001.

- Pierce, Benjamin J.**, D.M.A., M.M. (University of Michigan-Ann Arbor), B.M. (Bowling Green State University), Professor, Department of Music, 2003.
- Pierce, Lisa**, M.S. (University of Georgia), B.S. (University of Tennessee), Instructor, Department of Information Systems, 2014.
- Pierson, Harry A.**, Ph.D. (The Ohio State University), M.S.E.M., B.S.M.E. (University of Missouri, Rolla), Assistant Professor, Department of Industrial Engineering, 2014.
- Pijanowski, John C.**, Ph.D., M.S. (Cornell University), B.A. (Brown University), Professor, Department of Curriculum and Instruction, 2007.
- Pinto, Ines**, Ph.D. (Louisiana State University Health Sciences Center), M.S., B.S. (University of Chile), Associate Professor, Department of Biological Sciences, 2000.
- Pittman, Harrison Mauzy**, LL.M. (University of Arkansas), J.D., B.A. (University of Arkansas at Little Rock), Assistant Professor, 2001.
- Place, Alison L.**, M.F.A (Miami University), Assistant Professor, School of Art, 2017.
- Plassmeyer, Mark**, Ph.D. (University of Denver), M.S.W. (University of Pittsburgh), Assistant Professor, School of Social Work, 2019.
- Plavcan, Joseph M.**, Ph.D., B.A. (Duke University), Professor, Department of Anthropology, 2001.
- Pohl, Edward A.**, Ph.D., M.S.R.E. (University of Arizona), M.S.S.E. (Air Force Institute of Technology), M.S.E.M. (University of Dayton), B.S.E.E. (Boston University), Professor, Department of Industrial Engineering, 2004.
- Pohl, Letitia**, Ph.D. (University of Arkansas), M.S.S.E. (Air Force Institute of Technology), B.S.M.E. (Tulane University), Clinical Assistant Professor, Department of Industrial Engineering, 2013.
- Pohlman, Fred W.**, Ph.D. (Kansas State University), M.S. (University of Tennessee), B.S. (University of Missouri-Columbia), Professor, Department of Animal Science, 1997.
- Poling, Richard L.**, Ph.D, B.S., M.S. (Ohio State University), Adjunct Associate Professor, Department of Agricultural Education, Communications and Technology, 2009.
- Pollock, Chad Aaron**, M.A. (University of Missouri-Columbia), M.Div. (Baylor University), B.A. (Ouachita Baptist University), Assistant Librarian, University Libraries, 2011.
- Pope, Adam**, Ph.D. (Purdue University), M.A. (University of Arkansas), B.A. (Freed-Hardeman University), Assistant Professor, Department of English, 2013.
- Popejoy, Erin O.**, Ph.D. (University of Texas–San Antonio), M.A. (Texas State University), B.A. (Case Western Reserve University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2015.
- Popp, Michael P.**, Ph.D. (Colorado State University), M.B.A. (University of Colorado-Boulder), B.Comm. (University of Manitoba), Professor, Department of Agricultural Economics and Agribusiness, 1998.
- Popp, Jennie Sheerin**, Ph.D., M.S. (Colorado State University), B.S. (University of Scranton), Professor, Department of Agricultural Economics and Agribusiness, 1998.
- Porter, Errol**, M.S.E.E., B.S.E.E. (University of Arkansas), Research Associate, Microelectronics-Photonics, 1997.
- Posnak, Adam**, M.F.A (Louisiana State University and A&M College), Instructor, School of Art, 2010.
- Post, Rana**, M.B.A. (William Woods University), B.S. (University of Missouri, Columbia), Instructor, School of Human Environmental Sciences, 2008.
- Potra, Adriana**, Ph.D. (Florida International University), M.S., B.S. (University of Babes-Bolyai, Romania), Assistant Professor, Department of Geosciences, 2012.
- Potter, Daniel S.**, M.N.A.S., B.S. (Missouri State University), Instructor, Department of Animal Science, 2016.
- Powell, Jeremy G.**, Ph.D. (University of Arkansas), D.V.M. (Oklahoma State University), B.S. (University of Arkansas), Professor, Department of Animal Science, 2009.
- Powers, Michael**, M.A. (Clemson University), B.A. (University of Florida), Instructor, Department of History, 2018.
- Price, Heather Arielle**, M.S., B.S. (University of Arkansas), Lecturer, Department of Mathematical Sciences, 2006.
- Prinz, Gary S.**, Ph.D, M.S., B.S. (Brigham Young University), Assistant Professor, Department of Civil Engineering, 2014.
- Prosandeev, Sergey**, Ph.D., M.S. (Rostov State University), Research Professor, Department of Physics, 2005.
- Puckett, Latisha**, Ph.D., B.S. (University of Arkansas), Instructor, Department of Chemistry and Biochemistry, 2015.
- Pulido Rull, Ana**, Ph.D., M.A. (Harvard University), B.A. (National Autonomous University of Mexico), Associate Professor, School of Art, 2012.
- Pullen, Brian K.**, M.B.A. (University of Arkansas), B.S. (Arkansas Tech University), Instructor, Department of Management, 2000.
- Purcell, Larry C.**, Ph.D. (University of Florida), M.S., B.S. (University of Georgia), Distinguished Professor, Department of Crop, Soil and Environmental Sciences, 1993.
- Puvanakrishnan, Priyaveena**, Ph.D. (University of Texas at Austin), Instructor, Department of Biomedical Engineering, 2015.
- Pérez Arroyo, Elkin Javier**, M.A. (University of Arkansas), B.A. (Universidad de Córdoba, Montería, Colombia), Instructor, Department of World Languages, Literatures and Cultures, 2017.
- ## Q
- Qian, Xianghong**, Ph.D., M.Phil. (George Washington University), B.S. (Nanjing University, P.R. China), Professor, Department of Biomedical Engineering, 2011.
- Quinn, William A.**, Ph.D., M.A. (The Ohio State University), B.A. (Xavier University), Distinguished Professor, Department of English, 1979.
- Quinn, Elizabeth Hart**, M.F.A. (Virginia Commonwealth University), B.A. (Sewanee University), Instructor, 2011.
- Quinn, Kyle P.**, Ph.D. (University of Pennsylvania), B.S. (University of Wisconsin), Assistant Professor, Department of Biomedical Engineering, 2014.
- ## R
- Ragsdale, Chal**, M.M. (East Carolina University), B.S. (Auburn University), University Professor, Department of Music, 1975.
- Rahman, Muhammad**, Ph.D. (Indiana University), M.S., B.S. (University of Dhaka), Clinical Assistant Professor, Department of Economics, 2014.
- Raich, Andrew Seth**, Ph.D., M.A. (University of Wisconsin-Madison), B.A. (Williams College), Professor, Department of Mathematical Sciences, 2008.
- Rainey, Daniel V.**, Ph.D., M.S. (Purdue University), B.S.A. (University of Arkansas), Associate Professor, Department of Agricultural Economics and Agribusiness, 2000.
- Rainey, Ronald L.**, Ph.D., M.S., B.S.A. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 1993.
- Rainwater, Candace Auburn**, Ph.D. (University of Florida), Instructor, Engineering, 2012.
- Rainwater, Chase E.**, Ph.D. (University of Florida), B.S.I.E. (University of Arkansas), Associate Professor, Department of Industrial Engineering, 2009.
- Rajaram, Narasimhan**, Ph.D. (University of Texas, Austin), B.E. (Anna University, India), Assistant Professor, Department of Biomedical Engineering, 2014.
- Ralston, Christine R.**, Ph.D. (Purdue University), M.Ed., B.S. (Indiana Wesleyan University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2015.

- Ramirez, Kasey**, M.F.A. (Indiana University, Bloomington), B.F.A. (Rhode Island School of Design), Assistant Professor, School of Art, 2015.
- Rankin, Sandy**, Ph.D., M.F.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, 2011.
- Rao, Raj R.**, Ph.D. (University of Georgia), M.S. (University of Texas), M.Sc., B.E. (Birla Institute of Technology and Sciences, India), Professor, Department of Biomedical Engineering, 2016.
- Rapert, Molly**, Ph.D. (University of Memphis), M.B.A., B.S.B.A. (University of Arkansas), Associate Professor, Department of Marketing, 1991.
- Rath, Narayan C.**, Ph.D., M.S. (University of Delhi-India), B.S. (Utkal University-India), Research Professor, Department of Poultry Science, 1992.
- Rauth, Cynthia A.**, M.A. (University of Washington), Instructor, English Language and Cultural Studies, 2014.
- Rawson, Caleb**, Ph.D. (University of Colorado at Boulder), B.S. (Colorado Christian University), Assistant Professor, Department of Accounting, 2018.
- Rawwagah, Fuad**, Ph.D., M.A. (University of Arkansas), B.S. (Yarmouk University), Assistant Professor, Department of Physics, 2010.
- Raynor, James**, M.S. (University of Arkansas), B.S. (Texas A & M University), Instructor, Program in Operations Management, 2014.
- Reeber, Joy Elisabeth**, Ph.D., M.A. (University of Wisconsin-Madison), B.A. (University of North Carolina), Instructor, Department of World Languages, Literatures and Cultures, 2012.
- Reeves, Carol**, Ph.D. (University of Georgia), M.A. (University of South Carolina), B.S. (Georgia Southern College), Professor, Department of Management, 1990.
- Reid, Margaret F.**, Ph.D. (University of Oklahoma), M.B.A. (Central State University), M.P.A. (University of Oklahoma), M.A. (University of Bonn), B.A. (University of Marburg, West Germany), Professor, Department of Political Science, 1993.
- Ren, Wei**, Ph.D. (University of Hong Kong), B.S. (Shanxi University), Assistant Professor, Department of Physics, 2008.
- Rennie, Craig**, Ph.D. (University of Oregon), M.B.A. (Dalhousie University), B.A. (University of Toronto), Associate Professor, Department of Finance, 2001.
- Restrepo, Luis Fernando**, Ph.D., M.A. (University of Maryland-College Park), B.A. (Universidad Pontificia Bolivariana), University Professor, Department of World Languages, Literatures and Cultures, 1995.
- Rhoads, Douglas Duane**, Ph.D. (Kansas State University), M.A., B.A. (Wichita State University), University Professor, Department of Biological Sciences, 1990.
- Rice, Lanny**, M.S. (University of Arkansas), Instructor, Department of Agricultural Education, Communications and Technology, 2012.
- Richardson, Mike**, Ph.D. (University of Georgia), M.S. (Louisiana State University), B.S. (Louisiana Tech University), Professor, Department of Horticulture, 1998.
- Richardson, Vernon J.**, Ph.D. (University of Illinois-Urbana-Champaign), M.B.A., B.S. (Brigham Young University), Distinguished Professor, Department of Accounting, 2005.
- Richardson, Tracey**, Ed.D. (Argosy University), M.S., B.A.Sc. (Troy University), Instructor, Program in Operations Management, 2009.
- Ricke, Steven C.**, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (University of Illinois), Professor, Department of Food Science, 2005.
- Ridge, Jason**, Ph.D., M.A., B.A. (Oklahoma State University), Associate Professor, Department of Management, 2015.
- Rieck, Yo'av**, Ph.D. (University of Texas at Austin), B.A. (Israel Institute of Technology), Professor, Department of Mathematical Sciences, 2000.
- Rieske, David**, M.S., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2007.
- Riha, Michael**, M.F.A. (Indiana University at Bloomington), B.F.A. (University of Wisconsin), Professor, Department of Theatre, 1992.
- Riley, Nastassja**, M.M. (Florida State University), Lecturer, Department of Music, 2014.
- Riley, Timothy B.**, Ph.D., M.B.A., B.S.S. (University of Kentucky), Assistant Professor, Department of Finance, 2016.
- Risk, Mark E.**, M.B.A., B.S.B.A. (University of Arkansas), Instructor, Department of Finance, 1981.
- Riva, Fernando**, Ph.D. (Yale University), Visiting Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.
- Robbins, Robert Thomas**, Ph.D. (North Carolina State University), M.S., B.S. (Kansas State University), University Professor, Department of Entomology and Plant Pathology, 1979.
- Robbins, James A.**, Ph.D. (University of California-Davis), M.S. (University of Georgia), B.S. (University of Wisconsin), Professor, Department of Horticulture, 1998.
- Roberts, Monty**, M.S., B.S. (University of Arkansas), Instructor, Department of Mechanical Engineering, 2011.
- Roberts, Trenton L.**, Ph.D. (University of Arkansas), M.S. (University of Arizona), B.S. (Oklahoma State University), Associate Professor, Department of Crop, Soil and Environmental Sciences, 2010.
- Roberts, Robin**, Ph.D., M.A. (University of Pennsylvania), B.A. (Mount Holyoke College), Professor, Department of English, 2011.
- Robertson, Lona**, Ed.D. (Indiana University, Bloomington), M.S., B.S. (Florida State University), Professor, School of Human Environmental Sciences, 2006.
- Robertson, Bill**, Ph.D., M.S. (Texas A&M University), B.S. (West Texas State University), Professor, Department of Crop, Soil and Environmental Sciences, 2014.
- Robinson, Charles F.**, Ph.D. (University of Houston), M.A. (Rice University), B.A. (University of Houston), Professor, Department of History, 1999.
- Robinson, Eddie**, Ph.D. (Northcentral University), M.A.S. (Embry Riddle Aeronautical University), M.S. (University of Arkansas), B.S. (United States Air Force Academy), Instructor, Program in Operations Management, 2007.
- Rochell, Samuel J.**, Ph.D. (University of Illinois at Urbana-Champaign), M.S., B.S. (Auburn University), Assistant Professor, Department of Poultry Science, 2016.
- Rodeffer, Carolyn**, M.B.A. (University of Chicago), B.A. (University of Maryland), Instructor, Department of Management, 2015.
- Rodriguez, Sarah**, Ph.D., B.A. (University of Pennsylvania), Assistant Professor, Department of History, 2016.
- Roe, Larry**, Ph.D. (University of Florida), M.S., B.S.M.E. (University of Mississippi), Associate Professor, Department of Mechanical Engineering, 1994.
- Roeder, Richard A.**, Ph.D., M.S. (Texas A&M University), B.A. (Glassboro State College), Professor, Department of Animal Science, 2002.
- Roessger, Kevin**, Ph.D., M.S., B.A. (University of Wisconsin-Milwaukee), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2016.
- Rogers, Marilyn L.**, M.L.S. (Louisiana State University), B.A. (Northwestern State University), Assistant Librarian, University Libraries, 1987.
- Rojas, Clemencia**, Ph.D. (Cornell University), M.S. (Purdue University), B.S. (Universidad de Los Andes, Colombia), Assistant Professor, Department of Entomology and Plant Pathology, 2015.
- Rojas, Alejandro**, Ph.D., M.S. (Michigan State University), M.S., B.S. (Los Andes University), Assistant Professor, Department of Entomology and Plant Pathology, 2018.

- Rom, Curt R.**, Ph.D., M.S. (The Ohio State University), B.S. (University of Arkansas), University Professor, Department of Horticulture, 1989.
- Rorie, Rick**, Ph.D. (Louisiana State University), M.S., B.S. (University of Arkansas), Professor, Department of Animal Science, 1989.
- Rosa, Ananda**, M.S.W. (University of Arkansas at Little Rock), B.A. (University of Arkansas), Clinical Assistant Professor, School of Social Work, 2010.
- Rosales, Steven**, Ph.D. (University of California-Irvine), B.A. (University of California-San Diego), Associate Professor, Department of History, 2013.
- Rose, Jerry**, Ph.D., M.A. (University of Massachusetts), B.A. (University of Colorado), University Professor, Department of Anthropology, 1976.
- Rosen, Chris**, Ph.D. (University of Akron), M.A. (Appalachian State University), B.A. (Washington and Lee University), Professor, Department of Management, 2006.
- Rosenkrans, Charles F.**, Ph.D. (Kansas State University), M.S., B.S. (University of Missouri-Columbia), Professor, Department of Animal Science, 1991.
- Ross, Jeremy**, Ph.D, M.S., B.S. (University of Arkansas), Professor, Department of Crop, Soil and Environmental Sciences, 1996.
- Rossetti, Manuel D.**, Ph.D., P.E., M.S.I.S. (The Ohio State University), B.S.I.E. (University of Cincinnati), Professor, Department of Industrial Engineering, 1999.
- Rossetti, Amy H.**, M.S., B.S. (Ohio State University), Instructor, Program in Operations Management, 2013.
- Rossiter-Hofer, Adriana**, Ph.D. (University of Maryland-College Park), M.S. (Federal University of Rio de Janeiro, Brazil), B.S. (Federal University of Pernambuco, Brazil), Associate Professor, Department of Supply Chain Management, 2008.
- Rosteck, Thomas**, Ph.D. (University of Wisconsin-Madison), M.A. (Brown University), A.B. (Washington University), Associate Professor, Department of Communication, 1990.
- Rotolo, Chuck**, M.Arch. (Washington University in St. Louis), B.Arch. (Louisiana State University), Assistant Professor, Department of Architecture, 2005.
- Rowe, Stephen**, Ph.D. (University of Illinois), M.S. (Loyola University Chicago), B.A. (Covenant College), Assistant Professor, Department of Accounting, 2016.
- Roy, William**, M.S. (University of Arkansas), B.S. (University of Memphis), Instructor, Program in Operations Management, 2002.
- Rozier, Louise L.**, D.M.L. (Middlebury College), M.A. (University of Arkansas), B.A. (Licence es Lettres, Université de Besançon, France), Associate Professor, Department of World Languages, Literatures and Cultures, 1991.
- Rucker, Kathryn Jill**, Ph.D., M.B.A., B.S. (Oklahoma State University), Associate Professor, Department of Agricultural Education, Communications and Technology, 2013.
- Rudzinski, Russell D.**, M.A. (Washington University in St. Louis), B.Arch. (Syracuse University), Assistant Professor, Department of Architecture, 2000.
- Ruiz, M. Reina**, Ph.D. (Washington University in St. Louis), M.A. (Kansas State University), B.A. (University of Leon, Spain), Associate Professor, Department of World Languages, Literatures and Cultures, 2001.
- Rulli, Richard J.**, D.M.A. (University of Wisconsin-Madison), M.M. (Ithaca College), B.M. (University of Northern Colorado), Associate Professor, Department of Music, 2003.
- Rumley, Elizabeth Rebecca**, LL.M. (University of Arkansas), J.D. (University of Toledo), B.A. (Michigan State University), Research Assistant Professor, Department of Agricultural Economics and Agribusiness, 2008.
- Rumley, Rusty W.**, J.D. (University of Oklahoma), Research Assistant Professor, Department of Agricultural Economics and Agribusiness, 2009.
- Runkle, Benjamin R.K.**, Ph.D., M.S. (University of California–Berkeley), B.S. (Princeton University), Assistant Professor, Department of Biological and Agricultural Engineering, 2014.
- Runkles, Henry S.**, M.M. (University of Arkansas), Lecturer, Department of Music, 2002.
- Rupe, John C.**, Ph.D., M.S. (University of Kentucky), B.S. (Colorado State University), Professor, Department of Entomology and Plant Pathology, 1984.
- Russell, Mark**, Ed.D. (Texas Tech University), M.S., B.S. (Colorado State University), Assistant Professor, Department of Animal Science, 2010.
- Ryan, Jeffrey J.**, Ph.D., M.A. (Rice University), B.A. (Colorado State University), Associate Professor, Department of Political Science, 1990.
- Ryan, John**, Ph.D. (University of York), M.Sc. (University of Warwick), B.A. (University of York, Britain), Professor, Department of Mathematical Sciences, 1990.

- Sabatini, Lindsey Rachel**, D.N.P., M.S., B.S.N., B.S. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2012.
- Sabherwal, Rajiv**, Ph.D. (University of Pittsburgh), P.G.D.M. (Indian Institute of Management), B.S.E.E. (Regional Engineering College, India), Distinguished Professor, Department of Information Systems, 2011.
- Sabo, George**, Ph.D., M.A., B.S. (Michigan State University), Professor, Department of Anthropology, 1980.
- Sabon, Lauren**, Ph.D. (University of Tennessee-Knoxville), M.S/M.A. (Marshall University), B.S., B.A. (West Virginia University), Clinical Assistant Professor, Department of Sociology and Criminology, 2014.
- Sacharoff, Laurent A.**, J.D. (Columbia University), B.A. (Princeton University), Associate Professor, School of Law, 2010.
- Sadaka, Sammy**, Ph.D. (Dalhousie University, Canada, and Alexandria University, Egypt), M.S., B.S. (Alexandria University, Egypt), Associate Professor, Department of Biological and Agricultural Engineering, 2007.
- Saeidi, Shirin**, Ph.D. (University of Cambridge, United Kingdom), M.A. (George Mason University), B.A. (University of Maryland-College Park), Assistant Professor, Department of Political Science, 2018.
- Sakon, Joshua**, Ph.D. (University of Wisconsin-Madison), B.S. (Southern Oregon University), Professor, Department of Chemistry and Biochemistry, 1997.
- Salamo, Gregory J.**, Ph.D. (City University of New York), M.S. (Indiana University-Purdue University-Indianapolis), B.S. (City University of New York, Brooklyn College), Distinguished Professor, Department of Physics, 1975.
- Salisbury, Luti**, M.Sc. (Loughborough University of Technology), B.Sc. (University of Guyana), Distinguished Professor, University Libraries, 1992.
- Salonen, Rick**, Ed.D., M.M. (University of Arkansas), B.M. (Central Michigan University), Instructor, Department of Music, 2008.
- Salter, Kandy S.L.**, O.T.H. (University of Kansas), M.S. (University of Central Arkansas), Clinical Assistant Professor, Department of Occupational Therapy, 2018.
- Samuels, Mandel**, M.B.A. (University of Arkansas), B.A. (Oklahoma State University), Assistant Professor, Department of Human Resource and Workforce Development Education, 2012.
- Sargenti, Anthony**, M.A. (San Francisco State University), B.A. (San José State University), Instructor, Department of World Languages, Literatures and Cultures, 2016.
- Saunders, Robert F.**, M.S.E.E., M.S. (University of Arkansas), Instructor, Department of Electrical Engineering, 2012.
- Savin, Mary Cathleen**, Ph.D., M.S. (University of Rhode Island), B.S. (University of Notre Dame), Professor, Department of Crop, Soil and Environmental Sciences, 2002.

- Saxena, Ashok**, Ph.D., M.S. (University of Cincinnati), B.S.M.E. (Indiana Institute of Technology), Distinguished Professor, Department of Mechanical Engineering, 2003.
- Schaefer-Whitby, Peggy**, Ph.D. (University of Central Florida), M.A. (University of Houston-Clear Lake), B.A. (St. Cloud State University), Associate Professor, Department of Curriculum and Instruction, 2012.
- Scheide, Frank Milo**, Ph.D. (University of Wisconsin-Madison), M.A. (New York University), B.S. (University of Wisconsin-River Falls), Professor, Department of Communication, 1977.
- Schluterman, Heath A.**, Ph.D., B.S. (University of Arkansas), Instructor, Engineering, 2009.
- Schneider, Susan**, LL.M. (University of Arkansas), J.D. (University of Minnesota-Twin Cities), B.A. (College of Saint Catherine), Professor, School of Law, 1998.
- Schott, Elizabeth W.**, Ph.D., M.S. (New Mexico State University), M.S.I.E. (Georgia Institute of Technology), Instructor, Program in Operations Management, 2017.
- Schreckhise, William D.**, Ph.D., M.A., B.A. (Washington State University), Associate Professor, Department of Political Science, 1998.
- Schuetz, Sebastian**, Ph.D. (City University of Hong Kong), M.S., B.S. (University of Mannheim), Assistant Professor, Department of Information Systems, 2017.
- Schulte, Stephanie Ricker**, Ph.D., M.A. (George Washington University), B.A. (University of Arkansas), Associate Professor, Department of Communication, 2008.
- Schulte, Bret J.**, M.F.A. (George Mason University), B.A. (University of Nebraska-Lincoln), Associate Professor, School of Journalism and Strategic Media, 2008.
- Schwab, Bill**, Ph.D., M.A. (The Ohio State University), M.A. (University of Akron), B.A. (Miami University), University Professor, Department of Sociology and Criminology, 1976.
- Scott, Allison L.**, D.N.P. (University of Missouri-Kansas City), M.S.N., B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, Eleanor Mann School of Nursing, 2006.
- Scott, Robert C.**, Ph.D. (Mississippi State University), M.S., B.S. (Oklahoma State University), Professor, Department of Crop, Soil and Environmental Sciences, 2002.
- Scott, Adrienne R.**, M.S.W. (University of Texas, Arlington), B.A. (University of Arkansas), Lecturer, School of Social Work, 2014.
- Scott, Marc**, Ph.D. (North Dakota State University), M.S., B.S. (South Carolina State University), Clinical Assistant Professor, Department of Supply Chain Management, 2016.
- Sebold, Karen Denise**, Ph.D., M.A. (University of Arkansas), B.S. (Campbell College), B.S. (Rogers State University), Clinical Assistant Professor, Department of Political Science, 2011.
- Selvam, R. Panneer**, Ph.D. (Texas Tech University), M.S.C.E. (South Dakota School of Mines and Technology), M.E., B.E. (University of Madras, India), University Professor, Department of Civil Engineering, 1986.
- Senor, Thomas D.**, Ph.D., M.A. (University of Arizona), B.S. (University of Oregon), Professor, Department of Philosophy, 1989.
- Seo, Han-Seok**, Dr.rer.Medic. (Technische Universität Dresden, Germany), Ph.D., M.Sc. (Seoul National University), B.S. (Korea University, Seoul), Associate Professor, Department of Food Science, 2012.
- Serrano, Christina**, Ph.D. (University of Georgia), B.B.A. (Armstrong Atlantic State University), Assistant Professor, Department of Information Systems, 2011.
- Servoss, Shannon**, Ph.D. (Northwestern University), B.S.Ch.E. (University of Michigan-Ann Arbor), Associate Professor, Ralph E. Martin Department of Chemical Engineering, 2007.
- Setia, Pankaj**, Ph.D. (Michigan State University), M.B.A. (Management Development Institute), B.S. (University of Delhi, India), Associate Professor, Department of Information Systems, 2008.
- Sexton, Kim**, Ph.D., M.A., M.Phil. (Yale University), B.A. (State University of New York at Binghamton), Associate Professor, Department of Architecture, 1999.
- Sha, Xueyan**, Ph.D. (Louisiana State University), Professor, Department of Crop, Soil and Environmental Sciences, 2012.
- Sha, Zhenghui**, Ph.D. (Purdue University), M.S.M.E. (Xi'an Jiaotong University), B.S.M.E. (Xi'an University of Technology), Assistant Professor, Department of Mechanical Engineering, 2017.
- Shadwick, John D.L.**, M.S. (University of Arkansas), B.S. (University of Central Arkansas), Instructor, Department of Biological Sciences, 2011.
- Shakiba, Ehsan**, Ph.D., M.S. (University of Arkansas), M.S., B.S. (Azad University, Iran), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2015.
- Shanks, Bruce C.**, Ph.D. (South Dakota State University), M.S. (Montana State University), B.S. (Missouri State University), Adjunct Assistant Professor, Department of Animal Science, 2011.
- Shannon, Graham F.**, M.Arch. (Rice University), B.Arch., B.A. (University of Arkansas), Professor, Department of Architecture, 1979.
- Sharman, Glenn R.**, Ph.D. (Stanford University), B.S. (Wheaton College), Assistant Professor, Department of Geosciences, 2017.
- Sharpley, Andrew N.**, Ph.D. (Massey University, New Zealand), B.S. (University College of North Wales), Distinguished Professor, Department of Crop, Soil and Environmental Sciences, 2006.
- Shaulis, Barry J.**, Ph.D., M.S., B.S. (University of Houston), B.B.A. (University of Georgia), Research Associate, Department of Geosciences, 2016.
- Shaw, John B.**, Ph.D. (University of Texas at Austin), B.A. (Oberlin College), Assistant Professor, Department of Geosciences, 2014.
- Shelton, Gina**, B.A. (Mississippi State University), Instructor, School of Journalism and Strategic Media, 2013.
- Shelton, Leslie Jo**, Ph.D. (Michigan State University), M.Ed., B.A. (Ohio University), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2014.
- Shew, Woodrow L.**, Ph.D. (University of Maryland-College Park), B.A. (College of Wooster), Associate Professor, Department of Physics, 2012.
- Shi, Wei**, Ph.D. (University of Alberta), M.S. (East China University of Science and Technology), B.S. (Shanghai Jiao Tong University), Assistant Professor, Department of Chemistry and Biochemistry, 2012.
- Shi, Xuan**, Ph.D. (West Virginia University), M.S. (Indiana University of Pennsylvania), B.S. (Hubei University), Assistant Professor, Department of Geosciences, 2012.
- Shi, Ainong**, Ph.D. (North Carolina State University), M.S. (Graduate School of Chinese Academy of Agricultural Sciences), B.S. (Zhejiang University), Assistant Professor, Department of Horticulture, 2013.
- Shields, Christopher A.**, Ph.D., J.D. (University of Arkansas), M.A., B.A. (Arkansas State University), Clinical Assistant Professor, Department of Sociology and Criminology, 2003.
- Shields, Todd G.**, Ph.D., M.A. (University of Kentucky), B.A. (Miami University), Professor, Department of Political Science, 1994.
- Shipman, Jonathan**, Ph.D. (University of Tennessee), B.S. (University of Central Arkansas), Associate Professor, Department of Accounting, 2015.
- Shobe, Marcia A.**, Ph.D. (University of Kansas), M.S.W. (University of Hawaii at Manoa), B.A. (State University of New York at Plattsburgh), Professor, School of Social Work, 2007.
- Shook, Carole**, M.S.B.A., B.S.B.A. (University of Arkansas), Instructor, Department of Supply Chain Management, 1999.
- Shoulders, Kate**, Ph.D. (University of Florida), M.S., M.A. (Murray State University), Associate Professor, Department of Agricultural Education, Communications and Technology, 2012.

- Shreve, Marilou D.**, D.N.P., M.S.N. (University of Missouri-Kansas City), B.S.N. (University of Arkansas), Assistant Professor, Eleanor Mann School of Nursing, 2013.
- Shuler, Kimberly M.**, M.S.W. (University of Arkansas at Little Rock), B.S.W. (University of Arkansas), Instructor, School of Social Work, 2015.
- Shuman, S. Michael**, M.M. (University of Arkansas), M.M. (University of Nebraska at Omaha), B.M. (Delta State University), Lecturer, Department of Music, 2006.
- Shuman, Hannah Mindeman**, , Lecturer, .
- Siahmakoun, Lobat**, M.S. (University of Arkansas), B.S. (Missouri Southern State University), Instructor, School of Human Environmental Sciences, 2015.
- Siebenmorgen, Terrence J.**, Ph.D. (University of Nebraska-Lincoln), M.S.Ag.E. (Purdue University), B.S.Ag.E. (University of Arkansas), Distinguished Professor, Department of Food Science, 1984.
- Siepielski, Adam M.**, Ph.D. (University of Wyoming-Laramie), M.S. (New Mexico State University), B.S. (Pennsylvania State University-University Park), Assistant Professor, Department of Biological Sciences, 2015.
- Simon, Lauren**, Ph.D., B.S.B.A., B.S. (University of Florida), Associate Professor, Department of Management, 2016.
- Singh, Surendra P.**, Ph.D., M.A. (University of Rochester), M.Sc., B.Sc. (Banaras Hindu University, India), University Professor, Department of Physics, 1982.
- Sirmans, Corbitt Stace**, Ph.D., B.S. (Florida State University), Assistant Professor, Department of Finance, 2014.
- Sites, Joanna**, M.S.W., B.A. (University of Arkansas), Lecturer, School of Social Work, 2016.
- Skinner, Stephen R.**, M.S., B.S. (University of Arkansas), Instructor, Department of Physics, 1998.
- Skinner, Jerral V.**, Ph.D. (University of Arkansas), Lecturer, Department of Crop, Soil and Environmental Sciences, 1990.
- Slaton, Nathan A.**, Ph.D., M.S. (University of Arkansas), B.S. (Murray State University), Professor, Department of Crop, Soil and Environmental Sciences, 2001.
- Slattey, Patrick Joseph**, Ph.D. (Indiana University at Bloomington), A.B. (College of the Holy Cross), Associate Professor, Department of English, 1991.
- Sloan, Kathryn Ann**, Ph.D., M.A., M.B.A. (University of Kansas), B.A. (Kansas State University), Professor, Department of History, 2004.
- Slone, Ryan B.**, B.F.A. (University of Arkansas), Instructor, School of Art, 2001.
- Smith, Kathy**, Ed.D., M.S. (University of Arkansas), B.S. (The Ohio State University), Clinical Associate Professor, School of Human Environmental Sciences, 1999.
- Smith, Brent Lamar**, Ph.D., M.S. (Purdue University), B.A. (Ouachita Baptist University), Distinguished Professor, Department of Sociology and Criminology, 2003.
- Smith, Ronn J.**, Ph.D. (Washington State University), M.S., B.S. (Montana State University), Associate Professor, Department of Marketing, 2006.
- Smith, Carl Alan**, Ph.D., M.A. (University of Sheffield), B.Sc. (University of Lancaster), Associate Professor, Department of Landscape Architecture, 2008.
- Smith, Joshua Byron**, Ph.D., M.A. (Northwestern University), B.A. (University of Illinois at Chicago), Assistant Professor, Department of English, 2011.
- Smith, Annie B.**, LL.M. (George Washington University), J.D. (University of Wisconsin-Madison), Associate Professor, School of Law, 2012.
- Smith, Tom E.C.**, Ed.D. (Texas Tech University), M.Ed., B.S.E. (University of Mississippi), University Professor, Department of Curriculum and Instruction, 2002.
- Smith, Scott**, M.S. (University of Arkansas), M.S. (Air Force Institute of Technology), B.S. (United States Air Force Academy), Instructor, Program in Operations Management, 2006.
- Smith, Christopher**, Ph.D. (University of Virginia), M.S. (University of Missouri-Rolla), M.S. (University of Texas at Austin), B.S. (U.S. Military Academy), Instructor, Program in Operations Management, 2015.
- Smith, Martin**, B.S. (Oklahoma State University), Assistant Professor, Air Force ROTC, 2018.
- Smith, Christy**, Ed.D., Ed.S., M.S.E., B.S.E. (University of Arkansas), Clinical Assistant Professor, Department of Curriculum and Instruction, 2019.
- Smith-Nix, Angela**, Ph.D. (University of Arkansas), M.Ed., B.S.E. (Arkansas State University), Clinical Assistant Professor, Department of Health, Human Performance and Recreation, 1989.
- Snyder, Tamara D.**, M.S. (University of Arkansas), B.S. (University of California-Los Angeles), Clinical Assistant Professor, Department of Physics, 2004.
- Snyder, Gerry**, M.A. (New York University), B.F.A. (University of Oregon), Distinguished Professor, School of Art, 2019.
- Sodero, Annibal Camara**, Ph.D. (Arizona State University), M.S.C. (Warkwick University), B.S.C. (UFMG-Brazil), Assistant Professor, Department of Supply Chain Management, 2013.
- Song, Geoboo**, Ph.D. (University of Oklahoma), B.A. (Korea University), B.A. (Hanyang University), Assistant Professor, Department of Political Science, 2012.
- Sonn, Richard D.**, Ph.D., M.A. (University of California-Berkeley), B.A. (University of Michigan), Professor, Department of History, 1987.
- Sonnenberg, Anthony**, M.F.A., M.A. (University of Washington), B.F.A. (University of Texas at Austin), Assistant Professor, 2009.
- Southward, Cheryl Leigh**, Ph.D., M.S., B.S. (University of Tennessee), Associate Professor, School of Human Environmental Sciences, 2008.
- Souto Melgra, Nacacha**, Ph.D. (University of Puerto Rico, Mayaguez), Clinical Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2018.
- Soysal, Gonca**, Ph.D. (Northwestern University), M.S. (Northwestern University), M.E. (University of Florida), B.S. (Middle East Technical University), Assistant Professor, Department of Marketing, 2017.
- Sparks, Leigh Pryor**, Ph.D. (University of Arkansas), M.A., B.A. (Stanford University), Instructor, Department of English, 2009.
- Spears, Kari R.**, M.S.W., B.A. (University of Arkansas), Lecturer, School of Social Work, 2016.
- Specking, Eric A.**, M.S.I.E., B.S. (University of Arkansas), Lecturer, Program in Operations Management, 2014.
- Spialek, Matthew L.**, Ph.D. (University of Missouri), Assistant Professor, Department of Communication, 2017.
- Spicer, Tom O.**, Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Professor, Ralph E. Martin Department of Chemical Engineering, 1981.
- Spiegel, Frederick W.**, Ph.D. (University of North Carolina at Chapel Hill), B.A. (Drew University), Distinguished Professor, Department of Biological Sciences, 1982.
- Spiegel, Sarah E.**, M.S. (University of Illinois-Urbana-Champaign), B.A. (Bryn Mawr College), Assistant Librarian, University Libraries, 2007.
- Spiesshoefer, Silke**, Ph.D., M.S.E.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, Department of Electrical Engineering, 2014.
- Spradley, J. Ples**, M.S. (University of Arkansas), B.S. (Hendrix College), Extension Associate Professor, Department of Entomology and Plant Pathology, 1984.
- Sprandel, Heather**, Ed.D., M.Ed. (University of Arkansas), B.A. (DePaul University), Instructor, Walton College of Business, 1999.
- Springer, Bethany Lynn**, M.F.A. (University of Georgia), B.A. (Virginia Polytechnic Institute and State University), Associate Professor, School of Art, 2006.

- Spurlock, Terry**, Ph.D. (University of Arkansas), Extension Assistant Professor, Department of Entomology and Plant Pathology, 2015.
- Srivastava, Vibha**, Ph.D. (Jawaharlal Nehru University, New Delhi), M.S. (Govind Ballabh Pant University of Agriculture and Technology), B.S. (D.E.I. University), Professor, Department of Crop, Soil and Environmental Sciences, 2001.
- Stahle, David William**, Ph.D. (Arizona State University), M.A. (University of Arkansas), B.A. (University of Arizona), Distinguished Professor, Department of Geosciences, 1982.
- Standerfer, Christina Corrado**, Ph.D. (University of Colorado-Boulder), M.A., B.A. (University of Arkansas at Little Rock), Professor, Clinton School of Public Service, 2007.
- Stankus, Tony**, M.L.S. (University of Rhode Island), B.A. (College of the Holy Cross), Distinguished Professor, University Libraries, 2007.
- Stapp, Robert Bruce**, Ph.D., M.S. (Oklahoma State University), B.S.B.A. (Oklahoma City University), Clinical Professor, Department of Economics, 1995.
- Starks, Trish**, Ph.D., M.A. (The Ohio State University), B.A. (University of Missouri), Professor, Department of History, 2000.
- Starling-Ledbetter, Robyn M.**, M.A., B.A. (University of Arkansas), Instructor, School of Journalism and Strategic Media, 2007.
- Stassen, Robert E.**, Ph.D., M.B.A. (University of Nebraska-Lincoln), B.S. (University of Minnesota), Associate Professor, Department of Marketing, 1989.
- Stauss, Kim**, Ph.D. (University of Utah), M.S.W. (California State University at Sacramento), B.S. (Stephen F. Austin State University), Associate Professor, School of Social Work, 2006.
- Steelman, Zach**, Ph.D., M.I.S. (University of Arkansas), B.B.A. (Northeastern State University), Assistant Professor, Department of Information Systems, 2017.
- Steinkraus, Donald C.**, Ph.D. (Cornell University), M.S. (University of Connecticut), B.A. (Cornell University), Professor, Department of Entomology and Plant Pathology, 1989.
- Steinmetz, Joseph E.**, Ph.D. (Ohio University), M.A., B.S. (Central Michigan University), Distinguished Professor of Psychological and Brain Science, Department of Psychological Science, 2016.
- Stenken, Julie A.**, Ph.D. (University of Kansas), B.S. (University of Akron), Professor, Department of Chemistry and Biochemistry, 2007.
- Stephen, Fred M.**, Ph.D. (University of California-Berkeley), B.S. (San Jose State University), University Professor, Department of Entomology and Plant Pathology, 1974.
- Stephens, Dorothy Anne**, Ph.D. (University of California-Berkeley), M.A. (University of Illinois-Chicago), B.A. (Northwestern University), Professor, Department of English, 1992.
- Stephens, Mary Paige**, M.S.W., B.A. (University of Missouri-Columbia), Lecturer, School of Social Work, 2013.
- Stephenson, Steven Lee**, Ph.D., M.S. (Virginia Polytechnic Institute and State University), B.S. (Lynchburg College), Research Professor, Department of Biological Sciences, 2003.
- Stephenson, Barbara C.**, M.S. (West Virginia University), Instructor, Department of Mathematical Sciences, 2004.
- Sterling, Brett E.**, Ph.D., M.A. (Vanderbilt University), B.A. (University of Arkansas), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013.
- Stevens, Christopher W.**, Ph.D. (University of Maryland College Park), M.A. (City University of New York-The Graduate Center), B.A. (Humboldt State University), Instructor, Department of Philosophy, 2015.
- Stewart, Patrick A.**, Ph.D., (Northern Illinois University), M.A., B.A. (University of Central Florida), Associate Professor, Department of Political Science, 2008.
- Stewart, Angela**, D.N.P. (University of Arkansas), M.N.Sc., B.S.N. (University of Arkansas for Medical Sciences), Assistant Professor, Eleanor Mann School of Nursing, 2015.
- Stites, Wesley**, Ph.D. (Massachusetts Institute of Technology), M.A., B.A. (Johns Hopkins University), Professor, Department of Chemistry and Biochemistry, 1991.
- Stockdell, Rick**, M.A. (Kansas State University), B.S. (Northwest Missouri State University), Associate Professor, School of Journalism and Strategic Media, 1980.
- Stokowski, Sarah**, Ph.D. (University of Tennessee), M.Ed. (University of Oklahoma), B.S.E. (University of Kansas), Assistant Professor, Department of Health, Human Performance and Recreation, 2014.
- Stoner, Wesley**, Ph.D., M.A. (University of Kentucky), B.A. (Pennsylvania State University), Assistant Professor, Department of Anthropology, 2014.
- Stoverink, Adam**, Ph.D., (Texas A&M University), M.B.A. (St. Louis University), B.S.B.A. (University of Missouri), Assistant Professor, Department of Management, 2017.
- Striegler, Susanne**, Ph.D., M.S., B.S. (Ulm University, Germany), Professor, Department of Chemistry and Biochemistry, 2012.
- Studebaker, Glenn**, Ph.D., M.S. (University of Arkansas), B.S. (Missouri Southern State University), Associate Professor, Department of Entomology and Plant Pathology, 1993.
- Su, Danjie**, Ph.D. (University of California, Los Angeles), M.A., B.A. (Sun Yatsen University, China), Assistant Professor, Department of World Languages, Literatures and Cultures, 2017.
- Suarez, Celina A.**, Ph.D. (University of Kansas), M.S. (Temple University), B.S. (Trinity University), Associate Professor, Department of Geosciences, 2012.
- Sude, Yujie**, Ph.D., M.A. (University of Arkansas), M.Ed. (Beijing Normal University), LL.B. (Peking University), Clinical Assistant Professor, Department of Economics, 2018.
- Sui, Daniel**, Ph.D. (University of Georgia), M.S., B.S. (Peking University), Distinguished Professor, Department of Geosciences, 2018.
- Sullivan, Amanda Lynn**, Ph.D., M.A.T., B.S.E. (University of Arkansas), Clinical Associate Professor, Department of Health, Human Performance and Recreation, 2010.
- Sullivan, Kelly M.**, Ph.D. (University of Florida), M.S.I.E., B.S.I.E. (University of Arkansas), Assistant Professor, Department of Industrial Engineering, 2012.
- Sullivan, W. Curt**, M.A. (University of Arkansas), B.A. (Harding University), Lecturer, Department of Political Science, 2015.
- Sun, Xiaolun**, Ph.D., M.S. (Virginia Polytech Institute and State University), B.S. (Southern China Agricultural University), Assistant Professor, Department of Poultry Science, 2016.
- Sutherland, Daniel E.**, Ph.D., M.A., B.A. (Wayne State University), Distinguished Professor, Department of History, 1989.
- Sutton, James M.**, M.S. (Southern Methodist University), B.S. (University of West Florida), B.M. (University of Southern Mississippi), Instructor, Program in Operations Management, 2017.
- Swedenburg, Ted R.**, Ph.D., M.A., (University of Texas at Austin), B.A. (University of Beirut), Professor, Department of Anthropology, 1996.
- Sykes, Tracy Ann**, Ph.D. (University of Arkansas), B.S. (University of Maryland-College Park), Associate Professor, Department of Information Systems, 2011.
- Syler, Rhonda A.**, Ph.D. (Auburn University), M.B.A. (Columbus State University), M.S. (Kansas State University), B.S. (Middle Tennessee State University), Clinical Assistant Professor, Department of Information Systems, 2016.
- Sytsma, Janine A.**, Ph.D. (University of Wisconsin-Madison), M.A. (University of Denver), B.A. (Arizona State University), Assistant Professor, School of Art, 2016.

Szakasits, Monika, J.D. (Baylor University), B.A. (Sam Houston State University), Associate Librarian, University Libraries, 2004.

Szalanski, Allen Lawrence, Ph.D. (University of Nebraska-Lincoln), M.S. (Kansas State University), B.S. (University of Manitoba), Professor, Department of Entomology and Plant Pathology, 2001.

Szwydky-Davis, Lissette López, Ph.D., M.A. (Penn State University), B.A. (University of Miami), Assistant Professor, Department of English, 2013.

T

Talafuse, Thomas, Ph.D. (University of Arkansas), M.S. (Air Force Institute of Technology), B.S. (United States Air Force Academy), Instructor, Program in Operations Management, 2018.

Taoka, Loring, M.F.A. (University of North Texas), Instructor, School of Art, 2012.

Tarvin, Tim, J.D. (University of Arkansas), B.A. (Hendrix College), Associate Professor, School of Law, 1993.

Taylor, Jennifer, Ph.D. (University of Missouri-Kansas City), M.A. (University of Northern Iowa), B.A. (University of Kentucky), Research Professor, Department of Marketing, 2014.

Teague, Rick, M.S. (Webster University), B.B.A. (University of Memphis), Instructor, Program in Operations Management, 2001.

Teal, Tabatha, M.S.N. (University of Arkansas), B.S.N. (Arkansas Tech University), Instructor, Eleanor Mann School of Nursing, 2014.

Teal, Kimberly Hannon, Ph.D., M.M. (Eastman School of Music), B.A. (University of Oregon), Assistant Professor, Department of Music, 2016.

Tellez-Isaias, Guillermo, Ph.D. (Texas A&M University), Visiting Professor, Department of Poultry Science, 2002.

Ten Haaf, Rachel E., Ph.D. (University of Michigan), M.A. (University of Illinois, Urbana-Champaign), Assistant Professor, Department of World Languages, Literatures and Cultures, 2016.

Terhune, Claire E., Ph.D., M.A. (Arizona State University), B.A., B.S. (College of Charleston), Assistant Professor, Department of Anthropology, 2013.

Terrell, Katie, M.B.A. (University of Arkansas), B.A. (University of Central Arkansas), Instructor, Department of Accounting, 2012.

Terry, Laura, M.F.A. (Savannah State University), B.S. (Auburn University), Associate Professor, Department of Architecture, 1998.

Teuton, Sean Kicummah, Ph.D., M.A. (Cornell University), B.A. (University of Colorado-Boulder), Professor, Department of English, 2013.

Thallapuram, Suresh, Ph.D. (Osmania University), Professor, Department of Chemistry and Biochemistry, 2003.

Thein, Ricky, M.A. (Southern Illinois University), B.A. (University of Central Florida), Clinical Assistant Professor, School of Journalism and Strategic Media, 2013.

Thibado, Paul M., Ph.D. (University of Pennsylvania), B.S. (San Diego State University), Professor, Department of Physics, 1996.

Thoma, Greg, Ph.D. (Louisiana State University), M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Professor, Ralph E. Martin Department of Chemical Engineering, 1993.

Thomas, JaLynn D., B.S. (Louisiana Tech College Ruston Campus), Instructor, Department of Accounting, 2011.

Thomas, Shaun A., Ph.D., M.A. (Louisiana State University), B.A. (University of Akron), Associate Professor, Department of Sociology and Criminology, 2015.

Thomas, Johanna, Ph.D., M.S.W. (Louisiana State University), B.A. (University of Akron), Assistant Professor, School of Social Work, 2015.

Thomas, Lauren, D.V.M. (Oklahoma State University), B.S. (University of Arkansas), Clinical Assistant Professor, Department of Animal Science, 2016.

Thomas, Stephanie, M.S.W. (University of Maryland at Baltimore), B.S. (Old Dominion University), Lecturer, School of Social Work, 2017.

Thomas, Rodney W., Ph.D., M.B.A. (University of Tennessee), B.S.B.A. (Greensboro College), Associate Professor, Department of Supply Chain Management, 2017.

Thomas, Stephanie, Ph.D. (Georgia Southern University), M.B.A., B.A. (University of Tennessee), Clinical Assistant Professor, Department of Supply Chain Management, .

Thompson, Timothy F., D.M.A., M.M. (University of Wisconsin-Madison), Professor, Department of Music, 1979.

Thompson, Dale R., Ph.D. (North Carolina State University), M.S., B.S. (Mississippi State University), Associate Professor, Department of Computer Science and Computer Engineering, 2000.

Thompson, Randy, J.D. (University of Illinois-Urbana-Champaign), M.L.S., B.A. (Indiana University), Associate Professor, School of Law, 2008.

Thompson, Audie K., Ph.D. (University of Mississippi Medical Center), Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2018.

Thomsen, Michael R., Ph.D. (University of Minnesota-Morris), M.S., B.S. (Utah State University), Professor, Department of Agricultural Economics and Agribusiness, 1998.

Thrash, Ben, , Assistant Professor, Department of Entomology and Plant Pathology, 2018.

Throgmorton, Molly Kathryn, M.A. (University of Arkansas), B.A. (Ouachita Baptist University), Instructor, 2012.

Tian, Ryan, Ph.D. (University of Connecticut), B.S. (Fudan University, Shanghai), Associate Professor, Department of Chemistry and Biochemistry, 2004.

Tipsmark, Christian K., Ph.D., M.S. (University of Southern Denmark), Associate Professor, Department of Biological Sciences, 2010.

Tjani, Maria, Ph.D. (Michigan State University), M.S. (Purdue University), B.S. (University of Ioannina, Greece), Associate Professor, Department of Mathematical Sciences, 2003.

Tompkins, Chris, J.D. (Vanderbilt University), B.S. (U.S. Naval Academy), Instructor, Department of Finance, 2011.

Tonymon, Susan, M.S.W. (University of Arkansas at Little Rock), B.S.W. (Arkansas State University), Instructor, School of Social Work, 2014.

Torres Mesa, Nelson Augusto, M.A. (University of Arkansas), B.A. (University of Antioquia), Instructor, Department of World Languages, Literatures and Cultures, 2010.

Traywick, La Vona, Ph.D. (University of Kentucky), Associate Professor, School of Human Environmental Sciences, 2007.

Trivitt, Julie R., Ph.D., M.A. (University of Arkansas), M.A. (Southwest Missouri State University), Clinical Associate Professor, Department of Education Reform, 2012.

Troiano, Eric, D.M.A., M.M. (Michigan State University), B.M. (Ithaca College), Instructor, Department of Music, 2016.

Trudo, Sabrina P., Ph.D. (University of Washington), B.S. (Brigham Young University), Associate Professor, School of Human Environmental Sciences, 2015.

Tullis, Jason A., Ph.D., M.S. (University of South Carolina at Columbia), B.S. (Brigham Young University), Professor, Department of Geosciences, 2004.

Tung, Steve, Ph.D., M.S.M.E. (University of Houston), B.S.M.E. (National Taiwan University), Professor, Department of Mechanical Engineering, 2000.

Turner, Ronna L., Ph.D. (University of Illinois-Urbana-Champaign), M.S.E. (Missouri State University), B.S.E. (Southwest Missouri State University), Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 1997.

Turner, Alison, M.A. (Parsons School of Design), B.A. (Kentucky State University), Assistant Professor, Department of Architecture, 2008.

Turner, Henry L., Ph.D., M.S. (University of Arkansas), B.S. (University of Oregon), Instructor, Department of Geosciences, 2008.

Turner, Aaron, M.F.A. (Rutgers State University), B.A. (University of Memphis), Research Associate, School of Art, 2016.

Tuychiev, Hayot A., M.A. (University of Arkansas), B.A. (Tashkent State University of Economics), Instructor, School of Journalism and Strategic Media, 2010.

Tyler, Susan, M.S.W., B.S.W. (University of Arkansas), Lecturer, School of Social Work, 2018.

Tzanetakis, Ioannis E., Ph.D. (Oregon State University), M.S., B.S. (Agricultural University of Athens, Greece), Professor, Department of Entomology and Plant Pathology, 2008.

U

Ungar, Peter S., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (State University of New York, Binghamton), Distinguished Professor, Department of Anthropology, 1995.

Uribe, Lia, D.M.A. (University of Kansas), M.M. (University of Arkansas), B.M. (Universidad Nacional de Colombia, Bogotá), Assistant Professor, Department of Music, 2013.

V

Vajda, Anthony J., Ph.D. (Old Dominion University), M.S. (La Salle University), B.A. (University of Delaware), Assistant Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2018.

Valandra, Ph.D., M.S.W. (University of Minnesota), M.B.A., B.S. (University of Nebraska at Omaha), Assistant Professor, School of Social Work, 2013.

Van Hoek, Remko, Ph.D. (University of Utrecht), M.B.A. (London School of Economics), B.S.B.A. (Vanderbilt University), Clinical Professor, Department of Supply Chain Management, 2018.

Van Horn-Morris, Jeremy, Ph.D. (University of Texas at Austin), B.S. (University of Oregon), Associate Professor, Department of Mathematical Sciences, 2012.

Van Winkle, Holly M., M.S.N., B.S. (University of Arkansas), Instructor, Eleanor Mann School of Nursing, 2013.

Vandermark, Lesley, Ph.D., M.S. (University of Connecticut), B.S. (California University of Pennsylvania), Clinical Assistant Professor, Department of Health, Human Performance and Recreation, 2016.

VanDevender, Karl, Ph.D. (University of Arkansas), M.S., B.S. (Mississippi State University), Professor, Department of Biological and Agricultural Engineering, 1995.

Veilleux, Jennifer Celene, Ph.D., M.A. (University of Illinois at Chicago), B.A. (Macalaster College), Associate Professor, Department of Psychological Science, 2011.

Velliquette, Anne M., Ph.D. (University of Arkansas), M.A.B., B.S. (Southwest Missouri State University), Clinical Assistant Professor, Department of Marketing, 2014.

Venkatesh, Viswanath, Ph.D. (University of Minnesota-Twin Cities), B.E. (Bharathiar University, India), Distinguished Professor, Department of Information Systems, 2004.

Vennarucci, Rhodora, Ph.D., M.A. (University at Buffalo, New York), B.A. (University of Michigan), Assistant Professor, Department of World Languages, Literatures and Cultures, 2013.

Verma, Lalit R., Ph.D. (University of Nebraska-Lincoln), M.S. (University of Montana), B. Tech. (J.N. Agricultural University, Jabalpur, India), Professor, Department of Biological and Agricultural Engineering, 2000.

Viennot, Gilles André Fernand, Ph.D. (University of Kansas), M.A. (University of Paris VII Jussieu), M.A. (University of Besançon), Assistant Professor, Department of World Languages, Literatures and Cultures, 2015.

Vilató, Claudia, M.A. (Penn State University), B.A. (University of Miami), Instructor, Department of English, 2015.

Villanova, Daniel, Ph.D. (Virginia Tech University), B.S.B.A. (Appalachian State University), Assistant Professor, Department of Marketing, 2018.

Vining, Benjamin R., Ph.D., M.A. (Boston University), B.A. Colgate University, Assistant Professor, Department of Anthropology, 2016.

Viswanathan, Padma, M.F.A. (University of Arizona), M.A. (Johns Hopkins University), B.A. (University of Alberta), Associate Professor, Department of English, 2010.

Vitale, Davide, M.Arch. (Harvard University), Diploma in Architecture (University of Rome), Professor, Department of Architecture, 1985.

Vowell-Johnson, Kelly, Ed.D. (University of Arkansas), M.N.Sc. (University of Arkansas for Medical Sciences), B.S.N. (Arkansas Tech University), Assistant Professor, Eleanor Mann School of Nursing, 2011.

Vyas, Reeta, Ph.D. (State University of New York at Buffalo), M.S., B.S. (Banaras Hindu University), Professor, Department of Physics, 1984.

W

Wade, Les, Ph.D. (University of California-Santa Barbara), M.F.A. (University of Georgia), M.A. (Duke University), B.A. (Tulane University), Professor, Department of Theatre, 2011.

Wai, Jonathan, Ph.D., M.S. (Vanderbilt University), M.A. (Claremont Graduate University), B.A. (Claremont McKenna College), Assistant Professor, Department of Education Reform, 2018.

Wailles, Eric J., Ph.D. (Michigan State University), B.S. (Cornell University), Distinguished Professor, Department of Agricultural Economics and Agribusiness, 1980.

Walch, John S., M.F.A. (University of Texas at Austin), B.A. (Colorado College), Assistant Professor, Department of Theatre, 2016.

Walker, Heather L., Ph.D., M.S.Ch.E., B.S.Ch.E. (University of Arkansas), Clinical Assistant Professor, Ralph E. Martin Department of Chemical Engineering, 2008.

Walker, James M., Ph.D. (University of Colorado-Boulder), M.S., B.S. (Louisiana Polytechnic Institute), Professor, Department of Biological Sciences, 1965.

Walker, Karen A., M.A. (University of Arkansas), Instructor, 2009.

Walker, Kate Ireton, M.S. (University of Arkansas), B.S. (Kansas State University), Instructor, Department of Biological Sciences, 2014.

Waller, Matthew A., Ph.D., M.S. (Pennsylvania State University), B.S. (University of Missouri-Columbia), Professor, Department of Supply Chain Management, 2002.

Walsh, Lora, Ph.D. (Northwestern University), M.Sc. (University of Edinburgh), B.A. (Pepperdine University), Visiting Assistant Professor, 2014.

Wamishe, Yeshe Andenow, Ph.D. (University of Arkansas) M.S., B.S. (Addis Ababa University, Ethiopia), Associate Professor, Department of Entomology and Plant Pathology, 2011.

Wang, Feng, Ph.D. (University of Pittsburgh), Ph.D. (Kutztown University of Pennsylvania), Associate Professor, Department of Chemistry and Biochemistry, 2012.

Wang, Ya-Jane, Ph.D. (Iowa State University), M.S. (University of Minnesota-Twin Cities), B.S. (National Taiwan University), Professor, Department of Food Science, 1999.

Wang, Yong, Ph.D., M.S. (University of California, Los Angeles), B.S. (University of Science and Technology of China), Assistant Professor, Department of Physics, 2016.

Wang, Yao-Chin, Ph.D. (Oklahoma State University), M.B.A., B.Ec. (National Chung Cheng University), Assistant Professor, School of Human Environmental Sciences, 2017.

- Ward, Barry M.**, Ph.D. (Rutgers State University-New Brunswick), M.Sc., B.A.Mod. (Trinity College, Dublin), Associate Professor, Department of Philosophy, 2002.
- Ward, Cortez**, M.S. (Troy University), B.S. (University of Maryland), Instructor, Program in Operations Management, 2006.
- Ward, Peggy**, Ph.D. (University of Arkansas), M.S. (Texas A&M University), B.S.Ed. (Southern Arkansas University), Clinical Assistant Professor, Department of Curriculum and Instruction, 2010.
- Ward, Heidi**, Ph.D. (University of Oklahoma), D.V.M. (Oklahoma State University), B.S. (University of Oklahoma), Assistant Professor, Department of Animal Science, 2015.
- Wardlow, George W.**, Ph.D. (The Ohio State University), M.Ed., B.S. (University of Missouri-Columbia), Professor, Department of Agricultural Education, Communications and Technology, 1992.
- Ware, Morgan**, Ph.D. (North Carolina State University), B.S. (Florida State University), Assistant Professor, Department of Electrical Engineering, 2005.
- Warren, W. Dale**, M.M. (University of Kentucky), B.S. (Austin Peay State University), Professor, Department of Music, 1991.
- Warren, Ron**, Ph.D. (Indiana University), M.A. (Colorado State University), B.A. (Michigan State University), Associate Professor, Department of Communication, 1997.
- Washington, Tyrone A.**, Ph.D., B.S. (University of South Carolina at Columbia), Associate Professor, Department of Health, Human Performance and Recreation, 2011.
- Watkins, Kenton Bradley**, Ph.D. (Oklahoma State University), M.S., B.A. (University of Arkansas), Professor, Department of Agricultural Economics and Agribusiness, 2002.
- Watkins, Patsy**, Ph.D. (University of Iowa), M.A., B.A. (University of Texas, Austin), Associate Professor, School of Journalism and Strategic Media, 1983.
- Way, Kelly Ann**, Ph.D., M.S., B.S. (Oklahoma State University), Associate Professor, School of Human Environmental Sciences, 2006.
- Weatherby, Danielle**, J.D. (University of Florida), B.A. (Franklin and Marshall College), Associate Professor, School of Law, 2013.
- Webb, Jennifer D.**, Ph.D. (Oklahoma State University), M.S., B.S. (University of Tennessee), Associate Professor, Department of Interior Design, 1999.
- Webster, Jim**, Ph.D. (Arizona State University), M.B.A. (University of Arkansas), B.S.C.E. (Indiana University-Purdue University-Indianapolis), Instructor, Department of Finance, 2007.
- Wejinya, Uchechukwu C.**, Ph.D., M.S., B.S. (Michigan State University), Associate Professor, Department of Mechanical Engineering, 2008.
- Welcher, Richard**, M.S.C.E., B.S.C.E. (University of Arkansas), Instructor, Department of Civil Engineering, 2011.
- Wells, Michael**, M.S. (Florida State University), B.S. (East Stroudsburg University), Instructor, Program in Operations Management, 2011.
- Wells, Rob**, Ph.D. (University of Maryland), M.A. (St. John's College), Assistant Professor, School of Journalism and Strategic Media, 2016.
- Weng, Qin**, Ph.D. (University of Pittsburgh), M.S. (Virginia Commonwealth University), B.A. (Beijing Foreign Studies University), Assistant Professor, Department of Information Systems, 2018.
- West, Elliott**, Ph.D., M.A. (University of Colorado-Boulder), B.A. (University of Texas, Austin), Alumni Distinguished Professor, Department of History, 1979.
- Westerman, Erica L.**, Ph.D. (Yale University), M.Sc. (University of New Hampshire), B.S. (Yale University), Assistant Professor, Department of Biological Sciences, 2016.
- Whayne, Jeannie**, Ph.D., M.A., B.A. (University of California-San Diego), University Professor, Department of History, 1990.
- White, John A.**, Ph.D. (The Ohio State University), M.S.I.E. (Virginia Polytech Institute and State University), B.S.I.E. (University of Arkansas), Distinguished Professor, Department of Industrial Engineering, 1997.
- White, Calvin**, Ph.D. (University of Mississippi), M.A., B.A. (University of Central Arkansas), Associate Professor, Department of History, 2007.
- Wickramasinghe, Ranil**, Ph.D. (University of Minnesota-Twin Cities), M.S., B.S. (University of Melbourne, Australia), Professor, Ralph E. Martin Department of Chemical Engineering, 2011.
- Wicks, Robert Howard**, Ph.D. (Michigan State University), M.A. (University of Missouri-Columbia), B.A. (American University), Professor, Department of Communication, 1994.
- Wicks, Jan L.**, Ph.D., M.A. (Michigan State University), B.A. (University of Southwest Louisiana), Professor, School of Journalism and Strategic Media, 1994.
- Wideman, Robert F.**, Ph.D. (University of Connecticut), B.A. (University of Delaware), Professor, Department of Poultry Science, 1993.
- Wiebe, Zac**, M.A. (University of Kansas), B.S. (University of Saskatchewan), B.S. (North Carolina State University), Assistant Professor, Department of Accounting, 2018.
- Wiedenmann, Robert N.**, Ph.D., B.S. (Purdue University), Professor, Department of Entomology and Plant Pathology, 2005.
- Wilke, Stephen**, J.D., M.P.A. (University of Memphis), Instructor, Program in Operations Management, 1996.
- Wilkerson, Weston**, M.F.A. (University of Tennessee), B.A. (Texas A&M University), Assistant Professor, Department of Theatre, 2014.
- Wilkins, Charles L.**, Ph.D. (University of Oregon), B.S. (Chapman College), Distinguished Professor, Department of Chemistry and Biochemistry, 1998.
- Willett, Cammy**, Ph.D., M.S. (University of Missouri), B.S. (Evangel University), Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2016.
- Williams, Stacy Goad**, Ph.D., M.S.C.E., B.S.C.E. (University of Arkansas), Associate Professor, Department of Civil Engineering, 1997.
- Williams, Rodney D.**, Ph.D., M.S., B.S.C.E. (University of Arkansas), Assistant Professor, Department of Civil Engineering, 1998.
- Williams, Patrick George**, Ph.D., M.A. (Columbia University), B.A. (University of Texas at Austin), Professor, Department of History, 1998.
- Williams, Brent Thomas**, Ph.D. (University of Illinois, Urbana-Champaign), M.S. (University of Texas Southwestern Medical School), B.A. (Austin College), Associate Professor, Department of Rehabilitation, Human Resource and Communication Disorders, 2002.
- Williams, Brent D.**, Ph.D., M.S. (University of Arkansas), B.A. (Lyon College), Associate Professor, Department of Supply Chain Management, 2011.
- Williams, Colleen C.**, J.D. (Washington University in St. Louis), B.A. (Western Washington University), Associate Librarian, University Libraries, 2006.
- Williams, Charlotte Lewellen**, Ph.D., M.S. (University of Arkansas for Medical Sciences), B.S. (Howard University), Professor, Clinton School of Public Service, 2007.
- Williams, Darron**, Ph.D. (Northcentral University), M.S., M.B.A., B.S. (University of Memphis), Instructor, Program in Operations Management, 2015.
- Williams, Amanda**, Ph.D., M.S., B.S. (Oklahoma State University), Assistant Professor, School of Human Environmental Sciences, 2017.
- Williams, Donnie F.**, Ph.D. (Georgia Southern University), Clinical Assistant Professor, Department of Supply Chain Management, 2019.
- Willson, John David**, Ph.D. (University of Georgia), B.S. (Davidson College), Associate Professor, Department of Biological Sciences, 2012.
- Wilson, Charles E.**, Ph.D., M.S. (University of Arkansas), B.S. (Arkansas State University), Professor, Department of Crop, Soil and Environmental Sciences, 2011.

Wilson, Charles, Ed.D., M.E., B.S. (University of Arkansas), Instructor, Program in Operations Management, 2005.

Wilson-Parrish, Nichelle La Von, M.F.A. (University of North Texas), B.F.A. (University of Arkansas), M.A. (University of North Texas), Instructor, School of Art, 2013.

Wise, Rick, Ph.D., M.S. (Southern Methodist University), B.S. (University of Arkansas), Research Professor, Department of Physics, 2014.

Wissehr, Cathy, Ed.D. (University of Missouri-Columbia), M.N.S.Ed., B.S. (Southeast Missouri State University), Clinical Associate Professor, Department of Curriculum and Instruction, 2009.

Wolchok, Jeffrey Collins, Ph.D. (University of Utah), M.S., B.S. (University of California at Davis), Associate Professor, Department of Biomedical Engineering, 2011.

Wolf, Patrick J., Ph.D., M.A. (Harvard University), B.A. (University of Saint Thomas), Distinguished Professor, Department of Education Reform, 2006.

Wolfe, Marc E., M.S.A. (Central Michigan University), B.S. (Harding University), Professor, Air Force ROTC, 2016.

Wong, Christopher William, B.A. (University of Notre Dame), Lecturer, 2010.

Wood, Lisa S., Ph.D., M.S., B.S. (University of Arkansas), Clinical Assistant Professor, Department of Crop, Soil and Environmental Sciences, 2012.

Wood, Clinton M., Ph.D. (University of Texas at Austin), M.S.C.E., B.S.C.E. (University of Arkansas), Assistant Professor, Department of Civil Engineering, 2013.

Woodland, Janet C., Ph.D., M.A. (State University of New York at Stony Brook), B.A. (King's College), Clinical Assistant Professor, Department of Mathematical Sciences, 1993.

Woods, Randall B., Ph.D., M.A., B.A. (University of Texas at Austin), Distinguished Professor, Department of History, 1971.

Woods, Jordan Blair, Ph.D., M.Phil. (University of Cambridge), J.D. (University of California, Los Angeles), Assistant Professor, School of Law, 2016.

Worden, Steven K., Ph.D. (University of Texas at Austin), M.A., B.A. (Portland State University), Associate Professor, Department of Sociology and Criminology, 1986.

Worrell, Dan, Ph.D., M.S., B.S. (Louisiana State University), Professor, Department of Management, 2005.

Worthington, Margaret L., Ph.D. (North Carolina State University), M.S. (University of California-Davis), B.S. (Duke University), Assistant Professor, Department of Horticulture, 2016.

Wright, Nia, M.B.A. (Tulane University), B.S. (University of Arkansas), Instructor, Program in Operations Management, 2009.

Wu, Jingxian, Ph.D. (University of Missouri-Columbia), M.S. (Tsinghua University), B.S. (Beijing University of Aeronautics and Astronautics), Associate Professor, Department of Electrical Engineering, 2008.

Wu, Xintao, Ph.D. (George Mason University), M.E. (Chinese Academy of Space Technology), B.S. (University of Science and Technology), Professor, Department of Computer Science and Computer Engineering, 2014.

X

Xiao, Min, Ph.D. (University of Texas at Austin), B.S. (Nanjing University), Distinguished Professor, Department of Physics, 1990.

Xiao, Jie, Ph.D. (State University of New York-Binghamton), M.S., B.S. (Wuhan University), Associate Professor, Department of Chemistry and Biochemistry, 2016.

Xinya, Liang, Ph.D. (Florida State University), B.S. (Zhejiang Gongshang University, China), Assistant Professor, ESMR, 2014.

Xu, Jenny, M.A. (University of Texas at Austin), Clinical Associate Professor, Department of World Languages, Literatures and Cultures, 1992.

Y

Yandell, Kay, Ph.D., M.A. (Cornell University), B.A. (University of Arkansas), Associate Professor, Department of English, 2013.

Yang, Song, Ph.D., M.S. (University of Minnesota-Twin Cities), M.A. (Nankai University, China), B.A. (Branch College of Nankai, China), Professor, Department of Sociology and Criminology, 2002.

Yang, Li, M.A. (Brandeis University and Beijing Language and Culture University), B.A. (Beijing Language and Culture University), Instructor, Department of World Languages, Literatures and Cultures, 2014.

Yates, Michael, M.B.A. (Harvard University), M.S. (Naval Postgraduate School), B.A. (University of California), Instructor, Department of Management, 1999.

Yazwinski, Tom, Ph.D. (North Carolina State University), M.S. (University of Maine), B.S. (University of Vermont), University Professor, Department of Animal Science, 1977.

Yeager, Timothy J., Ph.D., M.A. (Washington University in St. Louis), Professor, Department of Finance, 2006.

Yeager, Mickey, M.S. (University of Arkansas), M.A. (Liberty Baptist Theological Seminary), B.S. (University of Southern Mississippi), Instructor, Program in Operations Management, 1989.

Yoon, InJeong, Ph.D. (University of Arizona), Assistant Professor, School of Art, 2017.

Young, Elizabeth Lee, J.D. (George Washington University), B.A. (Hendrix College), Associate Professor, School of Law, 2008.

Young, Heather D., Ph.D. (University of Arkansas), M.S. (University of Tennessee), B.S. (Arkansas Tech University), Associate Professor, Department of Curriculum and Instruction, 2007.

Young, Amber, Ph.D. (University of Oklahoma), M.B.A. (Oklahoma Christian University), B.S.Ed. (University of Oklahoma), Assistant Professor, Department of Information Systems, 2018.

Young, Kelly, D.N.P. (University of South Alabama), M.S. (University of Oklahoma), B.S.N. (Southwestern Oklahoma State University), B.A. (Grinnell College), Assistant Professor, Eleanor Mann School of Nursing, 2018.

Young, Christopher, M.S.N. (University of Oklahoma), B.S.N. (Southwestern Oklahoma State University), Instructor, Eleanor Mann School of Nursing, 2018.

Youngblood, Joshua Cobbs, M.A. (Florida State University), B.A. (University of Louisiana at Monroe), Assistant Librarian, University Libraries, 2011.

Yu, Fisher, Ph.D. (Arizona State University), M.S., B.S. (Peking University), Associate Professor, Department of Electrical Engineering, 2008.

Z

Zabelina, Darya, Ph.D. (Northwestern University), Assistant Professor, Department of Psychological Science, 2017.

Zajac, Mark, Ph.D., M.Sc. (University of Notre Dame), B.Sc. (McMaster University, Hamilton Ontario, Canada), Visiting Assistant Professor, Department of Physics, 2013.

Zajcek, Anna, Ph.D. (Virginia Polytechnic Institute and State University), M.S., B.S. (University of Silesia, Poland), Professor, Department of Sociology and Criminology, 1994.

Zamarro Rodriguez, Gema, Ph.D., M.S. (Centro de Estudios Monetarios y Financieros, Spain), B.A. (Universidad Carlos III de Madrid, Spain), Professor, Department of Education Reform, 2014.

Zeng, Ka, Ph.D. (University of Virginia), M.A. (Virginia Polytech Institute and State University), B.A. (Foreign Affairs College, Beijing), Professor, Department of Political Science, 2000.

Zhang, Shengfan, Ph.D., M.I.E. (North Carolina State University), B.M. (Fudan University, Shanghai), Assistant Professor, Department of Industrial Engineering, 2011.

Zhang, Wen, Ph.D. (Purdue University), M.S. (University of Kansas), Assistant Professor, Department of Civil Engineering, 2011.

Zhang, Qingyang, Ph.D. (Northwestern University), M.S. (Loyola University–Chicago), B.S. (Beijing Normal University), Assistant Professor, Department of Mathematical Sciences, 2015.

Zhao, Jiangchao, Ph.D. (University of Wisconsin-Madison), M.S., B.S. (China Agricultural University), Assistant Professor, Department of Animal Science, 2015.

Zhao, Yue, Ph.D. (University of Nebraska-Lincoln), B.S. (Beijing University), Assistant Professor, Department of Electrical Engineering, 2015.

Zheng, Nan, Ph.D. (University of Michigan-Ann Arbor), M.S. (University of Rochester), B.S. (University of Science and Technology of China), Associate Professor, Department of Chemistry and Biochemistry, 2008.

Zhou, Wenchao, Ph.D. (Georgia Institute of Technology), M.S.M.E. (Xi'an Jiaotong University, Xi'an, China), B.S.M.E. (Huazhong University of Science and Technology, Wuhan, China), Assistant Professor, Department of Mechanical Engineering, 2014.

Zhu, Jun, Ph.D. (University of Illinois at Urbana-Champaign), M.S., B.S. (Zhejiang University, Hangzhou, China), Professor, Department of Biological and Agricultural Engineering, 2013.

Zies, Brenda June, Ph.D., M.A. (University of Arkansas), B.S. (East Texas State University), Teaching Assistant Professor, Department of Psychological Science, 2005.

Zilinsky, Anthony, M.B.A., B.A. (University of Connecticut), Instructor, Program in Operations Management, 2002.

Zollinger, Richard, M.B.A., B.S. (Brigham Young University), Instructor, Program in Operations Management, 2016.

Zou, Min, Ph.D., M.S.M.E. (Georgia Institute of Technology), M.S.A.E., B.S.A.E. (Northwestern Polytechnical University), Professor, Department of Mechanical Engineering, 2003.

Zou, Tim Jiping, Ph.D., M.S. (University of Illinois-Urbana-Champaign), B.A. (Shandong University), Librarian, University Libraries, 2004.

Courses of Instruction

Courses listed in this section describe all courses approved for offering by the University of Arkansas. The courses are listed alphabetically by subject with the subject code in parenthesis following. The word “course” refers to a unit of academic instruction, while the word “class” refers to a course that has been scheduled during a semester or summer session with a certain number of prescribed meetings each week. Many courses are offered as classes every semester while many others are offered less frequently. Successful completion of a class usually earns a specified number of semester hours of credit toward a degree.

To see a Schedule of Classes, which lists classes available in a specific semester, along with the instructor of record, time and place the class is being held, go to UAConnect (<https://uaconnect.uark.edu/>).

How to Read a Course Description

Courses listed in this section describe all courses approved for offering by the University of Arkansas. The word “course” refers to a unit of academic instruction, while the word “class” refers to a course scheduled during a semester or summer session with a certain number of prescribed meetings each week. Successful completion of a class usually earns a specified number of semester hours of credit toward a degree.

The Schedule of Classes lists classes available in a specific semester, along with the instructor of record, time and place the class is being held.

Course Description Explanations

A course listing comprises the following elements, in order:

Course Prefix: This alpha descriptor is the first identifying part of a course. This four-letter code represents the course prefix name. Usually the course prefix will be the same as the department offering the course, but occasionally the prefix is one of many different courses offered in a single department. For example, ARAB refers to Arabic courses, which are offered through the Department of World Languages, Literatures and Cultures; HIST refers to History courses.

Course Number: Each course is designated by a four-digit number. The first digit identifies the level of the course: 1, freshman level; 2, sophomore level; 3 and 4, junior-senior level; 5, 6, and 7, graduate level. Any exceptions to this practice are stated in the course descriptions.

Students desiring admission to courses offered at levels beyond their standing should request the instructor’s permission to enroll. (For definitions of academic level see Student Classification (p. 71).)

The second and third digits of the number identify the course within the department that offers it.

The fourth digit identifies the semester-hour value of the course. Credit for certain courses does not count toward some degrees.

Normally, courses meet once each week for 50 minutes for each hour of course credit. Laboratory, drill and other kinds of activity courses typically meet for two 50-minute periods per week for each hour of credit.

The letter ‘V’ is used in place of the last digit for those courses in which credit is variable. The minimum and maximum credit hours possible are given in parentheses after the course title.

The letter ‘X’ is used in place of the last digit for those courses in which fixed credit is ten or more hours.

The first three digits of the number are the same for corequisite courses (for example, a lecture and the corequisite lab or drill).

Course Suffix: A suffix to the course number further identifies the specific type of instruction:

- C - Drill or Lab Component
- L - Laboratory
- H - Honors Course
- M - Honors Laboratory

A course with no suffix is a typical lecture course (not an honors course).

Course Title: The title of the course is printed in bold letters.

Course Semester Offering: Course titles are followed by abbreviations (in parentheses) for the semester in which the course is normally offered. Cross-check with the Schedule of Classes to determine if a course is being offered. Courses marked (Sp) will be offered in the spring, courses marked (Fa) will be offered in the fall, courses marked (Su) will be offered in the summer, and courses marked (Irregular) will be offered irregularly. Consult the Schedule of Classes to verify that a course is being offered for a given term.

Course Description: A brief description of the course content and its major emphasis are stated. If the course is cross-listed (also offered under another course number) a statement to that effect will be included in the description. If the course is eligible to be repeated for degree credit more than once, a statement will appear to indicate the total hours or times a course may be repeated. If no repeat statement is listed, the course may be used for degree credit only once.

Requisites: Requisites are requirements that must be fulfilled either before a course may be taken or at the same time a course is taken. It is the student’s responsibility to make sure the proper prerequisites have been completed before enrolling in any class. Prerequisites are courses or requirements that must be completed prior to enrolling in a certain course. Courses may have prerequisites from inside and outside the department. It is the student’s responsibility to make sure he/she has completed the proper prerequisites before enrolling in any class. Courses listed as corequisite are to be taken in the same semester as the course desired.

A course listed as both a pre- and corequisites are requirements that if not taken prior to enrolling in a course, must be taken during the same semester as the course.

Students may not enroll in courses for which they do not have the necessary requisites. Students who are in doubt concerning their eligibility to enroll in specific courses should consult with their academic adviser. Students may be dropped from courses for which they do not have the necessary requisites.

Courses of Instruction By Subject

Accounting (ACCT) (p. 587)

Adult and Lifelong Learning (ADLL) (p. 590)

African and African American Studies (AAST) (p. 592)

Agricultural Economics (AGEC) (p. 594)

Agricultural Education (AGED) (p. 598)

Accounting (ACCT) Courses

ACCT 2013. Accounting Principles. 3 Hours.

Introduction of accounting as an information system with emphasis on processing and presenting information in the form of financial statements for use in decision making. The course emphasizes business processes and double entry accounting. Prerequisite: (ISYS 1120 or (ISYS 1123 with a grade of C or better)), (MATH 2053 or MATH 2554 with a grade of C or better), and WCOB 1111 (for business majors) with a grade of C or better. (Typically offered: Fall, Spring and Summer)

ACCT 2013H. Honors Accounting Principles. 3 Hours.

Introduction of accounting as an information system with emphasis on processing and presenting information in the form of financial statements for use in decision making. The course emphasizes business processes and double entry accounting. Prerequisite: Honors Standing, (ISYS 1120 or (ISYS 1123 with a grade of C or better)), (MATH 2053 or MATH 2554 with a grade of C or better), and WCOB 1111 (for business majors) with a grade of C or better. (Typically offered: Spring)
This course is equivalent to ACCT 2013.

ACCT 2023. Accounting Principles II. 3 Hours.

In this course we study managerial accounting concepts and their use in business decisions. We will examine the development and analysis of cost information for management use in decision-making, income determination, and performance evaluation. Prerequisite: ACCT 2013 with a grade of C or better. (Typically offered: Fall, Spring and Summer)

ACCT 310V. Accounting Internship. 1-3 Hour.

This class is designed to give students an internship opportunity to combine their formal academic preparation with an exposure to the accounting profession. Prerequisite: Department consent and ACCT 3723 with a grade of C or better. (Typically offered: Spring) May be repeated for up to 3 hours of degree credit.

ACCT 310VH. Honors Accounting Internship. 1-3 Hour.

This class is designed to give students an internship opportunity to combine their formal academic preparation with an exposure to the accounting profession. Prerequisite: Honors standing, Department consent and ACCT 3723 with a grade of C or better. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.
This course is equivalent to ACCT 310V.

ACCT 3533. Accounting Technology. 3 Hours.

This course provides an overview of accounting information systems and illustrates the importance of technology to accountants. Students are exposed to a variety of information technologies including manual, file-oriented, and database systems. The relative advantages and disadvantages of each type of system are highlighted and discussed. Prerequisite: ACCT 2013 with a grade of B or better. (Typically offered: Fall and Spring)

ACCT 3723. Intermediate Accounting I. 3 Hours.

This course is designed to study the theoretical basis for financial accounting concepts and principles related to financial reporting. This course emphasizes researching technical accounting pronouncements for application to external financial reporting issues. Prerequisite: ACCT 2013 with a grade of B or better. (Typically offered: Fall and Spring)

ACCT 3753. Intermediate Accounting II. 3 Hours.

This is the second financial accounting course designed to continue study of financial accounting concepts and principles. This course emphasizes research of technical accounting pronouncements for application to external financial reporting issues. Prerequisite: ACCT 3723 with a grade of C or better. (Typically offered: Fall and Spring)

ACCT 3843. Fundamentals of Taxation I. 3 Hours.

Introduction to federal income taxation with a focus on individuals, including basic tax concepts, income tax principles applicable to individual taxpayers, primary tax law authorities, tax research techniques, and tax planning strategies. Prerequisite: ACCT 2013 with a grade of B or better. (Typically offered: Fall and Spring)

ACCT 4003H. Honors Accounting Colloquium. 3 Hours.

Explores events, concepts and/or new developments in the field of accounting. Prerequisite: Honors standing, Senior standing and ACCT 3723 with a grade of C or better. (Typically offered: Fall)

ACCT 410V. Special Topics in Accounting. 1-3 Hour.

Explore current events, concepts and new developments relevant to Accounting not available in other courses. Prerequisite: ACCT 3723 with a grade of C or better. (Typically offered: Irregular) May be repeated for degree credit.

ACCT 4123H. Professional Ethics and Corporate Governance. 3 Hours.

An examination of various aspects of accounting and business ethics including ethical theories; ethical reasoning; ethical values - including integrity, objectivity, auditor independence, and other values relevant for accountants; and ethics codes. The course provides students with a framework of ethical reasoning, professional values and attitudes for exercising professional skepticism and other behavior that is in the best interest of the public and accounting profession. Aspects of corporate governance related to establishing an ethical corporate culture will also be addressed. Prerequisite: Senior standing, Honors standing, and ACCT 3723 with a grade of C or better. (Typically offered: Spring)

ACCT 4203. Fundamentals of Taxation II. 3 Hours.

Study of federal income taxation with a focus on entities other than individuals (C corporations, S corporations, partnerships, estates, and trusts) as well as an introduction to federal transfer taxes, state and local taxes, and multinational tax issues, including applicable tax principles and continued development of tax research techniques, and tax planning strategies. Prerequisite: ACCT 3723 and ACCT 3843 each with a grade of C or better. (Typically offered: Fall and Spring)

ACCT 449V. Special Topics in Accounting. 1-3 Hour.

Seminar in current topics not covered in other courses. Students may enroll in one or more units. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ACCT 4673. Product, Project and Service Costing. 3 Hours.

Cost systems with emphasis on information generation for cost management of products, projects and services. The course includes spreadsheet and other computer program analysis. Prerequisite: ACCT 2023 or ACCT 3613 and ACCT 3723 each with grades of C or better. (Typically offered: Fall)

ACCT 4703. Governmental/Nonprofit Accounting. 3 Hours.

The course will critically examine current issues in governmental and non-profit accounting, financial statement compliance and control for governmental and non-profit entities, and auditing for government and other non-profit organizations. Topics will include examination of state and local government accounting and reporting; sources and applications of taxes and program resources; not-for-profit organization accounting including taxation, regulatory, performance, and compliance issues; industry specific issues in accounting for health care organizations and colleges and universities; and federal governmental accounting. The course will also examine the application processes and compliance procedures for not-for-profit organizations and grants, and will provide a brief introduction to urban planning and economics. Prerequisite: ACCT 2013 and ACCT 2023 each with a grade of C or better. (Typically offered: Irregular)

ACCT 4753. Intermediate Accounting III. 3 Hours.

The objective of this course is to continue to build the student's understanding of financial accounting and preparation for the Financial Accounting Reporting section of the CPA examination. Prerequisite: ACCT 3753 with a grade of C or better. (Typically offered: Fall and Spring)

ACCT 4883. Energy Accounting. 3 Hours.

This course covers the basic issues of accounting and financial reporting for energy issues including hydrocarbon production, processing and sales as well as accounting for wind, solar and other alternative energy sources. Covers national and international energy policy, relevant public policy, environmental and geological issues, and considers environmental law, climate and economic topics relevant to energy topics. Prerequisite: ACCT 3723 and ACCT 3753 each with a grade of B or better, and admission to the MAcc program for the graduate section. (Typically offered: Irregular)

ACCT 4963. Audit and Assurance Services. 3 Hours.

Professional standards and procedures as applied to external and internal assurance engagements. Including coverage of the economic role of assurance providers, engagement planning, risk assessment, evidence gathering, and reporting. Prerequisite: ACCT 3723 with a grade of C or better. (Typically offered: Fall and Spring)

ACCT 510V. Special Topics in Accounting. 1-3 Hour.

(Formerly ACCT 410V.) Explore current events, concepts and new developments relevant to Accounting not available in other courses. Graduate degree credit will not be given for both ACCT 410V and ACCT 510V. Prerequisite: ACCT 3723 with a grade of C or better. (Typically offered: Irregular) May be repeated for degree credit.

ACCT 5223. MBA Accounting Analysis. 3 Hours.

Highlights the role played by accounting information in managing supply chains and retail operations. Provides tools for managing cost flows, including activity-based costing, retail accounting, and operational budgeting. Focuses on improving decision making processes, and linking the impact of retail/supply chain decisions to financial statements and shareholder value. (Typically offered: Fall and Spring)

ACCT 5263. Financial Statement Analysis for Executives. 3 Hours.

This course provides a framework for understanding the intersection between business strategy, accounting, economics, and finance. Using historical financial statements as the primary information input, you will employ tools that enable you to better understand the drivers of current performance and risk, forecast future performance, and construct a value estimate. These tools can be applied in a number of contexts including equity valuation, project selection, and managerial evaluation. Not eligible for MAcc program students. Prerequisite: MBA Director consent. (Typically offered: Summer)

ACCT 535V. Professional Accounting Internship. 1-3 Hour.

This course allows a student to experience an internship within a business and benefit from the applied experience. The internship may be designed to offer a wide range of professional accounting experiences in Industry or Public Accounting. The internship must be supervised by a faculty member as well as a member of the firm. MACC Director approval required. Prerequisite: MAcc Director consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ACCT 5413. Advanced Financial Accounting. 3 Hours.

Integrated course which examines the financial reporting, tax, managerial, systems and auditing aspects of major corporate restructurings arising from events such as mergers, acquisitions, spinoffs, reorganizations and downsizing. Prerequisite: ACCT 3753 or equivalent with a grade of C or better or MAcc Director consent. (Typically offered: Spring)

ACCT 5433. Fraud Prevention and Detection. 3 Hours.

An examination of various aspects of fraud prevention and detection, including the sociology of fraud, elements of fraud, types of fraud involving accounting information, costs of fraud, use of controls to prevent fraud, and methods of fraud detection. (Typically offered: Irregular)

ACCT 5443. Asset Management. 3 Hours.

Managing assets to achieve corporate strategy. Included are issues such as strategy formulation, acquisition processes, internal controls, system requirements, accounting measurements, inventory models, re-engineering, capital budgeting, tax issues, and discussion of current business events that have ethical implications. (Typically offered: Irregular)

ACCT 5463. Financial Statement Analysis. 3 Hours.

This course provides a framework for understanding the current economic position and future prospects of firms using corporate financial statements. Specifically, the student will study financial statements and their related footnotes in order to understand the drivers of current performance and risk, forecast future performance, and estimate the intrinsic value implied by those forecasts. These tools can be applied in a number of contexts including equity valuation, project selection, managerial evaluation, and corporate financial statement audits. Prerequisite: ACCT 3723 or equivalent with a grade of C or better. (Typically offered: Irregular)

ACCT 5483. Financial Accounting Research and Theory. 3 Hours.

This course explores our contemporary understanding of financial reporting incentives and outcomes. The course draws upon existing research on the determinants and consequences of financial reporting and examines the roles of various constituents including investors, lenders, financial analysts, managers, regulators, and auditors within the financial reporting environment. Prerequisite: Graduate standing and MAcc Director consent. (Typically offered: Irregular)

ACCT 549V. Special Topics in Accounting. 1-3 Hour.

Seminar in current topics not covered in other courses. Students may enroll in one or more units. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ACCT 5523. Advanced Accounting Information Systems. 3 Hours.

This course describes accounting systems in technologically advanced environments. Controls and other technical design considerations are described for the input, processing, storage, and reporting of accounting information. Special topics, such as expert systems and artificial intelligence applications in financial accounting, auditing, and tax also receive considerable attention. Prerequisite: MAcc Director consent. (Typically offered: Irregular)

ACCT 5673. Product, Project and Service Costing. 3 Hours.

(Formerly ACCT 4673.) Cost systems with emphasis on information generation for cost management of products, projects and services. The course includes spreadsheet and other computer program analysis. Graduate degree credit will not be given for both ACCT 4673 and ACCT 5673. Prerequisite: ACCT 2023 or ACCT 3613 and ACCT 3723 each with grades of C or better. (Typically offered: Fall)

ACCT 5703. Governmental/Nonprofit Accounting. 3 Hours.

The course will critically examine current issues in governmental and non-profit accounting, financial statement compliance and control for governmental and non-profit entities, and auditing for government and other non-profit organizations. Topics will include examination of state and local government accounting and reporting; sources and applications of taxes and program resources; not-for-profit organization accounting including taxation, regulatory, performance, and compliance issues; industry specific issues in accounting for health care organizations and colleges and universities; and federal governmental accounting. The course will also examine the application processes and compliance procedures for not-for-profit organizations and grants, and will provide a brief introduction to urban planning and economics. Prerequisite: MAcc Director consent. (Typically offered: Irregular)

ACCT 5873. Advanced Taxation. 3 Hours.

In-depth coverage of the tax treatment of corporations including advanced tax issues. Introduction to tax research including the organization and authority of tax law; accessing and using the tax law; and, applying tax law to taxpayer scenarios. Prerequisite: ACCT 4203 or equivalent with a grade of C or better. (Typically offered: Fall)

ACCT 5883. Tax Planning. 3 Hours.

In-depth coverage of the tax treatment of passthrough business entities including advanced tax issues. Overview of the income tax treatment of estates and trusts. Overview of the essentials of estate and gift taxation. Prerequisite: ACCT 3843 or equivalent with a grade of C or better. (Typically offered: Spring)

ACCT 5893. Multi-jurisdictional Tax Issues. 3 Hours.

This course provides an in-depth examination of multi-jurisdictional tax issues including U.S. federal income taxation of inbound and outbound transactions, state and local taxation, and multi-jurisdictional tax policy issues. Pre- or Corequisite: ACCT 5873. (Typically offered: Spring)

ACCT 5953. Auditing Standards. 3 Hours.

Professional aspects of financial statement auditing and registered auditors. Including ethics and legal responsibilities; internal control testing; critical evaluation of evidence; application of sampling; and reporting problems. Prerequisite: ACCT 4963 or equivalent with a grade of C or better. (Typically offered: Fall)

ACCT 5963. Audit and Assurance Services. 3 Hours.

(Formerly ACCT 4963.) Professional standards and procedures as applied to external and internal assurance engagements. Including coverage of the economic role of assurance providers, engagement planning, risk assessment, evidence gathering, and reporting. Graduate degree credit will not be given for both ACCT 4963 and ACCT 5963. Prerequisite: ACCT 3723 with a grade of C or better. (Typically offered: Fall and Spring)

ACCT 5993. Energy Accounting. 3 Hours.

(Formerly ACCT 4883.) This course covers the basic issues of accounting and financial reporting for energy issues including hydrocarbon production, processing and sales as well as accounting for wind, solar and other alternative energy sources. Covers national and international energy policy, relevant public policy, environmental and geological issues, and considers environmental law, climate and economic topics relevant to energy topics. Graduate degree credit will not be given for both ACCT 4883 and ACCT 5993. Prerequisite: ACCT 3723 and ACCT 3753 each with a grade of B or better, and admission to the MAcc program. (Typically offered: Irregular)

ACCT 6013. Graduate Colloquium. 3 Hours.

Presentation and critique of research papers and proposals. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ACCT 6033. Accounting Research Seminar I. 3 Hours.

First course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, managerial accounting and behavioral accounting. (Typically offered: Irregular)

ACCT 6133. Accounting Research Seminar II. 3 Hours.

Second course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 6233. Accounting Research Seminar III. 3 Hours.

Third course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 636V. Special Problems in Accounting. 1-6 Hour.

Special research project under supervision of a graduate faculty member. (Typically offered: Fall and Spring)

ACCT 6433. Accounting Research Seminar IV. 3 Hours.

Fourth course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 6633. Accounting Research Seminar V. 3 Hours.

Fifth course in the accounting research seminar sequence which explores and evaluates current accounting literature. Course content reflects recent developments in the literature and specific interests of participants. Examples of potential topics include research methods in accounting, financial accounting, managerial accounting, behavioral accounting, tax, audit, international accounting, and education. Prerequisite: ACCT 6033. (Typically offered: Irregular)

ACCT 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral dissertation. Prerequisite: Candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

Adult and Lifelong Learning (ADLL) Courses

ADLL 5113. Perspectives in Adult Education. 3 Hours.

Historical overview of the evolving field of adult education and lifelong learning in responsibilities of adult education providers and reviews the expansion of adult and lifelong learning opportunities associated with societal and demographic shifts. (Typically offered: Fall and Spring)

ADLL 5123. Principles and Practices of Adult Learning. 3 Hours.

Overview of the adult learner including characteristics, motivation for participating in learning, and strategies for developing educational programs for diverse adult populations. (Typically offered: Fall and Summer)

ADLL 5133. Curriculum Development in ABE and ASE. 3 Hours.

Curriculum development in Adult Basic Education (ABE) and Adult Secondary Education (ASE) settings including the various educational functioning levels, measures to assess student levels, selection of teaching materials, and development of curriculum utilizing instructional standards for ABE and ASE programs. (Typically offered: Fall)

ADLL 5143. Instructional Strategies and Assessment in Adult Education. 3 Hours.

Selection and utilization of materials and instructional methods for use in adult learning settings. Evaluative strategies to develop or select appropriate tools and techniques predicated upon the needs and goals of adult learners. (Typically offered: Spring)

ADLL 5153. Organization and Administration of Adult and Lifelong Learning Programs. 3 Hours.

Legal, ethical, staffing, and financial considerations for the development and implementation of programs for adult and lifelong learners in various programs including literacy centers, GED centers, community education, lifelong/leisure learning, and postsecondary education. (Typically offered: Spring)

ADLL 5163. Managing Change in Adult and Lifelong Learning. 3 Hours.

Strategies for planning, organizing, and facilitating change in programs that serve adult learners from diverse populations, across varied developmental stages and geographic locations. Discussion of social change that has impacted adult education and analysis of change models relevant to individuals, groups and organizations. (Typically offered: Fall and Summer)

ADLL 5173. Program Planning. 3 Hours.

Program development process for adult and lifelong learners. Overview of assessment, developing program objectives, identifying resources, and designing program plans. (Typically offered: Summer)

ADLL 5183. Technology and Innovation in Adult Learning. 3 Hours.

Techniques for designing, developing, implementing, and assessing technology-mediated adult and lifelong learning programs. Discussion of issues relevant to the use of innovative strategies for delivering instruction via emerging technologies and their potential impact on content and learning outcomes. (Typically offered: Summer)

ADLL 5193. Seminar in Adult and Lifelong Learning. 3 Hours.

Seminars focused on topics related to adult and lifelong learning. (Typically offered: Spring and Summer)

ADLL 5213. Adult and Lifelong Learning Internship. 3 Hours.

Internship in adult and lifelong learning settings. (Typically offered: Fall and Spring)

ADLL 5223. Adult and Lifelong Learning Applied Project. 3 Hours.

Development and Implementation of a project focused on adult and lifelong learning. Consent of advisor/instructor required. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

ADLL 5233. Independent Study. 3 Hours.

Provides students with an opportunity to pursue special study in adult and lifelong learning. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ADLL 6113. Advanced Adult Learning Theory. 3 Hours.

Advanced study of theories and models of adult and lifelong learning with an emphasis on current trends, recent research, and issues affecting the field. Issues covered will include critical theory and advancements in neuroscience and cognition as they relate to adult learning and lifespan development. (Typically offered: Irregular)

ADLL 6123. Leadership and Ethics in Adult and Lifelong Learning. 3 Hours.

This doctoral course focuses on leadership principles and ethical considerations that are critical to developing and sustaining adult education programs that benefit individuals, organizations, and communities. Course content will include case study analysis and lectures from scholar-practitioners from the field. (Typically offered: Irregular)

ADLL 6133. Analysis of International Adult and Lifelong Programs. 3 Hours.

Survey of the historical and philosophical events which have shaped adult and lifelong learning worldwide. Discussion of issues affecting adult education and lifelong learning including globalization, educational access, and variance in national policies. (Typically offered: Irregular)

ADLL 6143. Instructional Adaptation and Innovation in Adult and Lifelong Learning. 3 Hours.

An overview of teaching and learning methods, styles, and techniques which are applicable when facilitating adult learners across diverse settings. Content to include teaching and learning style assessment, accommodating learning styles, physical and learning disabilities, language differences and cultural norms. (Typically offered: Irregular)

ADLL 6153. Policy and Public Governance of Adult and Lifelong Learning Programs. 3 Hours.

Policy analysis and public governance issues in adult and lifelong learning with emphasis on state and federal programs. Discussions of how to evaluate, design, and implement policy focused on promoting adult and lifelong learning activities in a myriad of organizations. Overview of trends and current issues related to policy and public governance of adult and lifelong learning. (Typically offered: Irregular)

ADLL 6163. Adult Development and Psychology. 3 Hours.

Focus on adult developmental psychology with emphasis on lifespan development and specific issues related to learning in the various stages of adulthood. Work-life balance, meaning of work, generational issues. (Typically offered: Irregular)

ADLL 6173. Current Issues. 3 Hours.

Exploration and discussion of current issues relative to adult education and lifelong learning. Focus on the review and application of current research as it relates to practice. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ADLL 6183. Organization Development, Learning, and Change. 3 Hours.

Using a system perspective, this course examines the theories and practices associated with organization development, learning and change to understand the dynamic nature of organizational life. This course examines the structural frame, the human resource frame, the political frame, and the symbolic frame that influences organizational behavior and learning. The course investigates strategies and best practices for managing and leveraging this dynamism to build organizational capacity and improve performance. (Typically offered: Fall and Spring)

ADLL 6213. Signature Pedagogy: Teaching and Learning in Community Colleges. 3 Hours.

Using a learning-centered change model, this course examines how community colleges can shift from a traditional teaching-centered paradigm to one that is learning-centered. This course examines the context of the learning college, strategic planning for a learning-outcomes approach to governance, the role of student development and technology in the learning college, and implementing and assessing learning-centered strategies. (Typically offered: Irregular)

ADLL 6223. Workforce and Community Development. 3 Hours.

This course provides an overview of how community colleges influence workforce, economic, and community development through their education missions. The course will examine the community college's expanding role in economic and community development through workforce development programs. Emphasis will be placed on program structure, best practices in program development, and partnerships and collaboration with various stakeholders. (Typically offered: Irregular)

ADLL 6233. Survey and Significance of the American Community College. 3 Hours.

A comprehensive overview of the American community college, its history, its ever-evolving purpose and the challenges it faces. Course content will focus on the administrators and faculty who lead, the students they serve, and components such as developmental education, integrative education and transfer education. Discussion will include occupational and community education and issues related to accountability. Special attention will be paid to how this unique and complex institution remains relevant and significant to the community. (Typically offered: Irregular)

ADLL 6243. Current Trends in Community Colleges. 3 Hours.

This course examines environmental factors that influence the organization and administration of community colleges. Trends related to funding, policy, staffing, and workforce development are examined and contextualized to the evolving community college mission. (Typically offered: Irregular)

ADLL 6253. Professional Development in Adult and Lifelong Learning. 3 Hours.

This course examines career planning and development, performance management, and professional development in various settings. The focus of the course will be on concepts associated with Human Resource Development (HRD) and developing employees within an organization, as well as leading adults in transition in the community and in educational settings through the process of making career decisions. (Typically offered: Irregular)

ADLL 6313. Independent Study. 3 Hours.

Independent study of topics in adult and lifelong learning. (Typically offered: Irregular)

ADLL 6403. Quantitative Reasoning I for Adult Educators. 3 Hours.

Introduction to quantitative reasoning for educators and researchers in adult education. Topics include applying the hypothetico-deductive research process, describing data using statistical terminology, building statistical models, presenting data meaningfully, and using SPSS to analyze data from practical research problems. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. (Typically offered: Fall and Spring)

ADLL 6413. Quantitative Reasoning II in Adult and Lifelong Learning. 3 Hours.

Methodologies for designing descriptive, correlational, and experimental studies. Development of research questions, definition of variables, selection or development of instruments, data collection, analysis, interpretation and reporting of research results. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or equivalent. (Typically offered: Fall)

ADLL 6423. Qualitative Reasoning in Adult and Lifelong Learning. 3 Hours.

Methodologies for designing qualitative research studies in adult and lifelong learning settings. Selection of the appropriate qualitative tradition, selection of research subjects, development of data collection protocols, field work strategies, data analysis, data interpretation and presentation of data results. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. (Typically offered: Spring)

ADLL 6433. Program Evaluation. 3 Hours.

Overview of evaluation strategies in adult and lifelong learning programs that include: development of evaluation questions, selection or development of instrumentation, data collection methods, data analysis, and reporting of evaluation results. Emphasis on practical and ethical issues associated with evaluation processes. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423, or equivalent. (Typically offered: Spring)

ADLL 6443. Adult and Lifelong Learning Dissertation Seminar. 3 Hours.

Development of dissertation proposal. Formation of research question, selection of methodologies, development of problem statement, research questions, and identification of research variables, constructs of phenomena. Identification of data collection and data analysis procedures. This course meets in-person three to five times during the semester. Class dates are announced to ADLL students the preceding semester. Classes are held on campus on Saturdays from 9AM to 5PM. Participation is mandatory. Prerequisite: ADLL 6403 or ESRM 6403 or ADLL 6413 or ADLL 6423 or ADLL 6433, or equivalent. (Typically offered: Spring)

ADLL 6463. Advanced Qualitative Reasoning in Adult and Lifelong Learning. 3 Hours.

This qualitative methods course provides students with advanced instruction in qualitative data collection, field observations, records research, data analysis, and data display. In addition to reviewing various research studies that demonstrate different qualitative research approaches, students will practice some of the activities associated with executing a qualitative research study. Prerequisite: ADLL 6423 or instructor consent. (Typically offered: Irregular)

ADLL 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

African and African American Studies (AAST)

Courses

AAST 1003. Introduction to African and African American Studies. 3 Hours.

This course is an introduction to the interdisciplinary study of Africa and African Americans and their impact on the world order and society with an emphasis on that impact's manifestations in the United States of America. (Typically offered: Fall and Spring)

AAST 2023. The African American Experience. 3 Hours.

Examines various facets of African American culture that collectively construct the African American experience including art, literature, drama, migration, film, and education. Covers issues facing African Americans through a cultural and socio-political context to understand and appreciate African American impacts on the United States. (Typically offered: Fall, Spring and Summer)

AAST 3023. African Americans in Sport. 3 Hours.

Historical, sociological, and political issues and debate surrounding African Americans in sport. Contemporary issues facing African American athletes and sports figures. (Typically offered: Fall, Spring and Summer)

AAST 3033. The African American Experience in Business. 3 Hours.

This course is designed to provide the student with a comprehensive and critical analysis of the history of the African American experience as a member of the business sector of the United States economics. The course will review information that includes and demonstrates activities prior to slavery, during, and after slavery. (Typically offered: Irregular)

This course is cross-listed with WCOB 3033.

AAST 3123. African American Students in Higher Education. 3 Hours.

Examines the impact of college environments on African American students. Focuses on the following topics regarding African American students: retention, student demographics, student characteristics, current trends, issues and problems, student success, sub-populations, student values, and implications for higher education. (Typically offered: Irregular)

AAST 3133. History of Sports in Africa. 3 Hours.

This course considers the ways that Africans have strategically employed sports to confront and overcome both domestic and external challenges and how these approaches and the range of constituent strategies have changed over time. (Typically offered: Irregular)

This course is cross-listed with HIST 3133.

AAST 3183. Popular Culture in the Caribbean. 3 Hours.

History of the Caribbean through a historically-situated analysis of popular culture production, including literature, dance, music, cuisine, film, carnival, television, and sexuality. (Typically offered: Irregular)

This course is cross-listed with HIST 3183.

AAST 3193. The Making of the Modern Caribbean. 3 Hours.

History of the Caribbean from pre-Columbian to present times focusing in particular on indigenous origins, colonialism, slavery, rebellion, independence, nationalism, and political integration in the making of the modern Caribbean region. (Typically offered: Fall)

This course is cross-listed with HIST 3193.

AAST 3233. African American History to 1877. 3 Hours.

History of the African American experience in North America emphasizing economic, social, and cultural perspectives. Topics include the African slave trade, the creation of race and racism, the institution of slavery, free community formation in North, and the impact of the Civil War and Reconstruction on African Americans. (Typically offered: Fall and Spring)

This course is cross-listed with HIST 3233.

AAST 3243. African American History Since 1877. 3 Hours.

The course will study the major social, political, and economical issues relating to the African American experience beginning with the late post-Reconstruction period and will include all of the major personalities and influences in the Civil Rights Movement, from 1877 to the present. (Typically offered: Fall and Spring)

This course is cross-listed with HIST 3243.

AAST 3253. The History of Sub-Saharan Africa. 3 Hours.

Sub-Saharan African history from the 18th century to the present, with emphasis on the impact of the slave trade, colonization, Independence, and contemporary issues of the post-colonial period. Examination of the ways Africans experienced change in terms of culture, society, economics, gender, religion, politics, and labor. (Typically offered: Fall)

AAST 3263. African Americans in Film. 3 Hours.

A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and junior or senior standing. (Typically offered: Irregular)

This course is cross-listed with ENGL 3263, JOUR 3263, COMM 3263.

AAST 3273. African Americans in Documentary Film. 3 Hours.

Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians. Prerequisite: Junior or senior standing. (Typically offered: Spring)

This course is cross-listed with JOUR 3273, COMM 3273.

AAST 3283. Civil Rights Policy and Politics. 3 Hours.

This course will draw from linkages between the protest phase of the civil rights and American political institutions. The course explores the institutional impact of the civil rights movement on the presidency, congress, the courts, administrative regulatory agencies, and civil rights advisory organizations. (Typically offered: Spring)

This course is cross-listed with PLSC 3283.

AAST 3293. African American Politics. 3 Hours.

This is a survey course designed to provide students with a comprehensive overview of African American political participation in the United States. In addition to analyzing important events in African American Politics, the course attempts to explain evolving patterns of political participation in Black America. (Typically offered: Irregular)

This course is cross-listed with PLSC 3293.

AAST 3853. Topics in African-American Literature and Culture. 3 Hours.

The study of works of African-American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

This course is cross-listed with ENGL 3853.

AAST 3923H. Honors Colloquium. 3 Hours.

Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in AAST). (Typically offered: Irregular) May be repeated for degree credit.

AAST 3973. South Africa: The Long, Ongoing Walk to Freedom. 3 Hours.

Examines the country's complex history and also the ways that this past is both remembered and memorialized. Closely examines the initial motivations for the colonization of South Africa, the experiences of Africans under colonial and, subsequently, apartheid rule and the ongoing legacies of these periods in contemporary South Africa. (Typically offered: Irregular)

AAST 3983. Black Movements and Messiahs. 3 Hours.

Focuses on black movements and leaders across global African history since the Age of Revolutions to the present including political, economic, social, cultural, religious and artistic movements throughout Africa and the diaspora. (Typically offered: Irregular)

AAST 399VH. Honors African & African American Studies Thesis. 1-6 Hour.

Independent thesis research and writing under the direction of an AAST faculty member. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AAST 4003. African & African American Studies Study Abroad. 3 Hours.

Examination of selected topics in conjunction with student participation in the bi-annual African & African American Studies Study Abroad program to Ghana. Topic variable, chosen by instructor. (Typically offered: Summer Even Years) May be repeated for up to 6 hours of degree credit.

AAST 4003H. Honors African & African American Studies Study Abroad. 3 Hours.

Examination of selected topics in conjunction with student participation in the bi-annual African & African American Studies Study Abroad program to Ghana. Topic variable, chosen by instructor. (Typically offered: Summer Even Years) May be repeated for up to 6 hours of degree credit.

AAST 4063. Women in Africa. 3 Hours.

Diversity of women's life experiences throughout sub-Saharan Africa will be examined. The class will investigate a range of topics, from marriage and motherhood to prostitution and popular culture. A historical dimension will be present throughout the course, and perspectives from literature and film will also be incorporated. (Typically offered: Irregular)

This course is cross-listed with ANTH 4063.

AAST 4073. African Sociolinguistics. 3 Hours.

Explores how language use intersects, constructs, and reflects social life in Africa. Covers key topics in sociolinguistics as they apply to current sociolinguistic issues on the African continent today. (Typically offered: Irregular)

This course is cross-listed with ANTH 4073, WLLC 4073.

AAST 4083. African Popular Culture. 3 Hours.

This class explores popular cultural expression across Africa. Topics range from hip hop and film, to second-hand clothing fashions and the media. We will consider how popular culture, while often inspired by global trends, is rooted in local circumstances and often reflects attempts to grapple with important issues. (Typically offered: Irregular)

This course is cross-listed with ANTH 4083.

AAST 4093. The History of African Americans and Social Justice. 3 Hours.

Explores how the United States has extended social justice to African Americans during the nation's history. Examines social justice for blacks and the impact of historic policies and practices on black life today. (Typically offered: Irregular)

This course is cross-listed with HIST 4093.

AAST 4123. Africa and the Trans-Atlantic Slave Trade. 3 Hours.

Examines the trans-Atlantic slave trade with a primary focus on the role of Africa and Africans in creating the unique economy and culture of the trans-Atlantic world. (Typically offered: Irregular)

This course is cross-listed with HIST 4123.

AAST 4153. Race and Society. 3 Hours.

Introduction to the sociological study of race and ethnicity within the United States, with emphasis on understanding how race and ethnicity operate within contemporary social institutions. Prerequisite: SOCI 2013 or AAST 1003 or AAST 2023. (Typically offered: Fall)

This course is cross-listed with SOCI 4153.

AAST 4163. African American Perspectives of Trauma, Loss, and Recovery. 3 Hours.

Explores dimensions of trauma, loss, and recovery within the lived experiences of African American individuals, families, and communities in the United States.

Prerequisite: Junior standing or instructor consent. (Typically offered: Fall)

AAST 4173. Social Work with African American Families. 3 Hours.

An overview of historical and contemporary issues of African American families using culturally competent and strengths based frameworks. Focuses on the Black family as a social institution. Covers current trends affecting Black families, historical influences, evaluation of social policies, and programs of today. Prerequisite: Junior standing or instructor consent. (Typically offered: Fall and Spring)

This course is cross-listed with SCWK 4173.

AAST 4263. Modern Africa. 3 Hours.

Examines the last half-century of Africa's history, focusing on the last few decades. Introduction of Africa's colonial past, revolutions and struggles for independence.

Review of African development in the post-colonial and contemporary era, successes and failures of independent Africa, and the challenges the continent faces today. (Typically offered: Irregular)

This course is cross-listed with HIST 4263.

AAST 4273. Comparative Slavery. 3 Hours.

Explores the meaning of slavery around the world, both in ancient and modern times. This examination of how slavery differed in various cultures over time will allow students to explore the complexity of this labor relationship and gain a better understanding of how slavery was an integral part of world history. (Typically offered: Irregular)

This course is cross-listed with HIST 4273.

AAST 4323. Racial Identity, Politics, and Public Policy. 3 Hours.

Examines how race and perceived racial differences affect political discourse, mobilization, representation, and political outcomes. Prerequisite: PLSC 3293 or AAST 1003 or Junior standing. (Typically offered: Spring Even Years)

This course is cross-listed with PLSC 4323.

AAST 4383. The American Civil Rights Movement. 3 Hours.

Introduction to the history and development of the civil rights movement in the United States. (Typically offered: Irregular)

This course is cross-listed with HIST 4383.

AAST 4463. African American Theatre History - 1950 to Present. 3 Hours.

A chronological examination of African-American theatre history from 1950 to the present through the study of African-American plays and political/social conditions. Upon completion of this course, the student should be familiar with the major works of African-American theatre and have a deeper understanding of American history. (Typically offered: Spring)

AAST 4473. Account Planning. 3 Hours.

An introduction to applied advertising research and account planning. Integrate consumers' perspectives into creative strategy to developing brand stories for clients. Write creative briefs, positioning statements and prepare copy-testing research instruments to evaluate messages. Utilize consumer research for creating messages for diverse cultures. Prerequisite: Minimum 90 hours completed, no in-progress hours or coursework accepted, 2.5 overall GPA, JOUR 1033 with a grade of C or better, and JOUR 3723 and JOUR 3743, with a grade of B or better. (Typically offered: Fall and Spring)

This course is cross-listed with JOUR 4473.

AAST 4483. African American Biographies. 3 Hours.

Introduction to the history and intellectual development of famous and not-so-famous African Americans. (Typically offered: Irregular)

This course is cross-listed with HIST 4483.

AAST 4563. The Old South, 1607-1865. 3 Hours.

Survey of the political, social, and economic development of the antebellum South. (Typically offered: Fall Odd Years)
This course is cross-listed with HIST 4563.

AAST 4573. The New South, 1860 to the Present. 3 Hours.

Survey of the development of the Civil War and postwar South to the present. (Typically offered: Fall Even Years)
This course is cross-listed with HIST 4573.

AAST 4583. Cultures of Africa. 3 Hours.

An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. (Typically offered: Fall)
This course is cross-listed with ANTH 4583.

AAST 4813. Africans and Slavery in Colonial Latin America. 3 Hours.

Explores the diverse experiences of slaves and free Blacks in colonial Spanish and Portuguese America from 1500 to around 1888, demonstrating that bondage and the practice of African slavery was a pillar of political authority in colonial Latin America. (Typically offered: Irregular)
This course is cross-listed with HIST 4813.

AAST 4823. Black Freedom in the Age of Emancipation. 3 Hours.

Comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. Focuses on the histories, meanings, and legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them. (Typically offered: Spring)

AAST 4833. Black Freedom in the Age of Emancipation. 3 Hours.

A comparative study of Atlantic World freedom movements from the perspective of the African Diaspora. It focuses on the histories, meanings, legacies of the various types of black emancipation in the Atlantic World and the cultural technologies that enabled them. (Typically offered: Spring)

AAST 4853. Studies in African American Literature and Culture. 3 Hours.

The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is cross-listed with ENGL 4853.

AAST 489V. African & African American Independent Study. 1-6 Hour.

An exploration of African & African American Studies topics independently with a faculty member. Topic variable with permission of faculty member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

AAST 4923. History of the Black Press. 3 Hours.

Covers the historic context of contributions and innovations to U.S. newspapers by African Americans. Also investigates the role of the black press from its beginnings in 1827 through the civil rights movement. Prerequisite: Junior standing. (Typically offered: Spring Even Years)
This course is cross-listed with JOUR 4923.

AAST 4933. African American Political Ideology. 3 Hours.

A survey course designed to identify and examine characteristics and functions of several variants of black political ideology/thought. (Typically offered: Fall Odd Years)
This course is cross-listed with PLSC 4933.

AAST 4953. The History of Sub-Saharan African Women. 3 Hours.

Introduction to the history of women in Sub-Saharan Africa, starting in the early 18th century through the 20th century. Focus on women and the transatlantic slave trade, women's influence in pre-colonial religious, political, and cultural institutions, and women's experiences under colonial rule and in post-colonial Africa. (Typically offered: Irregular)
This course is cross-listed with HIST 4953.

AAST 4963. Third World Underdevelopment and Modernization. 3 Hours.

Examines key issues related to societal change in the Third World, including various views and theories of international development and modernization. Other major issues explored include social inequalities, food and hunger, population, environment, trade and globalization, international aid, and the roles of state, market, and civil society. (Typically offered: Irregular)
This course is cross-listed with HIST 4963.

AAST 4983. African American Art History. 3 Hours.

Survey of African American cultural production from the transatlantic slave trade to the present. (Typically offered: Fall)

AAST 499V. African and African American Studies Seminar. 1-12 Hour.

Explores the various aspects of the African & African American experience as it relates to the development of relationships in American society and the world at large. Variable topic each semester. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

AAST 5003. Graduate Seminar in African & African American Studies. 3 Hours.

Introduction to graduate study of African & African American Studies through an interdisciplinary examination of the history of the discipline, research methods employed, and its relationship to other disciplines. (Typically offered: Irregular)

AAST 5103. Graduate Readings in African & African American Studies. 3 Hours.

An exploration of African & African American Studies topics independently with a faculty member. Topic variable with permission of faculty member. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Agricultural Economics (AGEC) Courses

AGEC 1103. Principles of Agricultural Microeconomics. 3 Hours.

Introduction to agricultural economics, including a survey of the role and characteristics of agriculture businesses in our economic system. Basic economic concepts concerning price determination, profit maximization, and resource use are emphasized. The use of economic principles as applied to the production and marketing decisions made by managers of agricultural firms is demonstrated. Credit will be allowed for only one of AGECE 1103 or ECON 2023 or ECON 2023H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall, Spring and Summer)
This course is cross-listed with ECON 2023.

AGEC 1103H. Honors Principles of Agricultural Microeconomics. 3 Hours.

Introduction to agricultural economics, including a survey of the role and characteristics of agriculture businesses in our economic system. Basic economic concepts concerning price determination, profit maximization, and resource use are emphasized. The use of economic principles as applied to the production and marketing decisions made by managers of agricultural firms is demonstrated. Credit will be allowed for only one of AGECE 1103 or ECON 2023 or ECON 2023H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall and Spring)
This course is cross-listed with ECON 2023, AGECE 1103.

AGEC 2103. Principles of Agricultural Macroeconomics. 3 Hours.

Applications of economics principles to problems of agricultural production, distribution, and income; including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Credit will be allowed for only one of AGEC 2103 or AGEC 2103H or ECON 2013 or ECON 2013H. Pre- or Corequisite: MATH 1203. (Typically offered: Fall and Spring)

This course is cross-listed with ECON 2013.

AGEC 2103H. Honors Principles of Agricultural Macroeconomics. 3 Hours.

Applications of economics principles to problems of agricultural production, distribution, and income; including a study of the interrelationship between agriculture and other segments of the economy; and the dynamic forces in the economy which affect agriculture. Credit will be allowed for only one of AGEC 2103 or AGEC 2103H or ECON 2013 or ECON 2013H. Pre- or Corequisite: MATH 1203. Prerequisite: Honors standing. (Typically offered: Fall and Spring)

This course is cross-listed with ECON 2013, AGEC 2103.

AGEC 2141L. Agribusiness Financial Records Lab. 1 Hour.

A computer lab section for the AGEC 2142 Agribusiness Financial Records class is required to teach students accounting software and spreadsheet applications related to financial record keeping. Corequisite: AGEC 2142. Prerequisite: AGME 2903 or ISYS 1120 or ISYS 1123 and AGEC 1103 or ECON 2023 or ECON 2143. (Typically offered: Fall and Spring)

AGEC 2142. Agribusiness Financial Records. 2 Hours.

Principles of small agricultural business management accounting practices are taught to allow students to gain hands-on experience with financial record keeping for a business. Resulting financial statements are analyzed to determine opportunities for enhancing financial efficiency. Corequisite: AGEC 2141L. Prerequisite: AGME 2903 or ISYS 1120 or ISYS 1123 and AGEC 1103 or ECON 2023 or ECON 2143. (Typically offered: Fall and Spring)

AGEC 2303. Introduction to Agribusiness. 3 Hours.

Introduction to agribusiness issues as they relate to the food processing, wholesale and retail sectors of the agricultural industry. Coverage of methods and tools agribusiness managers use to evaluate business opportunities. Case studies serve to communicate concepts of product distribution, design, promotion and pricing in the development of a marketing plan. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Fall, Spring and Summer)

AGEC 2403. Quantitative Tools for Agribusiness. 3 Hours.

Introduction to quantitative methods used in agricultural economics and agribusiness with an emphasis on skills and techniques that will enhance the ability of students to perform in upper division coursework. Provides an overview of statistical and optimization methods used in research problems, economic theory, and applied decision making activities. Prerequisite: (AGEC 1103 or ECON 2023 or ECON 2143) and MATH 2043 (or higher MATH course from the University Core excluding MATH 2183). (Typically offered: Fall)

AGEC 3303. Food and Agricultural Marketing. 3 Hours.

Surveys consumer trends in food markets and the marketing activities of the food and fiber system. Emphasizes marketing concepts for both commodities and differentiated food products. Topics include applied consumer and price theory; marketing management; structure and performance of the food system; and current agricultural marketing topics. Prerequisite: AGEC 1103 or ECON 2023 or ECON 2143. (Typically offered: Fall, Spring and Summer)

AGEC 3313. Agribusiness Sales. 3 Hours.

Principles of professional sales and sales management techniques used in food and agricultural firms; develop a professional sales presentation; study current agribusiness industry professional sales persons and sales practices and techniques. Corequisite: Drill. Prerequisite: AGEC 1103 or AGEC 2103 or ECON 2013 or ECON 2023 or ECON 2143 or equivalent. (Typically offered: Spring)

AGEC 3373. Futures and Options Markets. 3 Hours.

Theory and mechanics of commodity futures and options markets including trading, margin, fees, etc. Price relationships between cash, futures and options. Fundamental and technical price analysis. Price risk management strategies for producers and users of agricultural commodity marketing plan. Speculative and hedging simulation exercises. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Fall)

AGEC 3403. Farm Business Management. 3 Hours.

Application of economic principles for the profitable organization and operation of the farm business. Focuses upon agricultural production management decision-making tools: budgeting techniques (enterprise, partial, cash flow), balance sheet, income statement, cash flow, investment analysis and risk management. Recommended: AGEC 1103 (or ECON 2023), AGEC 2142, and AGME 2903. (Typically offered: Fall and Spring)

AGEC 3413. Principles of Environmental Economics. 3 Hours.

An introductory, issues-oriented course in the economics of the environment.

The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Spring)

This course is cross-listed with ENSC 3413.

AGEC 3413H. Honors Principles of Environmental Economics. 3 Hours.

An introductory, issues-oriented course in the economics of the environment.

The course will focus on what is involved in how society makes decisions about environmental quality. The environmental issues important to the State of Arkansas and the United States will be emphasized. Corequisite: Drill component. Prerequisite: AGEC 1103 or ECON 2023. (Typically offered: Spring)

This course is cross-listed with AGEC 3413, ENSC 3413.

AGEC 3503. Agricultural Law I. 3 Hours.

Examination of those areas of law especially applicable to agriculture. Fundamentals of contract law, torts law, and property law will accompany discussion of major areas of agricultural law; acquisition and disposal of farmland; farm tenancies; rights and limitations in the use and ownership of farmland; water law; environmental protection; protection of the productivity of agricultural land; and the law of sales and secured transactions in an agricultural context. (Typically offered: Fall)

AGEC 3523. Environmental and Natural Resources Law. 3 Hours.

Principles of environmental and natural resources law relevant to agriculture, food and the environmental sciences; legal principles relating to regulation of water, air, hazardous substances, land, wildlife, livestock, and water rights. Principles of civil and criminal liabilities and other developing legal and regulatory issues relating to agriculture and natural resources. (Typically offered: Spring Even Years)

AGEC 400V. Special Problems. 1-6 Hour.

Special studies and readings conducted under the direct supervision of staff members to satisfy the requirements of individual students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGEC 401V. Internship in Agribusiness. 1-6 Hour.

A supervised practical work experience in an agribusiness firm or a governmental or industrial organization having direct impact on agriculture in order to gain professional competence and insight to employment opportunities. Prerequisite: junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.

AGEC 402V. Special Topics. 1-3 Hour.

Studies of selected topics in agricultural economics not available in other courses. (Typically offered: Irregular) May be repeated for degree credit.

AGEC 4113. Agricultural Prices and Forecasting. 3 Hours.

Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural price analysis. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ((AGEC 1103 or ECON 2023) and (AGEC 2403 or AGST 4023 or STAT 2303 or WCOB 1033) and (MATH 2043 or higher (MATH 2043C, MATH 2053, MATH 2053C, or MATH 2213, excluding MATH 2183)). (Typically offered: Spring)

AGEC 4123. Legal Issues in Animal Agriculture. 3 Hours.

An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation from local to state to federal, depending on the issue will be studied and discussed. (Typically offered: Spring Odd Years)

This course is cross-listed with ANSC 4123, POSC 4123.

AGEC 4143. Agricultural Finance. 3 Hours.

Methods and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon role of finance and financial planning and consideration is given to an understanding of financial firms serving agriculture. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (AGEC 2142 or ACCT 2013 or WCOB 1023). (Typically offered: Fall)

AGEC 4163. Agricultural and Rural Development. 3 Hours.

Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Prerequisite: AGEC 1103 (or ECON 2023). (Typically offered: Fall)

AGEC 4163H. Honors Agricultural and Rural Development. 3 Hours.

Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Prerequisite: AGEC 1103 (or ECON 2023) and honors standing. (Typically offered: Fall)

This course is equivalent to AGEC 4163.

AGEC 4303. Agribusiness Marketing Management. 3 Hours.

Marketing concepts will be developed and applied to the global food and fiber system. The course will use both commodity and product marketing principles and economic theory to analyze varied marketing situations. Case studies will be used to demonstrate the role that demand analysis and consumer behavior play in market management. Prerequisite: AGEC 2303 and AGEC 3303. (Typically offered: Spring)

AGEC 4313. Agricultural Business Management. 3 Hours.

The planning, organizing, leading and controlling functions of management as they relate to agricultural business firms. Marketing of value-added products, budgeting, organizational structure, cost control, financial statements, capital budgeting and employee supervision and motivation. Case studies are used to teach communication and decision-making skills. Senior standing recommended. Prerequisite: ((AGEC 2142 and AGEC 2141L) or (ACCT 2013)) and AGEC 2303. (Typically offered: Fall)

AGEC 4323. AgriBusiness Entrepreneurship. 3 Hours.

Agribusiness entrepreneurship is the process of bringing food or rural-based products and services from conceptualization to market. The course presents the opportunities, problems and constraints facing individuals and firms operating in rural or isolated markets while emphasizing the steps in conceptualization, development, marketing, and delivery-selling of agribusiness rural products. Prerequisite: AGEC 1103 or equivalent. (Typically offered: Spring)

AGEC 4373. Basis Trading: Applied Price Risk Management. 3 Hours.

This course provides students an opportunity to gain a detailed working knowledge of how basis trading concepts and practices are applied to agricultural markets and to develop a skill set that can be put immediately into practice in any basis trading operation. Prerequisite: AGEC 3373 or consent of instructor. (Typically offered: Spring and Summer)

AGEC 4383. Basis Trading: Case Study. 3 Hours.

This course provides an opportunity to apply principles learned in AGEC 4373 to grain merchandising using the case study approach. The course will involve in-class meetings supplemented with faculty-directed group-based learning experiences involving professional grain merchandisers. Group activities will follow the traditional case study method. Prerequisite: AGEC 4373. (Typically offered: Fall)

AGEC 4403. Advanced Farm Business Management. 3 Hours.

Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Senior standing recommended. Prerequisite: AGEC 3403 and (AGME 2903 or equivalent) and ((AGEC 2142 and AGEC 5141L) or ACCT 2013). (Typically offered: Fall)

AGEC 4603. Food Economics and Health. 3 Hours.

This course provides an advanced overview of selected topics in food economics, food and nutrition policy and the interface between nutrition programs and health policy. Students will develop an understanding of economic and policy concepts of food, nutrition, and health. The course emphasizes analytical tools that can be applied to study issues in food, nutrition, and health facing the US and world populations. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2403 or WCOB 1033). (Typically offered: Spring)

AGEC 4613. Political Economy of Agriculture and Food. 3 Hours.

Agricultural and food policies are studied from domestic and international perspectives. Laws, regulations, decisions and actions by governments and other institutions are examined in terms of rationale, content, and consequences. Economic and political frameworks are used to assess policies in terms competitive structure, operation, and performance of farming and food systems. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (PSYC 2003 or SOCI 2013 or HDFS 2603). (Typically offered: Fall)

AGEC 4623. International Agricultural Trade and Commercial Policy. 3 Hours.

Analysis of agricultural market competition and performance in a global economy. The impact of domestic and international agricultural policies on domestic and international markets and welfare. Economic principles applied to the interaction of economic events in the world food economy. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013). (Typically offered: Spring)

AGEC 500V. Special Problems. 1-3 Hour.

Individual reading and investigation of a special problem in agricultural economics not available under regular courses, under the supervision of the graduate faculty. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

AGEC 5011. Seminar. 1 Hour.

Presentation and discussion of graduate student research. Formal presentations are made by all graduate students. Consideration given to research design, procedures, and presentation of results. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

AGEC 502V. Special Topics. 1-3 Hour.

Advanced studies of selected topics in agricultural economics not available in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

AGEC 503V. Internship in Agricultural Economics. 1-3 Hour.

On-the-job application of skills developed in the M.S. program. (Typically offered: Fall, Spring and Summer)

AGEC 5043. Agricultural Finance. 3 Hours.

(Formerly AGECE 4143.) Methods and procedures whereby agricultural firms acquire and utilize funds required for their successful operation. Emphasis is placed upon role of finance and financial planning and consideration is given to an understanding of financial firms serving agriculture. Graduate degree credit will not be given for both AGECE 4143 and AGECE 5043. Prerequisite: (AGECE 1103 or ECON 2023) and (AGECE 2103 or ECON 2013) and (AGECE 2142 or ACCT 2013 or WCOB 1023). (Typically offered: Fall)

AGEC 5053. Advanced Farm Business Management. 3 Hours.

(Formerly AGECE 4403.) Principles and procedures of decision making as applied to the allocation of resources in the farm business for profit maximization. Emphasis is placed on use of principles of economics and their application to the decision making process. Includes exercises on the application of principles to specific farm management problems. Graduate degree credit will not be given for both AGECE 4403 and AGECE 5053. Prerequisite: AGECE 3403 and AGME 2903 or equivalent. (Typically offered: Fall)

AGEC 5063. Agricultural and Rural Development. 3 Hours.

(Formerly AGECE 4163.) Examination of agricultural and rural development issues in less developed countries. Alternative agricultural production systems are compared, development theories examined, and consideration given to the planning and implementation of development programs. Graduate degree credit will not be given for both AGECE 4163 and AGECE 5063. Prerequisite: AGECE 1103 (or ECON 2023). (Typically offered: Fall)

AGEC 5073. Basis Trading: Applied Price Risk Management. 3 Hours.

(Formerly AGECE 4373.) This course provides students an opportunity to gain a detailed working knowledge of how basis trading concepts and practices are applied to agricultural markets and to develop a skill set that can be put immediately into practice in any basis trading operation. Graduate degree credit will not be given for both AGECE 4373 and AGECE 5073. Prerequisite: AGECE 3373 or consent of instructor. (Typically offered: Spring and Summer)

AGEC 5083. Basis Trading: Case Study. 3 Hours.

(Formerly AGECE 4383.) This course provides an opportunity to apply principles learned in AGECE 4373 to grain merchandising using the case study approach. The course will involve in-class meetings supplemented with faculty-directed group-based learning experiences involving professional grain merchandisers. Group activities will follow the traditional case study method. Graduate degree credit will not be given for both AGECE 4383 and AGECE 5083. Prerequisite: AGECE 4373 or AGECE 5073 (formerly AGECE 4373). (Typically offered: Fall)

AGEC 5103. Agricultural Microeconomics. 3 Hours.

Masters-level training in agricultural microeconomic theory and its application to food, agriculture and the environment. The course covers behavior of firms, households and markets, in more depth and rigor than encountered in undergraduate courses. Theories are explained and then applied to relevant food, agricultural, environment and resource issues. (Typically offered: Fall)

AGEC 5113. Agricultural Prices and Forecasting. 3 Hours.

(Formerly AGECE 4113.) Price theory and techniques for predicting price behavior of general economy and price behavior of individual agricultural products will be analyzed. Provides practice in the application of economics and statistics to agricultural price analysis. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both AGECE 4113 and AGECE 5113. Prerequisite: (AGECE 1103 or ECON 2023), AGECE 2403, (AGST 4023 or STAT 2303 or WCOB 1033) and MATH 2053. (Typically offered: Spring)

AGEC 5123. Agribusiness Entrepreneurship. 3 Hours.

(Formerly AGECE 4323.) Agribusiness entrepreneurship is the process of bringing food or rural-based products and services from conceptualization to market. The course presents the opportunities, problems and constraints facing individuals and firms operating in rural or isolated markets while emphasizing the steps in conceptualization, development, marketing, and delivery-selling of agribusiness rural products. Graduate degree credit will not be given for both AGECE 4323 and AGECE 5123. Prerequisite: AGECE 1103 or equivalent. (Typically offered: Spring)

AGEC 5133. Agricultural and Environmental Resource Economics. 3 Hours.

An economic approach to problems of evaluating private and social benefits and costs of altering the environment. Emphasis given to the interaction of individuals, institutions, and technology in problems of establishing and maintaining an acceptable level of environmental quality. Prerequisite: Minimum of 3 hours Agricultural Economics or Economics at 3000 level or higher or PhD standing. (Typically offered: Spring)

AGEC 5143. Financial Management in Agriculture. 3 Hours.

Covers advanced topics in agricultural finance. The general focus of the course is the financial management of non-corporate firms. Covers the basic tools of financial analysis including financial arithmetic, asset evaluation under risk, and financial analysis and planning using econometric models. Such topics covered include management of current assets, capital budgeting, capital structure, and institutions involved in agricultural finance. Prerequisite: Graduate standing. (Typically offered: Fall)

AGEC 5153. The Economics of Public Policy. 3 Hours.

This class will examine the impact of public policy on agricultural and other business sectors as well as households and individuals, particular in rural areas. Emphasis will also be placed on analyzing the potential impact of future policy changes. The course will focus on the application of welfare criteria and economic analyses to the problems and policies affecting resource adjustments in agriculture and rural communities. Prerequisite: Graduate standing. (Typically offered: Spring)

AGEC 5203. Agribusiness Marketing Management. 3 Hours.

(Formerly AGECE 4303.) Marketing concepts will be developed and applied to the global food and fiber system. The course will use both commodity and product marketing principles and economic theory to analyze varied marketing situations. Case studies will be used to demonstrate the role that demand analysis and consumer behavior play in market management. Graduate degree credit will not be given for both AGECE 4303 and AGECE 5203. Prerequisite: AGECE 2303 and AGECE 3303. (Typically offered: Spring)

AGEC 5213. Agricultural Business Management. 3 Hours.

(Formerly AGECE 4313.) The planning, organizing, leading and controlling functions of management as they relate to agricultural business firms. Marketing of value-added products, budgeting, organizational structure, cost control, financial statements, capital budgeting and employee supervision and motivation. Case studies are used to teach communication and decision-making skills. Graduate degree credit will not be given for both AGECE 4313 and AGECE 5213. Prerequisite: (AGECE 2142 and AGECE 2141L) or (ACCT 2013 and AGECE 2303 or equivalent). (Typically offered: Fall)

AGEC 5223. International Agricultural Trade and Commercial Policy. 3 Hours.

(Formerly AGECE 4623.) Analysis of agricultural market competition and performance in a global economy. The impact of domestic and international agricultural policies on domestic and international markets and welfare. Economic principles applied to the interaction of economic events in the world food economy. Graduate degree credit will not be given for both AGECE 4623 and AGECE 5223. Prerequisite: (AGECE 1103 or ECON 2023) and (AGECE 2103 or ECON 2013). (Typically offered: Spring)

AGED 5233. Political Economy of Agriculture and Food. 3 Hours.

(Formerly AGEC 4613.) Agricultural and food policies are studied from domestic and international perspectives. Laws, regulations, decisions and actions by governments and other institutions are examined in terms of rationale, content, and consequences. Economic and political frameworks are used to assess policies in terms competitive structure, operation, and performance of farming and food systems. Graduate degree credit will not be given for both AGEC 4613 and AGEC 5233. Prerequisite: (AGEC 1103 or ECON 2023) and (AGEC 2103 or ECON 2013) and (PSYC 2003 or SOCI 2013 or HDFS 2603). (Typically offered: Fall)

AGED 5303. Agricultural Marketing Theory. 3 Hours.

Survey of the structure of agricultural product and factor markets including a critique of theoretical analyses of industry structure, conduct and performance; and a review of market structure research in agricultural industries. Prerequisite: Graduate standing. (Typically offered: Fall)

AGED 5403. Quantitative Methods for Agribusiness. 3 Hours.

Application of quantitative techniques used to support managerial decision-making and resource allocation in agricultural firms. Provides exposure to mathematical and statistical tools (regression analysis, mathematical programming, simulation) used in economic analysis in agriculture. Emphasis is placed on computer applications with conceptual linkage to economic theory. Prerequisite: Graduate standing. (Typically offered: Fall)

AGED 5413. Agribusiness Strategy. 3 Hours.

Addresses problems of strategy formulation in agribusiness emphasizing current problems and cases in agriculture. Surveys modern and classic perspectives on strategy with applications to agribusiness. Examines the development of firm level strategies within the structure and competitive environment of agricultural firms and industries. Prerequisite: Graduate standing. (Typically offered: Spring)

AGED 5603. Food Economics and Health. 3 Hours.

This course provides an advanced overview of selected topics in food economics, food and nutrition policy and the interface between nutrition programs and health policy. Students will develop an understanding of economic and policy concepts of food, nutrition, and health. The course emphasizes analytical tools that can be applied to study issues in food, nutrition, and health facing the US and world populations. Prerequisite: Graduate standing. (Typically offered: Spring)

AGED 5613. Econometrics. 3 Hours.

Use of economic theory and statistical methods to estimate economic models. The single equation model is examined emphasizing multicollinearity, autocorrelation, heteroskedasticity, binary variables and distributed lags and model specification. Prerequisite: MATH 2043 and knowledge of matrix methods, (which may be acquired as a corequisite), and (AGEC 1103 or ECON 2023) and (AGEC 2403 or AGST 4023 or STAT 2303 or WCOB 1033). (Typically offered: Spring)

AGED 5623. Quantitative Food and Agricultural Policy Analysis. 3 Hours.

Introduction to applied analysis of domestic and international food and agricultural policies using quantitative tools. This course will provide hands-on experience with simulation modeling in microeconomics. An emphasis is placed on policy analysis through computer applications with theoretical underpinnings. Corequisite: Lab component. Prerequisite: (AGEC 5103 and AGEC 5403) or instructor consent. (Typically offered: Spring)

AGED 5713. Food Safety Law. 3 Hours.

This course provides students with an introduction to food law and policy, history of food regulation, the organization of federal food law and regulatory agencies, government inspection and enforcement powers, food safety standards, food labeling, food advertising and product liability. Web-based course. (Typically offered: Irregular)

AGED 5723. Bioenergy and Resource Economics. 3 Hours.

This course surveys the allocation and conservation of natural resources from a perspective of optimal use and the sustainability of resources. The development and distribution issues relating to energy, land, water, and other resource areas are addressed in the course, with emphasis placed on the bioproducts and bioenergy concerns. (Typically offered: Fall Even Years)

AGED 5733. Bioenergy Economics and Sustainability. 3 Hours.

This course will provide an understanding of the economic issues relating to overall supply chains producing bioenergy and bio-based products. The course will address the economic, sustainability and social dimensions of these industries. (Typically offered: Fall)

AGED 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

AGED 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Agricultural Education (AGED) Courses

AGED 1001. Orientation to Agricultural and Extension Education. 1 Hour.

Continuation of AFLS 1011, Freshman Orientation, with attention given to sharing of possible solutions to individual problems. Exploration of anticipated collegiate experiences for departmental majors as well as post-graduation opportunities. Student and faculty interaction is stressed. The class meets during the last half of the fall semester twice a week. The class also meets 1 or 2 evenings for up to two hours each time. (Typically offered: Fall)

AGED 1031. Introduction to Early Field Experience. 1 Hour.

A thirty hour field experience designed to give prospective agricultural education teachers an opportunity to observe and participate in a variety of school settings. Corequisite: AGED 1123. (Typically offered: Fall)

AGED 1123. Foundations of Agricultural Education. 3 Hours.

A preparatory course evaluating the historical foundations of agricultural education with an introduction to the psychological, sociological and philosophical foundations of education. This course will encourage reflective practice through understanding of educational trends, classroom environment creation and utilization, and effective program planning. (Typically offered: Fall)

AGED 1133. Lifelong Agricultural Advocacy. 3 Hours.

This course will supply students with the necessary information and skills to evaluate and seek out opportunities and methods for advocating for agricultural industries. This course will equip students with the knowledge and skills to become active agricultural leaders serving at the intersection of policy, consumer engagement, and best agricultural practice. (Typically offered: Fall)

AGED 2143. Introduction to Agricultural Communications and Leadership. 3 Hours.

A survey of agricultural communications and leadership theories and practices for students in the ACOM and AGLE concentrations and minors and anyone seeking a basic understanding of these disciplines. The course provides an overview of the history, philosophy, and theories of the disciplines and introduces students to career options, skills and practical competencies required of agricultural communicators and leaders. (Typically offered: Fall)

AGED 3111. Student Management. 1 Hour.

To guide students in the development of realistic, proactive classroom management strategies that establish a safe culture of student learning and academic success. Prerequisite: Instructor Consent. (Typically offered: Spring)

AGED 3133. Instructional and Presentation Strategies. 3 Hours.

Methods and techniques in teaching agriculture at the secondary level. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall)

AGED 3143. Communicating Agriculture to the Public. 3 Hours.

An overview of public communications theory and practices in the agricultural, food, and life sciences with a particular focus on technical writing, public relations and media relations writing, campaign planning, public speaking, and various mass media communication techniques, including print, broadcast, electronic, and social media. (Typically offered: Fall, Spring and Summer)

AGED 3153. Leadership Development in Agriculture. 3 Hours.

Identification of styles and roles of leadership; development of leadership techniques and skills required in working with organizations; dynamics of group action; methods of resolving conflict; ethical considerations for leaders; and personal skills development. (Typically offered: Spring)

AGED 3153H. Honors Leadership Development in Agriculture. 3 Hours.

Identification of styles and roles of leadership; development of leadership techniques and skills required in working with organizations; dynamics of group action; methods of resolving conflict; ethical considerations for leaders; and personal skills development. Prerequisite: Junior standing. (Typically offered: Spring)

This course is equivalent to AGED 3153.

AGED 3161L. Curriculum Development and Assessment Techniques in Career and Technical Education Laboratory. 1 Hour.

To supply students with opportunities to apply skills in creating curricula, lesson plans, and assessment strategies for courses in career and technical education. Materials created as a result of this course will apply principles learned in AGED 3162, and will align with anticipated courses to be taught by the student during his/her teaching internship. Pre- or Corequisite: AGED 3162. (Typically offered: Fall)

AGED 3162. Curriculum Development and Assessment Techniques in AGED. 2 Hours.

To supply students with the necessary information and skills to select and apply appropriate teaching techniques, curricula, resources, and assessment strategies when designing a course in career and technical education. (Typically offered: Spring)

AGED 3173. Research Methods in the Social Sciences. 3 Hours.

This course offers undergraduate students the basics and explanation for appropriate research procedures, data collection, analysis, and reporting. Course objectives to include identifying appropriate components of research works, evaluation of research in social science and creation of research projects. The purpose of the course is to prepare undergraduate students to be better producers and consumers of research in the social sciences. (Typically offered: Summer)

AGED 3173H. Honors Research Methods in the Social Sciences. 3 Hours.

This course offers undergraduate students the basics and explanation for appropriate research procedures, data collection, analysis, and reporting. Course objectives to include identifying appropriate components of research works, evaluation of research in social science and creation of research projects. The purpose of the course is to prepare undergraduate students to be better producers and consumers of research in the social sciences. (Typically offered: Summer)

This course is equivalent to AGED 3173.

AGED 3243. Ag Reporting and Feature Writing. 3 Hours.

This course will provide students an exposure to writing, interviewing, and editing news on agricultural issues in agricultural industry publications. Students will gain practical experience with journalistic interviewing, news writing, feature writing, digital photography, and writing for broadcast on agricultural issues. This course is designed for students with at least six hours of upper division courses. Pre- or Corequisite: JOUR 1033 and lab component. (Typically offered: Fall Odd Years)

AGED 3943. Professional Development in Agricultural Communications. 3 Hours.

Overview of professional and technical skills needed to succeed in internships and jobs in the field of agricultural communications. (Typically offered: Fall Even Years)

AGED 4003. Issues in Agriculture. 3 Hours.

Lecture and discussion on local, regional, national and international issues related to agricultural policy, ethics, environment, society, and science. Designed for students with at least six hours of upper division agricultural science courses. Prerequisite: Junior standing. (Typically offered: Fall)

AGED 400V. Special Problems in Agricultural and Extension Education. 1-6 Hour.

Individual study or research for advanced undergraduates in the field of agricultural and extension education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGED 401V. Special Topics. 1-3 Hour.

Studies of selected topics in agricultural or extension education not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

AGED 4113. Undergraduate Researchers Improving Student Experience. 3 Hours.

To engage students in the social sciences in action research that serves to solve a problem or answer a question within the student's academic field through scientific inquiry. All students will work with professionals, commonly outside of the university, within their discipline to conduct their action research in order to solve a problem experienced by that professional. Students may work in teams or individually to complete the overall purpose of the course. (Typically offered: Spring)

AGED 4143. Electronic Communications in Agriculture. 3 Hours.

An overview of communication technology in the agricultural, food and life sciences. (Typically offered: Spring Even Years)

AGED 4153. Survey of Leadership Theory in Agriculture. 3 Hours.

An interdisciplinary analysis of current issues in the practice of leadership in a contemporary and changing society, particularly as they affect agricultural organizations and issues. Discussions of leadership theory, roles of leaders, skills for effective leadership, diversity issues, and followership will challenge students to think critically about leadership, enhance personal leadership performance and potential, and prepare for or expand leadership roles, and to become innovative and productive in dealing with challenges facing agricultural organizations today. Prerequisite: AGED 3153. (Typically offered: Fall)

AGED 4163. Leadership Analysis Through Film. 3 Hours.

Clemens (1999) stated, "Films are a catalyst." They make you laugh, cry, cheer, and think. Flaum (2002) stated leadership is best learned in the leadership moment. Moreover, the principles of Andragogy advocate adult learners best learning when there is a practical application of the learning subject. Therefore, this course builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films. Prerequisite: AGED 3153 or AGED 4153 or graduate standing or instructor consent. (Typically offered: Spring and Summer)

AGED 4211. Teachers as Professionals. 1 Hour.

To expose students to the roles and responsibilities of professional teachers. Students will understand the characteristics common to professionals and apply these to the teaching setting. Real-world examples of "grey-area" situations will allow students to evaluate issues holistically and determine appropriate solutions following the ethical and professional guidelines of the teaching discipline. Additionally, students will prepare resumes and engage in mock interviews to enhance their professional dispositions as they consider employment opportunities. Prerequisite: Instructor consent. (Typically offered: Fall)

AGED 4231. Program Development. 1 Hour.

Principles and concepts of leadership, program organization, supervised agricultural experience, and advisory committees. This course is a portion of pre-professional studies required for certification in agricultural education. Prerequisite: AGED 3133 and instructor consent. (Typically offered: Spring)

AGED 4243. Graphic Design in AFLS. 3 Hours.

This course provides students with graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences. Students will learn to use industry-standard software (InDesign, Photoshop, Illustrator, Microsoft Excel, etc.) to prepare text and graphics and package them for use in print production. Prerequisite: AGME 2903 or ISYS 1123 or equivalent. (Typically offered: Fall, Spring and Summer)

AGED 4343. Communication Campaigns in Agriculture. 3 Hours.

Students will develop understanding of the principles, practices and applications of social marketing, integrated marketing communications, advertising and public relations as they pertain to developing communication campaign strategies for the agricultural industry. Students will develop a communication campaign for an agricultural company and/or entity focused on a specific product or service. Prerequisite: Junior standing or higher, AGED 4243, AGED 3243, AGED 3143, and AGED 2143 or instructor permission. (Typically offered: Spring Odd Years)

AGED 4443. Principles of Technological Change. 3 Hours.

This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introduction, adoption, and diffusion of technological change. This course may be offered as a web-based course. Prerequisite: Junior standing. (Typically offered: Fall Odd Years)

AGED 4543. Ag Publications. 3 Hours.

Students produce a magazine through classroom study mirroring a professional magazine staff and are provided an opportunity for their writing, advertisements, photographs and artwork to be published in the magazine. By using computer applications, students integrate various skills including writing, editing and layout in agricultural publications. Prerequisite: JOUR 1033. (Typically offered: Spring Even Years)

AGED 4632. Teaching Diverse Populations in Agricultural and Extension Education. 2 Hours.

This course is designed to provide pre-service teachers of agriculture with an understanding of teaching diverse populations as applied to problems of practice in agricultural and extension education. (Typically offered: Spring)

AGED 475V. Internship in Agricultural Education. 1-6 Hour.

Scheduled practical field experiences under the supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation. Successful completion of a criminal background check required before a student can begin internship. Prerequisite: Admission into Clinical Practice. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGED 4843. Methods in Agricultural Laboratories. 3 Hours.

Methods and management techniques in all types of agricultural laboratories that may be in a secondary agricultural science program. Emphasis on management of students and facilities, equipment, and materials. Lecture 2 hours, laboratory 4 hours per week. Prerequisite: AGME 2123. Corequisite: Lab component. (Typically offered: Spring)

AGED 5001. Seminar. 1 Hour.

Presentations and discussion of graduate student research as well as review of current literature and topics of current interest by students and faculty. All graduate students will make at least one formal presentation. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

AGED 5013. Advanced Methods in Agricultural Mechanics. 3 Hours.

Emphasis on shop organization and management, courses of study, unit shop instruction, and development of skills in agricultural mechanics. (Typically offered: Summer Odd Years)

AGED 5033. Developing Leadership in Agricultural Organizations. 3 Hours.

Organizational concepts of leadership; administrative styles and structures; leadership for boards, committees, governmental bodies, and review of societal and political processes. Prerequisite: Graduate standing. (Typically offered: Fall)

AGED 5053. Philosophy of Agricultural and Extension Education. 3 Hours.

An examination and analysis of social and economic events leading to the establishment and maintenance of federal, state, county, and local agricultural education programs. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Spring)

AGED 510V. Special Problems. 1-6 Hour.

Individual investigation of a special problem in agricultural education which is not available through regular courses. These will be directed by a member of the graduate faculty. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGED 5113. Undergraduate Researchers Improving Student Experiences. 3 Hours.

To engage students in the social sciences in action research that serves to solve a problem or answer a question within the student's academic field through scientific inquiry. All students will work with professionals, commonly outside of the university, within their discipline to conduct their action research in order to solve a problem experienced by that professional. Students may work in teams or individually to complete the overall purpose of the course. Prerequisite: AGED 5463 or HESC 5463 or other instructor approved Research Methods course. (Typically offered: Spring)

AGED 5143. Electronic Communications in Agriculture. 3 Hours.

(Formerly AGED 4143.) An overview of communication technology in the agricultural, food and life sciences. Graduate degree credit will not be given for both AGED 4143 and AGED 5143. (Typically offered: Spring Even Years)

AGED 5153. Survey of Leadership Theory in Agriculture. 3 Hours.

(Formerly AGED 4153.) An interdisciplinary analysis of current issues in the practice of leadership in a contemporary and changing society, particularly as they affect agricultural organizations and issues. Discussions of leadership theory, roles of leaders, skills for effective leadership, diversity issues, and followership will challenge students to think critically about leadership, enhance personal leadership performance and potential, and prepare for or expand leadership roles, and to become innovative and productive in dealing with challenges facing agricultural organizations today. Graduate degree credit will not be given for both AGED 4153 and AGED 5153. Prerequisite: AGED 3153. (Typically offered: Fall)

AGED 5163. Leadership Analysis Through Film. 3 Hours.

(Formerly AGED 4163.) Films are a catalyst (Clemens, 1999). They make you laugh, cry, cheer, and think. Flaum (2002) stated leadership is best learned in the leadership moment. Moreover, the principles of Andragogy advocate adult learners best learning when there is a practical application of the learning subject. Therefore, this course builds upon the study of leadership theory by allowing students to analyze, reflect, synthesize, and apply leadership theories, models and concepts in the context of film. The course materials encourage students to reflect, synthesize, analyze, and apply the information learned from major leadership theories and apply them to various scenarios and situations demonstrated in selected films. Graduate degree credit will not be given for both AGED 4163 and AGED 5163. (Typically offered: Spring and Summer)

AGED 520V. Special Topics in Agricultural and Extension Education. 1-4 Hour.

Topics not covered in other courses or a more intensive study of specific topics in agriculture education. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

AGED 5243. Graphic Design in AFLS. 3 Hours.

(Formerly AGED 4243.) This course provides students with graphic design and software skills specific to industries in Agriculture, Food, and Life Sciences. Students will learn to use industry-standard software (InDesign, Photoshop, Illustrator, Microsoft Excel, etc.) to prepare text and graphics and package them for use in print production. Graduate degree credit will not be given for both AGED 4243 and AGED 5243. Prerequisite: AGME 2903 or ISYS 1123 or equivalent. (Typically offered: Fall, Spring and Summer)

AGED 5343. Communication Campaigns in Agriculture. 3 Hours.

(Formerly AGED 4343.) Students will develop understanding of the principles, practices and applications of social marketing, integrated marketing communications, advertising and public relations as they pertain to developing communication campaign strategies for the agricultural industry. Students will develop a communication campaign for an agricultural company and/or entity focused on a specific product or service. Graduate degree credit will not be given for both AGED 4343 and AGED 5343. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

AGED 5363. Educational Delivery Techniques. 3 Hours.

Students will learn to apply teaching and learning theory in the development of engaging instruction delivered through electronic media. The goal of the course is not to make experts in "programming" or "theory", but rather to prepare students with the knowledge/practical skills necessary to deliver curriculum through various methods. Prerequisite: Graduate standing. (Typically offered: Irregular)

AGED 5443. Principles of Technological Change. 3 Hours.

(Formerly AGED 4443.) This course introduces a structured approach for dealing with the organizational and human aspects of technology transition, including the key concepts of resistance and change management, organizational change, communications, and processes by which professional change agents influence the introduction, adoption, and diffusion of technological change. This course may be offered as a web-based course. Graduate degree credit will not be given for both AGED 4443 and AGED 5443. (Typically offered: Fall Odd Years)

AGED 5463. Research Methodology in the Social Sciences. 3 Hours.

Logical structure and the method of science. Basic elements of research design; observation, measurement, analytic method, interpretation, verification, presentation of results. Applications to research in economic or sociological problems of agriculture and human environmental sciences. Prerequisite: Graduate standing. (Typically offered: Fall)

This course is cross-listed with HESC 5463.

AGED 5473. Interpreting Social Data in Agriculture. 3 Hours.

The development of competencies in analyzing, interpreting and reporting the results of analyses of social science data in agriculturally related professions. Students will select appropriate analysis techniques and procedures for various problems, analyze data, and interpret and report the results of statistical analyses in narrative and tabular form. (Typically offered: Fall)

AGED 5483. Technical Communication in the Social Sciences. 3 Hours.

This course will provide students with the basic principles and techniques in communicating social science information relevant to human subject research in agriculture, natural resources, and life sciences to the general public. Communication processes covered in the course include audience identification, writing, editing, and production of social science-based materials for popular and refereed publications. Focus will also be placed on thesis preparation and writing and research manuscript development and dissemination of social science research. Web delivered course. Prerequisite: Graduate standing. (Typically offered: Spring)

AGED 550V. College Teaching in Agriculture and Related Disciplines. 1-3 Hour.

For students who are pursuing graduate degrees where emphasis is on preparation for a research career, but who also may desire or expect to teach. Provides theory and practice in planning and executing a college-level course. (Typically offered: Irregular)

AGED 5543. Ag Publications. 3 Hours.

(Formerly AGED 4543.) Students produce a magazine through classroom study mirroring a professional magazine staff and are provided an opportunity for their writing, advertisements, photographs and artwork to be published in the magazine. By using computer applications, students integrate various skills including writing, editing and layout in agricultural publications. Graduate degree credit will not be given for both AGED 4543 and AGED 5543. (Typically offered: Spring Even Years)

AGED 5563. Thesis Proposal Development. 3 Hours.

The purpose of this course is to assist graduate students in the preparation of their thesis research proposal. Students will produce the first three chapters of their thesis by the end of the course. Prerequisite: AGED 5463 or HESC 5463. (Typically offered: Fall)

AGED 5632. Teaching Diverse Populations in Agricultural and Extension Education. 2 Hours.

(Formerly AGED 4632.) This course is designed to provide pre-service teachers of agriculture with an understanding of teaching diverse populations as applied to problems of practice in agricultural and extension education. Graduate degree credit will not be given for both AGED 4632 and AGED 5632. (Typically offered: Spring)

AGED 575V. Internship in Agricultural Education. 1-6 Hour.

Scheduled practical field experiences under supervision of a professional practitioner in off-campus secondary school systems. Emphasis includes classroom preparation, teaching, and student evaluation. (Typically offered: Fall, Spring and Summer)

AGED 5993. Global Horticulture and Human Nutrition to Enhance Community Resilience and Food Security. 3 Hours.

This course covers three broad areas (Global Horticulture, Sustainable International Development, Human Health and Nutrition) and experts on three campuses created the instruction. The course is intended to be multi-disciplinary, and students should use their contextual knowledge to add to weekly discussions. Prerequisite: Graduate standing. (Typically offered: Spring)

This course is cross-listed with FDSC 5993, HORT 5993.

AGED 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Agricultural Mechanization (AGME)

Courses

AGME 1611L. Fundamentals of Agricultural Systems Technology Laboratory. 1 Hour.

Study of basic mathematical and physical science concepts important in the mechanization of agriculture. Laboratory required for agricultural education, communication and technology majors enrolled in AGME 1613, optional for others enrolled in AGME 1613. Corequisite: AGME 1613. (Typically offered: Fall)

AGME 1613. Fundamentals of Agricultural Systems Technology. 3 Hours.

Introduction to basic physical concepts important in agricultural technical systems: applied mechanics, power and machinery management, structures and electrification, and soil and water conservation. Lecture 3 hours per week. Corequisite: AGME 1611L (for AECT Majors). (Typically offered: Fall)

AGME 2123. Metals and Welding. 3 Hours.

An introduction to agricultural mechanics shop work to include hot and cold metal work, arc welding, and gas welding and cutting. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Fall and Spring)

AGME 2903. Agricultural and Human Environmental Sciences Applications of Microcomputers. 3 Hours.

Lecture and laboratory assignments covering the contemporary use of microcomputers in agricultural, food and life sciences. Emphasis placed on learning to use selected, appropriate Microsoft (Windows, Word, Excel, PowerPoint and Access), email/Internet, and collaboration software packages. (Typically offered: Fall, Spring and Summer)

AGME 3042. Agricultural Construction Technology. 2 Hours.

Principles of building design and construction. Includes site selection calculating structural loads and computerized packages for building design. Safety practices, selection of building materials and determining costs are also included. Lecture is one hour and lab is two hours per week. Prerequisite: MATH 1203 and junior standing. (Typically offered: Irregular)

AGME 3101L. Small Power Units/Turf Equipment Laboratory. 1 Hour.

Testing, evaluation, and maintenance of engines, hydrostatic power transmission systems, and equipment commonly used in the turf and landscaping industries. Corequisite: AGME 3102. Prerequisite: MATH 1203. (Typically offered: Spring)

AGME 3102. Small Power Units/Turf Equipment. 2 Hours.

Principles of operation, adjustment, repair, maintenance, and trouble shooting of small air-cooled engines and power units, including various engine systems, service and maintenance of turf equipment and machinery. Lecture 2 hours per week. Corequisite: AGME 3101L. Prerequisite: MATH 1203. (Typically offered: Spring)

AGME 3153. Surveying in Agriculture and Forestry. 3 Hours.

Techniques and procedures normally used in determining areas and characterizing the topography of agricultural and forest lands. Includes basic concepts of surveying; use and care of level, transit, distance measuring equipment; topographic mapping and public land surveys. (Typically offered: Fall)

AGME 3173. Electricity in Agriculture. 3 Hours.

Principles of electricity; wiring of home, farmstead and other agricultural structures; selection of electric motors and their care and application in the broad field of agriculture; lighting and special uses of electricity such as heating and electrical controls. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Spring)

AGME 400V. Special Problems. 1-6 Hour.

Individual research or study in electrification, irrigation, farm power, machinery, or buildings. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGME 402V. Special Topics in Agricultural Mechanization. 1-4 Hour.

Topics not covered in other courses or a more intensive study of special topics in agricultural mechanization. (Typically offered: Irregular) May be repeated for degree credit.

AGME 4203. Mechanized Systems Management. 3 Hours.

Selection, sizing, and operating principles of agricultural machinery systems, including power sources. Cost analysis and computer techniques applied to planning and management of mechanized systems. Corequisite: Lab component. Prerequisite: MATH 1203. (Typically offered: Fall Even Years)

AGME 4973. Irrigation. 3 Hours.

Methods of applying supplemental water to soils to supply moisture essential for plant growth, sources of water, measurement of irrigation water, pumps, conveyance structure, economics, and irrigation for special crops. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Spring)

AGME 500V. Special Problems. 1-6 Hour.

(Formerly AGME 400V.) Individual research or study in electrification, irrigation, farm power, machinery, or buildings. Graduate degree credit will not be given for both AGME 400V and AGME 500V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGME 501V. Special Topics in Agricultural Mechanization. 1-4 Hour.

(Formerly AGME 402V.) Topics not covered in other courses or a more intensive study of special topics in agricultural mechanization. Graduate degree credit will not be given for both AGME 402V and AGME 501V. (Typically offered: Irregular) May be repeated for degree credit.

AGME 5203. Mechanized Systems Management. 3 Hours.

(Formerly AGME 4203.) Selection, sizing, and operating principles of agricultural machinery systems, including power sources. Cost analysis and computer techniques applied to planning and management of mechanized systems. Graduate degree credit will not be given for both AGME 4203 and AGME 5203. Corequisite: Lab component. Prerequisite: MATH 1203. (Typically offered: Fall Even Years)

AGME 5973. Irrigation. 3 Hours.

(Formerly AGME 4973.) Methods of applying supplemental water to soils to supply moisture essential for plant growth, sources of water, measurement of irrigation water, pumps, conveyance structure, economics, and irrigation for special crops. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both AGME 4973 and AGME 5973. Corequisite: Lab component. (Typically offered: Spring)

Agricultural Statistics (AGST)

Courses

AGST 4023. Principles of Experimentation. 3 Hours.

Fundamental concepts of experimental and statistical methods as applied to agricultural research. Lecture 3 hours per week. Prerequisite: MATH 1203 or higher level. (Typically offered: Spring)

AGST 500V. Special Problems. 1-6 Hour.

Individual investigation of a special problem in some area of statistics applicable to the agricultural, food, environmental, and life sciences not available under existing courses. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AGST 5014. Experimental Design. 4 Hours.

Types of experimental designs, their analysis and application to agricultural research. Lecture 3 hours and laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ((AGST 4011 or AGST 5031 (formerly AGST 4011)) and ((AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 4003). (Typically offered: Spring)

AGST 5023. Principles of Experimentation. 3 Hours.

(Formerly AGST 4023.) Fundamental concepts of experimental and statistical methods as applied to agricultural research. Lecture 3 hours per week. (Typically offered: Fall, Spring and Summer)

AGST 5031. SAS Programming for Agricultural Sciences. 1 Hour.

(Formerly AGST 4011.) An introduction to the SAS programming language with an emphasis on the reading and restructuring of data files, and the displaying of data in tabular and graphic forms. The course is taught using a hands-on approach. Graduate degree credit will not be given for both AGST 4011 and AGST 5031. (Typically offered: Fall and Spring)

AGST 504V. Special Topics. 1-4 Hour.

Topics not covered in other courses or a broader-based study of specific topics in statistics and related areas. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

AGST 5713. Applied Regression Analysis for Agricultural Sciences. 3 Hours.

Analysis of agricultural experiments which contain quantitative factors through regression procedures. Lecture 3 hours per week. Prerequisite: ((AGST 4011 or AGST 5031 (formerly AGST 4011)) and ((AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 4003). (Typically offered: Fall)

Agriculture, Food and Life Sciences (AFLS) Courses

AFLS 1023H. Bumpers College Honors Program Perspectives. 3 Hours.

This course is intended to meet the requirements of UNIV 1001 and provide Bumpers College Honors students with an overview of the Honors Program as well as provide insight into research and creative project development and expectations. Pre- or Corequisite: Honors standing. (Typically offered: Fall)

AFLS 1600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

AFLS 2600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

AFLS 3413H. Honors Proposal Development and Research Methods. 3 Hours.

This course will include creative process, ethics, proposal writing, literature review, qualitative and quantitative/experimental design, scientific theory and methods, data collection, and analysis. At the end of this course, students will have developed a proposal for their Honors thesis. The course also offers an opportunity for students to present their proposals orally as preparation for their proposal meeting. Prerequisite: Sophomore, junior or senior standing. (Typically offered: Fall and Spring)

AFLS 3600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

AFLS 3993. Professional Growth and Critical Career Skills. 3 Hours.

The MERIT Profile will be utilized to identify students behavioral and character profiles so they may "know themselves" based upon strengths and tendencies. Throughout the term, students will be engaged in topics to help them identify their core values and strengths and develop their weaknesses. Course topics will include; adjusting to mistakes, cast off the negatives, verifying your values, scheduling priorities, building character, framing decisions/choices, personal improvement plans, and more. Upon course completion students should be able to utilize personal leadership approaches, strategic thinking and behavior, critical thinking and problem identification techniques and verbal and written communication to effectively convey their suitability specific feasible careers. Prerequisite: Junior standing. (Typically offered: Fall)

AFLS 400VH. Honors Thesis. 1-6 Hour.

(Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

AFLS 401V. Special Topics in AFLS. 1-6 Hour.

Studies of selected topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

AFLS 401VH. Honors Special Topics. 1-6 Hour.

Studies of selected topics not covered in other courses. Must be in the Honors program to register for this course. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

This course is equivalent to AFLS 401V.

AFLS 403V. Special Problems. 1-6 Hour.

Individual study or research for advanced undergraduates. Corequisite: Instructor consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

AFLS 403VH. Honors Special Problems. 1-6 Hour.

Individual study or research for advanced undergraduates. Corequisite: Instructor consent and honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

AFLS 4600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

AFLS 501V. Special Topics. 1-3 Hour.

Studies of selected topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Air Force ROTC (AERO) Courses

AERO 1011. Heritage and Values of the United States Air Force I. 1 Hour.

A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Leadership LAB mandatory for cadets. Corequisite: Lab component. (Typically offered: Fall)

AERO 1021. Heritage and Values of the United States Air Force II. 1 Hour.

A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force. Leadership LAB mandatory for cadets. Corequisite: Lab component. (Typically offered: Spring)

AERO 2011. Team and Leadership Fundamentals I. 1 Hour.

This course focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The course will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Corequisite: Lab component. (Typically offered: Fall)

AERO 2021. Team and Leadership Fundamentals II. 1 Hour.

This course focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The course will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset and to motivate sophomore students to transition from AFROTC cadet to AFROTC officer candidate. Prerequisite: AERO 2011. Corequisite: Lab component. (Typically offered: Spring)

AERO 3013. Leading People and Effective Communication I. 3 Hours.

This course teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Corequisite: Lab component. (Typically offered: Fall)

AERO 3023. Leading People and Effective Communication II. 3 Hours.

This course teaches cadets advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Cadets have an opportunity to try out these leadership and management techniques in a supervised environment as juniors and seniors. Corequisite: Lab component. (Typically offered: Spring)

AERO 4013. National Security Affairs and Preparation for Active Duty I. 3 Hours.

This course is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. Corequisite: Lab component. (Typically offered: Fall)

AERO 4023. National Security Affairs and Preparation for Active Duty II. 3 Hours.

This course is designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the cadets for Active Duty. Corequisite: Lab component. (Typically offered: Spring)

Animal Science (ANSC) Courses

ANSC 1001L. Introductory to Animal Sciences Laboratory. 1 Hour.

Study of facilities used in production, processing, and management in animal agriculture. Identification, selection evaluation and testing of livestock, meat, and milk. Laboratory 3 hours per week. (Typically offered: Fall and Spring)

ANSC 1032. Introductory Animal Sciences. 2 Hours.

Students will be introduced to biological sciences associated with modern systems of care and management of livestock. Foundation sciences include topics in genetics, growth and development, physiology, nutrition, animal health, and animal behavior. (Typically offered: Fall and Spring)

ANSC 1032H. Honors Introductory Animal Sciences. 2 Hours.

Students will be introduced to biological sciences associated with modern systems of care and management of livestock. Foundation sciences include topics in genetics, growth and development, physiology, nutrition, animal health, and animal behavior. Fall and spring semester. (Typically offered: Fall and Spring)
This course is equivalent to ANSC 1032.

ANSC 1041. Introduction to Companion Animal Industry. 1 Hour.

The importance of companion animals and their allied industries will be discussed. Application of scientific principles to the care and management of companion animals, specifically dogs, cats and horses, will be emphasized. Course will meet first eight weeks of the fall and spring semesters. (Typically offered: Fall and Spring)

ANSC 1051. Introduction to the Livestock Industry. 1 Hour.

The importance of livestock and their allied industries will be discussed. Application of scientific principles to the care and management of livestock, specifically beef and dairy cattle, swine, sheep, and goats will be emphasized. Meets second eight weeks for fall and spring. (Typically offered: Fall and Spring)

ANSC 1062. Sustainable Integrated Small Animal Farming. 2 Hours.

Practical information on small scale animal production, including practical strategies for farm planning, issues of economic and environmental sustainability, best management practices, biosecurity, disease prevention, and farm safety will be presented. (Typically offered: Spring)
This course is cross-listed with POSC 1062.

ANSC 1123. The Animals in our Lives. 3 Hours.

Address the controversies and focus on animal welfare, environmental issues and sustainability. (Typically offered: Summer)
This course is cross-listed with POSC 1123.

ANSC 2003. Introduction to Equine Industry. 3 Hours.

Examination of careers and business opportunities in the equine industry. Students will gain the opportunity to identify high quality horses through evaluation of conformation and locomotion. Students will also gain skill at oral presentation and be knowledgeable of costs and responsibilities associated with horse ownership. (Typically offered: Spring)

ANSC 2213. Behavior of Domestic Animals. 3 Hours.

Behavior associated with domestication. Effects of selective breeding, physical and social environments, and developmental stage on social organization, aggressive behavior, sexual behavior, productivity, and training of domestic animals. (Typically offered: Fall)

ANSC 2252L. Introduction to Livestock and Meat Evaluation. 2 Hours.

Develop an understanding between live animal evaluation and carcass composition. Comparative judging including meat evaluation, classification and selection of beef cattle, sheep and swine. (Typically offered: Spring)

ANSC 2303L. Introduction to Horsemanship. 3 Hours.

A study of modern horsemanship training techniques involving the psychology and ethology (reason for the behavior) of equine social behavior and how it pertains to learning patterns; application of fundamental behavioral concepts in training of horses, and modification of desirable and undesirable behavioral patterns. Prerequisite: Instructor consent. (Typically offered: Fall and Spring)

ANSC 2781. Career Preparation and Development. 1 Hour.

The importance of preparing for a career in the animal sciences and industries will be covered. (Typically offered: Fall)

ANSC 3003. Applied Animal Parasitology. 3 Hours.

The economically important parasites of domestic animals with emphasis on their host relationships and management considerations. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall and Spring Even Years)

ANSC 3013. Parasitisms of Domesticated Non-Herbivores. 3 Hours.

Course will provide applied instruction and appreciation for the parasitisms of our domesticated swine, chickens, turkeys, dogs and cats. (Typically offered: Fall; Spring Odd Years)

ANSC 3032. Animal Physiology I. 2 Hours.

Fundamental aspects of neural/muscle/bone tissues and the cardiovascular system. The normal structure and functions of these systems will be emphasized. Lecture 2 hours per week. Prerequisite: BIOL 1543 and (CHEM 1123 or CHEM 1073). (Typically offered: Fall)
This course is cross-listed with POSC 3032.

ANSC 3032H. Honors Animal Physiology I. 2 Hours.

Fundamental aspects of neural/muscle/bone tissues and the cardiovascular system. The normal structure and functions of these systems will be emphasized. Lecture 2 hours per week. Prerequisite: BIOL 1543 and (CHEM 1123 or CHEM 1073). (Typically offered: Fall)
This course is cross-listed with ANSC 3032, POSC 3032.

ANSC 3042. Animal Physiology II. 2 Hours.

Fundamental aspects of renal, respiratory, digestive, and endocrine physiology will be covered. The normal structure and function of these systems will be emphasized. Lecture 2 hours per week. Prerequisite: BIOL 1543 and CHEM 1123 or CHEM 1073. (Typically offered: Spring)
This course is cross-listed with POSC 3042.

ANSC 3072. Equine Selection and Evaluation. 2 Hours.

Students will learn criteria for evaluation and selection of breeding and show animals and will gain expertise in the evaluation of breed types and show ring characteristics. Includes field trips to various breed operations. Students in this class will be well prepared to participate in equine judging team activities. Prerequisite: Instructor consent. (Typically offered: Spring)

ANSC 3123. Principles of Genetics. 3 Hours.

Fundamentals of heredity, with special emphasis on the improvement of farm animals. Lecture 3 hours per week. Prerequisite: BIOL 1543 and MATH 1203 or higher. (Typically offered: Fall)
This course is cross-listed with POSC 3123.

ANSC 3133. Animal Breeding and Genetics. 3 Hours.

Application of the principles of genetics to the breeding of farm animals. Lecture 3 hours per week. Corequisite: Drill component. Prerequisite: MATH 1203 or higher. (Typically offered: Spring)

ANSC 3143. Principles of Animal Nutrition. 3 Hours.

Scientific approach to animal nutrition involving the mechanisms through which feed nutrients are utilized by farm animals. Lecture 3 hours per week. Prerequisite: ANSC 1032. (Typically offered: Spring)

ANSC 3151L. Applied Animal Nutrition Laboratory. 1 Hour.

Practical approach to animal nutrition; use of various methods of feedstuff evaluation and ration balancing for domestic animals. Laboratory 2 hours per week. Corequisite: ANSC 3152. Prerequisite: ANSC 3143 and MATH 1203. (Typically offered: Fall)

ANSC 3152. Applied Animal Nutrition. 2 Hours.

Practical approach to animal nutrition; physical and chemical composition of feedstuffs, feed processing and preparation, nutrient interactions, and application of nutritional principles to feeding domestic animals. Lecture 2 hours per week. Corequisite: ANSC 3151L. Prerequisite: ANSC 3143 and MATH 1203. (Typically offered: Fall)

ANSC 3282. Livestock Judging and Selection. 2 Hours.

Comparative judging, including grading, classification, and selection of beef cattle, swine, sheep and horses. Oral and written discussion. Laboratory 6 hours per week. Prerequisite: ANSC 1032 or ANSC 2252L. (Typically offered: Fall)

ANSC 3291. Livestock Junior Judging Team Activity. 1 Hour.

Training for membership on judging teams, through participation. (Typically offered: Spring)

ANSC 3333. Diseases of Livestock. 3 Hours.

Introductory study of the diseases of farm animals with emphasis on fundamental principles of disease, body defense mechanisms, hygiene, and sanitation. Prerequisite: BIOL 1543. (Typically offered: Spring)

ANSC 3433. Fundamentals of Reproductive Physiology. 3 Hours.

Principles of mammalian reproductive physiology with emphasis on farm animals. Lecture 3 hours per week. Pre- or Corequisite: ((CHEM 1073 and CHEM 1071L) or (CHEM 1123 and CHEM 1121L) or (CHEM 2613 and CHEM 2611L) or (CHEM 3603 and CHEM 3601L)) and ANSC 2252L and ANSC 2781 and BIOL 2013 and BIOL 2011L. Prerequisite: BIOL 1543. (Typically offered: Fall)

ANSC 3491L. Artificial Insemination in Cattle. 1 Hour.

Experience with artificial insemination technique in cattle including estrus detection, semen storage and handling, insemination equipment maintenance and technique. Laboratory 4 hours per week. The course is offered the second 8 weeks of the spring semester. Prerequisite: ANSC 3433 or instructor consent. (Typically offered: Spring)

ANSC 3513. Current Approaches in Agricultural Laboratory Research. 3 Hours.

A laboratory course to introduce students to current laboratory research techniques used in agricultural and life sciences. Hands-on laboratory exercises will emphasize current cellular and molecular research techniques, laboratory notebook keeping, data interpretation, and presentation of results. Prerequisite: BIOL 1543. (Typically offered: Spring Even Years)

ANSC 3613. Meat Science. 3 Hours.

The study of meat science and muscle biology. Topics will include animal/tissue growth and development and the relationship to meat quality. Meat processing, preservation, and meat safety concerns will also be considered. Lecture 3 hours per week. Prerequisite: CHEM 2613 or CHEM 3603. (Typically offered: Fall)

ANSC 3723. Horse and Livestock Merchandising. 3 Hours.

Various types of merchandising programs for specific livestock enterprises will be presented. Students will evaluate the effectiveness of merchandising programs including how to organize, advertise, and manage a purebred auction sale of livestock. (Typically offered: Fall)

ANSC 3753. Equine Assisted Activities and Therapies. 3 Hours.

Animal Science 3753 introduces students to the field of equine assisted activities and therapies. A variety of approaches, therapeutic settings and client populations will be addressed with an emphasis on equine behavior. Students will gain experience in the practical application of an equine assisted therapy program. (Typically offered: Fall)

ANSC 400V. Special Problems. 1-6 Hour.

Special problems in the animal sciences for advanced undergraduate students. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANSC 401V. Internship in Animal Sciences. 1-6 Hour.

Supervised work experience with private or government organizations Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANSC 4072. Advanced Equine Selection and Evaluation. 2 Hours.

Advanced evaluation and selection of breeding and show animals, evaluation of breed types and show characteristics. Field trips to breeding operations. Competitive Judging team members come from this course and participation in competitive events will be required. Prior equine evaluation is not necessary, but instructor consent is required. Some Saturday activities. Prerequisite: ANSC 3072 or instructor consent. (Typically offered: Fall)

ANSC 410V. Special Topics in Animal Sciences. 1-4 Hour.

Topics not covered in other courses or a more intensive study of specific topics in animal sciences. (Typically offered: Irregular) May be repeated for degree credit.

ANSC 410VH. Honors Special Topics in Animal Sciences. 1-4 Hour.

Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for degree credit.

ANSC 4123. Legal Issues in Animal Agriculture. 3 Hours.

An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation- from local to state to federal, depending on the issue- will be studied and discussed. (Typically offered: Spring Odd Years)
This course is cross-listed with AGECE 4123, POSC 4123.

ANSC 4142. Advanced Animal Handling Techniques. 2 Hours.

This course is designed to familiarize students with handling techniques of a variety of animals, including cattle, sheep, horses, pigs, dogs, and others. Students will learn and practice handling, restraint, and common husbandry procedures with a variety of domestic species. The course will provide valuable preparation for careers in livestock management, vet medicine, animal-based research, and other fields in animal science. Prerequisite: Junior standing or consent. (Typically offered: Fall and Spring)

ANSC 4163. Companion Animal Nutrition. 3 Hours.

This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring)

This course is cross-listed with POSC 4163.

ANSC 4173. Thoroughbred Horse Industry. 3 Hours.

This course is designed to give you an overview of the Thoroughbred breed and industry. Students will gain an understanding of the Thoroughbred industry, its history, and modern practices. Students will also gain an understanding of career potential in the Thoroughbred industry. Prerequisite: Instructor consent and Junior or Senior standing. (Typically offered: Spring Odd Years)

ANSC 4252. Cow-Calf Management. 2 Hours.

Systems of cow-calf management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Prerequisite: AFLS BSA students with ANSC 1032 and Junior standing or higher. (Typically offered: Fall)

ANSC 4262. Swine Production. 2 Hours.

Methods in producing purebred and commercial swine with specific emphasis on the management programs needed for profitable pork production in Arkansas. Pre- or Corequisite: AFLS BSA students with ANSC 1032 and Junior standing or higher. (Typically offered: Fall Even Years)

ANSC 4272. Sheep Production. 2 Hours.

Purebred and commercial sheep management emphasizing the programs of major importance in lamb and wool production in Arkansas. Prerequisite: AFLS BSA students with ANSC 1032 and Junior standing or higher. (Typically offered: Spring Odd Years)

ANSC 4283. Horse Production. 3 Hours.

Production, use and care of horses and ponies including breeding, feeding, handling, and management. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: Junior standing or higher. (Typically offered: Spring)

ANSC 4291. Livestock Senior Judging Team Activity. 1 Hour.

Training for membership on judging teams, through participation. (Typically offered: Fall)

ANSC 4303. Comparative Veterinary Anatomy. 3 Hours.

Study of structures and principles of anatomy of major domestic species. The dog, horse, and cow will be used as models for anatomical structures and the application of anatomical knowledge in animal science; focus on veterinary applications. 3 hours of lecture each week. Spring semesters. Corequisite: Lab component. Prerequisite: ANSC 1032 or BIOL 1543, junior standing or instructor consent. (Typically offered: Spring)

ANSC 4452. Milk Production. 2 Hours.

Principles of breeding, feeding, and management of dairy cattle will be studied. Prerequisite: AFLS BSA students with ANSC 1032 and Junior standing or higher. (Typically offered: Spring)

ANSC 4482. Companion Animal Management. 2 Hours.

The study and application of principles of domestication, nutrition, reproduction, parasitology, diseases, behavior, and husbandry management to companion animals. Dogs, cats, and exotic animals will be the species of primary interest. Practical problems of care and management of these species will be solved. Prerequisite: BIOL 1543 or equivalent or consent of instructor. (Typically offered: Fall)

ANSC 4552. Forage-Ruminant Relations. 2 Hours.

Chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake, digestion, behavior, and nutrient cycling at the plant-animal interface. CSES 1203 recommended. Prerequisite: ANSC 3143. (Typically offered: Spring Odd Years)

ANSC 4652. Stocker-Feedlot Cattle Management. 2 Hours.

Production and management systems for stocker and feed-lot cattle including practical applications of forage systems, feeding, health management and economics of production of these livestock. Prerequisite: AFLS BSA students with ANSC 1032 and Junior standing or higher. (Typically offered: Spring)

ANSC 4923. Brain & Behavior. 3 Hours.

Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory systems and the autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3032 or POSC 3032) or (ANSC 3042 or POSC 3042) or PSYC 2003 or BIOL 2213 or BIOL 2443 or BIOL 2533. (Typically offered: Fall)

This course is cross-listed with POSC 4923.

ANSC 500V. Special Problems. 1-6 Hour.

Work in special problems of animal industry. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANSC 5013. Domestic Animal Energetics. 3 Hours.

Physical, physiological and biochemical aspects of energy metabolism of domestic animals and their applications to livestock production. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

ANSC 5023. Legal Issues in Animal Agriculture. 3 Hours.

(Formerly ANSC 4123.) An issues-oriented course focusing on the legal issues involved in the production of poultry, swine and livestock. Emphasis will center on the laws, regulations and policy arguments involved in animal confinement, antibiotic use, humane slaughter and veterinary medicine, along with other related issues. The wide range of regulation- from local to state to federal, depending on the issue- will be studied and discussed. Graduate degree credit will not be given for both ANSC 4123 and ANSC 5023. (Typically offered: Spring Odd Years)

ANSC 5052. Cow-Calf Management. 2 Hours.

(Formerly ANSC 4252.) Systems of cow-calf management including the practical application of the principles of breeding, feeding, and management to commercial and purebred beef cattle under Arkansas conditions. Graduate degree credit will not be given for both ANSC 4252 and ANSC 5052. (Typically offered: Fall)

ANSC 510V. Special Topics in Animal Sciences. 1-4 Hours.

Topics not covered in other courses or a more intensive study of specific topics in animal sciences. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

ANSC 5123. Advanced Animal Genetics. 3 Hours.

Specialized study of animal genetics. Lecture 3 hours per week. Prerequisite: ANSC 3123. (Typically offered: Fall Even Years)

This course is cross-listed with POSC 5123.

ANSC 5133. Quantitative Inheritance. 3 Hours.

Advanced study of the genetic basis of variation and the genetic control of quantitative traits in populations. Lecture 3 hours per week. Prerequisite: ANSC 3133. (Typically offered: Spring Odd Years)

ANSC 5143. Biochemical Nutrition. 3 Hours.

Interrelationship of nutrition and physiological chemistry; structure and metabolism of physiological significant carbohydrates, lipids, and proteins; integration of metabolism with provision of tissue fuels; specie differences in regulatory control of tissue and whole body metabolism of nutrients. Prerequisite: CHEM 3813. (Typically offered: Fall Even Years)

This course is cross-listed with POSC 5143.

ANSC 5152. Protein and Amino Acid Nutrition. 2 Hours.

Students will be introduced to the basic processes of protein digestion, amino acid absorption, transport, metabolism, and utilization along with how biochemical function of proteins and their dynamic state affect nutritional status for animals and man. Prerequisite: CHEM 3813. (Typically offered: Spring Even Years)

This course is cross-listed with POSC 5152.

ANSC 5163. Companion Animal Nutrition. 3 Hours.

This course is designed to focus on the digestive anatomy, physiology, and nutrient metabolism of non-herbivorous companion animals, primarily dogs and cats. Topics discussed will also include an overview of the pet food industry, its regulations and commonly utilized ingredients. Students will gain a deeper understanding of nutrition as it relates to life stages and various disease states that can affect both dogs and cats. This course will require a Saturday trip to one or two off campus facilities.

Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Spring)

This course is cross-listed with POSC 5163.

ANSC 5253. Advanced Livestock Production. 3 Hours.

Comprehensive review of recent advances in research relative to the various phases of livestock production. (Typically offered: Irregular)

ANSC 5262. Swine Production. 2 Hours.

(Formerly ANSC 4262.) Methods in producing purebred and commercial swine with specific emphasis on the management programs needed for profitable pork production in Arkansas. Graduate degree credit will not be given for both ANSC 4262 and ANSC 5262. (Typically offered: Fall Even Years)

ANSC 5272. Sheep Production. 2 Hours.

(Formerly ANSC 4272.) Purebred and commercial sheep management emphasizing the programs of major importance in lamb and wool production in Arkansas.

Graduate degree credit will not be given for both ANSC 4272 and ANSC 5272.

(Typically offered: Spring Odd Years)

ANSC 5283. Horse Production. 3 Hours.

(Formerly ANSC 4283.) Production, use and care of horses and ponies including breeding, feeding, handling, and management. Lecture 2 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both ANSC 4283 and ANSC 5283. Corequisite: Lab component. (Typically offered: Spring)

ANSC 5452. Milk Production. 2 Hours.

(Formerly ANSC 4452.) Principles of breeding, feeding, and management of dairy cattle will be studied. Graduate degree credit will not be given for both ANSC 4452 and ANSC 5452. (Typically offered: Spring)

ANSC 5482. Companion Animal Management. 2 Hours.

(Formerly ANSC 4482.) The study and application of principles of domestication, nutrition, reproduction, parasitology, diseases, behavior, and husbandry management to companion animals. Dogs, cats, and exotic animals will be the species of primary interest. Practical problems of care and management of these species will be solved. Graduate degree credit will not be given for both ANSC 4482 and ANSC 5482. Prerequisite: BIOL 1543 or equivalent or consent of instructor.

(Typically offered: Fall)

ANSC 5553. Forage-Ruminant Relations. 3 Hours.

Advanced chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake and digestion, and techniques of measuring forage utilization and systems analysis at the plant-animal interface. Lecture 3 hours per week. CSES 1203 recommended. Prerequisite: ANSC 3143. (Typically offered: Spring Odd Years)

This course is cross-listed with CSES 5553.

ANSC 5652. Stocker-Feedlot Cattle Management. 2 Hours.

(Formerly ANSC 4652.) Production and management systems for stocker and feed-lot cattle including practical applications of forage systems, feeding, health management and economics of production of these livestock. Graduate degree credit will not be given for both ANSC 4652 and ANSC 5652. (Typically offered: Spring)

ANSC 5743L. Advanced Analytical Methods in Animal Sciences Laboratory. 3 Hours.

Introduction into theory and application of current advanced analytical techniques used in animal research. Two 3-hour laboratory periods per week. (Typically offered: Fall)

This course is cross-listed with POSC 5743L.

ANSC 5853. Advanced Meats Technology. 3 Hours.

An intensive study of processed meats, relating the science, technology, and quality of further processed meat and poultry products. Product development, sensory and chemical analysis, microbiology, nutritional aspects, and product labeling are covered. Prerequisite: POSC 4314 or ANSC 3613. (Typically offered: Spring Even Years)

ANSC 5901. Seminar. 1 Hour.

Critical review of the current scientific literature pertaining to the field of animal science. Oral reports. Lecture 1 hour per week. Prerequisite: Senior standing. (Typically offered: Fall)

ANSC 5923. Brain & Behavior. 3 Hours.

Covers cellular through neural systems, major brain functions and comparative neuroanatomy. Topics include ion channels, membrane and action potentials, synaptic integration, neurotransmitters, major brain regions of mammals and birds, sensory systems and the autonomic nervous systems, neuroendocrine system, and control by the brain of critical functions and behavior. Lecture 3 hours per week. Prerequisite: (ANSC 3032 or POSC 3032) or (ANSC 3042 or POSC 3042) or PSYC 2003 or BIOL 2213 or BIOL 2443 or BIOL 2533. (Typically offered: Fall)

This course is cross-listed with POSC 5923.

ANSC 5932. Cardiovascular Physiology of Domestic Animals. 2 Hours.

Cardiovascular physiology, including mechanisms of heart function and excitation, and blood vessel mechanisms associated with the circulatory system in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component.

Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Fall)

This course is cross-listed with POSC 5932.

ANSC 5942. Endocrine Physiology of Domestic Animals. 2 Hours.

Endocrine physiology, including mechanisms of hormone secretion, function, and regulation. Mechanisms associated with the endocrine system will be discussed for domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (or first 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042).

(Typically offered: Fall)

This course is cross-listed with POSC 5942.

ANSC 5952. Respiratory Physiology of Domestic Animals. 2 Hours.

Respiratory physiology, including mechanisms of lung function and gas exchange. Mechanisms associated with the interaction of the respiratory system with other bodily systems in domestic animals and poultry will be discussed. Lecture 3 hours; drill 1 hour per week for first 8 weeks of semester. Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Spring)
This course is cross-listed with POSC 5952.

ANSC 5962. Gastrointestinal/Digestive Physiology of Domestic Animals. 2 Hours.

Gastrointestinal and hepatic physiology, including mechanisms of digestion, absorption of nutrients with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Fall)
This course is cross-listed with POSC 5962.

ANSC 5972. Renal Physiology. 2 Hours.

Renal physiology, including mechanisms of renal clearance with emphasis on cellular control mechanisms in domestic animals and poultry. Lecture 3 hours; drill 1 hour per week (for second 8 weeks of semester). Pre- or Corequisite: CHEM 3813. Corequisite: Drill component. Prerequisite: (POSC 3032 or ANSC 3032) and (POSC 3042 or ANSC 3042). (Typically offered: Spring)
This course is cross-listed with POSC 5972.

ANSC 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ANSC 6123. Advanced Food Animal Wellbeing. 3 Hours.

Advances in fundamentals of animal welfare including animal health, animal handling, food safety and productivity. Prerequisite: ANSC 2213 or BIOL 4833 or instructor consent. (Typically offered: Spring)
This course is cross-listed with POSC 6123.

ANSC 6143. Minerals in Animal Nutrition. 3 Hours.

Mineral nutrients, their sources and functions, as related to nutrition of domestic animals. Lecture 3 hours per week. Prerequisite: ANSC 3143 or POSC 4343. (Typically offered: Fall; Spring Even Years)

ANSC 6243. Ruminant Nutrition. 3 Hours.

Anatomy and physiology of the rumen. The nutrient requirements of microbial organisms and the relation of microbial digestion in the rumen to the nutrition of cattle, sheep and other ruminants. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)

ANSC 6343. Vitamin Nutrition in Domestic Animals. 3 Hours.

The vitamins required by domestic animals with emphasis upon their role in animal nutrition, physiological functions, and consequences of failure to meet the requirement of the animal. Lecture 3 hours per week. Prerequisite: ANSC 3143 (or POSC 4343) and CHEM 3813. (Typically offered: Spring Even Years)
This course is cross-listed with POSC 6343.

ANSC 6833. Reproduction in Domestic Animals. 3 Hours.

Comprehensive review of current theory of reproductive function in domestic animals. Lecture 3 hours per week. Prerequisite: ANSC 3433. (Typically offered: Spring Even Years)

ANSC 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Anthropology (ANTH) Courses

ANTH 1011L. Introduction to Biological Anthropology Laboratory. 1 Hour.

Laboratory exercises illustrating concepts of physical anthropology. Corequisite: ANTH 1013. (Typically offered: Fall)

ANTH 1011M. Honors Introduction to Biological Anthropology Laboratory. 1 Hour.

Laboratory exercises illustrating concepts of physical anthropology. Corequisite: ANTH 1013. (Typically offered: Fall)
This course is equivalent to ANTH 1011L.

ANTH 1013. Introduction to Biological Anthropology. 3 Hours.

An introduction to the field of physical anthropology using human evolution as a unifying concept. Areas include human genetics, race, speciation, primate evolution, and human variation and adaptation. Corequisite: ANTH 1011L. (Typically offered: Spring and Summer)

ANTH 1013H. Honors Introduction to Biological Anthropology. 3 Hours.

An introduction to the field of physical anthropology using human evolution as a unifying concept. Areas include human genetics, race, speciation, primate evolution, and human variation and adaptation. Corequisite: ANTH 1011M. (Typically offered: Fall)
This course is equivalent to ANTH 1013.

ANTH 1023. Introduction to Cultural Anthropology (ACTS Equivalency = ANTH 2013). 3 Hours.

Introduction to the nature of culture and its influence on human behavior and personality; comparative study of custom, social organization, and processes of change and integration of culture. Corequisite: Drill component. (Typically offered: Fall, Spring and Summer)

ANTH 1023H. Honors Introduction to Cultural Anthropology. 3 Hours.

Introduction to the nature of culture and its influence on human behavior and personality; comparative study of custom, social organization, and processes of change and integration of culture. (Typically offered: Fall and Spring)
This course is equivalent to ANTH 1023.

ANTH 1033. Introduction to Archaeology. 3 Hours.

Archaeology studies the human past through contextual analysis of artifacts, archaeological sites, and landscapes. This course introduces archaeological methods and theories, significant discoveries and current debates in the discipline. Corequisite: Lab component. (Typically offered: Fall and Spring)

ANTH 2013. Introduction to Latin American Studies. 3 Hours.

This course provides an interdisciplinary introduction to Latin America. Drawing on Latin American literature, history, sociology, and political science, the course examines the broad forces that have shaped the region. (Typically offered: Irregular)

ANTH 3003. World Prehistory. 3 Hours.

Survey of the prehistoric and early historic cultures of the Americas, Asia, and Africa. (Typically offered: Irregular)

ANTH 3023. Approaches to Archeology. 3 Hours.

Study of the field of archeology including method, theory, analysis and interpretation with substantive worldwide examples. Prerequisite: ANTH 1033. (Typically offered: Spring)

ANTH 3033. Egyptology. 3 Hours.

Explores multiple aspects of Ancient Egyptian civilization including chronology, art, religion, literature and daily life. Prerequisite: Junior standing. (Typically offered: Irregular)

ANTH 3043. Bones, Bodies, and Brains in Evolutionary Perspective. 3 Hours.

This course will review the anatomy of the human body, comparing this anatomy with primates, mammals, and vertebrates, and it will consider how the major features of the human body emerged throughout evolution. (Typically offered: Irregular)

This course is cross-listed with BIOL 3043.

ANTH 3123. The Anthropology of Religion. 3 Hours.

An exploration of rituals, symbols, and rules that shape religious life. Religion is viewed broadly, considering activities that invoke powers beyond the reach of ordinary senses. Examining a variety of cultures, we explore what people say and do as they participate in activities such as magic, healing, pilgrimage, and contemporary religious movements. (Typically offered: Spring)

ANTH 3143. Language and Expressive Culture. 3 Hours.

This course explores the complex interrelationship of language, culture, and social identity. Verbal art and expressive culture are examined from a variety of anthropological perspectives. Topics include ethnographies of speaking, discourse analysis, cultural performances, and the performative aspects of oral expression. (Typically offered: Irregular)

This course is cross-listed with ENGL 3143, COMM 3143.

ANTH 3163. Male and Female: A Cultural and Biological Overview. 3 Hours.

A comparative study of male and female roles in culture in relation to human biology and socialization. (Typically offered: Fall)

ANTH 3173. Introduction to Linguistics. 3 Hours.

Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages reveal linguistic universals as well as phonological, syntactic, and semantic systems of individual languages. Related topics: language history, dialectology, language and its relation to culture and society, the history of linguistic scholarship. Prerequisite: Junior standing. (Typically offered: Irregular)

This course is cross-listed with COMM 3173, ENGL 3173, WLLC 3173.

ANTH 3213. Indigenous Peoples of North America: Anthropological Perspectives. 3 Hours.

An exploration of indigenous societies and cultures of North America from an anthropological perspective. Using examples from diverse Native Nations from the time of European contact to the present, we will examine colonialism and resistance, indigenous cosmologies, memory culture and oral tradition, and the politics of representation. (Typically offered: Irregular)

ANTH 3263. Indians of Arkansas and the South. 3 Hours.

Study of the traditional lifeways and prehistoric backgrounds of Indians living in the Southern United States, including Arkansas. (Typically offered: Spring Odd Years)

ANTH 3421L. Human Osteology Laboratory. 1 Hour.

Laboratory exercises illustrating concepts of human osteology. Corequisite: ANTH 3423. (Typically offered: Spring)

ANTH 3423. Human Osteology. 3 Hours.

Study of the human skeleton, identification of bones, allometric growth, sexual dimorphism, osteological genetic inheritance and environmental stresses. Lectures and demonstration. Corequisite: ANTH 3421L. (Typically offered: Spring)

ANTH 3433. Human Evolution. 3 Hours.

A study of hominid evolution from origin to the present, including trends in comparative primate evolution and functional development of human form as a result of cultural and biological interaction. (Typically offered: Fall)

ANTH 3443. Criminalistics: Forensic Sciences. 3 Hours.

Introduction to forensics focused on the scientific analysis of physical and biological evidence encountered in criminal investigations. Chemical, microscopic, biological, and observational techniques employed in the analysis of material evidence are described, discussed, and illustrated within an investigative framework. Topics include inorganic remains, fiber, tissue, human identification, fingerprints, tools, and weapons. (Typically offered: Irregular)

ANTH 3473. North American Prehistory. 3 Hours.

Survey of the aboriginal prehistory of the North American Continent north of Mexico. (Typically offered: Irregular)

ANTH 3503. Power and Popular Protest in Latin America. 3 Hours.

This course focuses on the historical formation of Latin America by examining conflicts between the region's rich and poor. It includes both an historical perspective on the formation of ethnic, gender, and class relations in Latin America, and a discussion of contemporary social problems. (Typically offered: Irregular)

ANTH 3523. Gender and Politics in Latin America. 3 Hours.

This course examines the ways in which political struggles surrounding land, labor, and the environment have been shaped by gender relations in Latin America. Why and how do peasant-workers engage their political worlds and how are such struggles shaped by gender? (Typically offered: Irregular)

ANTH 3533. Medical Anthropology. 3 Hours.

Survey of the interrelationship of human biology, culture and environment as reflected in disease experience from an evolutionary and cross cultural perspective. Special emphasis on stress. (Typically offered: Irregular)

ANTH 3543. Geospatial Applications and Information Science. 3 Hours.

An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. (Typically offered: Fall and Spring)

This course is cross-listed with GEOS 3543.

ANTH 3553. Religion in Latin America. 3 Hours.

Examines contemporary implications of Latin America's unique religious heritage. An exploration of multiple Latin American religious traditions, with sustained focus on key theoretical concerns: conversion, vernacular vs. orthodox expressions, the blending of indigenous and European cosmologies, devotion and ritual, and the articulation of ethnic, gendered, and religious identities. (Typically offered: Irregular)

ANTH 3563. Culture and Medicine. 3 Hours.

Study of health and medicine within cultural contexts, including attention to cross-cultural healers and healing systems. Special emphasis on biomedicine as a cultural system. (Typically offered: Irregular)

ANTH 3573. Ballroom Culture and Performance in the West. 3 Hours.

This course focuses on competitive ballroom dancing in the West, highlighting issues of spectacle, sport, art, festival, ritual, dress, performance, identity, and gender construction. (Typically offered: Irregular)

ANTH 3583. Body and Identity. 3 Hours.

This course explores personal, social and cultural constructions and performances of the body and identity, highlighting key intersections of embodiment including gender, race, sexuality and abilities. (Typically offered: Irregular)

This course is cross-listed with GNST 3583.

ANTH 3903. Topics in Anthropology. 3 Hours.

Covers a special topic or issue. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ANTH 3923H. Honors Colloquium. 3 Hours.

Covers a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in anthropology). (Typically offered: Irregular) May be repeated for degree credit.

ANTH 399VH. Honors Thesis. 1-6 Hour.

Honors thesis. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

ANTH 4013. History of Anthropological Thought. 3 Hours.

Detailed consideration of anthropological theory through study of its historical development. The research paper in this course fulfills the Fulbright College research paper requirement for anthropology majors. (Typically offered: Fall)

ANTH 4033. Popular Culture. 3 Hours.

Study of national and international varieties of popular culture, including music, dance, fashion, and the media. Emphasis will be given to both ethnographic approaches, which focus on the investigation of production and consumption of cultural forms and to cultural studies approaches, which see culture as a terrain of struggle. (Typically offered: Irregular)

ANTH 4063. Women in Africa. 3 Hours.

Diversity of women's life experiences throughout sub-Saharan Africa will be examined. The class will investigate a range of topics, from marriage and motherhood to prostitution and popular culture. A historical dimension will be present throughout the course, and perspectives from literature and film will also be incorporated. (Typically offered: Irregular)

This course is cross-listed with AAST 4063.

ANTH 4073. African Sociolinguistics. 3 Hours.

Explores how language use intersects, constructs, and reflects social life in Africa. Covers key topics in sociolinguistics as they apply to current sociolinguistic issues on the African continent today. (Typically offered: Irregular)

This course is cross-listed with AAST 4073, WLLC 4073.

ANTH 4083. African Popular Culture. 3 Hours.

This class explores popular cultural expression across Africa. Topics range from hip hop and film, to second-hand clothing fashions and the media. We will consider how popular culture, while often inspired by global trends, is rooted in local circumstances and often reflects attempts to grapple with important issues. (Typically offered: Irregular)

This course is cross-listed with AAST 4083.

ANTH 4093. The Archeology of Death. 3 Hours.

Study of the analysis and interpretation of archeological mortuary remains and sites. Key archeological and anthropological sources that have influenced major theoretical developments are reviewed. (Typically offered: Irregular)

ANTH 4123. Ancient Middle East. 3 Hours.

The archeology of the ancient Middle East with emphasis upon the interaction of ecology, technology and social structure as it pertains to domestication and urbanization. (Typically offered: Irregular)

ANTH 4133. Settlement Archaeology. 3 Hours.

Focuses on the historical development of settlement archeology, the methods of site survey and discovery within regions, ecological and social theories that underlie patterns of human land use and distribution, methods of site location analysis, and descriptive and predictive site location modeling. Prerequisite: ANTH 3023. (Typically offered: Irregular)

ANTH 4143. Ecological Anthropology. 3 Hours.

Anthropological perspectives on the study of relationships among human populations and their ecosystems. (Typically offered: Irregular)

ANTH 4243. Archeology of the Midsouth. 3 Hours.

Survey of prehistoric and protohistoric cultures of the lower Mississippi Valley and adjacent regions. Prerequisite: Junior standing. (Typically offered: Irregular)

ANTH 4256. Archeological Field Session. 6 Hours.

Practical field and laboratory experiences in archeological research. (Typically offered: Summer) May be repeated for up to 12 hours of degree credit.

ANTH 4263. Identity and Culture in the U.S.-Mexico Borderlands. 3 Hours.

An exploration of the interplay between Latino/a, Mexican, Anglo, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender, from an anthropological perspective, paying special attention to the border as theoretical construct as well as material reality. (Typically offered: Irregular)

ANTH 4273. Photography for Fieldwork. 3 Hours.

This class explores the use of photographic images as both data and representational tools in anthropological research, emphasizing the ethical, theoretical, and methodological issues involved. (Typically offered: Irregular)

ANTH 4283. Survey in Ethnographic Film. 3 Hours.

Survey of the development and evolution of ethnographic film, based on class screenings to build familiarity, vocabulary, and literacy with this branch of visual anthropology. (Typically offered: Irregular)

ANTH 4353. Laboratory Methods in Archeology. 3 Hours.

Theory and practice of describing, analyzing, and reporting upon archeological materials. (Typically offered: Irregular)

ANTH 4363. Museums, Material Culture, and Popular Imagination. 3 Hours.

Museums as ideological sites and thus as sites of potential contestation produce cultural and moral systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with and through objects that are displayed. (Typically offered: Fall)

ANTH 4443. Cultural Resource Management I. 3 Hours.

Concentrated discussion of management problems relative to cultural resources, including review and interpretation of relevant federal legislation, research vs. planning needs, public involvement and sponsor planning, and assessment of resources relative to scientific needs. No field training involved; discussion will deal only with administrative, legal and scientific management problems. (Typically offered: Spring) May be repeated for degree credit.

ANTH 448V. Individual Study of Anthropology. 1-6 Hour.

Reading course for advanced students with special interests in anthropology. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANTH 4513. African Religions: Gods, Witches, Ancestors. 3 Hours.

An exploration of African religions from a variety of anthropological perspectives, exploring how religious experience is perceived and interpreted by adherents, highlighting the way in which individual and group identities are constructed, maintained and contested within religious contexts. Readings reflect the vast diversity of religious life in Africa. (Typically offered: Irregular)

ANTH 4523. Dental Science. 3 Hours.

Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology. (Typically offered: Fall)

ANTH 4533. Middle East Cultures. 3 Hours.

Study of the peoples and cultures of the Middle East; ecology, ethnicity, economics, social organizations, gender, politics, religion, and patterns of social change. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

ANTH 4553. Introduction to Raster GIS. 3 Hours.

Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. (Typically offered: Fall)

This course is cross-listed with GEOS 4553.

ANTH 4563. Vector GIS. 3 Hours.

Introduction to geographic information systems (GIS) applications in marketing, transportation, real estate, demographics, urban and regional planning, and related areas. Lectures focus on development of principles, paralleled by workstation-based laboratory exercises using mainstream GIS software and relational databases. Prerequisite: GEOS 3023 or GEOS 3543. (Typically offered: Spring)

This course is cross-listed with GEOS 4583.

ANTH 4583. Cultures of Africa. 3 Hours.

An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. (Typically offered: Fall)

This course is cross-listed with AAST 4583.

ANTH 4593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.

Introduction to navigation, georeferencing, and digital data collection using GPS and GNSS receivers, data loggers, and laser technology. Components of NavStar GLONASS, Beidou and other global positioning system are used in integration of digital information into various GIS platforms with emphasis on practical applications. Prerequisite: GEOS 3543 or ANTH 3543. (Typically offered: Spring)

This course is cross-listed with GEOS 4593.

ANTH 4603. Landscape Archaeology. 3 Hours.

This course provides an introduction to the methods and theories of landscape archaeology. Topics include archaeological survey techniques, environmental and social processes recorded in the archaeological landscape, and analysis of ancient settlement and land use data to reveal changes in population, resource utilization, and environmental relationships. (Typically offered: Fall)

ANTH 4613. Primate Adaptation and Evolution. 3 Hours.

Introduction to the biology of the order of Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Prerequisite: ANTH 1013 (or BIOL 1543 and BIOL 1541L). (Typically offered: Spring)

This course is cross-listed with BIOL 4613.

ANTH 4633. Archeological Prospecting and Remote Sensing. 3 Hours.

Ground-based geophysical, aerial, and other remote sensing methods are examined for detecting, mapping, and understanding archeological and other deposits. These methods include magnetometry, resistivity, conductivity, radar, aerial photography, thermography, and multispectral scanning. Requires computer skills, field trips, and use of instruments. (Typically offered: Irregular)

ANTH 4653. GIS Analysis and Modeling. 3 Hours.

Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. (Typically offered: Spring)

This course is cross-listed with GEOS 4653.

ANTH 4703. Mammalian Evolution and Osteology. 3 Hours.

This course will focus on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Prerequisite: ANTH 1013 and ANTH 1011L or BIOL 1543 and BIOL 1541L or instructor consent. (Typically offered: Irregular)

ANTH 4803. Historical Archeology. 3 Hours.

Review of the development of historical archeology and discussion of contemporary theory, methods, and substantive issues. Lab sessions on historic artifact identification and analysis. (Typically offered: Irregular)

ANTH 4813. Ethnographic Approaches to the Past. 3 Hours.

Review of the uses of ethnographic data in the reconstruction and interpretation of past cultures and cultural processes, with particular emphasis on the relationships between modern theories of culture and archeological interpretation. (Typically offered: Irregular)

ANTH 482V. Applied Visual Research. 1-6 Hour.

This class provides hands-on skill and training conducting visually informed fieldwork designed to help represent unique cultural settings, experience, and heritage. Pre- or Corequisite: ANTH 4273 or ANTH 4283. (Typically offered: Irregular)

ANTH 4863. Quantitative Anthropology. 3 Hours.

Introductory statistics course for anthropology students examines probability theory, nature of anthropological data, data graphics, descriptive statistics, probability distributions, test for means and variances, categorical and rank methods, ANOVA, correlation and regression. Lectures focus on theory methods; utilize anthropological data and a statistical software laboratory. (Typically offered: Irregular)

This course is cross-listed with GEOS 4863.

ANTH 4903. Seminar in Anthropology. 3 Hours.

Research, discussion, and projects focusing on a variety of topics. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ANTH 4913. Topics of the Middle East. 3 Hours.

Covers a special topic or issue. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ANTH 500V. Advanced Problems in Anthropology. 1-18 Hour.

Individual research at graduate level on clearly defined problems or problem areas. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ANTH 5043. Advanced Vector Geographic Information Systems. 3 Hours.

Advanced vector operations and analysis. Topics will include topological analysis, network analysis, geocoding, conflation, implications of source and product map scale, map generation, error mapping, and cartographic production. Prerequisite: ((ANTH 4563 or ANTH 5563 (formerly ANTH 4563)) or ((GEOS 4583 or GEOS 5583 (formerly GEOS 4583)) or equivalent. (Typically offered: Irregular)

This course is cross-listed with GEOS 5033.

ANTH 5053. Quaternary Environments. 3 Hours.

An interdisciplinary study of the Quaternary Period including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. (Typically offered: Fall)

This course is cross-listed with ENDY 5053, GEOS 5053.

ANTH 5063. Popular Culture. 3 Hours.

(Formerly ANTH 4033.) Study of national and international varieties of popular culture, including music, dance, fashion, and the media. Emphasis will be given to both ethnographic approaches, which focus on the investigation of production and consumption of cultural forms and to cultural studies approaches, which see culture as a terrain of struggle. Graduate degree credit will not be given for both ANTH 4033 and ANTH 5063. (Typically offered: Irregular)

ANTH 5093. The Archeology of Death. 3 Hours.

(Formerly ANTH 4093.) Study of the analysis and interpretation of archeological mortuary remains and sites. Key archeological and anthropological sources that have influenced major theoretical developments are reviewed. Graduate degree credit will not be given for both ANTH 4093 and ANTH 5093. (Typically offered: Irregular)

ANTH 5103. Applications of Cultural Method and Theory. 3 Hours.

Review of the nature and history of cultural anthropology; recent theories and practical implications and applications of various methods of acquiring, analyzing and interpreting cultural anthropological data. (Typically offered: Fall)

ANTH 5113. Anthropology of the City. 3 Hours.

Examines cities as both products of culture, and sites where culture is made and received. Explores the implications of several pivotal urban and cultural trends and the way in which representations of the city have informed dominant ideas about city space, function, and feel. (Typically offered: Irregular)

ANTH 5123. Ancient Middle East. 3 Hours.

(Formerly ANTH 4123.) The archeology of the ancient Middle East with emphasis upon the interaction of ecology, technology and social structure as it pertains to domestication and urbanization. Graduate degree credit will not be given for both ANTH 4123 and ANTH 5123. (Typically offered: Irregular)

ANTH 5133. Settlement Archaeology. 3 Hours.

(Formerly ANTH 4133.) Focuses on the historical development of settlement archeology, the methods of site survey and discovery within regions, ecological and social theories that underlie patterns of human land use and distribution, methods of site location analysis, and descriptive and predictive site location modeling. Graduate degree credit will not be given for both ANTH 4133 and ANTH 5133. (Typically offered: Irregular)

ANTH 5143. Ecological Anthropology. 3 Hours.

(Formerly ANTH 4143.) Anthropological perspectives on the study of relationships among human populations and their ecosystems. Graduate degree credit will not be given for both ANTH 4143 and ANTH 5143. (Typically offered: Irregular)

ANTH 5153. Topics in Anthropology. 3 Hours.

Graduate level seminar with varied emphasis on topics relating to cultural anthropology. (Typically offered: Irregular) May be repeated for degree credit.

ANTH 5203. Applications of Archeological Method and Theory. 3 Hours.

Review of the nature and history of archeology; recent theories and practical implications and applications of various methods of acquiring, analyzing, and interpreting archeological data. (Typically offered: Fall)

ANTH 5243. Archeology of the Midsouth. 3 Hours.

(Formerly ANTH 4243.) Survey of prehistoric and protohistoric cultures of the lower Mississippi Valley and adjacent regions. Graduate degree credit will not be given for both ANTH 4243 and ANTH 5243. (Typically offered: Irregular)

ANTH 5256. Archeological Field Session. 6 Hours.

(Formerly ANTH 4256.) Practical field and laboratory experiences in archeological research. Graduate degree credit will not be given for both ANTH 4256 and ANTH 5256. (Typically offered: Summer)

ANTH 5263. Indians of Arkansas and the South. 3 Hours.

Study of the traditional lifeways and prehistoric backgrounds of Indians living in the southern United States, including Arkansas. (Typically offered: Spring Odd Years)

ANTH 5273. Photography for Fieldwork. 3 Hours.

(Formerly ANTH 4273.) This class explores the use of photographic images as both data and representational tools in anthropological research, emphasizing the ethical, theoretical, and methodological issues involved. Graduate degree credit will not be given for both ANTH 4273 and ANTH 5273. (Typically offered: Irregular)

ANTH 5283. Survey in Ethnographic Film. 3 Hours.

(Formerly ANTH 4283.) Survey of the development and evolution of ethnographic film, based on class screenings to build familiarity, vocabulary, and literacy with this branch of visual anthropology. Graduate degree credit will not be given for both ANTH 4283 and ANTH 5283. (Typically offered: Irregular)

ANTH 5293. Identity and Culture in the U.S.-Mexico Borderlands. 3 Hours.

(Formerly ANTH 4263.) An exploration of the interplay between Latino/a, Mexican, Anglo, and Native American identities and cultures along the U.S.-Mexico border. Course examines identity formation, hybridity, social tension, marginalization, race and gender, from an anthropological perspective, paying special attention to the border as theoretical construct as well as material reality. Graduate degree credit will not be given for both ANTH 4263 and ANTH 5293. (Typically offered: Irregular)

ANTH 5303. Applications of Method and Theory in Biological Anthropology. 3 Hours.

Review of the nature and history of biological anthropology; recent theories and the practical implications and applications of various methods of acquiring, analyzing, and interpreting data. (Typically offered: Irregular)

ANTH 5313. Laboratory Methods in Archeology. 3 Hours.

(Formerly ANTH 4353.) Theory and practice of describing, analyzing, and reporting upon archeological materials. Graduate degree credit will not be given for both ANTH 4353 and ANTH 5313. (Typically offered: Irregular)

ANTH 535V. Topics in Physical Anthropology. 1-6 Hour.

Graduate level seminar with varied emphasis on topics relating to physical anthropology. (Typically offered: Irregular) May be repeated for degree credit.

ANTH 5363. Museums, Material Culture, and Popular Imagination. 3 Hours.

(Formerly ANTH 4363.) Museums as ideological sites and thus as sites of potential contestation produce cultural and moral systems that legitimate existing social orders. This course will focus on strategies of representation and the continuous process of negotiating social and cultural hierarchies with and through objects that are displayed. Graduate degree credit will not be given for both ANTH 4363 and ANTH 5363. (Typically offered: Fall)

ANTH 5413. Bioarcheology Seminar. 3 Hours.

Intensive coverage of bioarcheological method and theory with the context of both academic and cultural resources management research. (Typically offered: Spring Odd Years)

ANTH 5423. Human Evolutionary Anatomy. 3 Hours.

Paleobiologists reconstruct past lifeways and systematic relationships of our ancestors using comparative studies of bony morphology and associated soft tissues. This course surveys methods and theories used to infer function and phylogeny, and details relevant aspects of the anatomy of humans, living great apes, and fossil human ancestors. Prerequisite: ANTH 1013 and BIOL 1543. (Typically offered: Irregular)

This course is cross-listed with BIOL 5423.

ANTH 5443. Cultural Resource Management I. 3 Hours.

Concentrated discussion of management problems relative to cultural resources, including review and interpretation of relevant federal legislation, research vs. planning needs, public involvement and sponsor planning, and assessment of resources relative to scientific needs. No field training involved; discussion will deal only with administrative, legal, and scientific management problems. (Typically offered: Irregular)

ANTH 5473. Descriptive Linguistics. 3 Hours.

A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Fall) This course is cross-listed with WLLC 5463, ENGL 5463.

ANTH 548V. Individual Study of Anthropology. 1-6 Hour.

(Formerly ANTH 448V.) Reading course for advanced students with special interests in anthropology. Graduate degree credit will not be given for both ANTH 448V and ANTH 548V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ANTH 5513. African Religions: Gods, Witches, Ancestors. 3 Hours.

(Formerly ANTH 4513.) An exploration of African religions from a variety of anthropological perspectives, exploring how religious experience is perceived and interpreted by adherents, highlighting the way in which individual and group identities are constructed, maintained and contested within religious contexts. Readings reflect the vast diversity of religious life in Africa. Graduate degree credit will not be given for both ANTH 4513 and ANTH 5513. (Typically offered: Irregular)

ANTH 5523. Dental Science. 3 Hours.

(Formerly ANTH 4523.) Introduction to the study of the human dentition including its anatomy, morphology, growth and development, and histology. Graduate degree credit will not be given for both ANTH 4523 and ANTH 5523. (Typically offered: Fall)

ANTH 5553. Introduction to Raster GIS. 3 Hours.

(Formerly ANTH 4553.) Theory, data structures, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Credit will not be given for both ANTH 4553 and ANTH 5553. (Typically offered: Fall)

This course is cross-listed with GEOS 5453.

ANTH 5563. Vector GIS. 3 Hours.

(Formerly ANTH 4563.) Introduction to geographic information systems (GIS) applications in marketing, transportation, real estate, demographics, urban and regional planning, and related areas. Lectures focus on development of principles, paralleled by workstation-based laboratory exercises using mainstream GIS software and relational databases. Credit will not be given for both ANTH 4563 and ANTH 5563. (Typically offered: Spring)

This course is cross-listed with GEOS 5583.

ANTH 5583. Peoples and Cultures of Sub-Saharan Africa. 3 Hours.

(Formerly ANTH 4583.) An exploration of the people and places of Africa from a variety of anthropological perspectives. Classic and contemporary works will be studied in order to underscore the unity and diversity of African cultures, as well as the importance African societies have played in helping us understand culture/society throughout the world. Credit will not be given for both ANTH 4583 and ANTH 5583. (Typically offered: Fall)

ANTH 5593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.

(Formerly ANTH 4593.) Introduction to navigation, georeferencing, and digital data collection using GPS and GNSS receivers, data loggers, and laser technology. Components of NavStar GLONASS, Beidou and other global positioning system are used in integration of digital information into various GIS platforms with emphasis on practical applications. Credit will not be given for both ANTH 4593 and ANTH 5593. (Typically offered: Spring)

This course is cross-listed with GEOS 5293.

ANTH 5603. Landscape Archaeology. 3 Hours.

(Formerly ANTH 4603.) This course provides an introduction to the methods and theories of landscape archaeology. Topics include archaeological survey techniques, environmental and social processes recorded in the archaeological landscape, and analysis of ancient settlement and land use data to reveal changes in population, resource utilization, and environmental relationships. Credit will not be given for both ANTH 4603 and ANTH 5603. (Typically offered: Fall)

ANTH 561V. Field Research in Archeology. 1-6 Hour.

Directed graduate level archeological fieldwork. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ANTH 5623. Primate Adaptation and Evolution. 3 Hours.

(Formerly ANTH 4613.) Introduction to the biology of the order of Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Credit will not be given for both ANTH 4613 and ANTH 5623. (Typically offered: Spring)

This course is cross-listed with BIOL 5613.

ANTH 5633. Archeological Prospecting & Remote Sensing. 3 Hours.

(Formerly ANTH 4633.) Ground-based geophysical, aerial, and other remote sensing methods are examined for detecting, mapping, and understanding archeological and other deposits. These methods include magnetometry, resistivity, conductivity, radar, aerial photography, thermography, and multispectral scanning. Requires computer skills, field trips, and use of instruments. Credit will not be given for both ANTH 4633 and ANTH 5633. (Typically offered: Irregular)

ANTH 5653. GIS Analysis and Modeling. 3 Hours.

(Formerly ANTH 4653.) Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. Credit will not be given for both ANTH 4653 and ANTH 5653. (Typically offered: Spring)

This course is cross-listed with GEOS 5653, ENDY 5043.

ANTH 5703. Mammalian Evolution and Osteology. 3 Hours.

(Formerly ANTH 4703.) This course will focus on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Credit will not be given for both ANTH 4703 and ANTH 5703. Prerequisite: ANTH 1013 and ANTH 1011L, BIOL 1543 and BIOL 1541L, or instructor consent. (Typically offered: Irregular)

This course is cross-listed with BIOL 5883.

ANTH 5803. Historical Archeology. 3 Hours.

(Formerly ANTH 4803.) Review of the development of historical archeology and discussion of contemporary theory, methods, and substantive issues. Lab sessions on historic artifact identification and analysis. Graduate degree credit will not be given for both ANTH 4803 and ANTH 5803. (Typically offered: Irregular)

ANTH 5813. Ethnographic Approaches to the Past. 3 Hours.

(Formerly ANTH 4813.) Review of the uses of ethnographic data in the reconstruction and interpretation of past cultures and cultural processes, with particular emphasis on the relationships between modern theories of culture and archeological interpretation. Credit will not be given for both ANTH 4813 and ANTH 5813. (Typically offered: Irregular)

ANTH 582V. Applied Visual Research. 1-6 Hour.

(Formerly ANTH 482V.) This class provides hands-on skill and training conducting visually informed fieldwork designed to help represent unique cultural settings, experience, and heritage. Credit will not be given for both ANTH 482V and ANTH 582V. (Typically offered: Irregular)

ANTH 5863. Quantitative Anthropology. 3 Hours.

(Formerly ANTH 4863.) Introductory statistics course for anthropology students examines probability theory, nature of anthropological data, data graphics, descriptive statistics, probability distributions, test for means and variances, categorical and rank methods, ANOVA, correlation and regression. Lectures focus on theory methods; utilize anthropological data and a statistical software laboratory. Credit will not be given for both ANTH 4863 and ANTH 5863. (Typically offered: Irregular)

This course is cross-listed with GEOS 5863.

ANTH 5903. Seminar in Anthropology. 3 Hours.

(Formerly ANTH 4903.) Research, discussion, and projects focusing on a variety of topics. Credit will not be given for both ANTH 4903 and ANTH 5903. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ANTH 5913. Topics of the Middle East. 3 Hours.

(Formerly ANTH 4913.) Covers a special topic or issue. Credit will not be given for both ANTH 4913 and ANTH 5913. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ANTH 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ANTH 6033. Society and Environment. 3 Hours.

This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and palaeo-environmental studies, readings and discussion will explore the co-production of social and environmental systems over time. (Typically offered: Spring) May be repeated for degree credit. This course is cross-listed with ENDY 6033.

ANTH 610V. Internship. 1-18 Hour.

Internship. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ANTH 6813. Seminar: Cultural Anthropology. 3 Hours.

Variable topics in Anthropology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ANTH 6823. Seminar: Archeology. 3 Hours.

Various topics in Archeology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ANTH 6833. Seminar: Biological Anthropology. 3 Hours.

Various topics in Biological Anthropology will be explored in depth. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ANTH 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. (Typically offered: Fall and Spring) May be repeated for degree credit.

Apparel Merchandising and Product Development (AMPD) Courses

AMPD 1013. Introduction to Clothing Concepts. 3 Hours.

Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. (Typically offered: Fall and Spring)

AMPD 1013H. Honors Introduction to Clothing Concepts. 3 Hours.

Origin of dress, the evolution of fashion as an economic power, the sociological and psychological aspects of clothing in various cultures, aesthetics of dress, selection and consumption of clothing. Lecture 3 hours per week. Prerequisite: Honors standing. (Typically offered: Fall and Spring)
This course is equivalent to AMPD 1013.

AMPD 1023. Introduction to Apparel Production. 3 Hours.

Course focuses on basic principles of apparel production and analysis of garment components of mass produced apparel. Students utilize computer generated designs in the production process. Laboratory 6 hours per week. Prerequisite: HESC or AMPD students only. (Typically offered: Fall and Spring)

AMPD 2013. Fashion, Buying and Promotion in a Global Market. 3 Hours.

Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major and AMPD 1013. (Typically offered: Fall and Spring)

AMPD 2013H. Honors Fashion, Buying and Promotion in a Global Market. 3 Hours.

Fashion components, marketing theories and practices as they specifically relate to apparel, home goods, and other design driven products in the global market. Focus on principles and techniques on how fashion marketers develop and apply marketing strategies that meet consumer needs at a profit. International buying and promotional aspects of the apparel industry are emphasized. Lecture 3 hours per week. Prerequisite: AMPD major, AMPD 1013 and honors standing. (Typically offered: Fall and Spring)
This course is equivalent to AMPD 2013.

AMPD 2033. Computer Based Methods for Apparel. 3 Hours.

This course is designed to give students basic experience with CAD (computer aided design) apparel industry software in a computer laboratory environment. Prerequisite: AMPD majors only, AMPD 1013, AMPD 1023 and AGME 2903 or ISYS 1123 or equivalent. (Typically offered: Fall and Spring)

AMPD 2053. Introduction to Textile Science. 3 Hours.

Textile fibers and fabrics, their structure, properties, manufacture, wearing qualities and methods of laundering, finishing, and dyeing. Artistic and economic selection of materials for clothing and household furnishings. Lecture 3 hours per week. Prerequisite: HESC, AMPD or FCSE students only. (Typically offered: Fall and Spring)

AMPD 2063. Quality Assessment of Apparel. 3 Hours.

Study of apparel from the perspective of structure, aesthetics, cost and expected performance of the finished product. Lecture 2 hours per week, lab 2 hours per week. Prerequisite: AMPD 1023 and AMPD 2053. (Typically offered: Fall and Spring)

AMPD 3003. Apparel Production. 3 Hours.

A study of product development and production through flat pattern manipulation and the related vocabulary necessary to communicate professionally within the industry. Pre- or Corequisite: AMPD 2063. (Typically offered: Fall and Spring)

AMPD 3033. Merchandising Math for the Apparel Industry. 3 Hours.

Exploration of activities associated with the procurement of fashion apparel. A fashion analysis is directed toward apparel demands and the creation of a fashion statement by the use of specific quantitative skills. Course follows fashion item from the designer to the store. Lecture 3 hours per week. Prerequisite: MATH 1203 or MATH 1204 or three credit hours of STAT and AMPD 2013. (Typically offered: Fall and Spring)

AMPD 3043. Fashion Brand Management. 3 Hours.

This course focuses on the fundamental elements of brand, the concept of brand equity, brand relationships with consumers, and the implications of technologies on the branding process in the fashion industry. The course topics include branding basics, the concept of brand equity, brand image, brand positioning, brand communications, the role of emotional and sensory experiences in fashion branding, luxury fashion brands, sustainable fashion branding management, and technology driven branding. Prerequisite: AMPD 2013. (Typically offered: Fall and Spring)

AMPD 3071. Apparel Merchandising and Product Development Pre-Internship. 1 Hour.

A study of job descriptions, responsibilities at the management level, structural operations, work procedures, job performance evaluations, job application, the resume, and portfolio development in preparation for AMPD 4082, AMPD Internship. Lecture 1 hour per week. Prerequisite: AMPD majors only. (Typically offered: Spring)

AMPD 4011. History of Apparel Through Film to 1900. 1 Hour.

This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course. (Typically offered: Fall and Spring)

AMPD 4023. Merchandising Application for the Apparel Industry. 3 Hours.

Application of merchandising theory, principles and practices in a capstone class. An in depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Prerequisite: AMPD 3033 and AMPD 3043. (Typically offered: Fall and Spring)

AMPD 4033L. Computer Aided Textile Design. 3 Hours.

This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Lab 4 hours per week. Prerequisite: AMPD 2033 and AMPD 2053. (Typically offered: Fall and Spring)

AMPD 4053. Historic and Contemporary Apparel. 3 Hours.

This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Prerequisite: Junior or senior standing or instructor consent. (Typically offered: Fall and Spring)

AMPD 4063. Advanced Apparel Production. 3 Hours.

An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 3003. (Typically offered: Fall and Spring)

AMPD 4063H. Honors Advanced Apparel Production. 3 Hours.

An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 3003 and honors candidacy. (Typically offered: Fall and Spring)

This course is equivalent to AMPD 4063.

AMPD 4082. Apparel Merchandising and Product Development Internship. 2 Hours.

A practical experience in a retail store or in a work situation related to the apparel industry to gain insight into the field of apparel merchandising and operations. Prerequisite: Junior standing and 2.50 cum GPA and AMPD 2013, AMPD 2033, AMPD 2063, AMPD 3003, AMPD 3033, AMPD 3043, AMPD 3071, COMM 1313 and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

AMPD 4093. Apparel Merchandise Planning and Inventory Control. 3 Hours.

Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Prerequisite: AMPD 3033. (Typically offered: Fall and Spring)

AMPD 4103. Evolution of Fashion and Society Through Television Media. 3 Hours.

This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends. (Typically offered: Fall and Spring)

AMPD 4111. History of Apparel Through Film from 1900 to Present. 1 Hour.

This course uses historic costume films to trace the evolution of clothing from 1900 to Present. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web based course. (Typically offered: Fall and Spring)

AMPD 4901. AMPD Pre-Study Tour. 1 Hour.

A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 491V AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 491V study tour and must be repeated for each study tour destination. A grade of "C" or better is required to participate in AMPD 491V. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.

AMPD 4901H. Honors AMPD Pre-Study Tour. 1 Hour.

A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 491V AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 4901 is content specific to each AMPD 491V study tour and must be repeated for each study tour destination. A grade of "C" or better is required to participate in AMPD 491V. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.

This course is equivalent to AMPD 4901.

AMPD 491V. AMPD Study Tour. 2-6 Hour.

An on-site study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 24 hours of degree credit.

AMPD 491VH. Honors AMPD Study Tour. 2-6 Hour.

An on-site study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 24 hours of degree credit.

AMPD 5003. Apparel Sourcing and Merchandising Systems in the Global Economy. 3 Hours.

Evaluation of key issues facing textiles and apparel supply chain businesses in the global economy considering economic, political, and social perspectives and professional implications. Lecture 3 hours. (Typically offered: Fall Odd Years)

AMPD 5023. Social, Psychological and Cultural Aspects of Dress. 3 Hours.

Integration of social, psychological and cultural theories as they apply to appearance and clothing behavior. Lecture 3 hours. (Typically offered: Fall Odd Years)

AMPD 5033. Issues and Trends in Textile Studies. 3 Hours.

Studies of advances in textile science and recent developments in the textile industry. Lecture 3 hours. (Typically offered: Spring Odd Years)

AMPD 5043. Theories and Practices in Apparel Merchandising. 3 Hours.

Theoretical perspectives, concepts and current practices that influence apparel merchandising. Lecture 3 hours. (Typically offered: Spring Even Years)

AMPD 5053. Survey Design and Scale Development. 3 Hours.

This course is designed to provide the expertise required to design and conduct survey research. Students will understand the instruments (scales/questionnaire) used in data collection processes and acquire the statistical skills necessary to develop and test these survey instruments. This course uses both theory and practice. Hands-on training will be provided via SPSS package for data analyses, and Qualtrics will be used for web-based surveys. Prerequisite: 3 hours of graduate-level statistics coursework and HESC 5463 or AGED 5463 or instructor consent. (Typically offered: Spring)

AMPD 5063. Advanced Apparel Production. 3 Hours.

(Formerly AMPD 4063.) An advanced study of product development incorporating technology used in the industry for a career in fashion merchandising and/or product development in a computer laboratory environment. Laboratory 6 hours per week. Graduate degree credit will not be given for both AMPD 4063 and AMPD 5263. Prerequisite: AMPD 2033, AMPD 2063 and AMPD 3003. (Typically offered: Fall and Spring)

AMPD 5093. Apparel Merchandise Planning and Inventory Control. 3 Hours.

(Formerly AMPD 4093.) Describes today's challenges for both apparel manufacturers and retailers in meeting the consumer's demands for the right products at the right prices - and at the right times. Follows the evolution of the merchandising function with emphasis on production efficiency, highlighting the philosophies of industry executives and the effective integration of the merchandising, store design, marketing, the apparel supply chain and manufacturing functions along the way. Graduate degree credit will not be given for both AMPD 4093 and AMPD 5293. Prerequisite: AMPD 3033. (Typically offered: Fall and Spring)

AMPD 5103. Evolution of Fashion and Society Through Television Media. 3 Hours.

(Formerly AMPD 4103.) This course uses television programming from its early beginnings in the 1930s through to the twenty-first century to trace major events, societal changes, and the associated evolution of fashion. The course examines television both as an innovator and diffuser of fashion trends. Graduate degree credit will not be given for both AMPD 4103 and AMPD 5103. (Typically offered: Fall and Spring)

AMPD 5111. History of Apparel Through Film from 1900 to Present. 1 Hour.

(Formerly AMPD 4111.) This course uses historic costume films to trace the evolution of clothing from 1900 to Present. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web based course. Graduate degree credit will not be given for both AMPD 4111 and AMPD 5311. (Typically offered: Fall and Spring)

AMPD 5211. History of Apparel Through Film to 1900. 1 Hour.

(Formerly AMPD 4011.) This course uses historic costume films to trace the evolution of clothing from ancient Egypt to the Twentieth Century. Emphasis is placed on societal aspects such as politics, religion, economy, technology, education, sports, class structure, and gender roles, and how they affect and change dress. Web-based course. Graduate degree credit will not be given for both AMPD 4011 and AMPD 5211. (Typically offered: Fall and Spring)

AMPD 5223. Merchandising Application for the Apparel Industry. 3 Hours.

(Formerly AMPD 4023.) Application of merchandising theory, principles and practices in a capstone class. An in depth study of innovative apparel business concepts as applied to manufacturers and retailers of apparel including apparel classification, seasonal cycles, stock emphasis, assortment strategies, target customers, and apparel trends. Includes an overview of marketing communication including advertising, personal selling, and sales promotion. Graduate degree credit will not be given for both AMPD 4023 and AMPD 5223. Prerequisite: AMPD 3033 and AMPD 3043. (Typically offered: Fall and Spring)

AMPD 5233L. Computer Aided Textile Design. 3 Hours.

(Formerly AMPD 4033.) This course is designed to give students advanced skills in textile design using industry based computer aided design (CAD) software. Lab 4 hours per week. Graduate degree credit will not be given for both AMPD 4033L and AMPD 5233L. Prerequisite: AMPD 2033 and AMPD 2053. (Typically offered: Fall and Spring)

AMPD 5253. Historic and Contemporary Apparel. 3 Hours.

(Formerly AMPD 4053.) This course traces the evolution of clothing from ancient times to the twentieth century with emphasis upon Western civilization and includes the study of contemporary fashion as a social force including the origin, scope, theory, and history of the fashion business, the materials of fashion, the fashion producers, auxiliary fashion enterprises, designers, fashion leaders, and leading market. Cultural and economic factors affecting dress, adornment and customs associated dress will be stressed. The Lecture 3 hours per week. Graduate degree credit will not be given for both AMPD 4053 and AMPD 5253. (Typically offered: Fall and Spring)

AMPD 5901. AMPD Pre-Study Tour. 1 Hour.

(Formerly AMPD 4901.) A study of specific regional and international fashion markets for apparel studies in preparation for AMPD 591V AMPD Study Tour. The course examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets. AMPD 5901 is content specific to each AMPD 591V study tour and must be repeated for each study tour destination. A grade of "C" or better is required to participate in AMPD 591V. Graduate degree credit will not be given for both AMPD 4901 and AMPD 5901. Prerequisite: 2.0 minimum GPA. AMPD majors with minimum 30 hours, or consent. (Typically offered: Spring and Summer) May be repeated for up to 4 hours of degree credit.

AMPD 591V. AMPD Study Tour. 2-6 Hour.

(Formerly AMPD 491V.) An on-site study of specific regional and international fashion markets for apparel merchandising and product development. Course further examines the design, production, distribution and retailing of fashion goods from couture fashion to mass markets as outlined in AMPD 4901. Course includes study trip; length based upon destination. Additional fees required. Course will also be offered each May and August Intersession. Graduate degree credit will not be given for both AMPD 491V and AMPD 591V. Prerequisite: AMPD 4901 (with a C or better), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. Corequisite: AMPD 4901 (with a C or better, if corequisite, must have C or better at time of trip), 2.0 min. GPA, AMPD major with min. 30 hours, and instructor consent. (Typically offered: Summer) May be repeated for up to 24 hours of degree credit.

Applied Music (Class) (MUAC) Courses

MUAC 1121. English and Italian Diction for Singers. 1 Hour.

Training in proper pronunciation and inflections of English and Italian as applied to singers. Two meetings per week. (Typically offered: Fall)

MUAC 1141. German and French Diction for Singers. 1 Hour.

Training in proper pronunciation and inflection of German and French as applied to singing. Two meetings per week. Prerequisite: MUAC 1121. (Typically offered: Spring)

MUAC 1161. Class Instruction in Piano for Non-Music Majors. 1 Hour.

Beginning instruction in piano. Does not fulfill the class piano requirement for music majors. (Typically offered: Fall, Spring and Summer)

MUAC 1221. Piano Class for Music Majors I. 1 Hour.

Training in functional piano skills for music majors. Two meetings per week.

Prerequisite: Music major and MUTH 1003. (Typically offered: Spring)

MUAC 1231. Piano Class for Music Majors II. 1 Hour.

A continuation of MUAC 1221. Two meetings per week. Upon successful completion of MUAC 1231 with a grade of B or better, credit for MUAC 1221 will also be given.

Prerequisite: MUAC 1221 and a music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or Bachelor of Music or Honors Bachelor of Music. (Typically offered: Fall)

MUAC 1301. Class Instruction in Violin and Viola. 1 Hour.

Beginning class instruction in violin and viola. For music education majors only or with instructor's consent. Prerequisite: Music Education majors pursuing a concentration in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent. (Typically offered: Fall)

MUAC 1311. Class Instruction in Violoncello and String Bass. 1 Hour.

Beginning class instruction in violoncello and string bass. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent. (Typically offered: Fall and Spring)

MUAC 1321. Class Instruction in Guitar. 1 Hour.

Beginning class instruction in guitar. Students must provide their own instruments. (Typically offered: Fall and Spring)

MUAC 1331. Class Instruction in Clarinet and Saxophone. 1 Hour.

The elementary study of clarinet and saxophone. Beginning class instruction designed to familiarize the student with the basic playing skills and teaching techniques for the instruments. Corequisite: MUAC 1341 and lab component. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent. (Typically offered: Spring)

MUAC 1341. Class Instruction in Flute. 1 Hour.

The elementary study of flute. Beginning class instruction designed to familiarize the student with basic playing skills and teaching techniques of the instrument. Corequisite: MUAC 1331 and lab component. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent. (Typically offered: Spring)

MUAC 1351. Class Instruction in High Brass Instruments. 1 Hour.

The elementary study of the cornet, trumpet, and horn. Beginning class instruction designed to familiarize the student with the history, physics, basic playing skills, methods, materials, and teaching techniques of the high brass family. Corequisite: MUAC 1361 and lab component. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent. (Typically offered: Spring)

MUAC 1361. Class Instruction in Low Brass Instruments. 1 Hour.

The elementary study of the trombone, euphonium and tuba. Beginning class instruction designed to familiarize the student with the history, physics, basic playing skills, methods, materials, and teaching techniques of the low brass family. Corequisite: MUAC 1351 and lab component. Prerequisite: Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent. (Typically offered: Spring)

MUAC 1381. Class Instruction in Voice. 1 Hour.

Fundamentals of vocalization and singing of English songs, including breathing, vowel clarity, and pronunciation of consonants. (Typically offered: Fall and Spring)

MUAC 2112. Music Technology. 2 Hours.

Introduces skills for transcribing music using music notation software and sound reinforcement systems. Covers MIDI sequencing and audio recording and editing software to produce accompaniment tracks and create compact discs of music and multimedia projects. Prerequisite: Music major pursuing a Bachelor of Music or Honors Bachelor of Music degree, and sophomore standing. (Typically offered: Fall, Spring and Summer)

MUAC 2141. Class Instruction in Oboe and Bassoon. 1 Hour.

The elementary study of oboe and bassoon. Class instruction designed to familiarize the student with basic playing skills and teaching techniques of the instruments. Prerequisite: MUAC 1331 or MUAC 1341 and a Music education major pursuing a degree in Piano Education, Voice Education, String Education or Woodwind Brass Percussion Education; or instructor's consent. (Typically offered: Spring)

MUAC 2221. Piano Class for Music Majors III. 1 Hour.

A continuation of MUAC 1231. Two meetings per week. Upon successful completion of MUAC 2221 with a grade of B or better, credit for MUAC 1221 and MUAC 1231 will also be given. Prerequisite: MUAC 1231 and a music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or Bachelor of Music or Honors Bachelor of Music. (Typically offered: Spring)

MUAC 2231. Piano Class for Music Major IV. 1 Hour.

A continuation of MUAC 2221. Two meetings per week. Upon successful completion of MUAC 2231 with a grade of B or better, credit for MUAC 1221, MUAC 1231, and MUAC 2221 will also be given. Prerequisite: MUAC 2221 and a music major pursuing a degree of Bachelor of Arts or Honors Bachelor of Arts or Bachelor of Music or Honors Bachelor of Music. (Typically offered: Fall)

MUAC 3401. Jazz Improvisation I. 1 Hour.

This course is the first in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. (Typically offered: Fall)

MUAC 3411. Jazz Improvisation II. 1 Hour.

This course is the second in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. Prerequisite: MUAC 3401. (Typically offered: Spring)

MUAC 4371. Teaching the High School Percussionist. 1 Hour.

A study of solo literature and small and large ensemble literature appropriate for the high school percussionist. Emphasis on advanced snare drum and marimba lit., timpani and the broad range of percussionist instruments. Includes study of high school band, orchestra and percussion ensemble scores. Prerequisite: MUED 1371. (Typically offered: Irregular)

MUAC 4401. Jazz Improvisation III. 1 Hour.

This course is the third in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. Prerequisite: MUAC 3411. (Typically offered: Fall)

MUAC 4411. Jazz Improvisation IV. 1 Hour.

This course is the fourth in a four-semester sequence on the study of jazz improvisation with a linguistic approach. The class will cover the vocabulary and grammar of jazz, as well as rhetoric, story-telling and emotional performance. Each week students will be expected to be proficient in technical drills, harmonic and rhythmic vocabulary, and repertoire related to the four fundamental forms encompassed by the course. Transcriptions and writing assignments will also be given, and students will work with the Contrast Method of Improvisational Concepts, self-listening and analysis, performing the topics in class, group performance, and artistic development. Prerequisite: MUAC 4401. (Typically offered: Spring)

MUAC 5371. Teaching the High School Percussionist. 1 Hour.

(Formerly MUAC 4371.) A study of solo literature and small and large ensemble literature appropriate for the high school percussionist. Emphasis on advanced snare drum and marimba lit., timpani and the broad range of percussionist instruments. Includes study of high school band, orchestra and percussion ensemble scores. Graduate degree credit will not be given for both MUAC 4371 and MUAC 5371. Prerequisite: MUED 1371. (Typically offered: Irregular)

Applied Music (Private Instruction) (MUAP)

Courses

MUAP 100V. Applied Secondary-Level Voice/Instrument I. 1-2 Hour.

Private study of secondary voice/instrument. Prerequisite: Instructor consent. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

MUAP 110V. Applied Major Voice/Instrument I. 1-4 Hour.

Private study of the primary voice/instrument for music majors. Admission to MUAP 110V requires the successful completion of audition for the instructor. Prerequisite: Music major. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 130V. Applied Skills Voice/Instrument I. 1-4 Hour.

Private study of the primary voice/instrument for music majors. Continued development of fundamental musical and technical skills introduced in MUAP 110V. Prerequisite: Music major; recommendation of instructor. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 200V. Applied Secondary-Level Voice/Instrument II. 1-2 Hour.

Continued private study of secondary voice/instrument. Instructor permission required to enroll. Prerequisite: Two semesters of MUAP 100V and recommendation of the instructor. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

MUAP 210V. Applied Major Voice/Instrument II. 1-4 Hour.

Continued private study of the primary voice/instrument for music majors. Prerequisite: Two semesters of MUAP 110V with grades of B or better or MUAP 130V with a grade of B or better. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 230V. Applied Skills Voice/Instrument II. 1-4 Hour.

Private study of the primary voice/instrument for music majors. Continued development of fundamental musical and technical skills introduced in MUAP 210V. Prerequisite: Two semesters of MUAP 210V and recommendation of instructor. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 300V. Applied Secondary-Level Voice/Instrument III. 1-2 Hour.

Advanced private study of secondary voice/instrument. Prerequisite: Two semesters of MUAP 200V and recommendation of the instructor. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

MUAP 310V. Applied Major Voice/Instrument III. 1-4 Hour.

Continuation of MUAP 210V. Private study of the primary instrument/voice for music majors at the advanced level. Admission requires approval of the faculty committee of the area of study (voice, piano, woodwind, brass, percussion). Mastery of fundamental/technical skills sufficient to prepare for a recital must be observable by the committee. Prerequisite: Two semesters of MUAP 210V with grades of B or better or MUAP 230V with a grade of B or better. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 310VH. Honors Applied Major Voice/Instrument III. 1-4 Hour.

Continuation of MUAP 210V. Private study of the primary voice/instrument for honors music majors at the advanced level. Admission requires approval of faculty committee of the area of study (voice, piano, woodwind, brass, percussion). Mastery of fundamental/technical skills sufficient to prepare for a recital must be observable by the committee. Prerequisite: Two semesters of MUAP 210V with grades of B or better or MUAP 230V with a grade of B or better; honors standing. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit. This course is equivalent to MUAP 310V.

MUAP 3201. Applied Recital I. 1 Hour.

Preparation and performance of a public recital of a minimum of 25 minutes of music. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 3201H. Honors Applied Recital I. 1 Hour.

Preparation and performance of a public recital of a minimum of 50 minutes of music. Corequisite: MUAP 310VH. (Typically offered: Fall and Spring) May be repeated for degree credit. This course is equivalent to MUAP 3201.

MUAP 330V. Applied Skills Voice/Instrument III. 1-4 Hour.

Private study of the primary voice/instrument for music majors at the advanced level. Continued development of musical and technical skills introduced in MUAP 310V. Prerequisite: Two semesters of MUAP 310V and recommendation of instructor. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 400V. Applied Secondary-Level Voice/Instrument IV. 1-2 Hour.

Continued advanced private study of secondary voice/instrument. Instructor permission required to enroll. Prerequisite: Two semesters of MUAP 300V and recommendation of the instructor. (Typically offered: Fall and Spring) May be repeated for up to 4 hours of degree credit.

MUAP 410V. Applied Major Voice/Instrument IV. 1-4 Hour.

Continuation of MUAP 310V. Private study of the primary voice/instrument for music majors at the advanced level. Prerequisite: Two semesters of MUAP 310V with recommendation of instructor. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 410VH. Honors Applied Major Voice/Instrument IV. 1-4 Hour.

Continuation of MUAP 310VH. Private study of the primary voice/instrument for honors music majors at the advanced level. Prerequisite: Two semesters of MUAP 310VH, recommendation of instructor and honors standing. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit. This course is equivalent to MUAP 410V.

MUAP 415V. Applied Skills Voice/Instrument IV. 1-4 Hour.

Private study of the primary voice/instrument for music majors at the advanced level in preparation for recital. Continued development of musical and technical skills introduced in MUAP 410V. Prerequisite: Two semesters of MUAP 410V and recommendation of instructor. (Typically offered: Fall and Spring) May be repeated for up to 8 hours of degree credit.

MUAP 4201. Applied Recital II. 1 Hour.

Preparation and performance of a public recital of a minimum of 50 minutes of music. Prerequisite: MUAP 3201. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 4201H. Honors Applied Recital II. 1 Hour.

Preparation and performance of a public recital of a minimum of 50 minutes of music. Corequisite: MUAP 410VH. (Typically offered: Fall and Spring) May be repeated for degree credit.

This course is equivalent to MUAP 4201.

MUAP 4301. Composition Recital. 1 Hour.

Preparation and performance of a public recital of a minimum of 50 minutes consisting of original musical compositions. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 4301H. Honors Composition Recital. 1 Hour.

Preparation and performance of a public recital of a minimum of 50 minutes consisting of original musical compositions. Prerequisite: Honors standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

This course is equivalent to MUAP 4301.

MUAP 500V. Applied Voice/Instrument-Secondary Level. 1-2 Hour.

Private study at the graduate secondary level. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 510V. Applied Voice/Instrument. 1-5 Hour.

Private study at the graduate level. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 5201. Graduate Recital I. 1 Hour.

Preparation and performance of a public recital of a minimum of 50 minutes of music. (Typically offered: Fall and Spring) May be repeated for degree credit.

MUAP 5211. Graduate Recital II. 1 Hour.

Preparation and performance of a public recital of a minimum of 50 minutes of music. (Typically offered: Fall and Spring) May be repeated for degree credit.

Arabic (ARAB) Courses

ARAB 1003. Elementary Arabic I. 3 Hours.

Stresses correct pronunciation, aural comprehension, simple speaking ability. Basic grammar is taught inductively through oral and written skills. (Typically offered: Spring)

ARAB 1013. Elementary Arabic II. 3 Hours.

Continues to stress correct pronunciation, aural comprehension, simple speaking ability. Continued presentation of grammar with special attention to basic morphology. Prerequisite: ARAB 1003 or equivalent. (Typically offered: Fall)

ARAB 1016. Intensive Arabic I. 6 Hours.

Equivalent to ARAB 1003 and ARAB 1013. Stresses correct pronunciation, aural comprehension, and simple speaking ability. Basic grammar is taught inductively through oral and written skills. (Typically offered: Fall)

ARAB 2003. Intermediate Arabic I. 3 Hours.

Leads to greater oral comprehension and speaking ability and develops the more advanced reading and writing skills. Prerequisite: ARAB 1013 or ARAB 1016 or equivalent. (Typically offered: Spring)

ARAB 2013. Intermediate Arabic II. 3 Hours.

Continued development of speaking, comprehension, reading, and writing. Emphasizes morphology and syntax. (Typically offered: Irregular)

ARAB 2016. Intensive Arabic II. 6 Hours.

Equivalent to 2003-2013 sequence. Leads to greater oral comprehension and speaking ability and develops the more advanced reading and writing skills. Emphasizes morphology and syntax. (Typically offered: Spring)

ARAB 2016H. Honors Intensive Arabic II. 6 Hours.

Equivalent to 2003-2013 sequence. Leads to greater oral comprehension and speaking ability and develops the more advanced reading and writing skills. Emphasizes morphology and syntax. Prerequisite: Honors standing. (Typically offered: Spring)

This course is equivalent to ARAB 2016.

ARAB 3016. Intensive Arabic III. 6 Hours.

Leads to greater facility in the spoken language and continues to develop reading and writing skills. Continued emphasis on morphology and syntax. Prerequisite: ARAB 2016. (Typically offered: Fall)

ARAB 3016H. Honors Intensive Arabic III. 6 Hours.

Leads to greater facility in the spoken language and continues to develop reading and writing skills. Continued emphasis on morphology and syntax. Prerequisite: ARAB 2016. (Typically offered: Fall)

This course is equivalent to ARAB 3016.

ARAB 3033. Colloquial Arabic. 3 Hours.

Development of aural comprehension and speaking skills in one of the major Arabic dialects. Prerequisite: ARAB 2016 or equivalent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARAB 4016. Intensive Arabic IV. 6 Hours.

Continued development of speaking, comprehension, reading, writing. Reading assignments introduce a variety of styles ranging from classical to modern in both prose and verse. (Typically offered: Spring)

ARAB 4016H. Honors Intensive Arabic IV. 6 Hours.

Continued development of speaking, comprehension, reading, writing. Reading assignments introduce a variety of styles ranging from classical to modern in both prose and verse. Prerequisite: Honors standing. (Typically offered: Spring)

This course is equivalent to ARAB 4016.

ARAB 4023. Advanced Arabic I. 3 Hours.

Development of advanced speaking and writing skills. Extensive reading and writing assignments and translating exercises from English into Arabic. Prerequisite: ARAB 4016. (Typically offered: Irregular)

ARAB 4033. Advanced Arabic II. 3 Hours.

Continued advanced speaking, reading, and writing skills. Prerequisite: ARAB 4023. (Typically offered: Irregular)

ARAB 4043. Advanced Conversation. 3 Hours.

Continued development of aural comprehension and speaking skills in one of the major Arabic dialects. (Typically offered: Irregular)

ARAB 4053. Arabic Readings. 3 Hours.

Develops skill in description, analysis, and argumentation through weekly reading and writing assignments within a workshop atmosphere. Selected readings from various styles of standard Arabic, ranging from newspapers to literary texts. Prerequisite: ARAB 4023 or equivalent. (Typically offered: Irregular)

ARAB 4113. Modern Arabic Literature. 3 Hours.

Selected readings from Arabic fiction and poetry from the 20th century to the present. Prerequisite: ARAB 4023 or equivalent. (Typically offered: Irregular)

ARAB 4213. Introduction to Arab Culture. 3 Hours.

Selected readings from Arab history, literature, the Islamic Tradition, and the Holy Qur'an. Prerequisite: ARAB 4023 or equivalent. (Typically offered: Irregular)

ARAB 470V. Special Topics. 1-6 Hour.

May be offered in a topic not specifically covered by courses otherwise listed. (Typically offered: Irregular) May be repeated for degree credit.

ARAB 570V. Special Topics. 1-6 Hour.

(Formerly ARAB 470V.) May be offered in a topic not specifically covered by courses otherwise listed. Graduate degree credit will not be given for both ARAB 470V and ARAB 570V. (Typically offered: Irregular) May be repeated for degree credit.

Architecture (ARCH) Courses

ARCH 1003. Basic Course in the Arts: Architecture Lecture. 3 Hours.

A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. (Typically offered: Fall and Spring)

ARCH 1003H. Honors Basic Course in the Arts: Architecture Lecture. 3 Hours.

A general introduction to architecture, exploring the designed environment, including cities and buildings and their histories, technologies, and users, in a holistic manner. May not be presented towards satisfaction of major requirements in either the B.Arch or B.A. in architectural studies degrees. Prerequisite: Honors candidacy. (Typically offered: Fall)

This course is equivalent to ARCH 1003.

ARCH 1013. Diversity and Design. 3 Hours.

Explores the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed. (Typically offered: Summer)

ARCH 1013H. Honors Diversity and Design. 3 Hours.

Explores the reciprocal relationship between diversity and design in America, investigating how race, gender, religion, ability, age, class, and location affect and are affected by the design of media, products, architecture, and cities/regions. Positive and negative effects of diversity and design are discussed. Prerequisite: Honors candidacy. (Typically offered: Summer)

This course is equivalent to ARCH 1013.

ARCH 1015. Fundamental Design Skills. 5 Hours.

Fundamental design skills; development of visual and verbal communication skills including observation skills, design technologies, analysis and representation in both 2-dimensions and 3-dimensions through analog and digital tools; creative and critical thinking skills. (Typically offered: Fall and Spring)

ARCH 1025. Fundamental Design Methodology. 5 Hours.

Fundamental design skills; use of precedents for understanding principles of design and natural and formal ordering systems; design development using both iterative and alternative methods of exploration in both 2-dimensions and 3-dimensions using analog and digital tools; continued development of visual and verbal communication skills. Prerequisite: ARCH 1015. (Typically offered: Spring and Summer)

ARCH 1212. Design Thinking I: Foundations in Technology. 2 Hours.

This course will raise pertinent questions about the role of architectural technology in design through studying the important theories about technology from Vitruvius to contemporary practice and understanding how they have been manifested in built form. (Typically offered: Fall and Summer)

ARCH 1222. Design Thinking II: Foundations in History. 2 Hours.

Explores the role of architectural history in design thinking, introducing divergent canons and traditions in a global context and emphasizing understanding of the relationships among buildings, spaces and places and the social, political and technological circumstances in which the work was theorized, produced, and lived. Prerequisite: ARCH 1212. (Typically offered: Spring and Summer)

ARCH 1600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 2016. Architectural Design III. 6 Hours.

Introduction of formal principles and strategies used in space making, focusing on the development of plans and sections. Precedents and the understanding of them through analysis and syntheses are used as a means of examining the past and the present while providing a framework from which personal design sensibilities can evolve. Corequisite: ARCH 2113 and ARCH 2132 and ARCH 2233. Prerequisite: ARCH 1025 and ARCH 1222. (Typically offered: Fall)

ARCH 2026. Architectural Design IV. 6 Hours.

An elaboration of space-making, addressing three-dimensional aspects of form-making, including the influence of structural systems, articulation of the vertical section, and exterior expression; the role of site as a generator of form; and the overarching importance of technics, including the materiality of space, structure, and light. Corequisite: ARCH 2123 and ARCH 2243. Prerequisite: ARCH 2016 and ARCH 2113 and ARCH 2132 and ARCH 2233. (Typically offered: Spring)

ARCH 2113. Architectural Structures I. 3 Hours.

Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)

ARCH 2113H. Honors Architectural Structures I. 3 Hours.

Introduction to statics and strength of materials. Building loads are examined as to their effect on the elements of architectural projects. Simple post and beam structures are the focus of this course. Bending, axial, and shear stress are examined in beams and columns. Materials studied include wood, steel, and concrete. Corequisite: ARCH 2016 and ARCH 2132. Prerequisite: ARCH 1212. (Typically offered: Fall)

This course is equivalent to ARCH 2113.

ARCH 2123. Architectural Structures II. 3 Hours.

Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113 and ARCH 2132. (Typically offered: Spring)

ARCH 2123H. Honors Architectural Structures II. 3 Hours.

Introduction to the basic theories of structures, structural behavior, and the design of simple structural systems capable of resisting gravity and lateral forces. Provides a basic understanding of structural behavior, organization of framing systems and location of lateral force resisting elements for building structures and other technical systems. Corequisite: ARCH 2026. Prerequisite: ARCH 2113, ARCH 2132 and honors candidacy. (Typically offered: Spring)

This course is equivalent to ARCH 2123.

ARCH 2132. Environmental Technology I. 2 Hours.

Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)

ARCH 2132H. Honors Environmental Technology I. 2 Hours.

Introduces theories and concepts of the building thermal, luminous and sonic environments with focus on solar geometry-shading, climate-thermal stresses, natural ventilation, daylight, sound isolation and noise control. The application of these systems to support the design of an environmentally responsive building and its enclosure is addressed. Corequisite: ARCH 2016 and ARCH 2113. Prerequisite: ARCH 1212. (Typically offered: Fall)

This course is equivalent to ARCH 2132.

ARCH 2233. History of Architecture I. 3 Hours.

Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. (Typically offered: Fall)

ARCH 2233H. Honors History of Architecture I. 3 Hours.

Critical study and analysis of world architecture from ancient times through the Middle Ages, comprising the ancient Americas, Asia, Mesopotamia, and Egypt; Classical, Byzantine, and Islamic architecture and vernacular design; and the early Christian, Romanesque, and Gothic periods. Prerequisite: Honors candidacy. (Typically offered: Fall)

This course is equivalent to ARCH 2233.

ARCH 2243. History of Architecture II. 3 Hours.

Critical study and analysis of world architecture from the fifteenth to the mid-nineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite for architecture majors only: ARCH 2233. (Typically offered: Spring)

ARCH 2243H. Honors History of Architecture II. 3 Hours.

Critical study and analysis of world architecture from the fifteenth to the mid-nineteenth centuries. Encompasses early modern Europe (Renaissance, Baroque, and Neoclassical) as well as two or more of the following: colonial New Spain, early modern Japan, and/or early modern Islamic empires in Africa, the Middle East, and Asia. Vernacular American building is surveyed as well as architecture in the nineteenth-century, including Beaux-Arts design and the introduction of industrial materials. Prerequisite: Architecture majors only. Corequisite: ARCH 2233 and honors candidacy. (Typically offered: Spring)

This course is equivalent to ARCH 2243.

ARCH 2600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 2993. Art and Culture in Italy. 3 Hours.

The evolution of culture and aesthetics and their immediate relationship with the creation of Italy's masterpieces in art and architecture. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

ARCH 3016. Architectural Design V. 6 Hours.

Emphasis on issues of design process, exploration of internal and external determinants of form and the integration of appropriate technologies in design solutions. Corequisite: ARCH 3134 and ARCH 4433. Prerequisite: ARCH 2026 and ARCH 2123 and ARCH 2243. (Typically offered: Fall)

ARCH 3026. Architectural Design VI. 6 Hours.

Studio-based analysis and design of structural and enclosure systems for buildings with particular emphasis on systems interface and application within the context of design exercises. Investigations of the appropriate use of materials and assemblies for varied programmatic and environmental criteria. Twelve hours of studio each week. Corequisite: ARCH 4523. Prerequisite: ARCH 3016 and ARCH 3143.

(Typically offered: Spring)

ARCH 303V. Special Projects. 1-6 Hour.

Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. (Typically offered: Irregular) May be repeated for degree credit.

ARCH 303VH. Honors Special Projects. 1-6 Hour.

Individual or group investigation in research, visual communication, history, or design concerning special interests of student or faculty. Prerequisite: Honors candidacy. (Typically offered: Irregular) May be repeated for degree credit.

This course is equivalent to ARCH 303V.

ARCH 3143. Building Materials and Assemblies. 3 Hours.

Introduction and comprehensive survey of primary building materials and methods of assembly: their history, properties, use and configuration - both traditional and contemporary, in the service of building construction; their impact on the form, expression and performance of building structures and envelopes. Prerequisite: ARCH 2132, ARCH 2113 and ARCH 2123. (Typically offered: Fall)

ARCH 3253. Environmental Technology II. 3 Hours.

Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 3016 and ARCH 3143. (Typically offered: Spring)

ARCH 3253H. Honors Environmental Technology II. 3 Hours.

Covers theoretical foundations and applications of building environmental systems: HVAC with duct layout and controls, indoor air quality, electric lighting, power, acoustics, fire safety and egress, and water and waste. The important role of such systems in the design of buildings is examined through a series of small projects assignments. Prerequisite: ARCH 2016 and ARCH 3143. (Typically offered: Spring)

This course is equivalent to ARCH 3253.

ARCH 3600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 3743. Furniture Design. 3 Hours.

Design concepts and techniques to acquaint the student with the design of furniture; analysis of function, development of design and construction of small pieces of furniture. (Typically offered: Irregular)

ARCH 4016. Comprehensive Studio. 6 Hours.

Emphasis on issues of typology, context and technological suitability as sources of theoretical and developmental responses. Corequisite: ARCH 4152. Prerequisite: ARCH 3026. (Typically offered: Fall)

ARCH 4023. Advanced Architectural Studies. 3 Hours.

Advanced seminars in subjects to special interest to students and faculty. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARCH 4023H. Honors Advanced Architectural Studies. 3 Hours.

Advanced seminars in subjects to special interest to students and faculty. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

This course is equivalent to ARCH 4023.

ARCH 4026. Comprehensive Studio. 6 Hours.

Continuation of Architectural Design VII. Corequisite: ARCH 4152. Prerequisite: ARCH 4016 or ARCH 4116 or ARCH 4126. (Typically offered: Spring)

ARCH 4116. Architectural Design - Rome. 6 Hours.

Investigation of complex design problems in the context of the city of Rome, utilizing advanced issues in architectural design and planning. Prerequisite: ARCH 3026 or ARCH 4016. (Typically offered: Fall and Spring)

ARCH 4126. Architectural Design Latin America. 6 Hours.

Introduces a complex social and physical urban condition through a process of formal analysis and design executed in a designated country augmented by an intense graphic investigation of urban form encountered through related field trips to the distinct cultural and geographic regions. Prerequisite: ARCH 3026 or ARCH 4016 or ARCH 4026. (Typically offered: Summer)

ARCH 4152. Building Systems Integration. 2 Hours.

Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016 or ARCH 4026. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring)

ARCH 4152H. Honors Building Systems Integration. 2 Hours.

Promotes the synthesis of building technologies, systems selection and integration in the resolution of a building design. Specifically, the student demonstrates knowledge in the ability to generate digital and analog graphic resolutions highlighting the design response of material, structural and environmental systems in a building. Corequisite: ARCH 4016 or ARCH 4026. Prerequisite: ARCH 2113 and ARCH 2123 and ARCH 2132 and ARCH 3143 and ARCH 3253. (Typically offered: Fall and Spring)

This course is equivalent to ARCH 4152.

ARCH 4433. History of Architecture III. 3 Hours.

Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233 and ARCH 2243 or IDES 2883. (Typically offered: Fall)

ARCH 4433H. Honors History of Architecture III. 3 Hours.

Critical study and analysis of the history and theories of modern architecture from the mid-nineteenth century to the present. Prerequisite: ARCH 2233, ARCH 2243 and honors candidacy. (Typically offered: Fall)

This course is equivalent to ARCH 4433.

ARCH 4483. Architecture of the Americas. 3 Hours.

Study of the development of architecture in the Americas from the Pre-Columbian cultures to the present day. Lecture and slides 3 hours per week. (Typically offered: Irregular)

ARCH 4483H. Honors Architecture of the Americas. 3 Hours.

Study of the development of architecture in the Americas from the Pre-Columbian cultures to the present day. Lecture and slides 3 hours per week. Prerequisite: Honors candidacy. (Typically offered: Irregular)

This course is equivalent to ARCH 4483.

ARCH 4523. Architectural Theory. 3 Hours.

Introduction to the lexicon of architecture and the ideas and ideologies that provide the conceptual and critical infrastructure for the discipline. Reading and discussion of representative theory texts. Emphasis on twentieth century modernism and postmodernism, including contemporary speculations on possible and emerging forms of practice after theory. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring)

ARCH 4523H. Honors Architectural Theory. 3 Hours.

Introduction to architectural theories and their relationship to modern historiography. Case studies are employed for the critical evaluation of significant texts and the discernment of concepts embedded in textual structures. Reading theory through established historical categories establishes critical insight to the original deployment, negation and resurfacing of architectural theories. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Spring)

This course is equivalent to ARCH 4523.

ARCH 4553. Modern Architecture in Mexico. 3 Hours.

Overview of the emergence, growth and trends that define the ongoing evolution of modern architecture in Mexico from the first decades of the 20th century to contemporary practice. Offered in the Mexico study abroad semester. (Typically offered: Summer)

ARCH 4553H. Honors Modern Architecture in Mexico. 3 Hours.

Overview of the emergence, growth and trends that define the ongoing evolution of modern architecture in Mexico from the first decades of the 20th century to contemporary practice. Offered in the Mexico study abroad semester. (Typically offered: Summer)

This course is equivalent to ARCH 4553.

ARCH 4600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARCH 4610. Architecture Cooperative Education I. 0 Hours.

A practicum which introduces and engages the student in the practice and application of the profession. Prerequisite: completion of all third year program requirements, 2.5 minimum GPA and permission of the faculty. (Typically offered: Irregular)

ARCH 4643. Principles of Sustainable Design. 3 Hours.

In collaboration with the Green Building Council Italia. Provides a basic understanding of key aspects of sustainable design in architecture with particular reference to the experiences and methods developed in Italy and Europe. (Typically offered: Fall and Spring)

ARCH 4653. Architecture of the City. 3 Hours.

Analysis of Rome's urban form and historical and theoretical information in support of the students' experience. Includes site visits and lectures. Offered in the Rome study abroad semester. (Typically offered: Fall and Spring)

ARCH 4673. Modern and Contemporary Rome. 3 Hours.

Explores different local conditions that determine main architectural changes that have taken place in Rome during the last century of its urban history. Important works, leading figures and major concepts in contemporary European architecture will be described to introduce examples of modern and contemporary architecture in Rome. (Typically offered: Fall and Spring)

ARCH 4723. Architectural Research Methods. 3 Hours.

Investigation into the practical, theoretical, and methodological strategies necessary for embarking upon architectural inquiry and discourse at a sophisticated level, for instance, in the form of a year-long thesis or independent project. Practical issues of method, such as research skills, literature review, and argument analysis are examined. The classic range of tools for interpreting architecture are surveyed from single-cause explanations (e.g., formalism) to more recent multi-causal theories (e.g., Semiotics, Deconstruction, Post-colonial theory, etc.) for architectural design. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Fall)

ARCH 4843. Medieval Architecture. 3 Hours.

This course traces the history of architecture in Western Europe from c. 300 - 1400. Sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, synagogues and mosques of Al-Andalus (Spain), Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARCH 4433. (Typically offered: Irregular)

This course is equivalent to ARHS 4743.

ARCH 4843H. Honors Medieval Architecture. 3 Hours.

This course traces the history of architecture in Western Europe from c. 300 - 1400. Sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, synagogues and mosques of Al-Andalus (Spain), Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARCH 4433. (Typically offered: Irregular)

This course is equivalent to ARHS 4743.

ARCH 4853. Renaissance and Baroque Architecture. 3 Hours.

Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. (Typically offered: Irregular)

This course is equivalent to ARHS 4753.

ARCH 4853H. Honors Renaissance and Baroque Architecture. 3 Hours.

Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and the edifices themselves, this course charts the evolution of a commanding Western architectural tradition. Renaissance and Baroque -- with close attention to the social, humanistic, and religious contexts that produced it. Prerequisite: ARCH 4433. (Typically offered: Irregular)

This course is equivalent to ARHS 4753.

ARCH 4863. Saint Peter's and the Vatican. 3 Hours.

Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. (Typically offered: Irregular)

ARCH 4863H. Honors St. Peter's and the Vatican. 3 Hours.

Examines art and architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renown artworks including the Sistine ceiling. Prerequisite: ARCH 2233 or ARCH 2233H, and ARCH 2243 or ARCH 2243H and ARCH 4433 or ARCH 4433H. (Typically offered: Irregular)

This course is equivalent to ARCH 4863.

ARCH 4933. Introduction to Historic Preservation. 3 Hours.

Introduces theoretical, methodological and practical issues of architectural preservation in Europe and, more specifically, in Italy. Addresses history and theory of restoration, basic principles of architectural preservation and methodology in the study and praxis of preservation applied to architecture and the issues posed by the preservation of modern architecture. (Typically offered: Fall and Spring)

ARCH 4943. Perspectives on Historic Preservation. 3 Hours.

Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)

This course is cross-listed with LARC 4943, IDES 4943.

ARCH 4943H. Honors Perspectives on Historic Preservation. 3 Hours.

Introduction of history, theory, and praxis of preservation design, emphasizing development and implementation of preservation projects in the practices of architecture, landscape architecture and interior design. Central themes include: preservation as a form of design; principles, rationales, and ideologies associated with preservation practice; and sustainable strategies for preservation design. Prerequisite: ARCH 2233 and ARCH 2243 or LARC 3413 and LARC 4413 or IDES 2883. (Typically offered: Fall)

This course is cross-listed with LARC 4943, IDES 4943, ARCH 4943.

ARCH 5016. Option Studio I. 6 Hours.

Project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: ARCH 4016, or ARCH 4026, or ARCH 4116, or ARCH 4126. (Typically offered: Fall)

ARCH 5016H. Honors Thesis Project I. 6 Hours.

Degree project development dependent upon the synthesis of knowledge and application of critical thinking addressing architectural issues at multiple scales. Prerequisite: Honors candidacy. (Typically offered: Fall)

This course is equivalent to ARCH 5016.

ARCH 5026. Option Studio II. 6 Hours.

Project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. (Typically offered: Spring) May be repeated for degree credit.

ARCH 5026H. Honors Thesis Project II. 6 Hours.

Degree project resolution including demonstrated skill in generating design ideas supported by clear understanding of issues resulting in comprehensive development and presentation of architectural issues at multiple scales. Prerequisite: Honors candidacy. (Typically offered: Spring)

This course is equivalent to ARCH 5026.

ARCH 5253. Architectural Structures Seminar. 3 Hours.

Advanced discussion, investigation, design, and analysis of structural systems, forms, and materials as determinants of architectural design. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARCH 5314. Architectural Professional Practice. 4 Hours.

Study of role and responsibility of the architect, owner, and contractor relationships; professional ethics; organization of the architect's office; contracts and other documents; risk management strategies; and the preparation of the technical specifications and bidding documents of the Project Manual. Prerequisite: ARCH 4026 or ARCH 4116 or ARCH 4126. (Typically offered: Fall)

ARCH 5493. History of Urban Form. 3 Hours.

The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular)

ARCH 5493H. Honors History of Urban Form. 3 Hours.

The study of pre-industrial urban and architectural design strategies in cities from the Classical through the Baroque eras and their rediscovery in the late 20th century, providing the student with a designer's understanding of a broad range of exemplary urban spaces and the buildings that shape them. Prerequisite: ARCH 2233 and ARCH 2243 and ARCH 4433. (Typically offered: Irregular)

This course is equivalent to ARCH 5493.

ARCH 5933. Preservation and Restoration. 3 Hours.

History of the preservation and restoration movement in Europe and the U.S.; its relation to the contemporary urban planning and renewal. Modern economic and administrative techniques of preservation. Participation in history surveys at regional and state levels. Prerequisite: ARCH 2233, ARCH 2243, and ARCH 4433. (Typically offered: Irregular)

ARCH 5943. Preservation Design Technology. 3 Hours.

This course prepares students to work with historic structures by providing an introduction to the history and principles of historic and traditional construction systems, including: concepts and techniques for building conservation, historic materials and technologies, identification of treatments, recordation and research, material properties and behavior, and building forensics. Prerequisite: ARCH 4943 or instructor consent. (Typically offered: Irregular)

ARCH 5953. Preservation Practice Field Trip. 3 Hours.

Intensive field study of a domestic or foreign site of significant or precedent-setting preservation activity, through a field trip and a course of pre-travel lectures. (Intersessions) Prerequisite: ARCH 4943 or instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

Army ROTC (MILS)

Courses

MILS 1001. Introduction to the Army. 1 Hour.

This course focuses on small group leadership and introducing the student to the Army as an organization. Students learn time management, drill and ceremony, military customs and courtesies, basic map reading, water safety and first aid. Introduction to the organization, values, ethics, personal development and the role of the Army. Classroom 1 hour per week. Lab 2 hours per week. Corequisite: Lab component. (Typically offered: Fall)

MILS 1011. Foundations of Agile and Adaptive Leadership. 1 Hour.

Continuation of MILS 1001. Topics include the Army Profession and what it means to be a professional in the U.S. Army, the Army Leadership Requirements Model, intermediate map reading/orienteering, and basic field craft. Classroom 1 hour per week. Lab 2 hours per week. Corequisite: Lab component. (Typically offered: Spring)

MILS 1101. Basic Marksmanship. 1 Hour.

Introduction to safe use of a rifle and practical application of rifle marksmanship. Course includes weapons safety, mechanics, capabilities, and fundamentals of marksmanship. Includes visit to fire at a local indoor rifle range. Materials and equipment furnished by Department of Military Science. (Typically offered: Fall)

MILS 1211. Basic Outdoor Field Craft and Skills. 1 Hour.

Introduction to basic military survival skills and outdoor field craft. Subjects include cold/hot weather survival, water procurement methods, expedient field shelters, signaling, map reading and rappelling technique. Materials and equipment furnished by Department of Military Science. Classroom 2 hours per week. (Typically offered: Fall and Spring)

MILS 2002. Leadership and Decision Making. 2 Hours.

This course focuses on basic Army leadership doctrine and develops the student's skills by introducing them to small unit tactics. Students learn to apply critical thinking and problem solving by using Troop Leading Procedures (TLP). Additional topics include the value of diversity, understanding the officer's role in leading change, management skills, and the fundamentals of the Army as a profession. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MILS 1001 and MILS 1011 or departmental consent. (Typically offered: Fall)

MILS 2012. Army Doctrine and Team Development. 2 Hours.

Continuation of MILS 2002. Topics include Troop Leading Procedures (TLP), time management, military writing, and basic tactics. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MILS 1001, MILS 1011, and MILS 2002 or departmental consent. (Typically offered: Spring)

MILS 2101. Advanced Rifle Marksmanship. 1 Hour.

Course to teach students the fundamentals of Advanced Rifle Marksmanship. Class is conducted once a week with topics including: Air rifle, small bore firing, advanced practical exercises of different shooting positions and marksmanship competition with other universities. Prerequisite: MILS 1101. (Typically offered: Spring)

MILS 3004. Applied Leadership I. 4 Hours.

This course focuses on the development of managerial and leadership abilities and the practical application of these skills during 'hands-on' training. Students learn advanced infantry tactics and demonstrate their leadership potential using this medium. Students are required to lead in drill and ceremony, physical training, and tactical situations. This course prepares the student to excel at the ROTC Advanced Camp (normally attended during the summer between the junior and senior year). One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and (MILS 1001, MILS 1011, MILS 2002, and MILS 2012; or completion of Army ROTC Basic Camp; or completion of basic training with any component of the U.S. Armed Forces). (Typically offered: Fall)

MILS 3014. Applied Leadership II. 4 Hours.

Continuation of MILS 3004. This course prepares the student to excel at the ROTC Advanced Camp (normally attended during the summer between the junior and senior year). Requirements include one 48 hour weekend field training exercise per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and MILS 1001, MILS 1011, MILS 2002, MILS 2012 and MILS 3004; or completion of Army ROTC Basic Camp; or completion of basic training with any component of the U.S. Armed Forces. (Typically offered: Spring)

MILS 4001. Advanced Military Issues. 1 Hour.

Individual study for advanced undergraduates. Students will research, write a paper, and give an oral presentation of a current military issue. Prerequisite: PMS approval. (Typically offered: Fall and Spring)

MILS 4004. Advanced Leadership I. 4 Hours.

This course focuses on the study of various military organizations and their role in military operations. Discussion of command and staff management in military organizations, executive responsibility of Army commissioned officers, service customs, courtesies, and traditions. The senior year includes the study of personnel management, professional ethics, the military justice system, and the Army's training and maintenance management system. This course prepares students to assume responsibilities as a commissioned officer upon graduation. One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and MILS 3004 and MILS 3014. (Typically offered: Fall)

MILS 4011. Advanced Military Correspondence. 1 Hour.

Practicum for advanced undergraduates. Students submit prepared military correspondence projects written in the military style using military forms and formats. Prerequisite: PMS approval. (Typically offered: Fall and Spring)

MILS 4014. Advanced Leadership II. 4 Hours.

Continuation of MILS 4004. This course prepares students to assume responsibilities as a commissioned officer upon graduation. One 48 hour weekend field training exercise is required per semester. Lecture 2 hours, laboratory 3 hours, physical training 3 hours (conducted Tuesday - Thursday) per week. Corequisite: Lab component. Prerequisite: Departmental consent and MILS 3004, MILS 3014 and MILS 4004. (Typically offered: Spring)

Art (ARTS)

Courses

ARTS 1013. Introduction to Drawing from Observation. 3 Hours.

Problems dealing with materials and techniques of drawing, including basic concepts of line, perspective, and value. (Typically offered: Summer)

ARTS 1313. Two-Dimensional Design. 3 Hours.

Studio problems in the use of line, shape, texture, value, and color and their relationships. (Typically offered: Fall and Spring)

ARTS 1323. Three-Dimensional Design. 3 Hours.

Studio problems with the elements of three-dimensional design: structure, space, form, surface, and their relationship. (Typically offered: Fall and Spring)

ARTS 1919C. Studio Foundation I. 9 Hours.

Intensive, studio-format coursework in a variety of two-dimensional, three-dimensional, and time-based media provides an introduction to fundamentals of art and design with emphasis on components of the creative process; research and critical thinking; investigation of materials; and instruction in software and fabrication techniques. 9 credit hours. Corequisite: Drill component. (Typically offered: Fall and Spring)

ARTS 1929C. Studio Foundation II. 9 Hours.

Continuation of Studio Foundation I. Intensive intermediate studio projects in a variety of two-dimensional, three-dimensional, and time-based mediums; instruction in software and fabrication techniques; and the introduction of professional practices, including the assemblage and maintenance of a foundational portfolio; required attendance at weekly seminar. Corequisite: Drill component. Prerequisite: ARTS 1919C (Typically offered: Fall and Spring)

ARTS 3003. Intermediate Drawing. 3 Hours.

Continued training in fundamental drawing skills. Builds upon observational drawing skills with analytic approaches, including the spatial logic of translating three dimensions to two, constructing global value relationships, and making meaningful compositions by linking formal decisions to conceptual intent. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 1013 and instructor consent. (Typically offered: Fall and Spring)

ARTS 3013. Figure Drawing I. 3 Hours.

Investigation of the human form through drawing, with special emphasis on gestural modes of working. Careful analysis of human anatomy, including internal and externally visible structures, position and movement of joints, as well as anatomical proportions and their variations among different individuals. Prerequisite: ARTS 3003. (Typically offered: Spring)

ARTS 3023. Drawing: Advanced Form and Content. 3 Hours.

This course will provide a technical and conceptual basis for independent exploration in the medium of drawing. A variety of approaches and starting points will be explored, including abstract/non-representational drawing, conceptual drawing, process-based drawing, and interpretive representational drawing. Experimental methods and media will be encouraged. Prerequisite: ARTS 3003 and junior or senior standing. (Typically offered: Irregular)

ARTS 3033. Drawing With Color. 3 Hours.

Color issues pertaining to drawing. Projects will challenge students to accurately perceive and recreate color relationships by building optical mixtures of colored marks to create a continuous world of color from a limited set of starting colors. Prerequisite: ARTS 3003. (Typically offered: Irregular)

ARTS 3043. Illustration: Communicating With Drawing. 3 Hours.

How to create images that carry specific, unambiguous meanings - to speak with pictures. Projects will explore various modes of visual communication and relationships to texts, including narrative, editorial and sequential illustrations. Prerequisite: ARTS 3003 or instructor consent. (Typically offered: Irregular)

ARTS 3053. Drawing in the Expanded Field. 3 Hours.

A philosophical examination of the discipline of drawing through experimental works. Initial projects will question the essential aspects of drawing-ness, pushing beyond the typical materials and processes to make drawings with unusual properties. In the second half of the course, students will take on a sustained individual exploration. Prerequisite: ARTS 3003 or instructor consent. (Typically offered: Irregular)

ARTS 3103. Painting I. 3 Hours.

An introduction to oil painting, focusing on painting from direct observation. Topics to be covered include: materials, palette, understanding perceptual color and color theory, and development of the painting through use of layers, value, mark-making, composition, light, and space. Prerequisite: ARTS 1313 and ARTS 3013; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

ARTS 3123. Painting: Water Media. 3 Hours.

Introduction to materials and techniques of watercolor and acrylic painting. Form, composition, and content to be studied through observation and imagination. Traditional techniques as well as experimentation and personal expression are to be explored. Prerequisite: ARTS 3103 or ARTS 3003. (Typically offered: Irregular)

ARTS 3133. Figure Painting. 3 Hours.

Introduction to representational and interpretive figure painting and to contemporary issues in figurative painting. The model as well as other visual sources will be used as a basis for observation, interpretation and invention. Prerequisite: ARTS 3013, ARTS 3103. (Typically offered: Irregular)

ARTS 3153. Painting Perception Into Abstraction. 3 Hours.

Investigation of the abstraction of visual phenomena. Various starting points and approaches will be studied. Emphasis on the analysis of form, the creation of pictorial structure, and the conceptual basis of perceptual abstraction. Prerequisite: ARTS 3103. (Typically offered: Irregular)

ARTS 3163. Abstract Painting. 3 Hours.

An introduction to the material, formal, and conceptual aspects of abstract painting. Projects will explore a variety of starting points for the invention of form in painting. Examines the construction of meaning in modern and contemporary abstract painting through studio work, discussion, writing assignments and lectures. Prerequisite: ARTS 3103. (Typically offered: Irregular)

ARTS 3173. Contemporary Representational Painting. 3 Hours.

Contemporary approaches to the use of imagery in painting. Projects emphasize the systematic alteration of color, form and space through strategies of reduction, omission, distortion and compositing. Prerequisite: ARTS 3103. (Typically offered: Irregular)

ARTS 3203. Beginning Sculpture: Fundamentals of Modeling, Mold Making & Casting. 3 Hours.

An introduction to fundamental additive and subtractive sculpture techniques and methods of seeing and working that give expression to material form. Beginning techniques in modeling, carving, mold making, and basic casting are demonstrated. Lectures, readings, and critiques will develop student awareness of traditional building techniques which inform contemporary sculpture practices. Prerequisite: ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Spring and Summer)

ARTS 3213. Beginning Sculpture: Construction Methods I. 3 Hours.

A focus on material sensitivity through thoughtful and skillful additive approaches. Woodworking and metalworking are introduced as methods to examine structural and spatial possibilities. Through examining and questioning the interplay of form, material, technique, and content, students will develop their knowledge of traditional fabrication processes, which inform contemporary sculpture. Prerequisite: ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Summer)

ARTS 3223. Beginning Sculpture: Critical Issues I. 3 Hours.

An experimental lab focused on critical issues in contemporary sculpture. Students will be challenged to dissect their process of making, to question the nature of sculpture and art-making in the 21st century, and the context in which art is created, shown, and distributed. Prerequisite: ARTS 1323 or (ARTS 1919C and ARTS 1929C). (Typically offered: Fall, Spring and Summer)

ARTS 3403. Printmaking: Introduction. 3 Hours.

Introduction to the technical, formal, conceptual, and historical aspects of printmaking through methods of relief, intaglio (etching), monoprint, serigraphic (screenprinting), and lithographic printing techniques. Prerequisite: ARTS 1919C and ARTS 1929C; or ARCH 1025. (Typically offered: Fall and Spring)

ARTS 3413. Printmaking: Etching. 3 Hours.

Exploration in the technical, formal, conceptual, and historical aspects of intaglio printmaking through traditional and current methods of metal plate etching, aquatint, color inking and printing, collagraph, photo processes, and other techniques. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Spring)

ARTS 3423. Printmaking: Lithography. 3 Hours.

Introduction to lithographic printmaking processes including wet and dry media on stone and plate, photo processes, and various inking methods. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325. (Typically offered: Spring)

ARTS 3433. Printmaking: Relief. 3 Hours.

Exploration in the technical, formal, conceptual, and historical aspects of relief printmaking through traditional and current methods of woodcut, wood engraving, linoleum, CNC routing, digital technologies, moku hanga, and other methods. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325. (Typically offered: Spring)

ARTS 3443. Printmaking: Screenprinting. 3 Hours.

Introduction to serigraphic techniques, including cut stencils, photosensitive stencils, resist methods, additive and reductive printing, and other processes. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325. (Typically offered: Fall and Summer)

ARTS 3453. Printmaking: Monoprint & Monotype. 3 Hours.

Exploration in the technical, formal, conceptual, and historical aspects of monotype and monoprint printmaking through a variety of traditional and current methods to create singular works on paper. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325. (Typically offered: Irregular)

ARTS 3463. Printmaking: Digital Inquiries. 3 Hours.

Exploration of the technical, formal, and conceptual aspects of both traditional printmaking techniques and contemporary digital media and their application to contemporary art and visual culture. Prerequisite: ARTS 3403 or ARTS 3443. (Typically offered: Irregular)

ARTS 3473. Printmaking: Book & Letterpress. 3 Hours.

Exploration in the technical, formal, conceptual, and historical aspects of book arts through traditional and current Eastern and Western methods of various book forms, book construction, binding, design, content, letterpress printing, and conceptual considerations. Prerequisite: ARTS 1919C and ARTS 1929C; or ARTS 3403; or ARCH 1025; or IDES 1045; or LARC 1325. (Typically offered: Irregular)

ARTS 3503. Ceramics: Handbuilding I. 3 Hours.

this introductory course investigates the techniques, materials, and themes common to hand-built ceramics. Students will also be introduced to ceramic studio processes, including clay and glaze mixing, low temperature gas and electric firing, and studio safety procedures. Prerequisite: ARTS 1013 and ARTS 1313 and ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Summer)

ARTS 3523. Ceramics: Wheelthrowing I. 3 Hours.

This introductory course investigates the techniques, materials, and themes common in wheel-thrown ceramics. Students will also be introduced to ceramic studio processes, including clay and glaze mixing, high temperature gas and electric firing, and studio safety procedures. Prerequisite: ARTS 1013 and ARTS 1313 and ARTS 1323; or ARTS 1919C and ARTS 1929C. (Typically offered: Spring and Summer)

ARTS 3533. Ceramics: Wheelthrowing II. 3 Hours.

This concept-driven intermediate-level course focuses on expanding the students' skills and knowledge of wheel-thrown and hand-built forms. Additional emphasis will be placed on clay and glaze testing, and understanding the processes of firing in electric, gas, salt/soda, and wood-firing kilns. Prerequisite: ARTS 3523. (Typically offered: Irregular)

ARTS 3543. Ceramics: Slip-Casting. 3 Hours.

This concept-driven intermediate-level course focuses on the techniques and approaches common to ceramic slip-casting. Plaster mold-making, model development and preparation, slip mixing, and slip-casting are emphasized. Students will utilize low and high temperature gas and electric firings. Prerequisite: ARTS 3503. (Typically offered: Spring)

ARTS 3723. Experiments in Moving Image I. 3 Hours.

An introduction to experimental video art, providing a theoretical and practical foundation for creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Students will complete assignments creating new, original moving image works. Prerequisite: ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

ARTS 3803. Photography I. 3 Hours.

Beginning photography. Introduction to analog and digital B & W materials, techniques, and theory. Development of visual ideas through assignments, critiques, slide lectures, and demonstrations. Prerequisite: ARTS 1313; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall and Spring)

ARTS 3813. Alternative Photographic Processes. 3 Hours.

Advanced B & W materials, techniques, and theory. Introduction to "non-traditional" materials, techniques, and theory (Cyanotype, Van Dyck Brownprint, Gum Biochromate, Kwik-PRINT, etc.). Assignments, critiques, slide lectures, and demonstrations. Prerequisite: ARTS 3803. (Typically offered: Irregular)

ARTS 3933. Color Studies. 3 Hours.

Investigation of color qualities and relationships through research and studio problems. Prerequisite: ARTS 1313 and ARTS 1323 and ARTS 3013; or ARTS 1919C and ARTS 1929C. (Typically offered: Fall)

ARTS 4003. Drawing Projects. 3 Hours.

Individual studio projects in Drawing. Each student will propose a project to pursue over the course of the semester. Prerequisite: Senior standing as a Studio Art BA or BFA concentrating in drawing. (Typically offered: Spring)

ARTS 4023. Figure Drawing II. 3 Hours.

Advanced study of the figure with emphasis on figure structure and its relationship to pictorial form in drawing. Prerequisite: ARTS 3013. (Typically offered: Irregular)

ARTS 404V. Special Problems in Drawing. 1-6 Hour.

Individual projects in drawing arranged with the instructor. Prerequisite: ARTS 3023. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ARTS 4133. Landscape Painting. 3 Hours.

Exploration of perceptual and conceptual approaches to painting the landscape. Both traditional and experimental techniques of oil painting will be studied. Includes outdoor on-site painting. Prerequisite: ARTS 3103. (Typically offered: Irregular)

ARTS 4153. Topics in Advanced Painting. 3 Hours.

Topics in advanced and experimental painting. Prerequisite: 6 hours of painting. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ARTS 417V. Special Problems in Painting. 1-6 Hour.

Individual technique and subject matter projects to be arranged with the instructor. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4183. Contemporary Issues in Painting. 3 Hours.

Examination of concepts and themes relevant to the contemporary practice of painting, accompanied by the production of an individually determined body of work. Emphasis on studio work supplemented by research, critique, reading and writing. Pre-or Corequisite: Three hours of painting from ARTS 3123, ARTS 3133, ARTS 3153, ARTS 3163, ARTS 3173, ARTS 4133, or ARTS 4153. Prerequisite: ARTS 3103. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

ARTS 4193. Advanced Painting. 3 Hours.

Intensive course for those art majors concentrating in painting. Extended, individually determined projects will emphasize production of a well researched, conceptually grounded and cohesive body of work. Supplemented by reading, writing and discussion of contemporary issues in painting. Pre- or Corequisite: Three hours of painting from ARTS 3123, ARTS 3133, ARTS 3153, ARTS 3163, ARTS 3173, ARTS 4133, or ARTS 4153. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4203. Intermediate Sculpture: Modeling, Moldmaking, & Casting II. 3 Hours.

Merging historical methodology and advanced technology from lost-wax metal casting to digital fabrication, a continuation of additive and subtractive techniques in modeling, carving, moldmaking, and casting. Specific problems utilizing various media are preceded by readings, lectures, and demonstrations. Prerequisite: ARTS 3203. (Typically offered: Fall and Summer)

ARTS 4213. Intermediate Sculpture: Mixed Media & Spatial Context. 3 Hours.

An exploration in assemblage, installation, environmental art, light, and kinetics as they apply to contemporary sculptural language. Specific problems utilizing various media are preceded by readings, lectures, and demonstrations. Pre- or Corequisite: ARTS 3213. (Typically offered: Fall)

ARTS 4223. Advanced Sculpture: Critical Issues II. 3 Hours.

A directed analysis of form and its relationship to content based on the development of work in students' medium of choice. Students will acquire the technical skills needed to meet personal vision through guidance of the instructor. Research evidenced in work, discussions, and critiques is emphasized. Prerequisite: 6 hours of intermediate level sculpture courses: Choose from ARTS 4203, ARTS 4213, and ARTS 4243. (Typically offered: Spring)

ARTS 423V. Special Problems in Sculpture. 1-6 Hour.

Individual projects in sculpture with emphasis on materials exploration. Prerequisite: ARTS 4223. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4243. Intermediate Sculpture: Construction Methods II. 3 Hours.

A deeper investigation into construction techniques to further examine structural and spatial possibilities and question the relationship between traditional and contemporary sculptural materials. Through a more profound and critical analysis of form, material, process, content, and context, construction methodology will be established as a foundation for individual practice. Prerequisite: ARTS 3213. (Typically offered: Spring)

ARTS 4413. Printmaking: Intermediate. 3 Hours.

Continued study in various printmaking media with emphasis on individual technical research, development of personal imagery, and refinement of skills. Two 3000-level printmaking courses required. Prerequisite: ARTS 3403 and ARTS 3443. (Typically offered: Fall and Spring)

ARTS 4483. Printmaking: Advanced. 3 Hours.

Continued advanced study in various printmaking media with emphasis on individual technical research, development of personal imagery, and refinement of skills. Prerequisite: ARTS 4413. (Typically offered: Fall and Spring)

ARTS 449V. Special Problems in Prints. 1-6 Hour.

Advanced individual study of one or more printmaking processes with emphasis on individual technical research, development of personal imagery, and refinement of skills. Prerequisite: ARTS 3403. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4503. Intermediate Ceramics. 3 Hours.

Focuses on discovering and developing a personal approach to the creation of ceramic objects. Students will explore and test clay bodies, surface treatments, and firing methods while simultaneously exploring ideas, formats, contexts, and interpretations to their work. Any or all ceramic processes may be used. Pre- or corequisite: ARTS 3503 or ARTS 3523 or ARTS 3543. (Typically offered: Fall)

ARTS 4513. Technical Ceramics. 3 Hours.

Advanced study of ceramic materials and processes. Clay composition, clay body formulation and analysis, glaze composition and formulation, firing methods (low, mid, and high-temperature gas, electric and atmospheric firings), and kiln design will be covered in depth. Prerequisite: ARTS 4503. (Typically offered: Irregular)

ARTS 4573. Advanced Ceramics. 3 Hours.

This course focuses on the generation and development of ideas and objects to form a cohesive body of work. Students will lead their own explorations, technically and conceptually, while working toward a professional-level standard of output. Any or all ceramic processes may be used. Prerequisite: ARTS 3503 and ARTS 3523 and ARTS 3543 and ARTS 4503. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 458V. Special Problems in Ceramics. 1-3 Hour.

Individual projects in ceramic techniques. Prerequisite: ARTS 3503 or ARTS 3523. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 459V. Individual Instruction. 1-6 Hour.

Special projects on an arranged basis for advanced students in any area of art in which the catalog sequence of courses has been completed. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4743. Experiments in Moving Image II. 3 Hours.

Further exploration of experimental video art, pushing the theoretical and practical foundation students build in "Experiments in Moving Image I". Expands on creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Prerequisite: ARTS 1919C, ARTS 1929C and ARTS 3723. (Typically offered: Fall and Spring)

ARTS 4813. Digital Photography. 3 Hours.

Introduction to digital photography production, techniques and theory. Digital input from scanning (flatbed & slide/negative), digital cameras, video and internet sources. Computer assisted manipulation of imagery for correction and abstraction. Output to a digital printing systems, analog systems (film recorder), servers and Internet. Prerequisite: ARTS 3803. (Typically offered: Fall and Spring)

ARTS 4823. Color Photography I. 3 Hours.

Introduction to color production. Color materials, techniques and theory. Direct reversal transparencies and prints, color negative processing and printing, and manipulation of color materials. Assignments, demonstrations, critiques, and lectures. Prerequisite: ARTS 3803. (Typically offered: Irregular)

ARTS 4833. Advanced Black and White Photography. 3 Hours.

Advanced black and white theory, practice and techniques including: Zone System, large format camera and studio lighting. Prerequisite: ARTS 3803. (Typically offered: Irregular)

ARTS 484V. Special Problems in Photography. 1-6 Hour.

Individual instruction for advanced undergraduates and graduate students. Special projects in photography designated by students in collaboration with faculty. Prerequisite: ARTS 3803 and (ARTS 3813 or ARTS 4823 or ARTS 4833). (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 4853. Documentary Photography. 3 Hours.

This course will introduce students to a variety of methods used in the area of documentary photography in order to give them the conceptual and technical skills necessary to create extended projects that focus on documenting and visually exploring subjects in an in-depth manner. Prerequisite: ARTS 3803. (Typically offered: Irregular)

ARTS 4883. Bookmaking. 3 Hours.

Introduction to the creation of unique, limited edition artist's bookworks -- with emphasis on technical knowledge and conceptual understanding of the book form as a means of artistic expression. (Typically offered: Irregular)

ARTS 490VH. Honors Thesis in Studio Art. 1-6 Hour.

Special problems in studio art. Prerequisite: Junior standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

ARTS 491V. Internships in Art. 1-3 Hour.

Credit for practical experience gained through internships in studio art, gallery practices and/or art education. Report required from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: Junior standing and art major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ARTS 4923. Professional Development. 3 Hours.

The creation and presentation of a portfolio of work in the student's area of concentration, accompanied by creation of relevant materials for successful professional practice. Art Education students may choose ARED 476V, Student Teaching, (12 credit hours) as a substitution. Prerequisite: Art majors only. Requires junior, senior or graduate standing. (Typically offered: Fall and Spring)

ARTS 493V. Fine Arts Gallery Internship. 1-3 Hour.

Study all aspects of operating the Fine Arts Gallery. Research and preparation for exhibitions, organize and install exhibits, care of art works, create and distribute publicity, arrange interviews with newspapers, and other media. (Typically offered: Fall, Spring and Summer)

ARTS 495V. Special Topics. 1-6 Hour.

May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARTS 498V. Senior Thesis. 1-6 Hour.

Senior thesis. (Typically offered: Fall, Spring and Summer)

ARTS 5013. Graduate Drawing. 3 Hours.

Graduate level study of drawing materials and techniques. Prerequisite: Graduate standing. (Typically offered: Fall)

ARTS 5023. Figure Drawing II. 3 Hours.

(Formerly ARTS 4023.) Advanced study of the figure with emphasis on figure structure and its relationship to pictorial form in drawing. Graduate degree credit will not be given for both ARTS 4023 and ARTS 5023. Prerequisite: ARTS 2013. (Typically offered: Irregular)

ARTS 5513. Technical Ceramics. 3 Hours.

(Formerly ARTS 4513.) Advanced study of ceramic materials and processes. Clay composition, clay body formulation and analysis, glaze composition and formulation, firing methods (low, mid, and high-temperature gas, electric and atmospheric firings), and kiln design will be covered in depth. Graduate degree credit will not be given for both ARTS 4513 and ARTS 5513. Prerequisite: ARTS 4503. (Typically offered: Irregular)

ARTS 5723. Experiments in Moving Image I. 3 Hours.

An introduction to experimental video art, providing a theoretical and practical foundation for creating video for installation, performance or screen, set within a context of historical and contemporary video art and experimental film. Students will complete assignments creating new, original moving image works. (Typically offered: Fall and Spring)

ARTS 5813. Digital Photography. 3 Hours.

(Formerly ARTS 4813.) Introduction to digital photography production, techniques and theory. Digital input from scanning (flatbed & slide/negative), digital cameras, video and internet sources. Computer assisted manipulation of imagery for correction and abstraction. Output to a digital printing systems, analog systems (film recorder), servers and Internet. Graduate degree credit will not be given for both ARTS 4813 and ARTS 5813. Prerequisite: ARTS 3803. (Typically offered: Fall and Spring)

ARTS 5833. Advanced Black and White Photography. 3 Hours.

(Formerly ARTS 4833.) Advanced black and white theory, practice and techniques including: Zone System, large format camera and studio lighting. Graduate degree credit will not be given for both ARTS 4833 and ARTS 5833. Prerequisite: ARTS 3803. (Typically offered: Irregular)

ARTS 584V. Special Problems in Photography. 1-6 Hour.

(Formerly ARTS 484V.) Individual instruction for advanced undergraduates and graduate students. Special projects in photography designated by students in collaboration with faculty. Graduate degree credit will not be given for both ARTS 484V and ARTS 584V. Prerequisite: ARTS 3803 and (ARTS 3813 or ARTS 4823 or ARTS 4833). (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ARTS 5883. Bookmaking. 3 Hours.

(Formerly ARTS 5883.) Introduction to the creation of unique, limited edition artist's bookworks -- with emphasis on technical knowledge and conceptual understanding of the book form as a means of artistic expression. Graduate degree credit will not be given for both ARTS 4883 and ARTS 5883. (Typically offered: Irregular) This course is equivalent to ARTS 4883.

ARTS 5913. Graduate Seminar in Studio Art. 3 Hours.

Special seminars at the graduate level in Studio Art. Subject matter changes depending on student interest and faculty expertise. Prerequisite: Admission to MFA program. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARTS 5923. MFA First Year Seminar. 3 Hours.

Introduction to graduate level study in art, including pedagogy related to teaching art at the college level. Topics to be covered include: development of research interests, critical thinking within studio practice, situating work in the contemporary context, expectations at the graduate level, and an introduction to techniques and theories of studio art education. Prerequisite: Admission to MFA program. (Typically offered: Fall)

ARTS 5933. MFA Second Year Seminar. 3 Hours.

Preparation for a professional art practice. Examination of theoretical and practical aspects of career development for contemporary artists. Prerequisite: ARTS 5923. (Typically offered: Fall)

ARTS 596V. Fine Arts Gallery Internship. 1-3 Hour.

(Formerly ARTS 493V.) Study all aspects of operating the Fine Arts Gallery. Research and preparation for exhibitions, organize and install exhibits, care of art works, create and distribute publicity, arrange interviews with newspapers, and other media. Graduate degree credit will not be given for both ARTS 493V and ARTS 596V. (Typically offered: Fall, Spring and Summer)

ARTS 601V. Master of Fine Arts Exhibition. 1-6 Hour.

Production and presentation of a one person exhibition of art work. The M.F.A. candidate will be responsible for making three acceptable slide sets of the exhibition and exhibition statements. Prerequisite: M.F.A. candidacy. (Typically offered: Fall, Spring and Summer)

ARTS 602V. Graduate Drawing. 1-6 Hour.

Individual problems in drawing techniques. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARTS 6033. Graduate Drawing Studio. 3 Hours.

Intensive studio practice in drawing combined with reading, writing, and discussion of relevant contemporary issues in the fields of painting and drawing. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 612V. Graduate Painting. 1-6 Hour.

Individual problems in painting techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6133. Graduate Painting Studio. 3 Hours.

Intensive studio practice in painting combined with reading, writing, and discussion of relevant contemporary issues in the fields of painting and drawing. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 622V. Graduate Sculpture. 1-6 Hour.

Individual problems in sculpture techniques. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

ARTS 6233. Graduate Sculpture Studio. 3 Hours.

Intensive studio practice in sculpture combined with reading, writing, and discussion of relevant contemporary issues in the field of sculpture and new media. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 642V. Graduate Printmaking. 1-6 Hour.

Individual problems in printmaking techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6433. Graduate Printmaking Studio. 3 Hours.

Intensive studio practice in printmaking combined with reading, writing, and discussion of relevant contemporary issues in the fields of printmaking. Includes regular critiques, both with the group and in individual consultations with the instructor. Prerequisite: Admission to MFA program in Studio Art. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

ARTS 652V. Graduate Ceramics. 1-6 Hour.

Individual problems in ceramic techniques. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6533. Graduate Ceramics Studio. 3 Hours.

Discussion of contemporary ceramics issues in tandem with the development of a cohesive body of work. Students lead their own explorations, technically and conceptually, while working toward a professional standard of output. Includes regular critiques, with the class and individually with the instructor. Any ceramic processes may be used. Prerequisite: MFA Studio Art Graduate Standing. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 682V. Graduate Photography. 1-6 Hour.

Individual problems in photography. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ARTS 6833. Graduate Photography Studio. 3 Hours.

Intensive studio practice with reading and discussion of contemporary issues in photography for MFA students. Prerequisite: Admission to MFA program in Art. (Typically offered: Fall and Spring) May be repeated for up to 18 hours of degree credit.

ARTS 695V. Special Topics. 1-6 Hour.

Subject matter not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

Art Education (ARED) Courses

ARED 1003. Introduction to Art Education. 3 Hours.

Covers foundational theories in art education, educational psychology, and philosophy. An 18-hour early field experience includes observation and participation in art classes in public schools and community settings. (Typically offered: Fall and Spring)

ARED 2003. Diversity, Pedagogy, & Visual Culture. 3 Hours.

Covers the issues of diversity in art and visual culture education. (Typically offered: Fall and Spring)

ARED 3003. Curriculum Design & Teaching Practices in Art Education. 3 Hours.

Covers contemporary art education theories and their implication to curriculum design. Students will discuss sociocultural learning theories in relation to the art-making process. (Typically offered: Fall and Spring)

ARED 3013. Teaching Art to Special Populations. 3 Hours.

Provides future art educators with the current issues and practices necessary for teaching art to students with special needs through inverse inclusion and rotating roles as teacher, assistant, student, and observer. Focuses on contemporary pedagogy to art classroom inclusion practice with special needs students in a community-based setting with service learning. (Typically offered: Irregular)

ARED 3013H. Honors Teaching Art to Special Populations. 3 Hours.

Provides future art educators with the current issues and practices necessary for teaching art to students with special needs through inverse inclusion and rotating roles as teacher, assistant, student, and observer. Focuses on contemporary pedagogy to art classroom inclusion practice with special needs students in a community-based setting with service learning. Prerequisite: Honors standing. (Typically offered: Irregular)

This course is equivalent to ARED 3013.

ARED 3613. Public School Art I. 3 Hours.

Selection, preparation and use of instructional materials in elementary and secondary schools. For students seeking teaching certification in art. Prerequisite: ARTS 1013 and ARTS 1313 and ARTS 1323 and ARTS 3013. (Typically offered: Irregular)

ARED 3643. Teaching Art in Elementary Schools. 3 Hours.

Methods and materials used in teaching elementary school art. Prerequisite: ARED 3613. (Typically offered: Fall)

ARED 3643H. Honors Teaching Art in Elementary Schools. 3 Hours.

Methods and materials used in teaching elementary school art. Prerequisite: ARED 3613. (Typically offered: Fall)

This course is equivalent to ARED 3643.

ARED 3653. Teaching Art in Secondary Schools. 3 Hours.

Methods and materials used in teaching secondary school art. Prerequisite: ARED 3613. (Typically offered: Spring)

ARED 3653H. Honors Teaching Art in Secondary Schools. 3 Hours.

Methods and materials used in teaching secondary school art. Prerequisite: ARED 3613. (Typically offered: Spring)

This course is equivalent to ARED 3653.

ARED 4003. Community Art. 3 Hours.

Covers community-based art theories, classroom learning theories, and instructional strategies. It is also a teaching practicum course for community outreach; thus, students will design curriculum, implement lesson plans, and organize a final exhibition. Includes at least 24 hours of community teaching experience. Prerequisite: ARED 3003. (Typically offered: Spring)

ARED 4003H. Honors Community Art. 3 Hours.

Covers community-based art theories, classroom learning theories, and instructional strategies. It is also a teaching practicum course for community outreach; thus, students will design curriculum, implement lesson plans, and organize a final exhibition. Includes at least 24 hours of community teaching experience. Prerequisite: ARED 3003 and honors standing. (Typically offered: Spring)

This course is equivalent to ARED 4003.

ARED 4633. Individual Research in Art Education. 3 Hours.

Independent study in specific areas of art education. Prerequisite: 6 hours of art education. (Typically offered: Fall and Spring)

ARED 476V. Student Teaching in Art. 6-12 Hour.

A minimum of 6 weeks will be spent in an off-campus school. During this time the student teacher will have an opportunity under supervision to observe, to teach and participate in other activities involving the school and community. Successful completion of a criminal background check required before student can begin student teaching. Prerequisite: ARTBFA major. (Typically offered: Fall and Spring)

ARED 4773. Professional Development in Art Education. 3 Hours.

Students will reflect on their art education experiences and the roles of art educators in various educational settings. This capstone course prepares students for their professional careers in K-12 schools and community settings through journaling, discussions, and teaching portfolio review. (Typically offered: Fall and Spring)

ARED 486V. Internship in Art Education. 1-3 Hour.

Offers credit for practical experience gained through internships in community-based art education including museums and/or other organizations. A report is required from the intern and field supervisor on significant accomplishments and/or progress. Prerequisite: ARED 1003. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ARED 486VH. Honors Internship in Art Education. 1-3 Hour.

Offers credit for practical experience gained through internships in community-based art education including museums and/or other organizations. A report is required from the intern and field supervisor on significant accomplishments and/or progress. Prerequisite: ARED 1003 and honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit. This course is equivalent to ARED 486V.

ARED 490VH. Honors Thesis in Art Education. 1-6 Hour.

Special problems in Art Education. Prerequisite: Junior standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

ARED 4953. Special Topics in Art Education. 3 Hours.

Art education topics not included in regularly offered courses. Pre- or Corequisite: ARED 3613. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARED 4953H. Honors Special Topics in Art Education. 3 Hours.

Art education topics not included in regularly offered courses. Pre- or Corequisite: ARED 3613. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit. This course is equivalent to ARED 4953.

ARED 5953. Special Topics in Art Education. 3 Hours.

(Formerly ARED 4953.) Art education topics not included in regularly offered courses. Graduate degree credit will not be given for both ARED 4953 and ARED 5953. Pre- or Corequisite: ARED 3613. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARED 695V. Special Topics in Art Education. 1-6 Hour.

Subject matter not covered in regularly offered courses, and relating to art education. May be repeated for different topics. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

Art History (ARHS) Courses

ARHS 1003. Basic Course in the Arts: Art Lecture (ACTS Equivalency = ARTA 1003). 3 Hours.

A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, films, and slides. Three hours a week plus attendance at specified programs and exhibits. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. (Typically offered: Fall, Spring and Summer)

ARHS 1003H. Honors Basic Course in the Arts: Art Lecture. 3 Hours.

A general introduction to the visual arts. Lectures on theory and criticism, demonstrations, films, slides. Three hours a week plus attendance at specified programs and exhibits. May not be presented toward satisfaction of the B.A. fine arts requirement by art majors. (Typically offered: Irregular) This course is equivalent to ARHS 1003.

ARHS 2913. Art History Survey I (ACTS Equivalency = ARTA 2003). 3 Hours.

Survey of art works from Stone Age through Medieval. Completion of ARHS 2913 and ARHS 2923 satisfies the content covered in ARHS 1003 for fulfillment of the fine arts university/state core. (Typically offered: Fall and Spring)

ARHS 2923. Art History Survey II (ACTS Equivalency = ARTA 2103). 3 Hours.

Survey of art works from Renaissance to the present. Completion of ARHS 2913 and ARHS 2923 satisfies the content covered in ARHS 1003 for fulfillment of the fine arts university/state core. (Typically offered: Fall and Spring)

ARHS 3923H. Honors Colloquium. 3 Hours.

Covers a special topic or issue. Offered as a part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in art). (Typically offered: Irregular)

ARHS 4413. Greek Art and Archaeology. 3 Hours.

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. Prerequisite: ARHS 2913. (Typically offered: Spring and Summer Odd Years)

This course is cross-listed with CLST 4413.

ARHS 4413H. Honors Greek Art and Archaeology. 3 Hours.

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. Prerequisite: ARHS 2913 and honors standing. (Typically offered: Spring and Summer Odd Years)

This course is cross-listed with CLST 4413, ARHS 4413.

ARHS 4423. Roman Art and Archaeology. 3 Hours.

Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. Prerequisite: ARHS 2913. (Typically offered: Spring and Summer Even Years)

This course is cross-listed with CLST 4423.

ARHS 4423H. Honors Roman Art and Archaeology. 3 Hours.

Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. Prerequisite: ARHS 2913 and honors standing. (Typically offered: Spring and Summer Even Years)

This course is cross-listed with CLST 4423, ARHS 4423.

ARHS 451V. Internship in Art History. 1-3 Hour.

Credit for practical experience gained through an internship in art history. Report required from intern and field supervisor on significant accomplishments and/or progress. Prerequisite: 9 hours of ARHS courses. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARHS 4563. Pre-Columbian Art. 3 Hours.

An introduction to pre-Columbian art from Mexico (3000 BC- 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)

ARHS 4563H. Honors Pre-Columbian Art. 3 Hours.

An introduction to pre-Columbian art from Mexico (3000 BC- 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture, architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)

This course is equivalent to ARHS 4563.

ARHS 4573. Artists of New Spain. 3 Hours.

An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)

ARHS 4573H. Honors Artists of New Spain. 3 Hours.

An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)

This course is equivalent to ARHS 4573.

ARHS 4613. African Art and Society. 3 Hours.

Situates the artistic production of modern Africa (1800-present) within a socio-cultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonialization, and globalization) on the artistic practice. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4613H. Honors African Art and Society. 3 Hours.

Situates the artistic production of modern Africa (1800-present) within a socio-cultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonialization, and globalization) on the artistic practice. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)

This course is equivalent to ARHS 4613.

ARHS 4623. African American Art History. 3 Hours.

Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones." It then follows developments in African American art from the Antebellum Period to the present. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4623H. Honors African American Art History. 3 Hours.

Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones." It then follows developments in African American art from the Antebellum Period to the present. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)

This course is equivalent to ARHS 4623.

ARHS 4633. Contemporary African Art. 3 Hours.

Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4633H. Honors Contemporary African Art. 3 Hours.

Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular)

This course is equivalent to ARHS 4633.

ARHS 4733. Saint Peter's and the Vatican. 3 Hours.

Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renowned artworks including the Sistine ceiling. Prerequisite: ARHS 2913 and ARHS 2923. (Typically offered: Irregular)

This course is equivalent to ARCH 4863.

ARHS 4733H. Honors Saint Peter's and the Vatican. 3 Hours.

Examines art and the architectural history of St. Peter's Basilica in Rome from antiquity to present. Emphasis on the Renaissance/Baroque church and its early Christian predecessor. Students consider the impact of devotional practices and papal politics on the church, the Vatican Palace, and its renowned artworks including the Sistine ceiling. Prerequisite: ARHS 2913 and ARHS 2923 and honors standing. (Typically offered: Irregular)

This course is equivalent to ARCH 4863.

ARHS 4743. Medieval Architecture. 3 Hours.

Traces the history of architecture in Western Europe from c. 300 - 1400. Focus is predominantly, though not exclusively, on the history of Christian architecture. Major architectural sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARHS 2913 or ARCH 4433 (Typically offered: Irregular)

ARHS 4743H. Honors Medieval Architecture. 3 Hours.

Traces the history of architecture in Western Europe from c. 300 - 1400. Focus is predominantly, though not exclusively, on the history of Christian architecture. Major architectural sites studied include: the early Christian basilicas in Rome, the towered churches of Carolingian emperors, Romanesque monasteries, and Gothic cathedrals. Prerequisite: ARHS 2913 or ARCH 4433 (Typically offered: Irregular)

This course is equivalent to ARHS 4743.

ARHS 4753. Renaissance and Baroque Architecture. 3 Hours.

Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and edifices, this course charts the evolution of a commanding Western architectural tradition with close attention to social, humanistic, and religious contexts. Prerequisite: ARHS 2923 or ARCH 4433. (Typically offered: Irregular)

ARHS 4753H. Honors Renaissance and Baroque Architecture. 3 Hours.

Study of Renaissance and Baroque architecture in Europe and the New World from 1400 to 1700. With reference to an array of texts, drawings, and edifices, this course charts the evolution of a commanding Western architectural tradition with close attention to social, humanistic, and religious contexts. Prerequisite: ARHS 2923 or ARCH 4433. (Typically offered: Irregular)

This course is equivalent to ARHS 4753.

ARHS 4763. Seminar in Critical Theory. 3 Hours.

Study of critical theory as it relates to problems in modern and contemporary art. Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring)

ARHS 4763H. Honors Seminar in Critical Theory. 3 Hours.

Study of critical theory as it relates to problems in modern and contemporary art.
Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring)
This course is equivalent to ARHS 4763.

ARHS 4773. History of New Media Art. 3 Hours.

Examines the history of "new media" art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Prerequisite: ARHS 2923 and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)

ARHS 4773H. Honors History of New Media Art. 3 Hours.

Examines the history of "new media" art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Prerequisite: ARHS 2923, honors standing and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)
This course is equivalent to ARHS 4773.

ARHS 4783. Special Topics in Contemporary Art. 3 Hours.

Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 4783H. Honors Special Topics in Contemporary Art. 3 Hours.

Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. Prerequisite: ARHS 2923 and honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is equivalent to ARHS 4783.

ARHS 4793. Making the Museum: History, Theory and Practice. 3 Hours.

Presents a broad overview of the institutional history and the contemporary professional practice of the museum world. Features numerous visiting lectures from a working professionals from the local area and nationwide institutions. Prerequisite: Any 3 credit hour, 3000 level or higher art history course. (Typically offered: Spring Even Years)

ARHS 4813. The History of Photography. 3 Hours.

Survey of photography from 1685 to present. (Typically offered: Irregular)

ARHS 4823. History of Graphic Design. 3 Hours.

Survey of graphic design history from 1850 to the present. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4833. Ancient Art. 3 Hours.

Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Prerequisite: ARHS 2913. (Typically offered: Irregular)

ARHS 4833H. Honors Ancient Art. 3 Hours.

Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Prerequisite: ARHS 2913. (Typically offered: Irregular)
This course is equivalent to ARHS 4833.

ARHS 4843. Medieval Art. 3 Hours.

Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. (Typically offered: Irregular)

ARHS 4843H. Honors Medieval Art. 3 Hours.

Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Prerequisite: ARHS 2913. (Typically offered: Irregular)
This course is equivalent to ARHS 4843.

ARHS 4853. Italian Renaissance Art. 3 Hours.

Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4853H. Honors Italian Renaissance Art. 3 Hours.

Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4853.

ARHS 4863. Northern Renaissance Art. 3 Hours.

Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4863H. Honors Northern Renaissance Art. 3 Hours.

Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4863.

ARHS 4873. Baroque Art. 3 Hours.

Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4873H. Honors Baroque Art. 3 Hours.

Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4873.

ARHS 4883. 18th and 19th Century European Art. 3 Hours.

Study of eighteenth- and nineteenth-century art and architecture in Europe. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4883H. Honors 18th and 19th Century European Art. 3 Hours.

Study of eighteenth and nineteenth century art and architecture in Europe. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4883.

ARHS 4893. 20th Century European Art. 3 Hours.

Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4893H. Honors 20th Century European Art. 3 Hours.

Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4893.

ARHS 490VH. Honors Thesis in Art History. 1-6 Hour.

Special problems in art history. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

ARHS 4913. American Art to 1860. 3 Hours.

The visual arts in the United States from Colonial times through 1860. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4913H. Honors American Art to 1860. 3 Hours.

The visual arts in the United States from Colonial times through 1860. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4913.

ARHS 4923. American Art 1860-1960. 3 Hours.

The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 4923H. Honors American Art 1860 - 1960. 3 Hours.

The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Prerequisite: ARHS 2923. (Typically offered: Irregular)
This course is equivalent to ARHS 4923.

ARHS 4933. Contemporary Art. 3 Hours.

Study of styles and major trends in the visual arts since 1960. Prerequisite: ARHS 2923. (Typically offered: Fall)

ARHS 4933H. Honors Contemporary Art. 3 Hours.

Study of styles and major trends in the visual arts since 1960. Prerequisite:

ARHS 2923 and ARHS 4923. (Typically offered: Fall)

This course is equivalent to ARHS 4933.

ARHS 4943. Seminar in Art Criticism. 3 Hours.

Study and problems in the criticism of art forms and styles. Prerequisite: 9 hours of

art history. (Typically offered: Fall)

ARHS 4943H. Honors Seminar in Art Criticism. 3 Hours.

Study and problems in the criticism of art forms and styles. Prerequisite: 9 hours of

art history. (Typically offered: Fall)

This course is equivalent to ARHS 4943.

ARHS 4953. Art Museum Studies. 3 Hours.

A survey of the history and function of the art museum and an introduction

to museum work. Investigation of collections and collections management, conservation, exhibitions, education and public programs, museum management, and contemporary issues which effect the museum profession. Prerequisite:

ARHS 2913 and ARHS 2923, or graduate Art MFA standing. (Typically offered: Irregular)

ARHS 4963. Individual Research in Art History. 3 Hours.

Independent study in specific areas of art history and criticism. Prerequisite: 12

hours of Art History and permission of instructor. (Typically offered: Fall and Spring)

ARHS 4963H. Honors Individual Research in Art History. 3 Hours.

Independent study in specific areas of art history and criticism. Prerequisite: 12

hours of Art History and permission of instructor. (Typically offered: Fall, Spring and Summer)

This course is equivalent to ARHS 4963.

ARHS 4973. Seminar in Art History. 3 Hours.

Special studies of periods and styles of art. Prerequisite: 9 hours of Art History.

(Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARHS 4983. Special Topics in Art History. 3 Hours.

Subject matter not covered in regularly offered courses, and relating to the history of art before the nineteenth century. May be repeated for different topics. Prerequisite:

ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 4983H. Honors Special Topics in Art History. 3 Hours.

Subject matter not covered in regularly offered courses, and relating to the history of art before the nineteenth century. May be repeated for different topics. Prerequisite:

ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

This course is equivalent to ARHS 4983.

ARHS 4993. Special Topics in Modern Art. 3 Hours.

Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics.

Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 5563. Pre-Columbian Art. 3 Hours.

An introduction to pre-Columbian art from Mexico (3000 BC- 1521 AD) through a survey of works of art from different media: sculpture, architecture, and mural painting. Topics examined include: sacred images, political uses of sculpture,

architecture and cosmogony, as well as the relationship between the material and content. (Typically offered: Irregular)

ARHS 5573. Artists of New Spain. 3 Hours.

An overview of colonial art in colonial New Spain. Focused on native agency, social function of art, and cross-cultural communication. Topics include indigenous materials and techniques, the use of images in legal contexts, and ritual liturgy. Some consideration will be given to artworks from the viceroyalty of Peru. (Typically offered: Irregular)

ARHS 5763. Seminar in Critical Theory. 3 Hours.

(Formerly ARHS 4763.) Study of critical theory as it relates to problems in modern and contemporary art. Graduate degree credit will not be given for both ARHS 4763 and ARHS 5763. Prerequisite: Nine credit hours of ARHS coursework. (Typically offered: Spring)

ARHS 5773. History of New Media Art. 3 Hours.

(Formerly ARHS 4773.) Examines the history of "new media" art in relation to larger shifts in technology, philosophy and politics. Beginning in the 19th century, the course explores the development of photography, film, video, performance, sound and digital art through the 20th century. Culminates with an examination of contemporary practice. Graduate degree credit will not be given for both ARHS 4773 and ARHS 5773. Prerequisite: ARHS 2923 and 3 hours of 3000 level and above art history coursework. (Typically offered: Irregular)

ARHS 5793. Making the Museum: History, Theory and Practice. 3 Hours.

Presents a broad overview of the institutional history and the contemporary professional practice of the museum world. Features numerous visiting lectures from a working professionals from the local area and nationwide institutions. (Typically offered: Spring Even Years)

ARHS 5813. The History of Photography. 3 Hours.

(Formerly ARHS 4813.) Survey of photography from 1685 to present. Graduate degree credit will not be given for both ARHS 4813 and ARHS 5813. (Typically offered: Irregular)

ARHS 5823. History of Graphic Design. 3 Hours.

(Formerly ARHS 4823.) Survey of graphic design history from 1850 to the present. Graduate degree credit will not be given for both ARHS 4823 and ARHS 5823.

Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5833. Ancient Art. 3 Hours.

(Formerly ARHS 4833.) Study of selections from the visual arts of Mesopotamia, Egypt, Greece, or Rome. Graduate degree credit will not be given for both ARHS 4833 and ARHS 5833. Prerequisite: ARHS 2913. (Typically offered: Irregular)

ARHS 5843. Medieval Art. 3 Hours.

(Formerly ARHS 4843.) Study of Early Christian, Byzantine, Early Medieval, Romanesque, and Gothic styles. Graduate degree credit will not be given for both ARHS 4843 and ARHS 5843. Prerequisite: ARHS 2913. (Typically offered: Irregular)

ARHS 5853. Italian Renaissance Art. 3 Hours.

(Formerly ARHS 4853.) Study of Proto-Renaissance, Early, High Renaissance, and Mannerist styles in Italy. Graduate degree credit will not be given for both ARHS 4853 and ARHS 5853. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5863. Northern Renaissance Art. 3 Hours.

(Formerly ARHS 4863.) Study of Late Gothic and Renaissance styles in the Netherlands, Germany, and France. Graduate degree credit will not be given for both ARHS 4863 and ARHS 5863. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5873. Baroque Art. 3 Hours.

(Formerly ARHS 4873.) Study of art styles of the 17th century, primarily in Italy, Spain, France, Flanders, and the Netherlands. Graduate degree credit will not be given for both ARHS 4873 and ARHS 5873. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5883. 18th and 19th Century European Art. 3 Hours.

(Formerly ARHS 4883.) Study of eighteenth- and nineteenth-century art and architecture in Europe. Graduate degree credit will not be given for both ARHS 4883 and ARHS 5883. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5893. 20th Century European Art. 3 Hours.

(Formerly ARHS 4893.) Study of the major styles and movements of the century, including Cubism, Fauvism, German Expressionism, and Surrealism. Graduate degree credit will not be given for both ARHS 4893 and ARHS 5893. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5913. American Art to 1860. 3 Hours.

(Formerly ARHS 4913.) The visual arts in the United States from Colonial times through 1860. Graduate degree credit will not be given for both ARHS 4913 and ARHS 5913. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5923. American Art 1860-1960. 3 Hours.

(Formerly ARHS 4923.) The visual arts in the United States from the onset of the American Civil War through the Cold War Era. Graduate degree credit will not be given for both ARHS 4923 and ARHS 5923. Prerequisite: ARHS 2923. (Typically offered: Irregular)

ARHS 5933. Contemporary Art. 3 Hours.

(Formerly ARHS 4933.) Study of styles and major trends in the visual arts since 1960. Graduate degree credit will not be given for both ARHS 4933 and ARHS 5933. Prerequisite: ARHS 2923. (Typically offered: Fall)

ARHS 5953. Art Museum Studies. 3 Hours.

(Formerly ARHS 4953.) A survey of the history and function of the art museum and an introduction to museum work. Investigation of collections and collections management, conservation, exhibitions, education and public programs, museum management, and contemporary issues which effect the museum profession. Graduate degree credit will not be given for both ARHS 4953 and ARHS 5953. Prerequisite: ARHS 2913 and ARHS 2923, or graduate Art MFA standing. (Typically offered: Irregular)

ARHS 5973. Seminar in Art History. 3 Hours.

(Formerly ARHS 4973.) Special studies of periods and styles of art. Graduate degree credit will not be given for both ARHS 4973 and ARHS 5973. Prerequisite: 9 hours of Art History. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ARHS 5983. Special Topics in Art History. 3 Hours.

(Formerly ARHS 4983.) Subject matter not covered in regularly offered courses, and relating to the history of art before the nineteenth century. May be repeated for different topics. Graduate degree credit will not be given for both ARHS 4983 and ARHS 5983. Prerequisite: ARHS 2913 or ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 5993. Special Topics in Modern Art. 3 Hours.

(Formerly ARHS 4993.) Subject matter not covered in regularly offered courses, and relating to the history of art from the nineteenth century to the present. May be repeated for different topics. Graduate degree credit will not be given for both ARHS 4993 and ARHS 5993. Prerequisite: ARHS 2923. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 6413. Greek Art and Archaeology. 3 Hours.

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. (Typically offered: Spring Odd Years)

ARHS 6423. Roman Art and Archaeology. 3 Hours.

Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. (Typically offered: Spring Even Years)

ARHS 6613. African Art and Society. 3 Hours.

Situates the artistic production of modern Africa (1800-present) within a socio-cultural framework, taking into consideration the role of the artist, the methods of production, the relationship between form and function, and the impact of geopolitical shifts (including intercontinental trade, colonialization, and globalization) on the artistic practice. (Typically offered: Irregular)

ARHS 6623. African American Art History. 3 Hours.

Surveys African American art from the seventeenth century to the present. It begins with a discussion of the transatlantic slave trade and it examines art produced in what Pratt terms the "contact zones". It then follows developments in African American art from the Antebellum Period to the present. (Typically offered: Irregular)

ARHS 6633. Contemporary African Art. 3 Hours.

Serves as a forum for the study of contemporary African art. It situates African art from the 1980s to the present within a historic context, addressing the impact of geopolitical ruptures on artistic practices, and it examines how the work operates across different intellectual, political, and geographical spheres. (Typically offered: Irregular)

ARHS 6783. Special Topics in Contemporary Art. 3 Hours.

Examines specialized topics within the field of contemporary art, with special attention to cutting-edge issues confronting artists today. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ARHS 6933. Graduate Research In Art History. 3 Hours.

Independent study in specific areas of art history and criticism. (Typically offered: Irregular)

ARHS 6943. Seminar: Critical Thought in Art. 3 Hours.

Explore topics of concern to the studio artist involving underlying concepts and purposes of art as well as models and methods for the analysis of art. Course based on discussions of selected readings, prepared papers and seminar reports. Prerequisite: graduate standing. (Typically offered: Fall) May be repeated for up to 3 hours of degree credit.

Arts and Sciences (ARSC) Courses

ARSC 1001. Fulbright Perspectives. 1 Hour.

Open to incoming freshmen and transfer students participating in the university's First Year Experience. Available for credit only. Prerequisite: New freshman or freshman transfer student and a ARSC college major. (Typically offered: Fall)

ARSC 1201. Inquiry Approaches to Teaching: UAteach Step I. 1 Hour.

For students exploring teaching as a career. Following an introduction to the theory and practice behind inquiry-based science and mathematics instruction, students teach lessons in elementary classrooms to obtain firsthand experience in planning and implementation. (Typically offered: Fall and Spring)
This course is cross-listed with EDHP 1201.

ARSC 1221. Inquiry-Based Lesson Design: UAteach Step II. 1 Hour.

For students exploring teaching as a career. Following an introduction to the theory and practice behind inquiry-based science and mathematics instruction, students teach lessons in elementary classrooms to obtain firsthand experience in planning and implementation. Prerequisite: ARSC 1201 or EDHP 1201. (Typically offered: Fall and Spring)

ARSC 1600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARSC 2303. Perspectives on Science and Mathematics. 3 Hours.

A course for prospective science and mathematics teachers exploring topics and episodes in the history and philosophy of science and mathematics, including whether mathematics is itself a science. Sciences include biology, physics, geology, astronomy, and chemistry. The course traces development of key ideas and seeks to correct common myths. Prerequisite: ARSC 1201 and ARSC 1221. (Typically offered: Spring)

ARSC 2600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARSC 3013. Fulbright College Career Connections. 3 Hours.

This course teaches students how to capitalize on their strengths, skills, experience, professional connections, and academic discipline. Key components of this course are guest lectures from on-campus and off-campus professionals, interactive group activities to practice professional skills, and the creation of an online portfolio. Prerequisite: Sophomore standing. (Typically offered: Fall and Spring)

ARSC 310V. Cooperative Education. 1-4 Hour.

Required of participants in cooperative education work assignments. Available for credit only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

ARSC 3600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

ARSC 4600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

Asian Studies (AIST)

Courses

AIST 4003. Asian Studies Colloquium. 3 Hours.

An interdepartmental colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: Sophomore standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

AIST 4003H. Honors Asian Studies Colloquium. 3 Hours.

An interdepartmental colloquium with an annual change of subject, required of students in the Asian studies program. Prerequisite: Sophomore standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

This course is equivalent to AIST 4003.

Astronomy (ASTR)

Courses

ASTR 2001L. Survey of the Universe Laboratory (ACTS Equivalency = PHSC 1204 Lab). 1 Hour.

Daytime and nighttime observing with telescopes and indoor exercises on selected topics. Pre- or Corequisite: ASTR 2003. (Typically offered: Fall, Spring and Summer)

ASTR 2001M. Honors Survey of the Universe Laboratory. 1 Hour.

An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the sun, normal stars and interstellar medium, birth and death of stars, neutron stars, and black holes. Pre- or Corequisite: ASTR 2003 or ASTR 2003H. (Typically offered: Fall)

This course is equivalent to ASTR 2001L.

ASTR 2003. Survey of the Universe (ACTS Equivalency = PHSC 1204 Lecture). 3 Hours.

An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the Sun, normal stars and interstellar medium, birth and death of stars, neutron stars, pulsars, black holes, the Galaxy, clusters of galaxies, and cosmology. Corequisite: ASTR 2001L or ASTR 2001M. (Typically offered: Fall, Spring and Summer)

ASTR 2003H. Honors Survey of the Universe. 3 Hours.

An introduction to the content and fundamental properties of the cosmos. Topics include planets and other objects of the solar system, the Sun, normal stars and interstellar medium, birth and death of stars, neutron stars, pulsars, black holes, the Galaxy, clusters of galaxies, and cosmology. Corequisite: ASTR 2001M. (Typically offered: Fall)

This course is equivalent to ASTR 2003.

ASTR 301V. Observational Astronomy. 1-3 Hour.

Individual experimental or observational problems studied with small telescopes, cameras, and other basic equipment. No credit is given toward a B.S. degree in physics. Prerequisite: ASTR 2003. (Typically offered: Irregular)

ASTR 4033. Astrophysics I: Stars and Planetary Systems. 3 Hours.

An introduction to astrophysics covering stellar structure and evolution, the properties of the solar system, and extrasolar planetary systems. Prerequisite: PHYS 3613 or CHEM 3504. (Typically offered: Fall Odd Years)

ASTR 4043. Astrophysics II: Galaxies and the Large-Scale Universe. 3 Hours.

An introduction to astrophysics covering the interstellar medium, the Milky Way galaxy, extragalactic astronomy, and introduction to cosmology. Prerequisite: ASTR 4033. (Typically offered: Spring Even Years)

ASTR 4073. Cosmology. 3 Hours.

An introduction to modern Big Bang cosmology. The course covers the origin, evolution, and structure of the Universe, based on the Theory of Relativity. Prerequisite: PHYS 3613 or CHEM 3504. (Typically offered: Spring Odd Years)

ASTR 5033. Astrophysics I: Stars and Planetary Systems. 3 Hours.

An introduction to astrophysics covering stellar structure and evolution, the properties of the solar system, and extrasolar planetary systems. (Typically offered: Fall Odd Years)

This course is cross-listed with SPAC 5033.

ASTR 5043. Astrophysics II: Galaxies and the Large-Scale Universe. 3 Hours.

An introduction to astrophysics covering the interstellar medium, the Milky Way galaxy, extragalactic astronomy, and introduction to cosmology. Prerequisite: ASTR 5033 or SPAC 5033. (Typically offered: Spring Even Years)

ASTR 5073. Cosmology. 3 Hours.

An introduction to modern physical cosmology covering the origin, evolution, and structure of the Universe, based on the Theory of Relativity. (Typically offered: Spring Odd Years)

Athletic Training (ATTR)

Courses

ATTR 5213. Athletic Training Clinical I - Application of Injury Prevention Devices and Techniques. 3 Hours.

This course will serve as an introduction to the athletic training clinical program. Procedures and policies of the clinical program and application of athletic preventive devices will be included as well. Corequisite: ATTR 5223. Prerequisite: Admission to the graduate program in athletic training. (Typically offered: Summer)

ATTR 5223. Athletic Training Clinical II - Emergency Procedures. 3 Hours.

This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce and instruct new emergency procedures. Corequisite: ATTR 5213. (Typically offered: Summer)

ATTR 5232. Athletic Training Clinical III - Lower Extremity Evaluation. 2 Hours.

This course will serve as a process for monitoring student's progression of athletic training proficiencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce the evaluation skills of gait, lower extremity, and spine/pelvis. Prerequisite: ATTR 5223. (Typically offered: Fall)

ATTR 5242. Athletic Training Clinical IV - Evaluation of Upper Extremity. 2 Hours.

This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce the evaluation skills of the upper extremities, head, neck, and posture. Prerequisite: ATTR 5232. (Typically offered: Spring)

ATTR 5262. Athletic Training Clinical V - Rehabilitation Lab. 2 Hours.

This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and reinforce techniques and applications of therapeutic exercise and rehabilitation. (Typically offered: Fall)

ATTR 5272. Athletic Training Clinical VI - Athletic Training Seminar. 2 Hours.

This course will serve as a process for monitoring student's progression of athletic training competencies, acquire clinical hours under the direct supervision of a certified athletic trainer, and serve as a capstone course validating the athletic training clinical proficiencies and prepare students for the NATABOC certification exam and future employment. Prerequisite: ATTR 5262. (Typically offered: Spring)

ATTR 5313. Clinical Anatomy for Athletic Trainers. 3 Hours.

Instruction of human anatomy for the athletic training professional using lecture, diagrams, textbook readings, and demonstrations. Focus will be placed on anatomy of structures related to athletic injuries; and can be used in the evaluation, treatment, and rehabilitation of injuries in a variety of athletic training settings. Prerequisite: Acceptance into the graduate athletic training program or instructor consent. (Typically offered: Summer)

ATTR 5363. Evaluation Techniques of Athletic Injuries - Upper Extremity. 3 Hours.

Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the upper extremities, trunk, and head. Prerequisite: Admission to graduate athletic training program. (Typically offered: Spring)

ATTR 5373. Evaluation Techniques of Athletic Injuries - Lower Extremity. 3 Hours.

Use of scientific assessment methods to recognize and evaluate the nature and severity of athletic injuries to the hip and lower extremities. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5403. Pathophysiology and Treatment I. 3 Hours.

This course will provide knowledge, skills, and values that the entry-level athletic trainer must possess to prevent, recognize, treat, advise on medications for and, when appropriate, refer general medical conditions and disabilities of physically active individuals. Prerequisite: Admission to the athletic training program. (Typically offered: Spring)

ATTR 5413. Pathophysiology and Treatment II. 3 Hours.

This course will provide knowledge, skills, and values that the entry-level athletic trainer must possess to prevent, recognize, treat, advise on medications for and, when appropriate, refer general medical conditions and disabilities of physically active individuals. Prerequisite: ATTR 5403. (Typically offered: Fall)

ATTR 5453. Therapeutic Modalities in Athletic Training. 3 Hours.

Contemporary therapeutic modalities used in managing athletic injuries. Modalities covered are classified as thermal agents, electrical agents, or mechanical agents. Emphasis is placed on their physiological effects, therapeutic indications (and contraindications), and clinical application. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5463. Therapeutic Exercise and Rehabilitation of Athletic Injuries. 3 Hours.

A systematic approach to exercise program development, techniques, indications and contraindications of exercise, and progression as related to athletic injury, prevention, and return to play guidelines. Prerequisite: Admission to graduate athletic training program. (Typically offered: Fall)

ATTR 5473. Administration in Athletic Training. 3 Hours.

Administrative components of athletic training. Basic concepts of legal liability, leadership and management principles, financial management, day to day scheduling and supervision, maintenance, and general administration. Prerequisite: Admission to graduate athletic training program. (Typically offered: Summer)

ATTR 5483. Medical Conditions in Athletic Training. 3 Hours.

This course will provide a collection of knowledge, skills, and values that the entry-level certified athletic trainer must possess to recognize, treat, and refer, when appropriate, the general medical conditions and disabilities of athletes and others involved in physical activity. Prerequisite: Admission to the graduate athletic training program or permission of instructor. (Typically offered: Fall)

ATTR 5493. Evidence-Based Practice in Athletic Training. 3 Hours.

In-depth analysis of current literature, research, case studies, and musculoskeletal evaluation and rehabilitation directed toward musculoskeletal injuries of the physically active. Prerequisite: Admission into the Athletic Training Education Program. (Typically offered: Summer)

Biological Engineering (BENG) Courses

BENG 2632. Biological Engineering Design Studio. 2 Hours.

Application of the engineering design process to projects involving living systems. Projects are team-based open-ended design with hands-on construction and testing of design prototypes. Emphasis is placed on understanding, quantifying and controlling complex interacting living systems involving humans, animals, plants and microbes with the goal of creating economically and ecologically sustainable systems. 4 hours of design studio per week. Pre- or Corequisite: PHYS 2054 and BIOL 1543 and BIOL 1541L, and (GNEG 1111 or GNEG 1103). (Typically offered: Fall)

BENG 2643. Biological Engineering Methods I. 3 Hours.

Introduction to software techniques for the graphical and geo-spatial representation of processes, structures, devices, landscapes and watersheds in biological engineering. Process layout and process flow diagrams. Two-dimensional and three-dimensional scale drawings and models. Elements of engineering drawings and plans. Mapping and introduction to geographic information systems. Surface topography, digital elevation modeling, spatial land use, soils and other GIS data sources. Stream networks, watershed delineation, grade planning and introductory runoff modeling. Introductory land surveying. Geo-referencing and integrating designed hydrologic structures with GIS-based site maps. Communicating complex designed systems. Two hours of lecture plus one 3-hour lab per week. Corequisite: Lab component. Prerequisite: PHYS 2054. (Typically offered: Spring)

BENG 3113. Measurement and Control for Biological Systems. 3 Hours.

Principles of sensors, instruments, measurements, controls, and data acquisition systems, with emphasis on applications for biological systems; including basic circuit analysis, sensor calibration and hardware selection. Basic process monitoring and control methods, including hardware and software. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: PHYS 2074. (Typically offered: Spring)

BENG 3113H. Honors Measurement and Control for Biological Systems. 3 Hours.

Principles of sensors, instruments, measurements, controls, and data acquisition systems, with emphasis on applications for biological systems; including basic circuit analysis, sensor calibration and hardware selection. Basic process monitoring and control methods, including hardware and software. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: PHYS 2074 and honors candidacy. (Typically offered: Spring)

This course is equivalent to BENG 3113.

BENG 3603. Metrics for Sustainable Agricultural Systems. 3 Hours.

Analysis of productive agricultural systems necessary to meet expanding demand worldwide for food, feed, fiber and fuel while preserving critical ecosystem services to avoid future catastrophic failures of the biosphere. Characterization of sustainable systems using well-defined metrics, indicators and indices, including reference to sustainability certifications. Metrics for soil, water, atmosphere and biodiversity. Applications in crop and animal production with scales from field to watershed to eco-region. Examining the process and methodologies of integrating metrics into indices to support sustainable supply chain decisions. Discussion of life cycle analyses and current initiatives toward approaching agricultural systems sustainability. Technical course intended for students in agriculture, biology, business, engineering, and environmental sciences. (Typically offered: Fall)

This course is cross-listed with CSES 3603.

BENG 3653. Global Bio-Energy Engineering. 3 Hours.

Global energy sources with a focus on renewable energy, solar and biomass derived fuels. Biomass energy production from crops and organic residues or waste products. Conversion of biomass to usable fuels. Utilization of renewable energy in society. Includes detailed systems analyses to examine inputs, efficiencies, usable outputs and by-products. Systems design to select and integrate components which meet client needs while maximizing sustainable global impacts. Three hours of lecture per week. Pre- or Corequisite: MEEG 2403 or CHEG 2313. (Typically offered: Fall)

BENG 3663. Biological Engineering Methods II. 3 Hours.

Modeling biological processes to predict system behavior as part of the design process. Development and use of spreadsheets and script programming code to represent biological phenomena and processes. Introduction to experimental design as applied to biological processes, including data collection and analysis, and elementary statistics. Use of engineering economics to aid comparisons of alternatives. Analysis of engineering designs and management practices to best meet the needs of society and the client in areas of sustainable water, food and energy systems. Lecture 3 hours per week. Prerequisite: PHYS 2054 and MATH 2564. (Typically offered: Fall)

BENG 3723. Unit Operations in Biological Engineering. 3 Hours.

Design of basic unit operations typical of biological engineering practice; unit operations include pump-pipe, fan-duct, moist air (psychrometric) processes (cool/heater/humidifier/dryer), air mixing, aeration, and refrigeration; unit operations design will account for unique constraints imposed by biological systems. Lecture 2 hours and lab 3 hours per week. Corequisite: Lab component. Prerequisite: (MEEG 2403 or CHEG 2313) and (CVEG 3213 or CHEG 2133 or MEEG 3503). (Typically offered: Spring)

BENG 3733. Transport Phenomena in Biological Systems. 3 Hours.

Basic principles governing transport of energy and mass. Estimating transfer of energy (heat) through solid bodies and liquid/gas boundary layers through conduction, convection, and radiation. Modeling the rates at which biological reactions occur (kinetics). Estimating the transfer of diffusing mass (gas or liquid) through solid bodies and liquid/gas boundary layers, including processes such as drying and oxygen diffusion. Three hours lecture per week. Pre- or Corequisite: (CVEG 3213 or MEEG 3503 or CHEG 2133.) Prerequisite: (MEEG 2403 or CHEG 2313) and MATH 2584. (Typically offered: Fall)

BENG 4123. Biosensors & Bioinstrumentation. 3 Hours.

Principles of biologically based sensing elements and interfacing techniques. Design and analysis methods of biosensing and transducing components in bioinstrumentation. Applications of biosensors and bioinstrumentation in bioprocessing, bioenvironmental, biomechanical and biomedical engineering. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2013 or BIOL 2533 and BENG 3113. (Typically offered: Spring Odd Years)

BENG 450V. Special Problems. 1-4 Hour.

Selected problems in biological engineering are pursued in detail. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

BENG 451VH. Honors Thesis. 1-6 Hour.

Honors thesis. Prerequisite: Honors candidacy. (Typically offered: Fall, Spring and Summer)

BENG 452V. Special Topics in Biological Engineering. 1-6 Hour.

Special topics in biological engineering not covered in other courses. Prerequisite: Engineering student. (Typically offered: Irregular) May be repeated for up to 8 hours of degree credit.

BENG 4663. Sustainable Biosystems Designs. 3 Hours.

Process and methodologies associated with measuring, assessing, and designing sustainable systems in water, energy and food. Quantitatively rigorous methodology for life cycle analysis (LCA) for inventory, assessment and impact analyses. Use of other systems analyses and process control theory to evaluate and design sustainable systems. Application of the methods to a project to gain experience in defining, quantifying and utilizing sustainable metrics. Three hours of lecture per week. Prerequisite: BENG 3653. (Typically offered: Spring)

BENG 4703. Biotechnology Engineering. 3 Hours.

Introduction to biotechnology topics ranging from principles of microbial growth, mass balances, bioprocess engineering as well as emerging principles in the design of biologically based microbial and enzymatic production systems. Application areas such as biofuels, and fine and bulk chemical production. Lecture 2 hours, laboratory 3 hours per week. Prerequisite: BENG 2632. Corequisite: Lab component. (Typically offered: Fall)

BENG 4743. Food and Bio-Product Systems Engineering. 3 Hours.

Sustainable bio-product engineering through biosystem design, analysis, modeling, control, and optimization. Life cycle phases for bio-products (food, fiber, feed, and fuel). System analysis of inputs and outputs of energy, water and mass for the purpose of producing and processing biomass for human uses. Advanced bioprocess design topics to utilize enzymes, cells, tissues and organisms to create bioproducts and methods for deactivating biological agents to preserve the quality and safety of food and other bio-products. Three hours lecture per week. Prerequisite: BENG 3723 and BENG 3733. (Typically offered: Fall)

BENG 4753L. Nanotechnology Laboratory. 3 Hours.

Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, and CHEM 1123. (Typically offered: Fall) This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.

BENG 4753M. Honors Nanotechnology Laboratory. 3 Hours.

Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, and CHEM 1123. (Typically offered: Fall) This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.

BENG 4812. Senior Biological Engineering Design I. 2 Hours.

Initiation of comprehensive two-semester team-design projects to design processes, devices and systems to meet needs of clients in sustainable water, food and energy. Practice in following the design process, including the definition of design objectives and constraints, establishing functions and performance criteria, generating alternatives and evaluating alternatives through analysis, modeling and prototype testing; exploring relevant design considerations including performance, efficiency, costs, environmental impacts, sustainability and stewardship, safety and ethics. Developing analytic capability; and practicing design optimization to find best alternative for the client. Lecture 1 hour, laboratory 3 hours per week. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall)

BENG 4823. Senior Biological Engineering Design II. 3 Hours.

Completion of comprehensive two-semester team-design projects to design processes, devices and systems to meet needs of clients in sustainable water, food and energy. Focus on building of prototypes or models, system optimization, evaluation and improvement. Final design details packaged to meet the needs of the client. Interaction with appropriate persons from other disciplines. Written and oral reporting. Communications with peers, supervisor, clients and the public. Lecture 1 hour per week, two 2-hour lab periods per week. Prerequisite: BENG 4812. Corequisite: Lab component. (Typically offered: Spring)

BENG 4831. Biological Engineering Professionalism. 1 Hour.

Preparation to be job-ready, employable and successful in transition to a professional career and further study in Biological Engineering. Introduction to job and graduate study searches. Professional and ethical responsibilities; professional registration. Conflict, change and project management. Effective communications and interactions with supervisors, peers, clients, and stakeholders. Two hour discussion section per week. Prerequisite: Senior standing. (Typically offered: Fall)

BENG 4933. Sustainable Watershed Engineering. 3 Hours.

Provides students with expertise in using advanced tools in watershed monitoring, assessment, and design. Builds on core competencies in hydrology and hydraulics to allow student to evaluate water used by sector in water management regions; evaluate and quantify water demands by sector with emphasis on irrigation; develop risk-based simulations of hydrologic processes, including precipitation, evapo-transportation, infiltration, runoff, and stream flow; quantify and simulate constituent loading to watersheds using GIS-based models, and understand the applications of these methods in water resource management policy. Three hours lecture per week. Prerequisite: CVEG 3223. (Typically offered: Fall)

BENG 4963. Modeling Environmental Biophysics. 3 Hours.

Interactions between the biosphere and the atmosphere. Connecting the physical environment of solar energy, wind, soil, and hydrology to the biosphere through plant ecophysiology. Boundary layer meteorology, photosynthesis and boundary layer modeling strategies, and the soil-plant-atmosphere continuum. Instrumentation, measurement and modeling strategies for understanding leaf-, landscape- and regional behaviors; and, the transfer, kinetics, and balance of momentum, energy, water vapor, CO₂, and other atmospheric trace gases between the landscape (vegetation and soil) and the atmosphere. Applications in sustainable agriculture, irrigation, land and water resources, and modeling plant water use and carbon uptake strategies. Three hours of lecture per week. Prerequisite: MATH 2564 and (BENG 4933 or CVEG 3223). (Typically offered: Spring Even Years)

BENG 4973. Practice in Water Quality Monitoring and Analysis. 3 Hours.

Application of water quality principles to a real world problem. Team project experience developing quality assurance project plans, designing monitoring systems, selecting chemical analysis methods, estimating loads, performing trend analysis, basic model calibration and validation, and technical report writing and oral presentations. Working with various clientele to analyze water quality data in the context of evaluating real-world problems and issues. Technical course intended for students in engineering, environmental sciences, agriculture and biology. Three hours of lecture per week. Prerequisite: CVEG 3213 or instructor's consent to allow interdisciplinary student teams. (Typically offered: Spring Odd Years)

BENG 500V. Advanced Topics in Biological Engineering. 1-6 Hour.

Special problems in fundamental and applied research. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

BENG 5103. Advanced Instrumentation in Biological Engineering. 3 Hours.

Applications of advanced instrumentation in biological systems. Emphasis on updated sensing and transducing technologies, data acquisition and analytical instruments. Lecture 2 hours, lab 3 hours per week. Corequisite: Lab component. Prerequisite: BENG 3113. (Typically offered: Spring Even Years)

BENG 5253. Bio-Mems. 3 Hours.

Topics include the fundamental principles of microfluidics, Navier-Stokes Equation, bio/abio interfacing technology, bio/abio hybrid integration of microfabrication technology, and various biomedical and biological problems that can be addressed with microfabrication technology and the engineering challenges associated with it. Lecture 3 hour per week. Prerequisite: MEEG 3503 or CVEG 3213 or CHEG 2133. (Typically offered: Irregular)

This course is cross-listed with MEEG 5253.

BENG 5613. Simulation Modeling of Biological Systems. 3 Hours.

Application of computer modeling and simulation of discrete-event and continuous-time systems to solve biological and agricultural engineering problems. Philosophy and ethics of representing complex processes in simplified form. Deterministic and stochastic modeling of complex systems, algorithm development, application limits, and simulation interpretation. Emphasis on calibration, validation and testing of biological systems models for the purposes of system optimization, resource allocation, real-time control and/or conceptual understanding. Prerequisite: ((AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 4003 or INEG 2313. (Typically offered: Irregular)

BENG 5623. Life Cycle Assessment. 3 Hours.

This course will examine the process and methodologies associated with life cycle analysis (LCA). The course will explore the quantitatively rigorous methodology for life cycle inventory (LCI), LCA and life cycle impact assessment (LCIA). This course is offered on-line. The principal instructor will be a UA faculty member. (Typically offered: Spring)

BENG 5633. Linkages Among Technology, Economics and Societal Values. 3 Hours.

Addresses how macro-level change is influenced by the linkages among technology, economics and societal values. Three major course initiatives: 1) Developing a conceptual model for understanding how macro-level change has occurred over history; 2) Examining recorded history in order to develop a contextual appreciation for Society's current situation; and 3) Using statistical data to identify six overriding world trends that are likely to greatly impact society's goal of achieving sustainable prosperity and well-being in the foreseeable future. Prerequisite: Graduate standing or instructor permission. (Typically offered: Fall and Spring)

This course is cross-listed with OMTG 5633.

BENG 5703. Design and Analysis of Experiments for Engineering Research. 3 Hours.

Principles of planning and design of experiments for engineering research. Propagation of experimental error. Improving precision of experiments. Analysis of experimental data for optimal design and control of engineering systems using computer techniques. Students must have an introductory background in statistics. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Irregular)

BENG 5743. Biotechnology Engineering. 3 Hours.

Introduction to biotechnology topics ranging from principles of microbial growth, mass balances, bioprocess engineering as well as emerging principles in the design of biologically based microbial and enzymatic production systems. Application areas such as biofuels, and fine and bulk chemical production. Lecture 2 hours, laboratory 3 hours per week. Students may not earn credit for both BENG 5743 and BENG 4703. Prerequisite: Graduate standing. Corequisite: Lab component. (Typically offered: Fall)

BENG 5801. Graduate Seminar. 1 Hour.

Reports presented by graduate students on topics dealing with current research in biological engineering. Prerequisite: Graduate standing. (Typically offered: Spring)

BENG 5923. Nonpoint Source Pollution Control and Modeling. 3 Hours.

Control of hydrologic, meteorologic, and land use factors on nonpoint source (NPS) pollution in urban and agricultural watersheds. Discussion of water quality models to develop NPS pollution control plans and total maximum daily loads (TMDLs), with consideration of model calibration, validation, and uncertainty analysis. Prerequisite: CVEG 3223. (Typically offered: Irregular)

BENG 5933. Environmental and Ecological Risk Assessment. 3 Hours.

Process and methodologies associated with human-environmental and ecological risk assessments. Environmental risk assessments based on human receptors as endpoints, addressing predominantly abiotic processes. Ecological risk assessments based on non-human receptors as endpoints. Approach using hazard definition, effects assessment, risk estimation, and risk management. Application of methods to student projects to gain experience in defining and quantifying uncertainty associated with human perturbation, management and restoration of environmental and ecological processes. (Typically offered: Spring)

BENG 5953. Ecological Engineering Design. 3 Hours.

Design of low impact development techniques to enhance ecological services, reduce peak runoff, and capture sediments, nutrients and other pollutants resulting from urban development. Techniques may include: bio-swales, retention basins, filter strips. Design of sustainable ecological processes for the treatment and utilization of wastes/residues. Techniques may include: direct land application to soils/crops, composting systems, lagoons and constructed wetlands. Design goals include optimization of ecological services to maintain designated uses of land, water and air; including enhancement of habitat for wildlife and recreation, and the discovery of economically viable methods for co-existence of urban and agricultural land uses. Lecture 3 hours per week. (Typically offered: Fall)

BENG 5963. Modeling Environmental Biophysics. 3 Hours.

Interactions between the biosphere and the atmosphere. Connecting the physical environment of solar energy, wind, soil, and hydrology to the biosphere through plant ecophysiology. Boundary layer meteorology, photosynthesis and boundary layer modeling strategies, and the soil-plant-atmosphere continuum. Instrumentation, measurement and modeling strategies for understanding leaf-, landscape- and regional behaviors; and, the transfer, kinetics, and balance of momentum, energy, water vapor, CO₂, and other atmospheric trace gases between the landscape (vegetation and soil) and the atmosphere. Applications in sustainable agriculture, irrigation, land and water resources, and modeling plant water use and carbon uptake strategies. A working knowledge of calculus and a discipline related to the course is expected. Three hours of lecture per week. Students may not earn degree credit for both BENG 4963 and BENG 5963. Prerequisite: Instructor consent. (Typically offered: Spring Even Years)

BENG 5973. Advanced Practice in Water Quality Monitoring and Analysis. 3 Hours.

Application of water quality principles to a real world problem. Team project experience leading and developing quality assurance project plans, designing monitoring systems, selecting chemical analysis methods, estimating loads, performing trend analysis, basic model calibration and validation, team management, and technical report writing and oral presentations. Working with various clientele to analyze water quality data in the context of evaluating real-world problems and issues. Three hours of lecture per week. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

BENG 600V. Master's Thesis. 1-6 Hour.

Graduate standing required for enrollment. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BENG 700V. Doctoral Dissertation. 1-18 Hour.

Candidacy is required for enrollment. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Biology (BIOL) Courses

BIOL 1001L. Environmental Science Laboratory. 1 Hour.

Laboratory, field trip, and discussion sessions covering the concepts and information allowing students to critically evaluate environmental issues. Topics will include: laboratory safety, recycling, composting, geographic information systems, soil testing, water quality, hazardous wastes, waste disposal, wetlands, wastewater treatment, and sustainable food systems. Laboratory 2 hours per week. Corequisite: BIOL 1003. (Typically offered: Fall and Spring)
This course is cross-listed with ENSC 1001L.

BIOL 1003. Environmental Science. 3 Hours.

Series of lectures and discussions introducing the topic of environmental science including factors related to water, soil, and air quality. If taking course for University core Natural Science credit, BIOL 1001L is a corequisite. Corequisite: BIOL 1001L. (Typically offered: Fall and Spring)
This course is cross-listed with ENSC 1003.

BIOL 1524. Biological Principles (ACTS Equivalency = BIOL 1004 Lecture). 4 Hours.

Integrated lecture and laboratory focusing on the overriding principles of Biology. Designed to convey biological reasoning to non-science majors. May not count as prerequisite for advanced courses in BIOL. Corequisite: Lab component. (Typically offered: Fall, Spring and Summer)

BIOL 1541L. Principles of Biology Laboratory (ACTS Equivalency = BIOL 1014 Lab). 1 Hour.

Experimental and observational techniques used in biology with emphasis on the acquisition and interpretation of results that illustrate major biological principles. Corequisite: BIOL 1543. (Typically offered: Fall, Spring and Summer)

BIOL 1541M. Honors Principles of Biology Laboratory. 1 Hour.

This course is designed for the well prepared student in the Honors program. It focuses on teaching students experimental and observational techniques used in the science of biology. It emphasizes the acquisition and interpretation of results that illustrate the major principles of biology. Corequisite: BIOL 1543H or BIOL 1543. (Typically offered: Fall and Spring)
This course is equivalent to BIOL 1541L.

BIOL 1543. Principles of Biology (ACTS Equivalency = BIOL 1014 Lecture). 3 Hours.

Principles that unify biology with emphasis on scientific study that demonstrates how all organisms are the product of evolution and are parts of interacting systems from the molecular to the ecosystem level. Corequisite: BIOL 1541L. (Typically offered: Fall, Spring and Summer)

BIOL 1543H. Honors Principles of Biology. 3 Hours.

This course is designed for the well prepared student in Honors program. It focuses on the principles that unify the science of biology. Students will be exposed to how scientific principles have been used to demonstrate that all organisms are the products of evolution and are parts of interacting systems from the molecular to the ecosystem level. Corequisite: BIOL 1541M or BIOL 1541L. (Typically offered: Fall and Spring)
This course is equivalent to BIOL 1543.

BIOL 1584. Biology for Majors (ACTS Equivalency = BIOL 1014 Lecture). 4 Hours.

Integrated lecture and laboratory course designed to prepare Biology Majors to enter the rest of the Biology Core of Cell Biology, General Genetics, Evolutionary Biology, and General Ecology. Pre- or Corequisite: CHEM 1103 or CHEM 1203. (Typically offered: Fall and Spring)

BIOL 1584H. Honors Biology for Majors. 4 Hours.

Integrated lecture and laboratory course designed to prepare Biology Majors to enter the rest of the Biology Core of Cell Biology, General Genetics, Evolutionary Biology, and General Ecology. Pre or Corequisite: CHEM 1103 or CHEM 1203. (Typically offered: Fall and Spring)

This course is equivalent to BIOL 1584.

BIOL 1601L. Principles of Zoology Laboratory (ACTS Equivalency = BIOL 1054 Lab). 1 Hour.

(Formerly ZOOL 1611L) Laboratory exercises illustrating animal structure, physiology, genetics, and ecology. Corequisite: BIOL 1603. (Typically offered: Fall and Summer)

BIOL 1601M. Honors Principles of Zoology Laboratory. 1 Hour.

(Formerly ZOOL 1611M) Laboratory exercises illustrating animal structure, physiology, genetics, and ecology. Corequisite: BIOL 1603. (Typically offered: Fall) This course is equivalent to BIOL 1601L.

BIOL 1603. Principles of Zoology (ACTS Equivalency = BIOL 1054 Lecture). 3 Hours.

(Formerly ZOOL 1613) Introduction to zoological principles relating to cells, organ systems, development, genetics, ecology, and animal phyla. Corequisite: BIOL 1601L or BIOL 1601M. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Summer)

BIOL 1611L. Plant Biology Laboratory (ACTS Equivalency = BIOL 1034 Lab). 1 Hour.

(Formerly BOTY 1611L) Pre- or Corequisite: BIOL 1613. (Typically offered: Spring and Summer)

BIOL 1611M. Honors Plant Biology Laboratory. 1 Hour.

(Formerly BOTY 1611M.) Pre- or Corequisite: BIOL 1613. (Typically offered: Spring) This course is equivalent to BIOL 1611L.

BIOL 1613. Plant Biology (ACTS Equivalency = BIOL 1034 Lecture). 3 Hours.

(Formerly BOTY 1613) Consideration of basic flowering plant structure, growth, development, physiology, genetics, ecology, and a brief survey of other plant groups. Lecture 3 hours per week. BIOL 1611L is recommended as a corequisite and both are required for partial fulfillment of the Fulbright College natural sciences requirement. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring and Summer)

BIOL 2011L. General Microbiology Laboratory (ACTS Equivalency = BIOL 2004 Lab). 1 Hour.

Techniques for handling microorganisms. Does not count toward BS in Biology. Corequisite: BIOL 2013. (Typically offered: Fall, Spring and Summer)

BIOL 2011M. Honors General Microbiology Laboratory. 1 Hour.

Techniques for handling microorganisms. Does not count towards BS in Biology. Corequisite: BIOL 2013. (Typically offered: Fall, Spring and Summer) This course is equivalent to BIOL 2011L.

BIOL 2013. General Microbiology (ACTS Equivalency = BIOL 2004 Lecture). 3 Hours.

Basic concepts of microbiology including diversity, genetics, metabolism, growth, control of growth, pathogenesis, and immunology. Does not count towards BS in Biology. Corequisite: BIOL 2011L. Prerequisite: (BIOL 1543 and BIOL 1541L) or BIOL 1584)) and (CHEM 1073 and CHEM 1071L or CHEM 1103 or CHEM 1123 and CHEM 1121L or CHEM 1203 and CHEM 1201L). (Typically offered: Fall, Spring and Summer)

BIOL 2211L. Human Physiology Laboratory (ACTS Equivalency = BIOL 2414 Lab). 1 Hour.

(Formerly ZOOL 2211L) Exercises include experiments on osmosis, reflexes, senses, muscle, cardiovascular system, ventilation, metabolism, renal function, etc. Data collection, analysis, and report writing. Does not satisfy the Fulbright College writing requirement. Does not count toward BS in Biology. Corequisite: BIOL 2213. (Typically offered: Fall and Spring)

BIOL 2213. Human Physiology (ACTS Equivalency = BIOL 2414 Lecture). 3 Hours.

(Formerly ZOOL 2213) Fundamental concepts of physiology with emphasis in the human. Does not count toward BS in Biology. Corequisite: BIOL 2211L. Prerequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1103) or (CHEM 1123 and CHEM 1121L) and MATH 1203. (Typically offered: Fall and Spring)

BIOL 2321L. General Genetics Laboratory. 1 Hour.

Analysis of genetic problems and experiments with emphasis on "hands-on" experience with a variety of organisms. May require time outside laboratory period. Laboratory 3 hours per week. Pre- or Corequisite: BIOL 2323. (Typically offered: Fall and Spring)

BIOL 2323. General Genetics. 3 Hours.

Surveys of Mendelian, molecular, and population mechanisms of inheritance and gene expression in prokaryotes and eukaryotes. Lecture 3 hours per week. Prerequisite: (BIOL 1584 or BIOL 1543 and BIOL 1541L) and (CHEM 1103 or CHEM 1203) and (MATH 1203 or STAT 2023 or equivalent). (Typically offered: Fall and Spring)

BIOL 2441L. Human Anatomy Laboratory (ACTS Equivalency = BIOL 2404 Lab). 1 Hour.

Laboratory 3 hours exercises in mammalian anatomy. Cannot be taken without prior credit in BIOL 2443 or concurrent enrollment in BIOL 2443. Does not count toward BS in Biology. Corequisite: BIOL 2443. (Typically offered: Fall, Spring and Summer)

BIOL 2443. Human Anatomy (ACTS Equivalency = BIOL 2404 Lecture). 3 Hours.

Description of human body as a series of organ systems and their interrelationships. Does not count towards BS in Biology. Corequisite: BIOL 2441L. Prerequisite: Four hours of biological sciences. (Typically offered: Fall, Spring and Summer)

BIOL 2531L. Cell Biology Laboratory. 1 Hour.

Introduction to methods and techniques used in Cell Biology research. Laboratory experiences to highlight topics covered in BIOL 2533. Pre- or Corequisite: BIOL 2533. (Typically offered: Fall and Spring)

BIOL 2533. Cell Biology. 3 Hours.

Introduction to cell structure, cell processes, biological polymers, energetics, and diversity. An introduction to biochemistry and cell chemistry. Recommended: (CHEM 1123 and CHEM 1121L) or (CHEM 1223 and CHEM 1221L) or equivalent. Prerequisite: BIOL 1584, or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Spring)

BIOL 2723L. Microbial Fermentation Laboratory. 3 Hours.

An inquiry-based introductory lab course that explores the biology and chemistry of brewing, with a focus on brewing microbiology. Laboratory 6 hours per week. Students must be 21 years of age or older on the first day of class. Prerequisite: BIOL 1543 or BIOL 1584. Pre- or Corequisite: FDSC 2723. (Typically offered: Fall)

BIOL 3004. Principles of Plant Pathology. 4 Hours.

Examination of the causes and symptoms of plant disease and the genetics of plant disease. Physiology, and ecology of host-pathogen interactions. Spread of disease and principles of disease control. Corequisite: Lab component. (Typically offered: Fall)

This course is cross-listed with PLPA 3004.

BIOL 3011L. Introduction to Insect Identification Lab. 1 Hour.

Introductory lab course on insect identification, collection, and curation techniques, primarily designed as an intensive add-on to BIOL 3013 for students wanting a more in-depth examination of insect diversity. Insect collection required. Course includes field trips. Students are encouraged to contact instructor before enrolling. Pre- or corequisite: BIOL 3013. (Typically offered: Fall)

This course is cross-listed with ENTO 3011L.

BIOL 3013. Introduction to Entomology. 3 Hours.

Fundamentals of insect biology including structure and function, development, ecology, behavior, plant feeding and disease transmission. Lecture 3 hours/week. Students interested in a more intensive examination of insects, including collection, curation, and identification techniques, should sign up for the separate one credit lab BIOL 3011L. Students are strongly encouraged to take BIOL 1543 before registering for this course. (Typically offered: Fall)

This course is cross-listed with ENTO 3013.

BIOL 3023. Evolutionary Biology. 3 Hours.

An introduction to the mechanisms and patterns of evolutionary change. Seeks to develop logical, scientific skills and to apply them in understanding how life has changed during the history of the earth. Corequisite: Drill component. Prerequisite: (BIOL 1584 or BIOL 1543, BIOL 1541L) and BIOL 2323. (Typically offered: Fall and Spring)

BIOL 3043. Bones, Bodies, and Brains in Evolutionary Perspective. 3 Hours.

Reviews the anatomy of the human body, comparing this anatomy with primates, mammals, and vertebrates, and it will consider how the major features of the human body emerged throughout evolution. (Typically offered: Spring)

BIOL 3123. Prokaryote Biology. 3 Hours.

An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. Prerequisite: BIOL 2533. (Typically offered: Spring)

BIOL 3123H. Honors Prokaryote Biology. 3 Hours.

An in-depth coverage of prokaryote diversity, genetics, metabolism, growth, structures and functions. Prerequisite: BIOL 2533. (Typically offered: Spring)

This course is equivalent to BIOL 3123.

BIOL 3273. UAteach Research Methods. 3 Hours.

A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Prerequisite: ARSC 1201 and ARSC 1221. (Typically offered: Spring)

This course is cross-listed with PHYS 3273, CHEM 3273.

BIOL 3273H. Honors UAteach Research Methods. 3 Hours.

A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Prerequisite: ARSC 1201 and ARSC 1221, junior standing and honors. (Typically offered: Spring)

This course is cross-listed with PHYS 3273, CHEM 3273, BIOL 3273.

BIOL 3404. Comparative Vertebrate Morphology. 4 Hours.

Anatomy of selected vertebrate animals with emphasis upon homologous structures in various animal groups. The recommended anatomy course for Biology BS majors. Lecture 2 or 3 hours, laboratory 4 or 6 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Fall and Spring)

BIOL 3861L. General Ecology Laboratory. 1 Hour.

General ecology lab. Pre-or Corequisite: BIOL 3863. (Typically offered: Fall)

BIOL 3863. General Ecology. 3 Hours.

Ecological principles and concepts; environmental factors and interactions that determine distribution and abundance of organisms. Prerequisite: 7 hours of biological science. (Typically offered: Fall and Spring)

BIOL 3923H. Honors Colloquium. 3 Hours.

Covers a special topic or issue, offered as part of the honors program. Prerequisite: honors candidacy (not restricted to candidacy in biological sciences). (Typically offered: Irregular) May be repeated for degree credit.

BIOL 4003L. Laboratory in Prokaryote Biology. 3 Hours.

Laboratory techniques in prokaryote culture, identification, physiology, metabolism, and genetics. Laboratory 6 hours per week. Prerequisite: BIOL 3123. (Typically offered: Fall and Spring)

BIOL 4013. Insect Behavior and Chemical Ecology. 3 Hours.

Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component. (Typically offered: Spring Even Years)

This course is cross-listed with ENTO 4013.

BIOL 4024. Insect Diversity and Taxonomy. 4 Hours.

Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Fall Even Years)

This course is cross-listed with ENTO 4024.

BIOL 4053. Insect Ecology. 3 Hours.

To develop understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. Corequisite: Lab component. (Typically offered: Fall Even Years)

This course is cross-listed with ENTO 4053.

BIOL 4104. Taxonomy of Flowering Plants. 4 Hours.

Identifying, naming, and classifying of wildflowers, weeds, trees, and other flowering plants. Emphasis is on the practical aspects of plant identification. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L and BIOL 2323 and BIOL 3023. (Typically offered: Spring)

BIOL 4114. Dendrology. 4 Hours.

Morphology, classification, geographic distribution, and ecology of woody plants. Lecture 3 hours, laboratory 3 hours per week, and fieldtrips. Prerequisite: BIOL 3863. (Typically offered: Fall)

BIOL 4122. Food Microbiology. 2 Hours.

The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)

This course is cross-listed with FDSC 4122.

BIOL 4133. Plant Disease Control. 3 Hours.

Principles, methods and mechanics of plant disease control. Emphasis is given to the integration of control measures and epidemiology of plant diseases. Lecture 3 hours per week. Prerequisite: PLPA 3004. (Typically offered: Fall)

This course is cross-listed with PLPA 4223.

BIOL 4143. Advanced Methods in Microscopy. 3 Hours.

Stand alone course on laboratory methods course emphasizing techniques in modern microscopy. Individual research project required. Prerequisite: BIOL 2533 and BIOL 2531L. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

BIOL 4153. Biology of Global Change. 3 Hours.

Covers impact of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4252. Prerequisite: BIOL 1543 and BIOL 1541L or BIOL 1584 and BIOL 1584H. (Typically offered: Spring)

BIOL 4154H. Honors Biology of Global Change. 4 Hours.

Covers impact of global change on sustainability and adaptability of biological systems. Prerequisite: (BIOL 1584 or BIOL 1543 and BIOL 1541L) and junior standing. (Typically offered: Spring)

This course is equivalent to BIOL 4153.

BIOL 4163. Dynamic Models in Biology. 3 Hours.

Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Prerequisite: MATH 2554. (Typically offered: Irregular)

This course is cross-listed with MATH 4163.

BIOL 4174. Conservation Genetics. 4 Hours.

Covers concepts of biodiversity identification and illustrates how genetic data are generated and analyzed to conserve and restore biological diversity. Corequisite: Lab component and drill. Prerequisite: BIOL 3023, BIOL 3863 and STAT 2023 (or equivalent), and Junior standing. (Typically offered: Spring)

BIOL 4213. Biological Regulation and Subcellular Communication. 3 Hours.

Combines lectures, review of primary literature, student presentations, and small group discussions to explore a diversity of topics related to mechanisms of biological regulation and subcellular communication. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Irregular)

BIOL 4223. Bacterial Lifestyles. 3 Hours.

Introduces students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied to identify unique strategies that bacteria employ to thrive in their respective environments or develop special adaptations to harsh environments. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 3123. (Typically offered: Spring Odd Years)

This course is cross-listed with PLPA 4123.

BIOL 4233. Genomics and Bioinformatics. 3 Hours.

Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Spring)

BIOL 4233H. Honors Genomics and Bioinformatics. 3 Hours.

Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Spring)

This course is equivalent to BIOL 4233.

BIOL 4234. Comparative Physiology. 4 Hours.

Comparison of fundamental physiological mechanisms in various animal groups. Adaptations to environmental factors at both the organismal and cellular levels are emphasized. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2533 and CHEM 3613 and (CHEM 3611L or CHEM 3612M). (Typically offered: Fall)

BIOL 4241L. Ichthyology Laboratory. 1 Hour.

Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 4243. Corequisite: BIOL 4243. (Typically offered: Spring Odd Years)

BIOL 4241M. Honors Ichthyology Laboratory. 1 Hour.

Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 4243H. Prerequisite: Honors standing. Corequisite: BIOL 4243H. (Typically offered: Spring Odd Years)

This course is equivalent to BIOL 4241L.

BIOL 4243. Ichthyology. 3 Hours.

Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Prerequisite: Eight credits in Biology. Corequisite: BIOL 4241L. (Typically offered: Spring Odd Years)

BIOL 4243H. Honors Ichthyology. 3 Hours.

Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Prerequisite: Eight credits in Biology and honors standing. Corequisite: BIOL 4241L. (Typically offered: Spring Odd Years)

This course is equivalent to BIOL 4243.

BIOL 4252. Biology of Global Change Seminar. 2 Hours.

Readings, essays, and group discussions that parallel the 27 lectures in BIOL 4153 and which dissect the resulting impacts of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4153. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring)

BIOL 4252H. Honors Biology of Global Change Seminar. 2 Hours.

Readings, essays, and group discussions that parallel the 27 lectures in BIOL 4153 and which dissect the resulting impacts of global change on sustainability and adaptability of biological systems. Corequisite: BIOL 4153. Prerequisite: BIOL 1584 or BIOL 1543 and BIOL 1541L. (Typically offered: Spring)

This course is equivalent to BIOL 4252.

BIOL 4263. Cell Physiology. 3 Hours.

In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signalling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3813 and PHYS 2033. (Typically offered: Fall)

BIOL 4263H. Honors Cell Physiology. 3 Hours.

In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signalling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3813 and PHYS 2033. (Typically offered: Fall)

This course is equivalent to BIOL 4263.

BIOL 4273. Endocrinology. 3 Hours.

In endocrinology we study hormonal integration of living processes as all levels from molecule to organism. We will work with the mechanisms of hormone action, the endocrine control axes and hormones physiological role. The course will include paper discussions and student presentations on topics of special interest. Prerequisite: BIOL 2533 or equivalent. (Typically offered: Spring)

BIOL 4303. Plant Physiology. 3 Hours.

An introductory course in plant physiology focusing on cellular processes that support the metabolic, developmental, and reproductive needs of plants. Prerequisite: BIOL 2533 or CHEM 3813 or CHEM 5843. (Typically offered: Fall)

BIOL 4313. Molecular Cell Biology. 3 Hours.

In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)

BIOL 4313H. Honors Molecular Cell Biology. 3 Hours.

In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)

This course is equivalent to BIOL 4313.

BIOL 4323. Comparative Neurobiology. 3 Hours.

Exploration of modern research approaches to understanding the development and function of animal nervous systems, with emphasis on molecular and cellular approaches in non-human animal models commonly used in biomedical research. Format combines lectures, group discussions, and student presentations using examples from the primary neurobiology literature. Prerequisite: BIOL 2323 and BIOL 2533 or equivalents. (Typically offered: Irregular)

BIOL 4333. Biotechnology in Agriculture. 3 Hours.

Discussion of the techniques, applications, and issues of biotechnology as it is being used in modern agriculture. Coverage includes the basics of molecular biology, production of transgenic plants and animals, and new applications in the agricultural, food, and medical marketplace. Lecture and discussion, 3 hours per week. (Typically offered: Fall)

This course is cross-listed with PLPA 4333.

BIOL 4353. Ecological Genetics/Genomics. 3 Hours.

Analysis of the genetics of natural and laboratory populations with emphasis on the ecological bases of evolutionary change. Prerequisite: BIOL 2323 and BIOL 2321L and MATH 2554 and STAT 2023 or equivalents. (Typically offered: Fall Odd Years)

BIOL 4404. Comparative Botany. 4 Hours.

A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylogeny. Three hours lecture, 4 hours lab per week. Corequisite: Lab component. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Spring)

BIOL 4424. Mycology. 4 Hours.

Form and function of the fungi. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Irregular)

BIOL 4433. Principles of Evolution. 3 Hours.

Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the Modern Synthesis. Historical, theoretical, and population genetics approaches are discussed. Recommended BIOL 3023 and BIOL 2321L and BIOL 3861L. Prerequisite: BIOL 2323 and BIOL 3863. (Typically offered: Fall Even Years)

BIOL 4463. Physiological Ecology. 3 Hours.

Interactions between environment, physiology, and properties of individuals and populations on both evolutionary and ecological scales. Prerequisite: BIOL 3863 and BIOL 4234 and its lab component. (Typically offered: Spring Odd Years)

BIOL 4511L. Population Ecology Laboratory. 1 Hour.

Population Ecology Lab. Pre- or Corequisite: BIOL 4513. (Typically offered: Fall Even Years)

BIOL 4513. Population Ecology. 3 Hours.

Survey of theoretical and applied aspects of population processes stressing models of growth, interspecific interactions, and adaptation to physical and biotic environments. Prerequisite: BIOL 3863. (Typically offered: Fall Even Years)

BIOL 4523. Plant Ecology. 3 Hours.

To develop understanding of important ecological concepts through study of dynamics relationships among plants and their environment. To become familiar with the literature of plant ecology, and interpretation and critique of ecological research. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

BIOL 4543. Developmental Biology. 3 Hours.

An analysis of the principles and mechanisms of development emphasizing the embryonic and postembryonic development of animals. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Irregular)

BIOL 4554. Developmental Biology with Laboratory. 4 Hours.

An analysis of the concepts of mechanisms of development emphasizing the experimental approach. Lecture 3 hours, laboratory 3 hours per week. Students may not receive degree credit for both BIOL 4543 and BIOL 4554. Corequisite: Lab component. Prerequisite: BIOL 2533 and BIOL 2323 or graduate standing. (Typically offered: Fall)

BIOL 4563. Cancer Biology. 3 Hours.

An introduction to the fundamentals of cancer biology. Prerequisite: BIOL 2533. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

BIOL 4613. Primate Adaptation and Evolution. 3 Hours.

Introduction to the biology of the order Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Prerequisite: BIOL 3023 or ANTH 1013. (Typically offered: Spring)
This course is cross-listed with ANTH 4613.

BIOL 4634. Wetlands Ecology and Management. 4 Hours.

To familiarize students with the ecology and management of wetlands. Students will be exposed to the characteristics of wetlands, the environmental factors that produce wetland types, and the management techniques used to meet desired wetland goals. Primary lecture topics will include: wetland definition, wetlands of the world, wetland status, trends, laws, wetland hydrology, wetland soils, wetland plants, wetland plant adaptations, wetland wildlife, wetland wildlife adaptations, wetland ecosystem development, and wetland management. Lecture 2 hours, Laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 4693. Forest Ecology. 3 Hours.

Introduction to the various biological, ecological and historical aspects of forest communities, with particular emphasis on the forests of the central and southeastern United States. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 4703. Mechanisms of Pathogenesis. 3 Hours.

A survey of the events causing human disease at the molecular, cellular and genetic levels. Seeks to develop an appreciation that both the tricks pathogens use and the body's own defenses contribute to pathology. Prerequisite: BIOL 2533. (Typically offered: Fall)

BIOL 4703H. Honors Mechanisms of Pathogenesis. 3 Hours.

A survey of the events causing human disease at the molecular, cellular and genetic levels. Seeks to develop an appreciation that both the tricks pathogens use and the body's own defenses contribute to pathology. Prerequisite: BIOL 2533. (Typically offered: Fall)

This course is equivalent to BIOL 4703.

BIOL 4711L. Basic Immunology Laboratory. 1 Hour.

Basic immunology laboratory. Corequisite: BIOL 4713. (Typically offered: Spring)

BIOL 4713. Basic Immunology. 3 Hours.

(Formerly MBIO 4714) A general overview of immunity with emphasis on the underlying cellular, molecular, and genetic events, and discussions of more specialized issues in immunology, such as disease states involving the immune system, and other interesting problems in modern immunology. Lecture 2 hours, laboratory 4 hours per week. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Spring)

BIOL 4713H. Honors Basic Immunology. 3 Hours.

A general overview of Immunity with emphasis on the underlying cellular, molecular, and genetic events, and discussions of more specialized issues in Immunology, such as disease states involving the Immune system, and other interesting problems in modern Immunology. Prerequisite: BIOL 2323 and BIOL 2533. (Typically offered: Spring)

This course is equivalent to BIOL 4713.

BIOL 4724. Protistology. 4 Hours.

The biology of eukaryotes other than animals, land plants, and fungi with emphasis on morphology and modern approaches to phylogenetic systematics. Three hours lecture, four hours lab/week. Involves writing term papers. Corequisite: Lab component. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Irregular)

BIOL 4734. Wildlife Management Techniques. 4 Hours.

To familiarize students with techniques used in the management of wildlife populations. Students will be exposed to field methods, approaches to data analysis, experimental design, and how to write a scientific paper. Management applications will be emphasized. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 4744. Fish Biology. 4 Hours.

Morphology, classification, life history, population dynamics, and natural history of fishes and fish-like vertebrates. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: 12 hours of biological science. (Typically offered: Spring Odd Years)

BIOL 4753. General Virology. 3 Hours.

An introduction to viral life-cycles, structure, and host cell interactions. Emphasis placed on molecular and biochemical aspects of virology. Two hour lecture and one hour discussion. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Spring)

BIOL 4763. Ornithology. 3 Hours.

Taxonomy, morphology, physiology, behavior, and ecology of birds. Lecture, laboratory, and field work. Corequisite: Lab component. Prerequisite: BIOL 3863 (Typically offered: Spring Even Years)

BIOL 4774. Biometry. 4 Hours.

Students learn biological statistics and experimental design by actually designing experiments and analyzing data, as well as through lecture, discussion, reading, writing, and problem solving. Lecture 3 hours, laboratory 3 hours each week. Corequisite: Lab component. Prerequisite: STAT 2023 or equivalent, BIOL 3863. (Typically offered: Spring Even Years)

BIOL 4783. Mammalogy. 3 Hours.

Lectures and laboratory dealing with classification, morphology, distribution, ecology, behavior, and physiology of mammals. Two hours lecture, 4 hours laboratory. Corequisite: Lab component. Prerequisite: 10 hours Biological Sciences. (Typically offered: Fall Even Years)

BIOL 4793. Introduction to Neurobiology. 3 Hours.

Exploration of the neurological underpinnings of perception, action, and experience including: how sense receptors convert information in the world into electricity, how information flows through the nervous systems, how neural wiring makes vision possible, how the nervous system changes with experience, and how the system develops. Prerequisite: BIOL 2533. (Typically offered: Spring)

BIOL 480V. Special Topics in Biological Sciences. 1-6 Hour.

Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BIOL 480VH. Honors Special Topics in Biological Sciences. 1-6 Hour.

Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

This course is equivalent to BIOL 480V.

BIOL 4833. Animal Behavior. 3 Hours.

Organization, regulation, and phylogeny of animal behavior, emphasizing vertebrates. Lecture, laboratory, and field work. Corequisite: Lab component. (Typically offered: Fall Odd Years)

BIOL 4844. Community and Ecosystem Ecology. 4 Hours.

Survey of theoretical and applied aspects of community processes stressing structure, tropic dynamics, community interactions, and major community types. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Fall Odd Years)

BIOL 4863. Analysis of Animal Populations. 3 Hours.

Basic principles of design and analysis for population studies of fish and wildlife species. Students will be instructed in the use of the latest software for estimating population parameters. Focus will be on both concepts and applications. Management applications of estimated parameters will be emphasized. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

BIOL 4873. Microbial Molecular Genetics and Informatics. 3 Hours.

Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: BIOL 2323 or BIOL 2533. (Typically offered: Fall)

BIOL 4873H. Honors Microbial Molecular Genetics and Informatics. 3 Hours.

Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: BIOL 2323 or BIOL 2533. (Typically offered: Fall)
This course is equivalent to BIOL 4873.

BIOL 4883. Mammalian Evolution and Osteology. 3 Hours.

Focuses on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Prerequisite: ANTH 1013 and ANTH 1011L, or BIOL 1543 and BIOL 1541L, or instructor consent. (Typically offered: Fall Even Years)

This course is equivalent to ANTH 4703.

BIOL 496V. Culture and Environment: Field Studies. 1-6 Hour.

May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

BIOL 496VH. Honors Culture and Environment: Field Studies. 1-6 Hour.

May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.
This course is equivalent to BIOL 496V.

BIOL 498V. Senior Thesis. 1-6 Hour.

Senior thesis. (Typically offered: Fall, Spring and Summer)

BIOL 499V. Research In Biological Sciences. 1-4 Hour.

Research. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.

BIOL 499VH. Honors Research in Biological Sciences. 1-4 Hour.

Honors research. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 8 hours of degree credit.
This course is equivalent to BIOL 499V.

BIOL 5001. Seminar in Biology. 1 Hour.

Discussion of selected topics and review of current literature in any area of the biological sciences. (Typically offered: Fall and Spring) May be repeated for up to 2 hours of degree credit.
This course is cross-listed with CEMB 5911.

BIOL 5003L. Laboratory in Prokaryote Biology. 3 Hours.

Laboratory techniques in prokaryote culture, identification, physiology, metabolism, and genetics. Laboratory 6 hours per week. Prerequisite: BIOL 3123. (Typically offered: Fall and Spring)

BIOL 5024. Insect Diversity and Taxonomy. 4 Hours.

(Formerly BIOL 4024.) Principles and practices of insect classification and identification with emphasis on adult insects. 2.5 hours lecture, 4 hours lab. Previous knowledge of basic entomology is necessary. Graduate degree credit will not be given for both BIOL 4024 and BIOL 5024. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall)
This course is cross-listed with ENTO 5024.

BIOL 5034. Wildlife Management Techniques. 4 Hours.

(Formerly BIOL 4734.) To familiarize students with techniques used in the management of wildlife populations. Students will be exposed to field methods, approaches to data analysis, experimental design, and how to write a scientific paper. Management applications will be emphasized. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4734 and BIOL 5034. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5053. Insect Ecology. 3 Hours.

(Formerly BIOL 4053.) Teaches important ecological concepts through study of dynamic relationships among insects and their environment. Introduces literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. 2 hours lecture/2 hours lab. Graduate degree credit will not be given for both BIOL 4053 and BIOL 5053. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall Even Years)

This course is cross-listed with ENTO 5053.

BIOL 5104. Taxonomy of Flowering Plants. 4 Hours.

(Formerly BIOL 4104.) Identifying, naming, and classifying of wildflowers, weeds, trees, and other flowering plants. Emphasis is on the practical aspects of plant identification. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4104 and BIOL 5104. Corequisite: Lab component. Prerequisite: BIOL 1613 and BIOL 1611L and BIOL 2323 and BIOL 3023. (Typically offered: Spring)

BIOL 5113. Insect Behavior and Chemical Ecology. 3 Hours.

Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Spring Even Years)

This course is cross-listed with ENTO 5113.

BIOL 5122. Food Microbiology. 2 Hours.

(Formerly BIOL 4122.) The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Graduate degree credit will not be given for both BIOL 4122 and BIOL 5122. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)

This course is cross-listed with FDSC 5122.

BIOL 5124. Dendrology. 4 Hours.

(Formerly BIOL 4114.) Morphology, classification, geographic distribution, and ecology of woody plants. Lecture 3 hours, laboratory 3 hours per week, and fieldtrips. Graduate degree credit will not be given for both BIOL 4114 and BIOL 5124. Prerequisite: BIOL 3863. (Typically offered: Fall)

BIOL 5133. Insect Molecular Genetics. 3 Hours.

A hands on course in insect molecular genetic techniques including molecular diagnostics and population genetics. Students will learn how to apply advanced molecular genetic methodologies and Internet database resources to insects that they are using for their graduate research. (Typically offered: Spring Even Years)

This course is cross-listed with ENTO 5133.

BIOL 5143. Advanced Methods in Microscopy. 3 Hours.

Stand alone course on laboratory methods emphasizing techniques in modern microscopy. Individual research project required. Prerequisite: Graduate standing. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

BIOL 5153. Practical Programming for Biologists. 3 Hours.

Hands-on instruction in the fundamentals of biological computing. Students learn how to set up a Unix work station, work from the command line, install software, build databases, and program in Perl, a popular scripting language for biological applications. Most examples focus on the analysis of genomic data. (Typically offered: Irregular)

BIOL 5163. Dynamic Models in Biology. 3 Hours.

(Formerly BIOL 4163.) Mathematical and computational techniques for developing, executing, and analyzing dynamic models arising in the biological sciences. Both discrete and continuous time models are studied. Applications include population dynamics, cellular dynamics, and the spread of infectious diseases. Graduate degree credit will not be given for both BIOL 4163 and BIOL 5163. Prerequisite: MATH 2554. (Typically offered: Irregular)

BIOL 5174. Conservation Genetics. 4 Hours.

Covers concepts of biodiversity identification and illustrates how genetic data are generated and analyzed to conserve and restore biological diversity. Prerequisite: BIOL 3023, BIOL 3863 and STAT 2023 (or equivalent) and graduate standing. (Typically offered: Spring)

BIOL 5213. Biological Regulation and Subcellular Communication. 3 Hours.

Combines lectures, review of primary literature, student presentations, and small group discussions to explore a diversity of topics related to mechanisms of biological regulation and subcellular communication. Prerequisite: Graduate standing. (Typically offered: Irregular)

BIOL 5223. Bacterial Lifestyles. 3 Hours.

The course will introduce students to bacteria as prokaryotic organisms, different from eukaryotes such as plants and animals. Model microbial systems will be studied in more detail to identify unique strategies that bacteria employ to thrive in their respective environment, whether they are causing diseases or establishing beneficial interactions with animal or plants or coexisting with other microorganisms in diverse ecological environments. The course will also cover special adaptations that bacteria have evolved to adapt to harsh environments and how these adaptations can be harnessed to control pollution. Prerequisite: (BIOL 2013 and BIOL 2011L) or BIOL 3123. (Typically offered: Spring Odd Years)

This course is cross-listed with PLPA 5123.

BIOL 5233. Genomics and Bioinformatics. 3 Hours.

Principles of molecular and computational analyses of genomes. Prerequisite: BIOL 2533 or BIOL 2323. (Typically offered: Spring)

BIOL 5241L. Ichthyology Laboratory. 1 Hour.

Practical application of fish identification based on anatomy, fish sampling methods, and curation of fish specimen. Laboratory component of BIOL 5243. Corequisite: BIOL 5243. (Typically offered: Spring Odd Years)

BIOL 5243. Ichthyology. 3 Hours.

Comprehensive overview of the diversity of fishes. Covers anatomy, physiology, evolution, taxonomy, ecology, behavior, zoogeography and conservation of marine and freshwater fishes. Lecture 3 hours per week. Corequisite: BIOL 5241L. (Typically offered: Spring Odd Years)

BIOL 5254. Comparative Physiology. 4 Hours.

(Formerly BIOL 4234.) Comparison of fundamental physiological mechanisms in various animal groups. Adaptations to environmental factors at both the organismal and cellular levels are emphasized. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4234 and BIOL 5254. Prerequisite: BIOL 2533 and CHEM 3613 and (CHEM 3611L or CHEM 3612M). (Typically offered: Fall)

BIOL 5263. Cell Physiology. 3 Hours.

In-depth molecular coverage of cellular processes involved in growth, metabolism, transport, excitation, signaling and motility, with emphasis on function and regulation in eukaryotes, primarily animals. Prerequisite: BIOL 2323, BIOL 2533, BIOL 2531L, CHEM 3813, and PHYS 2033. (Typically offered: Fall)

BIOL 5273. Endocrinology. 3 Hours.

In endocrinology we study hormonal integration of living processes at all levels from molecule to organism. We will work with the mechanisms of hormone action, the endocrine control axes and hormones physiological role. The course will include paper discussions and student presentations on topics of special interest. (Typically offered: Spring)

BIOL 5303. Plant Physiology. 3 Hours.

Introductory course in plant physiology focusing on cellular processes that support the metabolic, developmental, and reproductive needs of plants. Prerequisite: 3 hours of cell biology or biochemistry. (Typically offered: Fall)

BIOL 5313. Molecular Cell Biology. 3 Hours.

In-depth molecular coverage of transcription, cell cycle, translation, and protein processing in eukaryotes and prokaryotes. Prerequisite: BIOL 2533 and BIOL 2323 and CHEM 3603 and CHEM 3601L and CHEM 3613 and CHEM 3611L. (Typically offered: Spring)

BIOL 5323. Comparative Neurobiology. 3 Hours.

Exploration of modern research approaches to understanding the development and function of animal nervous systems, with emphasis on molecular and cellular approaches in non-human animal models commonly used in biomedical research. Format combines lectures, group discussions, and student presentations using examples from the primary neurobiology literature. Prerequisite: Graduate standing. (Typically offered: Irregular)

BIOL 5343. Advanced Immunology. 3 Hours.

Aspects of innate, cell-mediated, and humoral immunity in mammalian and avian species. Molecular mechanisms underlying the function of the immune system are emphasized. A course in Basic Immunology prior to enrollment in Advanced Immunology is recommended but not required. Lecture 3 hours per week. (Typically offered: Spring)

This course is cross-listed with POSC 5343.

BIOL 5352L. Immunology in the Laboratory. 2 Hours.

Laboratory course on immune-diagnostic laboratory techniques and uses of antibodies as a research tool. Included are cell isolation and characterization procedures, immunochemistry, flow cytometry, ELISA and cell culture assay systems. Laboratory 6 hours per week. Prerequisite: POSC 5343 or BIOL 5343. (Typically offered: Spring)

This course is cross-listed with POSC 5352L.

BIOL 5353. Ecological Genetics/genomics. 3 Hours.

Analysis of the genetics of natural and laboratory populations with emphasis on the ecological bases of evolutionary change. Prerequisite: BIOL 2323 and BIOL 2321L, BIOL 3023 and MATH 2554 and STAT 2023 or equivalents. (Typically offered: Fall Odd Years)

BIOL 5404. Comparative Botany. 4 Hours.

A comparative approach to organisms classically considered to be plants with emphasis on morphology, life history, development, and phylogeny. Three hours lecture, 4 hours lab per week. Corequisite: Lab component. Prerequisite: Graduate standing. (Typically offered: Fall Odd Years)

BIOL 5414. Mycology. 4 Hours.

Form and function of the fungi. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Laboratory component. (Typically offered: Irregular)

BIOL 5423. Human Evolutionary Anatomy. 3 Hours.

Paleobiologists reconstruct past lifeways and systematic relationships of our ancestors using comparative studies of bony morphology and associated soft tissues. This course surveys methods and theories used to infer function and phylogeny, and details relevant aspects of the anatomy of humans, living great apes, and fossil human ancestors. Prerequisite: ANTH 1013 and BIOL 1543. (Typically offered: Irregular)

This course is cross-listed with ANTH 5423.

BIOL 5433. Principles of Evolution. 3 Hours.

Advanced survey of the mechanisms of evolutionary change with special emphasis on advances since the Modern Synthesis. Historical, theoretical, and population genetics approaches are discussed. Recommended: BIOL 3023 and BIOL 2321L and BIOL 3861L. Prerequisite: BIOL 2323 and BIOL 3863. (Typically offered: Fall Even Years)

BIOL 5463. Physiological Ecology. 3 Hours.

Interactions between environment, physiology, and properties of individuals and populations on both evolutionary and ecological scales. Prerequisite: BIOL 3863 and BIOL 4234. (Typically offered: Spring Odd Years)

BIOL 5511L. Population Ecology Laboratory. 1 Hour.

Demonstration of the models and concepts from BIOL 5513. Pre- or Corequisite: BIOL 5513. (Typically offered: Fall Even Years)

BIOL 5513. Population Ecology. 3 Hours.

Survey of theoretical and applied aspects of populations processes stressing models of growth, interspecific interactions, and adaptation to physical and biotic environments. Corequisite: BIOL 5511L. Prerequisite: BIOL 3863. (Typically offered: Fall Even Years)

BIOL 5523. Plant Ecology. 3 Hours.

To develop understanding of important ecological concepts through study of dynamics relationships among plants and their environment. To become familiar with the literature of plant ecology, and interpretation and critique of ecological research. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

BIOL 5524. Developmental Biology with Laboratory. 4 Hours.

An analysis of the concepts and mechanisms of development emphasizing the experimental approach. Students may not receive degree credit for both BIOL 5543 Developmental Biology and BIOL 5524 Developmental Biology with Laboratory. Corequisite: Lab component. (Typically offered: Fall)

BIOL 5534. Biochemical Genetics. 4 Hours.

Lectures and laboratories based on modern molecular genetic techniques for analyses of eukaryotes and manipulation of prokaryotes. A hands-on course in recombinant DNA techniques: laboratory practices in gene identification, cloning, and characterization. Lecture 2 hours, laboratory 6 hours per week. Corequisite: Lab component. Prerequisite: BIOL 2323 (or equivalent) and CHEM 3813 (or equivalent). (Typically offered: Spring)

BIOL 5543. Developmental Biology. 3 Hours.

An analysis of the principles and mechanisms of development emphasizing the embryonic and postembryonic development of animals. Degree credit will not be allowed for both BIOL 5543 and BIOL 5524. (Typically offered: Irregular)

BIOL 5553. Astrobiology. 3 Hours.

Discusses the scientific basis for the possible existence of extraterrestrial life. Includes the origin and evolution of life on Earth, possibility of life elsewhere in the solar system (including Mars), and the possibility of life on planets around other stars. Prerequisite: Instructor consent. (Typically offered: Irregular)

This course is cross-listed with SPAC 5553.

BIOL 5563. Cancer Biology. 3 Hours.

An introduction to the fundamentals of cancer biology. Prerequisite: BIOL 2533. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

BIOL 5613. Primate Adaptation and Evolution. 3 Hours.

(Formerly BIOL 4613.) Introduction to the biology of the order Primates. This course considers the comparative anatomy, behavioral ecology and paleontology of our nearest living relatives. Graduate degree credit will not be given for both BIOL 4613 and BIOL 5613. Prerequisite: BIOL 3023 or ANTH 1013. (Typically offered: Spring)

This course is cross-listed with ANTH 5623.

BIOL 5634. Wetlands Ecology and Management. 4 Hours.

To familiarize students with the ecology and management of wetlands. Students will be exposed to the characteristics of wetlands, the environmental factors that produce wetland types, and the management techniques used to meet desired wetland goals. Primary lecture topics will include: wetland definition, wetlands of the world, wetland status, trends, laws, wetland hydrology, wetland soils, wetland plants, wetland plant adaptations, wetland ecosystem development, and wetland management. Lecture 2 hours, Laboratory 3 hours per week. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5643. Eukaryote Phylogeny. 3 Hours.

Molecular analysis of the eukaryotic tree of life, phylogenetic tree reconstruction, and eukaryote diversity and evolutionary relationships. (Typically offered: Spring Odd Years)

BIOL 5693. Forest Ecology. 3 Hours.

(Formerly BIOL 4693.) Introduction to the various biological, ecological and historical aspects of forest communities, with particular emphasis on the forests of the central and southeastern United States. Graduate degree credit will not be given for both BIOL 4693 and BIOL 5693. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5703. Mechanisms of Pathogenesis. 3 Hours.

A survey of events causing human disease at the molecular, cellular and genetic levels. Seeks to develop an appreciation that both the tricks pathogens use and the body's own defenses contribute to pathology. (Typically offered: Fall)

BIOL 5711L. Basic Immunology Laboratory. 1 Hour.

(Formerly BIOL 4711L.) Basic immunology laboratory. Graduate degree credit will not be given for both BIOL 4711L and BIOL 5711L. Corequisite: BIOL 5713. (Typically offered: Spring)

BIOL 5713. Basic Immunology. 3 Hours.

A general overview of Immunity with emphasis on the underlying cellular, molecular and genetic events controlling immune reactions. Reading of the primary literature on disease states involving the immune system. (Typically offered: Spring)

BIOL 5723. Fish Biology. 3 Hours.

Morphology, classification, life histories, population dynamics, and natural history of fishes and fish-like vertebrates. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: 12 hours of biological sciences. (Typically offered: Spring Odd Years)

BIOL 5734. Protistology. 4 Hours.

The biology of eukaryotes other than animals, land plants, and fungi with emphasis on morphology and modern approaches to phylogenetic systematics. Three hours lecture, four hours lab/week. Involves writing term papers. Corequisite: Lab component. (Typically offered: Irregular)

BIOL 5743. Herpetology. 3 Hours.

Morphology, classification and ecology of amphibians and reptiles. Lecture 2 hours, laboratory 1 hour per week. Corequisite: Lab component. (Typically offered: Spring Even Years)

BIOL 5753. General Virology. 3 Hours.

An introduction to viral life-cycles, structure, and host cell interactions. Emphasis placed on molecular and biochemical aspects of virology. Two hour lecture and one hour discussion. Prerequisite: BIOL 2533 and BIOL 2323. (Typically offered: Spring)

BIOL 5763. Ornithology. 3 Hours.

Taxonomy, morphology, physiology, behavior, and ecology of birds. Lecture, laboratory, and field work. Corequisite: Lab component. Prerequisite: 10 hours of biological sciences. (Typically offered: Spring Even Years)

BIOL 5774. Biometry. 4 Hours.

(Formerly BIOL 4774.) Students learn biological statistics and experimental design by actually designing experiments and analyzing data, as well as through lecture, discussion, reading, writing, and problem solving. Lecture 3 hours, laboratory 3 hours each week. Graduate degree credit will not be given for both BIOL 4774 and BIOL 5774. Corequisite: Lab component. Prerequisite: STAT 2023 or equivalent, BIOL 3863. (Typically offered: Spring Even Years)

BIOL 5783. Mammalogy. 3 Hours.

Lectures and laboratory dealing with classification, morphology, distribution, ecology, behavior, and physiology of mammals. Two hours lecture, 4 hours laboratory. Corequisite: Lab component. (Typically offered: Fall)

BIOL 5793. Introduction to Neurobiology. 3 Hours.

(Formerly BIOL 4793.) Exploration of the neurological underpinnings of perception, action, and experience including: how sense receptors convert information in the world into electricity, how information flows through the nervous systems, how neural wiring makes vision possible, how the nervous system changes with experience, and how the system develops. Graduate degree credit will not be given for both BIOL 4793 and BIOL 5793. Prerequisite: BIOL 2533. (Typically offered: Spring)

BIOL 580V. Special Topics in Biological Sciences. 1-6 Hour.

Consideration of new areas of biological sciences not yet treated adequately in other courses. Prerequisite: 8 hours of biological sciences. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

BIOL 5833. Animal Behavior. 3 Hours.

Organization, regulation, and phylogeny of animal behavior, emphasizing vertebrates. Lecture, laboratory, and field work. Corequisite: Lab component. (Typically offered: Fall Odd Years)

BIOL 5843. Conservation Biology. 3 Hours.

The study of direct and indirect factors by which biodiversity is impacted by human activity. It is a synthetic field of study that incorporates principles of ecology, biogeography, population genetics, economics, sociology, anthropology, philosophy, geology, and geography. Prerequisite: BIOL 3863. (Typically offered: Irregular)

BIOL 5844. Community Ecology. 4 Hours.

Survey of theoretical and applied aspects of community processes stressing structure, trophic dynamics, community interactions, and major community types. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Fall Odd Years)

BIOL 5863. Analysis of Animal Populations. 3 Hours.

(Formerly BIOL 4863.) Basic principles of design and analysis for population studies of fish and wildlife species. Students will be instructed in the use of the latest software for estimating population parameters. Focus will be on both concepts and applications. Management applications of estimated parameters will be emphasized. Lecture 2 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both BIOL 4863 and BIOL 5863. Corequisite: Lab component. Prerequisite: BIOL 3863. (Typically offered: Spring Even Years)

BIOL 5873. Microbial Molecular Genetics and Informatics. 3 Hours.

Fundamentals of microbial genomics and bioinformatics. Course covers microbial genetics, genetic structure, genome organization, proteome organization, approaches for the analysis of DNA, RNA, and proteins, cellular metabolic pathways, genetic regulation, small RNA molecules, functional genomics, metagenomics, and bioinformatics approaches for analysis of microbial genomes. Prerequisite: Graduate status. (Typically offered: Fall)

BIOL 5883. Mammalian Evolution and Osteology. 3 Hours.

Focuses on describing the evolutionary history of mammals, a group of vertebrates that include over 5,000 species in 29 orders, and will provide an overview of living species and their identifying features. Credit will not be given for both ANTH 4703 and ANTH 5703. Prerequisite: Instructor consent. (Typically offered: Fall Even Years)

This course is cross-listed with ANTH 5703.

BIOL 5914. Stream Ecology. 4 Hours.

Current concepts and research in lotic ecosystem dynamics. Lecture, laboratory, field work and individual research projects required. Corequisite: Lab component. Prerequisite: 3 hours of ecology-related coursework. (Typically offered: Fall Even Years)

BIOL 5933. Global Biogeochemistry: Elemental Cycles and Environmental Change. 3 Hours.

This course explores the chemical, biological, and geological processes occurring within ecosystems. An understanding of these processes is used to investigate how they form the global biogeochemical cycles that provide energy and nutrients necessary for life. Class discussions focus on global change and the effects of more recent anthropogenic influences. Prerequisite: 3 hours of chemistry or biochemistry and ecology. (Typically offered: Spring Odd Years)

BIOL 596V. Culture and Environment: Field Studies. 1-6 Hour.

(Formerly BIOL 496V.) May be taken by students participating in overseas study programs or other domestic field study programs approved by the department. Graduate degree credit will not be given for both BIOL 496V and BIOL 596V. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

BIOL 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BIOL 6113. Insect Physiology. 3 Hours.

General and comparative physiology of insects. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. (Typically offered: Spring Even Years)

This course is cross-listed with ENTO 6113.

BIOL 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Biomedical Engineering (BMEG) Courses

BMEG 2614. Introduction to Biomedical Engineering. 4 Hours.

An introductory course for undergraduate biomedical engineering students. It covers topics such as recombinant DNA technologies, cell and tissue engineering, stem cell and organ regeneration, the biomechanics, bioinstrumentation, engineering of immunity, and bio- and medical imaging, etc. The application of nano-biotechnology in developing clinical products such as tissue engineered products, drug delivery systems, etc. will be emphasized in the course. Prerequisite: (GNEG 1321H, or GNEG 1121, or GNEG 1103), and CHEM 1103, with a grade of C or better, MATH 2554 and PHYS 2054. (Typically offered: Fall and Summer)

BMEG 2813. Biomechanical Engineering. 3 Hours.

This course introduces basic concepts and principles of biomechanics to biomedical and other engineering students. The course topics include mechanics and materials, viscoelastic properties, bone, cartilage, ligament, tendon, muscle, cardiovascular dynamics, clinical gait analysis, etc. After taking this course, students are expected to understand the application of engineering kinetics to describe motions of human body and mechanic properties of tissues. MATLAB will be used to write and solve biomechanical static and dynamic equations. Lecture 3 hours per week. Prerequisite: BMEG 2614, CHEM 1123, MATH 2564, and PHYS 2074. (Typically offered: Spring)

BMEG 2904. Biomedical Instrumentation. 4 Hours.

This course is designed for biomedical engineering undergraduate students to learn both theoretical and practical concepts of bioinstrumentation and their applications in modern life science and medicine. Analytical experiments will be practiced in the laboratory along with the lecture section. This course covers basic topics in circuits such as charge current, voltage, resistance, power energy, linear network analysis, inductors, capacitors, operational amplifier, time-varying signals, active analog filters, bioinstrumentation design etc. The application of these principles and theories in bioinstrumentation design and development is particularly emphasized in this course. The lab section requires team work, planning, and data sharing. Corequisite: Lab component. Prerequisite: BMEG 2614, MATH 2564 and PHYS 2074. (Typically offered: Spring)

BMEG 3124. Biomedical Signals and Systems. 4 Hours.

This course will introduce students to the basics of signals - continuous and digital signals, and signal processing tools, such as filters, Laplace and Fourier transforms. The 'systems' aspect of the course will focus on physiological systems and methods to model such systems. The course will also focus on the biomedical applications of these methods through lab components. Prerequisite: BMEG 2904. (Typically offered: Fall)

BMEG 3634. Biomaterials. 4 Hours.

Introduction to the engineering properties of materials used in biomedical devices and applications. Topics include: atomic properties, structure-property-processing relationships, bulk engineering properties, surface and interfacial properties and applications of materials in biology and medicine. All topics will be reviewed in the context of specific biomedical devices and the engineering principles involved in their design. Corequisite: Lab component. Prerequisite: BMEG 2813, CHEM 1123, and BIOL 1543 and BIOL 1541L. (Typically offered: Fall)

BMEG 3653. Biomedical Modeling and Numerical Methods. 3 Hours.

Application of mathematical techniques to physiological systems. The emphasis will be on cellular physiology and cardiovascular system. Cellular physiology topics include models of cellular metabolism, membrane dynamics, membrane potential, excitability, wave propagation and cellular function regulation. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Pre- or Corequisite: MATH 2584. Prerequisite: BMEG 2614, and (MATH 2574 or MATH 3083). (Typically offered: Spring)

BMEG 3653H. Honors Biomedical Modeling and Numerical Methods. 3 Hours.

Application of mathematical techniques to physiological systems. The emphasis will be on cellular physiology and cardiovascular system. Cellular physiology topics include models of cellular metabolism, membrane dynamics, membrane potential, excitability, wave propagation and cellular function regulation. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Pre- or Corequisite: MATH 2584. Prerequisite: BMEG 2614, and (MATH 2574 or MATH 3083). (Typically offered: Spring)

This course is equivalent to BMEG 3653.

BMEG 3801. Clinical Observations and Needs Finding. 1 Hour.

This course involves the introduction of clinical procedures and biomedical devices and technology to biomedical engineering students. Students will tour medical facilities, clinics and hospitals and will participate in medical seminars, workshops and medical rounds. The course prepares students to successfully select and complete a project in the senior capstone course. Prerequisite: BMEG 2813 or BMEG 2904. (Typically offered: Fall and Spring)

BMEG 3824. Biomolecular Engineering. 4 Hours.

Biomolecular Engineering is to design and produce biomolecules, especially proteins, for uses ranging from pharmaceuticals, materials, sensors, transducers, to functional interfaces with conventional engineering materials. The course begins with an introduction to the tools and techniques of molecular biology that are used for protein engineering. Additional topics include recombinant DNA techniques, biochemical kinetics, cell growth reaction and kinetics, bioreactors, membrane processes, and bioproduct purification. There is an associated laboratory with exercises related to lecture topics. Corequisite: Lab component. Prerequisite: BMEG 3634, CHEM 1123, and BIOL 2533. (Typically offered: Spring)

BMEG 3824H. Honors Biomolecular Engineering. 4 Hours.

Biomolecular Engineering is to design and produce biomolecules, especially proteins, for uses ranging from pharmaceuticals, materials, sensors, transducers, to functional interfaces with conventional engineering materials. The course begins with an introduction to the tools and techniques of molecular biology that are used for protein engineering. Additional topics include recombinant DNA techniques, biochemical kinetics, cell growth reaction and kinetics, bioreactors, membrane processes, and bioproduct purification. There is an associated laboratory with exercises related to lecture topics. Corequisite: Lab component. Prerequisite: BMEG 3634, CHEM 1123, and BIOL 2533. (Typically offered: Spring)

This course is equivalent to BMEG 3824.

BMEG 4103L. Nanotechnology Laboratory. 3 Hours.

Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, and CHEM 1123. (Typically offered: Fall)
This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.

BMEG 4103M. Honors Nanotechnology Laboratory. 3 Hours.

Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, CHEM 1123. (Typically offered: Fall)
This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.

BMEG 4213. Tissue Mechanics. 3 Hours.

The purpose of this course is to introduce students to non-linear biomechanics of soft tissues such as skin, bladder, blood vessels, and the brain. Topics covered: Tissue mechanics: continuum biomechanics, tensor analysis, kinematics of continua, balance laws. Governing physics of mechanics as applied to soft tissues. Various constitutive relations will be discussed: linear elastic, hyperelastic, viscoelastic, poroelastic, and inelastic materials with internal variables. Cannot receive credit for both BMEG 4213 and BMEG 5213. Prerequisite: BMEG 2813, BMEG major and Senior standing. (Typically offered: Irregular)

BMEG 4243. Advanced Biomaterials and Biocompatibility. 3 Hours.

From Absorbable sutures to Zirconium alloy hip implants, biomaterials science influences nearly every aspect of medicine. This course focuses on the study of different classes of biomaterials and their interactions with human tissues. Topics include: biocompatibility; biofouling; hemocompatibility; wound healing response; foreign body response; design of orthopedic, dental and cardiovascular implants; ophthalmological and dermatological materials; degradable polymers for drug delivery; nanobiomaterials; smart biomaterials and the regulation of devices and materials by the FDA. Pre- or Corequisite: BMEG 4623. Prerequisite: BMEG 3634. (Typically offered: Irregular)

BMEG 4403. Biomedical Microscopy. 3 Hours.

An advanced course covering light microscopy techniques, conjugate image planes, principles of contrast, fluorescence imaging, confocal and multi-photon microscopy, electron microscopy, atomic force microscopy, image reconstruction and digital image processing with supporting units in tissue culture and histology. Prerequisite: BMEG 2904, PHYS 2074, BMEG major and Senior standing. (Typically offered: Irregular)

BMEG 4413. Tissue Engineering. 3 Hours.

This course introduces Tissue Engineering approaches at genetic and molecular, cellular, tissue, and organ levels. Topics include cell and tissue in vitro expansion, tissue organization, signaling molecules, stem cell and stem cell differentiation, organ regeneration, biomaterial and matrix for tissue engineering, bioreactor design for cell and tissue culture, dynamic and transportation in cell and tissue cultures, clinical implementation of tissue engineered products, and tissue-engineered devices. Corequisite: Lab component. Prerequisite: BMEG 3824 and BIOL 2533. (Typically offered: Irregular)

BMEG 450VH. Honors Thesis. 1-4 Hour.

Provides Biomedical Engineering students an opportunity to explore a topic in depth through an independent research or design project. Prerequisite: Honors standing. (Typically offered: Spring and Summer) May be repeated for degree credit.

BMEG 4513. Biomedical Optics and Imaging. 3 Hours.

This course will provide students with a fundamental understanding of various biomedical imaging modalities. Topics will include: Basics of light-tissue interaction - absorption, fluorescence, elastic and inelastic scattering; Computational and analytical models of light propagation to quantify tissue optical properties; Optical imaging techniques spectroscopy, tomography, and laser speckle with potential clinical applications; and Clinical imaging modalities and recent advances X-ray, Magnetic Resonance Imaging (MRI), Positron Emission Tomography (PET), Computed Tomography (CT), Ultrasound imaging, and Photoacoustic imaging. At the end of this course, students should have a good understanding of optical imaging, spectroscopy, and non-optical imaging modalities, specific anatomical sites that they are best suited for, and the trade-offs between imaging depth and resolution. Students may not receive credit for both BMEG 4513 and BMEG 5513. Prerequisite: BMEG 2904 and senior standing. (Typically offered: Irregular)

BMEG 4523. Biomedical Data and Image Analysis. 3 Hours.

This course focuses on an introduction to image processing and analysis for applications in biomedical research. After a review of basic MATLAB usage, students will learn fundamental tools for processing and analyzing data from a variety of subdisciplines within biomedical engineering. Topics include: filtering, thresholding, segmentation, morphological processing, and image registration. Through exercises involving 1D, 2D, and 3D data, students will develop problem-solving skills and a knowledge base in MATLAB required for customized quantitative data analysis. Students may not receive credit for both BMEG 4523 and BMEG 5523. Prerequisite: BMEG 3124 and BMEG 3653. (Typically offered: Irregular)

BMEG 460V. Individual Study. 1-3 Hour.

Individual study and research of a topic mutually agreeable to the student and faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

BMEG 460VH. Honors Individual Study. 1-3 Hour.

Individual study and research of a topic mutually agreeable to the student and faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

This course is equivalent to BMEG 460V.

BMEG 4623. Biomedical Transport Phenomena. 3 Hours.

An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. This course will cover molecular transport due to velocity, concentration and thermal gradients. Topics include the conservation relations; rheology of Newtonian and non-Newtonian physiological fluids; regulation of blood flow; steady and transient diffusion in reacting systems; dimensional analysis; transport processes in disease pathology. Prerequisite: BMEG 3653, CHEG 2133 or MEEG 3503, CHEG 2313 or MEEG 2403, MATH 2574 and MATH 2584. (Typically offered: Fall)

BMEG 4623H. Honors Biomedical Transport Phenomena. 3 Hours.

An introduction to the modeling of complex biological systems using principles of transport phenomena and biochemical kinetics. This course will cover molecular transport due to velocity, concentration and thermal gradients. Topics include the conservation relations; rheology of Newtonian and non-Newtonian physiological fluids; regulation of blood flow; steady and transient diffusion in reacting systems; dimensional analysis; transport processes in disease pathology. Prerequisite: BMEG 3653, CHEG 2133 or MEEG 3503, CHEG 2313 or MEEG 2403, MATH 2574 and MATH 2584. (Typically offered: Fall)

This course is equivalent to BMEG 4623.

BMEG 470V. Special Topics in Biomedical Engineering. 1-4 Hour.

Consideration of current biomedical engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for degree credit.

BMEG 4713. Cardiovascular Physiology and Devices. 3 Hours.

Understanding etymology of disease while creating solutions and dedicated devices is the primary focus of biomedical engineering. This course describes an interdisciplinary approach of the clinical and engineering worlds to develop devices for treating cardiovascular disease. The first part of the course will be a thorough review of the relevant anatomic and physiological considerations important for developing devices. Understanding these considerations from an engineering perspective to inform device development will be the second part of the course. Students may not receive credit for both BMEG 4713 and BMEG 5713. Prerequisite: CHEG 2133 or MEEG 3503, and BIOL 2213. (Typically offered: Irregular)

BMEG 4743. Drug and Gene Delivery. 3 Hours.

An advanced course covering important issues in drug and gene delivery in tumor and normal tissues. The course emphasizes quantitative analysis of molecule and nanoparticle transport through mathematical modeling and computer simulation. Various engineering-related topics on drug and gene delivery are discussed. These topics include physiologically-based pharmacokinetic analysis, transvascular transport, interstitial transport, transport across cell membrane, drug and gene carriers, targeted delivery of drugs, oxygen transport, delivery of effector cells and genes. Pre- or Corequisite: BMEG 4623. (Typically offered: Irregular)

BMEG 4813. Biomedical Engineering Design I. 3 Hours.

This is part one of a two-semester course that introduces students to the basic concepts of design from a biomedical engineering perspective. Groups are organized into teams of 4-5 members. The students put together a development plan and complete an initial prototype. Students will design what is to be fabricated and tested as a medical device or software following design process and product design specification guidelines. Corequisite: Lab component. Pre- or Corequisite: BMEG 4623. (Typically offered: Fall)

BMEG 4823. Biomedical Engineering Design II. 3 Hours.

This is part two of a two-semester course that introduces students to the basic concepts of design from a biomedical engineering perspective. Groups are organized into teams of 4-5 members. The students put together a development plan and complete an initial prototype. Students will design what is to be fabricated and tested as a medical device or software following design process and product design specification guidelines. Corequisite: Lab component. Prerequisite: BMEG 4813. (Typically offered: Spring)

BMEG 4873. Bionanotechnology. 3 Hours.

This is an introductory course relevant to bionanotechnology. The topics covered in this course include nanobiomaterials, nanoparticles, nanowires, nanobiochips, nanobiosensors, and nanobiodevices. The applications of these nanomaterials and devices in clinical diagnostics, disease treatment, point-of-care test and/or point-of-care diagnostics, tele-medical cares, controlled and targeted drug delivery, etc. will be particularly emphasized in the lecture. Prerequisite: BMEG 2813, BMEG 3824, and CHEG 2133 or MEEG 3503. (Typically offered: Irregular)

BMEG 4973. Regenerative Medicine. 3 Hours.

This is an advanced course focusing on tissue engineering and regenerative medicine. Topics include stem cell tissue engineering, cell signaling, transport and kinetics, biomaterials and scaffolds, surface interactions, viral and nonviral-based gene delivery, tissue engineered organs, organ transplantation, nanomedicine, cell replacement therapy, and organ regenerative therapy. Technologies used to grow clinical relevant cells and tissues in lab will also be discussed in this course. Pre- or Corequisite: Senior standing. (Typically offered: Irregular)

BMEG 5103. Design and Analysis of Experiments in Biomedical Research. 3 Hours.

An advanced course covering sample size estimation with power calculations, protection of vertebrate animals and human subjects, factorial design, multivariate analysis of variance, parametric and non-parametrics data analysis, Kaplan-meier analysis, and post-test correction of multiple comparisons as related to biomedical data. Prerequisite: MATH 2584 and BMEG 3653 or equivalents. (Typically offered: Irregular)

BMEG 5203. Mathematical Modeling of Physiological Systems. 3 Hours.

Application of numerical methods and mathematical techniques to physiological systems. Cellular physiology topics include models of cellular metabolism, diffusion, membrane potential, excitability, calcium dynamics and intercellular signalling. Cardiovascular system topics include models of blood cells, oxygen transport, cardiac output, cardiac regulation, and circulation. Other physiology topics include respiration, muscle, vision, hearing, voice, and speech. Prerequisite: MATH 2584 or BMEG 3653 or BMEG 4623 or equivalents. (Typically offered: Irregular)

BMEG 5213. Tissue Mechanics. 3 Hours.

The purpose of this course is to introduce students to non-linear biomechanics of soft tissues such as skin, bladder, blood vessels, and the brain. Topics covered: Tissue mechanics: continuum biomechanics, tensor analysis, kinematics of continua, balance laws. Governing physics of mechanics as applied to soft tissues. Various constitutive relations will be discussed: linear elastic, hyperelastic, viscoelastic, poroelastic, and inelastic materials with internal variables. Cannot receive credit for both BMEG 4213 and BMEG 5213. Prerequisite: BMEG 2813 and BMEG 4623 or equivalents. (Typically offered: Irregular)

BMEG 5313. Advanced Biomaterials and Biocompatibility. 3 Hours.

From Absorbable sutures to Zirconium alloy hip implants, biomaterials science influences nearly every aspect of medicine. This course focuses on the study of different classes of biomaterials and their interactions with human tissues. Prerequisite: BMEG 3634 and BMEG 4623 or equivalents. (Typically offered: Irregular)

BMEG 5413. Tissue Engineering. 3 Hours.

This course introduces Tissue Engineering approaches at genetic and molecular, cellular, tissue, and organ levels. Topics include cell and tissue in-vitro expansion, tissue organization, signaling molecules, stem cell and stem cell differentiation, organ regeneration, biomaterial and matrix for tissue engineering, bioreactor design for cell and tissue culture, dynamic and transportation in cell and tissue cultures, clinical implementation of tissue engineered products, and tissue-engineered devices. Students may not earn credit for both BMEG 5413 and BMEG 4413. Corequisite: Lab component. Prerequisite: BIOL 2533 and BMEG 3824. (Typically offered: Irregular)

BMEG 5423. Regenerative Medicine. 3 Hours.

The course covers five broad areas: Biological and molecular basis for regenerative medicine, tissue development, regenerative medicine and innovative technologies, clinical applications of regenerative medicine, and regulation and ethics. Prerequisite: BIOL 2533 and BMEG 3824 or equivalents. (Typically offered: Irregular)

BMEG 5513. Biomedical Optics and Imaging. 3 Hours.

This course will provide students with a fundamental understanding of various biomedical imaging modalities. Topics will include: Basics of light-tissue interaction - absorption, fluorescence, elastic and inelastic scattering; Computational and analytical models of light propagation to quantify tissue optical properties; Optical imaging techniques - spectroscopy, tomography, and laser speckle with potential clinical applications; and Clinical imaging modalities and recent advances - X-ray, Magnetic Resonance Imaging (MRI), Positron Emission Tomography (PET), Computed Tomography (CT), Ultrasound imaging, and Photoacoustic imaging. At the end of this course, students should have a good understanding of optical imaging, spectroscopy, and non-optical imaging modalities, specific anatomical sites that they are best suited for, and the trade-offs between imaging depth and resolution. Students may not receive credit for both BMEG 4513 and BMEG 5513. (Typically offered: Irregular)

BMEG 5523. Biomedical Data and Image Analysis. 3 Hours.

This course focuses on an introduction to image processing and analysis for applications in biomedical research. After a review of basic MATLAB usage, students will learn fundamental tools for processing and analyzing data from a variety of subdisciplines within biomedical engineering. Topics include: filtering, thresholding, segmentation, morphological processing, and image registration. Through exercises involving 1D, 2D, and 3D data, students will develop problem-solving skills and a knowledge base in MATLAB required for customized quantitative data analysis. Students may not receive credit for both BMEG 4523 and BMEG 5523. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 560V. Advanced Individual Study. 1-6 Hour.

Individual study and research of a topic mutually agreeable to the student and faculty member. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 570V. Advanced Special Topics. 1-6 Hour.

Consideration of current biomedical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.

BMEG 5713. Cardiovascular Physiology and Devices. 3 Hours.

Understanding etymology of disease while creating solutions and dedicated devices is the primary focus of biomedical engineering. This course describes an interdisciplinary approach of the clinical and engineering worlds to develop devices for treating cardiovascular disease. The first part of the course will be a thorough review of the relevant anatomic and physiological considerations important for developing devices. Understanding these considerations from an engineering perspective to inform device development will be the second part of the course. Students may not receive credit for both BMEG 4713 and BMEG 5713. Prerequisite: Graduate standing. (Typically offered: Irregular)

BMEG 5800. Graduate Seminar I. 0 Hours.

A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research. Prerequisite: BMEG 5801. (Typically offered: Fall) May be repeated for up to 0 hours of degree credit.

BMEG 5801. Graduate Seminar I. 1 Hour.

A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including research ethics, authorship, biosafety and the use of animals in biomedical research. (Typically offered: Fall)

BMEG 5810. Graduate Seminar II. 0 Hours.

A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. Prerequisite: BMEG 5811. (Typically offered: Spring) May be repeated for up to 0 hours of degree credit.

BMEG 5811. Graduate Seminar II. 1 Hour.

A weekly seminar series comprised of presentations by invited speakers and graduate students as well as didactic instruction in relevant topics including professional development, career options, effective communication, technology transfer, clinical translation and intellectual property. (Typically offered: Spring)

BMEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.

The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. (Typically offered: Fall and Spring)

This course is cross-listed with MEEG 5953, CVEG 5953.

BMEG 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

BMEG 700V. Doctoral Dissertation. 1-6 Hour.

Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

Business Law (BLAW) Courses

BLAW 2013. The Legal Environment of Business (ACTS Equivalency = BLAW 2003). 3 Hours.

Introduction to the legal and ethical environment in which business operates. Topics covered in this survey course include: introduction to the legal system and the judicial resolution of disputes, constitutional law, administrative law, criminal law, torts, contracts, property law, advertising and marketing law, bankruptcy and credit transactions, business organizations, antitrust, employment law and ethics. (Typically offered: Fall, Spring and Summer)

BLAW 2013H. Honors The Legal Environment of Business. 3 Hours.

Introduction to the legal and ethical environment in which business operates. Topics covered in this survey course include: introduction to the legal system and the judicial resolution of disputes, constitutional law, administrative law, criminal law, torts, contracts, property law, advertising and marketing law, bankruptcy and credit transactions, business organizations, antitrust, employment law and ethics. (Typically offered: Fall, Spring and Summer)
This course is equivalent to BLAW 2013.

BLAW 3033. Commercial Law. 3 Hours.

A study of the laws applicable to commercial transactions. Topics covered include the common law of contracts, Articles Two (Sales) and Three (Commercial Paper) of the Uniform Commercial Code, secured transactions, suretyship, and bankruptcy. (Typically offered: Spring)

BLAW 5003. Commercial Transactions. 3 Hours.

A study of laws applicable to business. Topics covered include the law of Contracts and UCC Sales, Payment Systems (checking accounts and E-payments), Bankruptcy, Intellectual Property, Principal-Agency Relationships, Business Entities, Data Security, Federal Securities Law, and Accountant's Legal Liability. Prerequisite: Graduate standing. (Typically offered: Irregular)

Career and Technical Education (CATE) Courses

CATE 3003. Teaching Housing and Interior Design to Secondary Students. 3 Hours.

This course prepares students to teach housing and interior design concepts to students in secondary school settings. Topics to be covered include housing needs and decisions, architectural design and construction, furnishings, safety and security, and careers related to the housing industry. Problem-based and project-based learning will provide the foundation for content delivery in this course. (Typically offered: Fall)

CATE 3103. Introduction to Professionalism. 3 Hours.

Studying and developing educational concepts in career and technical education with accepted principles of professionalism in secondary education settings. Prerequisite: Career and Technical Education (CATE) students only. (Typically offered: Fall)

CATE 3103H. Honors Introduction to Professionalism. 3 Hours.

Studying and developing professional concepts in vocational education with accepted principles of professionalism applied to career and technical education settings. (Typically offered: Fall)

This course is equivalent to CATE 3103.

CATE 380V. Supervised Work Experience. 1-9 Hour.

Supervision in business and industry under guidance. Designed for students who desire or need directed occupational experience. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CATE 390V. Competency Based Teacher Development: Program Organization. 3-12 Hour.

Development of competencies related to the methodology of instructional planning, execution, and evaluation. Provided by PBTE modules and University resource person. Enrollment before CATE 391V and CATE 392V. Prerequisite: Employed in service vocational-technical education field based instructor. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

CATE 391V. Competency Based Teacher Development - Teaching Adults. 3-12 Hour.

Development of competencies related to vocational guidance, contemporary instructional techniques, and student vocational organizations. Provided by PBTE modules and University resource person. Prerequisite: Completion of 12 credit hours of CATE 390V and employee in-service-vocational-technical education field based instructor. (Typically offered: Fall, Spring and Summer) May be repeated for up to 24 hours of degree credit.

CATE 392V. Competency Based Teacher Development: Teaching & Learning. 3-12 Hour.

Development of competencies related to program planning, development, evaluation; school community relations; and professional development. Provided by CBTD modules and University resource person. Prerequisite: Completion of 12 credit hours of CATE 391V and employee in-service-vocational-technical education field based instructor. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

CATE 393V. Competency Based Internship: Educational Legal Issues. 3-6 Hour.

In an actual school setting the student will satisfactorily demonstrate the competencies required to conduct a total vocational-technical education program. Instruction and follow-up will be provided by a University resource person. Prerequisite: Completion of 12 credit hours of CATE 392V and employee in-service-vocational-technical education field based instructor. (Typically offered: Fall, Spring and Summer) May be repeated for up to 24 hours of degree credit.

CATE 4013. Teaching Strategies. 3 Hours.

Methods and techniques in the preparation and delivery of teaching. Prerequisite: CATE 3103. (Typically offered: Fall)

CATE 4023. Classroom Management. 3 Hours.

Theory and techniques in classroom management, including professional ethics and school policies related to students, faculty and programs. Prerequisite: CATE 3103. (Typically offered: Fall)

CATE 4033. Assessment / Program Evaluation. 3 Hours.

An introduction to constructing, evaluating and interpreting tests; descriptive and inferential statistics; state competency testing; and guidelines for state program evaluations. Prerequisite: CATE 3103. (Typically offered: Fall)

CATE 4052. Seminar Teaching Internship. 2 Hours.

Site-based field experiences are integrated with the course content to provide continuity between theory and practice. Classroom management, ethics and diversity are emphasized. Corequisite: CATE 406X. (Typically offered: Spring)

CATE 406X. Teaching Internship. 12 Hours.

A minimum of 15 weeks will be spent in an off-campus school, at which time the student will have an opportunity under supervision to observe, to teach and to participate in other activities involving the school and the community. Successful completion of a criminal background check required before student can begin internship. Prerequisite: Senior status, CATE 3103, CATE 4013, CATE 4023, CATE 4033, CIED 3023 or CIED 4023 and CIED 3033. (Typically offered: Spring)

CATE 4073. Introduction to Teaching Programming in the Secondary Schools. 3 Hours.

This course provides an introduction to the foundations of teaching methods for computer programming in the secondary schools. Methods of computer programming instruction will include teaching strategies in coding, developing computational thinking, problem-solving skills, and applying key programming concepts. This is an introductory level course. No prerequisites are required. (Typically offered: Irregular)

CATE 4803. Problems in Career & Technical Education. 3 Hours.

Problems and issues relating to instruction in career and technical education. You must have approval by the instructor of this course to enroll. (Typically offered: Fall, Spring and Summer)

CATE 5003. Introduction to Professionalism. 3 Hours.

This course examines the principles and concepts of professionalism in the teaching profession, with an emphasis on developing professional concepts in the profession. Added emphasis is on career and technical education organizations. Prerequisite: Admission to the CATE teacher education program. (Typically offered: Fall)

CATE 5013. Teaching Strategies. 3 Hours.

This course is designed to offer a variety of ideas and experiences concerning methods of teaching, planning and presenting instruction. (Typically offered: Fall)

CATE 5016. Cohort Teaching Internship. 6 Hours.

A minimum of 12 weeks will be spent in an off-campus school, at which time the intern will have an opportunity under supervision to observe, to teach, and to participate in other activities involving the school and the community. Prerequisite: Admission to the College of Education and Health Professions Teacher Education and CATE Master's program. (Typically offered: Spring)

CATE 5023. Classroom Management. 3 Hours.

(Formerly CATE 4023.) Theory and techniques in classroom management, including professional ethics and school policies related to students, faculty and programs. Graduate degree credit will not be given for both CATE 4023 and CATE 5023. Prerequisite: CATE 3103. (Typically offered: Fall)

CATE 5033. Assessment/Program Evaluation. 3 Hours.

An introduction to constructing, evaluating, and interpreting tests; descriptive and inferential statistics; state competency testing; and guidelines for state program evaluations. Prerequisite: Graduate standing. (Typically offered: Fall)

CATE 5073. Introduction to Teaching Programming in the Secondary Schools. 3 Hours.

(Formerly CATE 4073.) This course provides an introduction to the foundations of teaching methods for computer programming in the secondary schools. Methods of computer programming instruction will include teaching strategies in coding, developing computational thinking, problem-solving skills, and applying key programming concepts. This is an introductory level course. No prerequisites are required. Graduate degree credit will not be given for both CATE 4073 and CATE 5073. (Typically offered: Irregular)

CATE 5443. Teaching Career Development in Public Schools. 3 Hours.

This course provides a study of curricula, methods, and techniques involved in teaching career development as related to the 16 occupational clusters. Successful completion of this course is required for licensed teachers to earn their 418 Career Development endorsement. Corequisite: Lab component. (Typically offered: Summer)

CATE 5453. Methods of Teaching Middle School Career Development. 3 Hours.

Provides a survey of types and sources of occupational information and methods of providing occupational-oriented experiences. Designed for teachers and future teachers of career orientation and is 1 of 2 required courses for vocational career orientation. (Typically offered: Summer)

CATE 5463. Applications in Career Orientation. 3 Hours.

Student is introduced to various teaching methods and techniques of managing hands-on activities in career orientation class setting. (Typically offered: Summer)

CATE 5503. Trends and Issues in Technology Education. 3 Hours.

A comprehensive technology education methods course pertaining to the teaching of standards-based curriculum materials. (Typically offered: Fall, Spring and Summer)

CATE 5543. Technology for Teaching and Learning. 3 Hours.

A study of computer technology as it relates to teacher education. This course concentrates on knowledge and performance and includes hands-on technology activities that can be incorporated in an educational setting. Students interact with the instructor and other students via BlackBoard and engage in weekly discussions and acquire hands-on computer technology experience. (Typically offered: Fall and Summer)

CATE 5573. Instructional Materials. 3 Hours.

A comprehensive course designed to give students the opportunity to understand, prepare, and test materials leading toward excellence in instruction. The focus of this course is the design and development of instructional media and materials utilizing different multimedia and software for use in educational programs. This includes the development of computer based, general instructional materials. (Typically offered: Fall and Summer)

CATE 5803. Teaching Apparel Production to Secondary Students. 3 Hours.

This course prepares students to teach apparel production concepts to students in secondary school settings. Topics to be covered include clothing selection, textiles, clothing care and laundry, clothing construction, and careers and technology. Problem- and project-based learning will provide the foundation for content delivery in this course. The focus on this course is on preparing preservice teachers in secondary schools to teach apparel production utilizing a variety of teaching methods. (Typically offered: Spring)

Cell and Molecular Biology (CEMB) Courses

CEMB 590V. Special Topics in Cell and Molecular Biology. 1-6 Hour.

Consideration of new areas in Cell and Molecular Biology not yet treated adequately in textbooks or in other courses. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CEMB 5911. Seminar in Cell and Molecular Biology. 1 Hour.

Discussion of current topics in Cell and Molecular Biology. All graduate students in the Cell and Molecular Biology degree program must enroll every fall and spring semester in this course or an approved alternate seminar course. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

This course is cross-listed with BIOL 5001.

CEMB 600V. Master's Thesis. 1-6 Hour.

Master's thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CEMB 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Chemical Engineering (CHEG) Courses

CHEG 2113. Introduction to Chemical Engineering I. 3 Hours.

Introduction to the field of chemical engineering. Industries, careers, and the curriculum are discussed. Basic chemical engineering terms, concepts, and calculations are presented. Mass balance calculations are performed and the application of computers to chemical engineering problems is introduced. Pre- or Corequisite: CHEM 1123 or CHEM 1223. (Typically offered: Fall and Spring)

CHEG 2133. Fluid Mechanics. 3 Hours.

Analysis and design of fluids handling equipment and systems. Application of the principles of fluid statics, fluid dynamics, compressible flow, etc. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2614 or INEG 2103). (Typically offered: Fall, Spring and Summer)

CHEG 2133H. Honors Fluid Mechanics. 3 Hours.

Analysis and design of fluids handling equipment and systems. Application of the principles of fluid statics, fluid dynamics, compressible flow, etc. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2614 or INEG 2103). (Typically offered: Fall, Spring and Summer)

This course is equivalent to CHEG 2133.

CHEG 2313. Thermodynamics of Single-Component Systems. 3 Hours.

A detailed study of the thermodynamic "state principles," energy and entropy balances, and their application to the solution of problems involving single-component physical systems and processes. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2614 or INEG 2103). (Typically offered: Fall, Spring and Summer)

CHEG 2313H. Honors Thermodynamics of Single-Component Systems. 3 Hours.

A detailed study of the thermodynamic "state principles," energy and entropy balances, and their application to the solution of problems involving single-component physical systems and processes. Pre- or Corequisite: MATH 2574 or MATH 2574C and (CHEG 2113 or BENG 2632 or BMEG 2614 or INEG 2103). (Typically offered: Fall, Spring and Summer)

This course is equivalent to CHEG 2313.

CHEG 3144. Heat and Mass Transfer. 4 Hours.

Applications of the principles of conduction, convection and radiation to the analysis and design of chemical processing heat transfer equipment and systems. Fundamentals of chemical diffusional and convection processes. Corequisite: Drill component. Pre- or Corequisite: CHEG 3323. Prerequisite: CHEG 2133 and MATH 2584. (Typically offered: Fall and Spring)

CHEG 3144H. Honors Heat and Mass Transfer. 4 Hours.

Applications of the principles of conduction, convection and radiation to the analysis and design of chemical processing heat transfer equipment and systems. Fundamentals of chemical diffusional and convection processes. Corequisite: Drill component. Pre- or Corequisite: CHEG 3323. Prerequisite: CHEG 2133 and MATH 2584. (Typically offered: Fall and Spring)

This course is equivalent to CHEG 3144.

CHEG 3233L. Chemical Engineering Laboratory I. 3 Hours.

Experimental measurements of various physical properties and comparison with published values and theoretical predictions. Experimental investigation of fluid flow and thermodynamics. Interpretation of results using graphical, numerical and statistical tools, and presentation of results in written technical reports and oral briefings. Identification and quantification of sources of experimental error. Identification of relevant experimental parameters to achieve an objective. Pre- or Corequisite: CHEG 3144. Corequisite: Drill component. Prerequisite: CHEG 2133 and CHEG 2313. (Typically offered: Fall and Spring)

CHEG 3253. Chemical Engineering Computer Methods. 3 Hours.

Application of computer methods to chemical engineering problems including a review of structured programming principles. Corequisite: Drill component. Pre- or Corequisite: CHEG 3144 and CHEG 3323. Prerequisite: MATH 2584. (Typically offered: Fall and Spring)

CHEG 3323. Thermodynamics of Multi-Component Systems. 3 Hours.

The use of the state principle and energy and entropy balance developed in CHEG 2313 is extended to allow processes. Physical and chemical equilibrium processes are considered in detail. Prerequisite: CHEG 2313 and MATH 2574. (Typically offered: Fall and Spring)

CHEG 3323H. Honors Thermodynamics of Multi-Component Systems. 3 Hours.

The use of the state principle and energy and entropy balance developed in CHEG 2313 is extended to allow processes. Physical and chemical equilibrium processes are considered in detail. Prerequisite: CHEG 2313 and MATH 2574. (Typically offered: Fall and Spring)

This course is equivalent to CHEG 3323.

CHEG 3333. Chemical Engineering Reactor Design. 3 Hours.

Principles of kinetics of homogeneous and heterogeneous reactions, catalysis, and reactor design with applications, drawn from industrial processes. Pre- or Corequisite: CHEG 3253. Prerequisite: CHEG 3323. (Typically offered: Fall and Spring)

CHEG 3333H. Honors Chemical Engineering Reactor Design. 3 Hours.

Principles of kinetics of homogeneous and heterogeneous reactions, catalysis, and design with applications, drawn from industrial processes. Pre- or Corequisite: CHEG 3253. Prerequisite: CHEG 3323. (Typically offered: Fall and Spring)

This course is equivalent to CHEG 3333.

CHEG 3713. Chemical Engineering Materials Technology. 3 Hours.

Selection of metals, polymers and ceramics for service in process conditions (including corrosion). In addition to static strains on materials, specialized materials such as semiconductors, composites, and nano-materials are studied. The relationship between molecular structure and macroscopic properties is emphasized including processing and manufacture. Prerequisite: CHEM 3603 and PHYS 2054 and CHEG 3323. (Typically offered: Spring)

CHEG 4163. Separation Processes. 3 Hours.

Applications of chemical engineering design to stagewise and continuous separations in systems approaching equilibrium. Prerequisite: CHEG 3144. (Typically offered: Fall and Spring)

CHEG 4163H. Honors Separation Processes. 3 Hours.

Applications of chemical engineering design to stagewise and continuous separations in systems approaching equilibrium. Prerequisite: CHEG 3144. (Typically offered: Fall and Spring)

This course is equivalent to CHEG 4163.

CHEG 4273. Corrosion Control. 3 Hours.

Qualitative and quantitative introduction to corrosion and its control. Application of the fundamentals of corrosion control in the process industries is emphasized. Prerequisite: CHEG 2313. (Typically offered: Spring)

CHEG 4332L. Chemical Engineering Laboratory II. 2 Hours.

Experimental investigations of mass transfer and kinetics/reactor design. Special attention to attaining a high order of accuracy and to presenting results in complete written reports, with emphasis on quality rather than quantity work performed. Pre- or Corequisite: CHEG 3333 and CHEG 4163. Corequisite: Drill component. Prerequisite: CHEG 3233L. (Typically offered: Fall and Spring)

CHEG 4413. Chemical Engineering Design I. 3 Hours.

Principles of cost estimation, profitability, economic analysis, and economic balances as practiced in the chemical process industries. Special emphasis on the solution of problems involving the combination of engineering principles and economics. Corequisite: Drill component. Pre- or Corequisite: CHEG 4163. Prerequisite: ECON 2013 (or ECON 2143) and CHEG 3144 and CHEG 3333. (Typically offered: Fall and Spring)

CHEG 4413H. Honors Chemical Engineering Design I. 3 Hours.

Principles of cost estimation, profitability, economic analysis, and economic balances as practiced in the chemical process industries. Special emphasis on the solution of problems involving the combination of engineering principles and economics. Corequisite: Drill component. Pre- or Corequisite: CHEG 4163. Prerequisite: ECON 2013 (or ECON 2143) and CHEG 3144 and CHEG 3333. (Typically offered: Fall and Spring)

This course is equivalent to CHEG 4413.

CHEG 4423. Automatic Process Control. 3 Hours.

Application of mathematical modeling methods to the description of transient phenomena of interest to process engineers. Modes of control and principles of feedback control are introduced with applications to process engineering problems. Pre- or Corequisite: CHEG 4163. Prerequisite: CHEG 3253. (Typically offered: Spring)

CHEG 4423H. Honors Automatic Process Control. 3 Hours.

Application of mathematical modeling methods to the description of transient phenomena of interest to process engineers. Modes of control and principles of feedback control are introduced with applications to process engineering problems. Pre- or Corequisite: CHEG 4163. Prerequisite: CHEG 3253. (Typically offered: Spring)

This course is equivalent to CHEG 4423.

CHEG 4443. Chemical Engineering Design II. 3 Hours.

Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Corequisite: Drill component. Prerequisite: CHEG 4413. (Typically offered: Fall and Spring)

CHEG 4443H. Honors Chemical Engineering Design II. 3 Hours.

Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Corequisite: Drill component. Prerequisite: CHEG 4413. (Typically offered: Fall and Spring)

This course is equivalent to CHEG 4443.

CHEG 4813. Chemical Process Safety. 3 Hours.

Application of chemical engineering principles to the study of safety, health, and loss prevention. Fires and explosions, hygiene, toxicology, hazard identification, and risk assessment in the chemical process industries. Corequisite: Drill component. Prerequisite: CHEG 3144 and CHEG 3323. (Typically offered: Fall)

CHEG 4813H. Honors Chemical Process Safety. 3 Hours.

Application of chemical engineering principles to the study of safety, health, and loss prevention. Fires and explosions, hygiene, toxicology, hazard identification, and risk assessment in the chemical process industries. Corequisite: Drill component. Prerequisite: CHEG 3323 and CHEG 3144. (Typically offered: Fall)

This course is equivalent to CHEG 4813.

CHEG 488V. Special Problems. 1-6 Hour.

Special problems. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CHEG 5013. Membrane Separation and System Design. 3 Hours.

Theory and system design of cross flow membrane process--reverse osmosis, nanofiltration, ultrafiltration, and microfiltration--and applications for pollution control, water treatment, food and pharmaceutical processing. (Typically offered: Irregular)

CHEG 5033. Technical Administration. 3 Hours.

Contemporary issues affecting the domestic and global Chemical Process Industries (CPI). Emphasis is on process economics, market and corporate strategy as well as advances in technology to improve corporate earnings while addressing the threats and opportunities in the CPI. Prerequisite: Senior or graduate standing. (Typically offered: Irregular)

CHEG 5043. Colloid and Interface Science. 3 Hours.

This course aims to provide essential knowledge about surface, interface, and molecular self-organization. At the end of this course students should understand (i) basic concepts to describe phenomena at surfaces, (ii) molecular self-organization, and (iii) basic techniques for characterization of surfaces and interfaces. (Typically offered: Spring Odd Years)

CHEG 5113. Transport Processes I. 3 Hours.

Fundamental concepts and laws governing the transfer of momentum, mass, and heat. (Typically offered: Fall)

CHEG 5133. Advanced Reactor Design. 3 Hours.

Applied reaction kinetics with emphasis on the design of heterogeneous reacting systems including solid surface catalysis, enzyme catalysis, and transport phenomena effects. Various types of industrial reactors, such as packed bed, fluidized beds, and other non-ideal flow systems are considered. (Typically offered: Spring)

CHEG 5213. Advanced Chemical Engineering Calculations. 3 Hours.

Developments of and solutions of equations and mathematical models of chemical processes and mechanisms. (Typically offered: Irregular)

CHEG 5273. Corrosion Control. 3 Hours.

Qualitative and quantitative introduction to corrosion and its control. Application of the fundamentals of corrosion control in the process industries is emphasized. (Typically offered: Spring)

CHEG 5333. Advanced Thermodynamics. 3 Hours.

Methods of statistical thermodynamics, the correlation of classical and statistical thermodynamics, and the theory of thermodynamics of continuous systems (non-equilibrium thermodynamics). (Typically offered: Fall)

CHEG 5353. Advanced Separations. 3 Hours.

Phase equilibrium in non-ideal and multicomponent systems, digital and other methods of computation are included to cover the fundamentals of distillation, absorption, and extraction. (Typically offered: Irregular)

CHEG 5443. Chemical Engineering Design II. 3 Hours.

A capstone design class designed for graduate students who do not have an engineering degree. Responsibility for decision making is placed on the students in the solution of a comprehensive, open ended problem based on an industrial process. Both formal oral and formal written presentation of results are required. Students may not receive credit for both CHEG 4443 and CHEG 5443. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CHEG 5513. Biochemical Engineering Fundamentals. 3 Hours.

An introduction to bioprocessing with an emphasis on modern biochemical engineering techniques and biotechnology. Topics include: basic metabolism (prokaryote and eukaryote), biochemical pathways, enzyme kinetics (including immobilized processes), separation processes (e.g. chromatography) and recombinant DNA methods. Material is covered within the context of mathematical descriptions (calculus, linear algebra) of biochemical phenomenon. (Typically offered: Spring Even Years)

CHEG 5733. Polymer Theory and Practice. 3 Hours.

Theories and methods for converting monomers into polymers are presented. Topics include principles of polymer science, commercial processes, rheology, and fabrication. (Typically offered: Fall Odd Years)

CHEG 5801. Graduate Seminar. 1 Hour.

Oral presentations are given by master's candidates on a variety of chemical engineering subjects with special emphasis on new developments. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CHEG 588V. Special Problems. 1-6 Hour.

Opportunity for individual study of an advanced chemical engineering problem not sufficiently comprehensive to be a thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CHEG 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CHEG 6123. Transport Processes II. 3 Hours.

Continuation of CHEG 5113. Prerequisite: CHEG 5113. (Typically offered: Spring)

CHEG 6203. Preparation of Research Proposals. 3 Hours.

This course will cover technical communication in both written and oral presentation. Prerequisite: Instructor consent. (Typically offered: Irregular)

CHEG 6801. Graduate Seminar. 1 Hour.

Oral presentations are given by doctoral students on a variety of chemical engineering subjects with special emphasis on new developments. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CHEG 688V. Special Topics in Chemical Engineering. 1-3 Hour.

Advanced study of current Chemical Engineering topics not covered in other courses. Prerequisite: Doctoral students only. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CHEG 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Chemistry and Biochemistry (CHEM) Courses

CHEM 1051L. Chemistry in the Modern World Laboratory (ACTS Equivalency = CHEM 1004 Lab). 1 Hour.

Basic laboratory exercises involving measurements of mass and volume, acids and bases, hardness of water, energy content in fuel, sugar content in drinks, and radioactivity. Meets 2 hours per week. Corequisite: CHEM 1053. (Typically offered: Fall and Spring)

CHEM 1053. Chemistry in the Modern World (ACTS Equivalency = CHEM 1004 Lecture). 3 Hours.

The impact of chemical developments upon contemporary society. Chemical problems of ecological, environmental, nutritional, economic, and sociological concern. Designed for non-science majors. Lecture 3 hours per week. Corequisite: CHEM 1051L. (Typically offered: Fall and Spring)

CHEM 1071L. Fundamentals of Chemistry Laboratory (ACTS Equivalency = CHEM 1214 Lab). 1 Hour.

Laboratory exercises in principles and practices of Fundamental Chemistry. Corequisite: CHEM 1073. (Typically offered: Fall)

CHEM 1073. Fundamentals of Chemistry (ACTS Equivalency = CHEM 1214 Lecture). 3 Hours.

Fundamental principles of chemistry for students majoring in Home Economics or Nursing. Lecture 3 hours, recitation 1 hour per week. Corequisite: CHEM 1071L and related course component drill section for CHEM 1073. (Typically offered: Fall and Summer)

CHEM 1101L. University Chemistry I Laboratory (ACTS Equivalency = CHEM 1414 Lab). 1 Hour.

Laboratory exercises involving density, types of chemical reactions separations and chromatography, solubility, waters of hydration, freezing point depression, gas laws, and data interpretation. Meets 3 hours per week for 1 hour credit. (Typically offered: Fall, Spring and Summer)

CHEM 1103. University Chemistry I (ACTS Equivalency = CHEM 1414 Lecture). 3 Hours.

An introductory course for science, engineering or agriculture majors. Atomic structure, electron configurations and periodic properties, nomenclature and bonding in compounds, Lewis structure and resonance forms, molecular geometries and polarity, stoichiometry, solution chemistry and aqueous reactions, thermochemistry, gas laws and kinetic molecular theory. Corequisite: Drill component. Prerequisite: MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or College Algebra CLEP 54 or higher. (Typically offered: Fall, Spring and Summer)

CHEM 1121L. University Chemistry II Laboratory (ACTS Equivalency = CHEM 1424 Lab). 1 Hour.

Quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH, and descriptive inorganic chemistry. Laboratory 3 hours per week. Upon completion of CHEM 1121L on the UAF campus with a grade of "C" or better, credit for CHEM 1101L can be requested. Corequisite: CHEM 1123 and related course component drill section for CHEM 1123. (Typically offered: Fall, Spring and Summer)

CHEM 1121M. Honors University Chemistry II Laboratory. 1 Hour.

Qualitative and quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH, and descriptive inorganic chemistry. Laboratory notebooks are required as part of every experiment. Designed for students in the honors programs. Laboratory 3 hours per week. Corequisite: CHEM 1123H and related course component drill for CHEM 1123H. (Typically offered: Fall and Spring)

This course is equivalent to CHEM 1121L.

CHEM 1123. University Chemistry II (ACTS Equivalency = CHEM 1424 Lecture). 3 Hours.

Introductory course for science, engineering or agriculture majors. Liquids, solids, intermolecular forces, phase diagrams, solution chemistry, solubility, colligative properties, chemical kinetics, chemical equilibria, acid-base equilibria, aqueous ionic equilibria, titrations, buffers, solubility equilibria, thermodynamics, electrochemistry, and nuclear chemistry. Lecture 3 hours per week. Corequisite: CHEM 1121L and related course component drill section for CHEM 1123. Prerequisite: CHEM 1103 (or CHEM 1203, or satisfactory performance on the chemistry proficiency exam) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or College Algebra CLEP 54 or higher. (Typically offered: Fall, Spring and Summer)

CHEM 1123H. Honors University Chemistry II. 3 Hours.

Presents the topics of periodicity, bonding, stoichiometry, thermodynamics, kinetics, and chemical equilibrium in detail. Lecture 3 hours per week. Students with satisfactory performance on the proficiency exam and who complete CHEM 1123H on the UAF campus with a grade of "C" or better can request credit for CHEM 1103. Pre- or Corequisite: MATH 1284C or higher. Corequisite: CHEM 1121M and related course component drill section for CHEM 1123H. Prerequisite: Honors candidacy and CHEM 1103 (or CHEM 1203, or satisfactory performance on the chemistry proficiency exam). (Typically offered: Fall, Spring and Summer)

This course is equivalent to CHEM 1123.

CHEM 1201L. Chemistry for Majors I Laboratory. 1 Hour.

Laboratory exercises involving density, types of chemical reactions separations and chromatography, solubility, waters of hydration, freezing point depression, gas laws, and data interpretation. Laboratory notebooks are required as part of every experiment. Laboratory 3 hours per week. Students may not receive credit for both CHEM 1201L and CHEM 1101L. Corequisite: CHEM 1203 and related course component drill for CHEM 1203. (Typically offered: Fall)

CHEM 1203. Chemistry for Majors I. 3 Hours.

The first half of a two-semester course designed especially for students planning to major in chemistry or biochemistry. Students may not receive credit for both CHEM 1203 and CHEM 1103. Corequisite: CHEM 1201L and related course component drill section for CHEM 1203. Prerequisite: MATH 1203 or higher, or AP Calculus AB 3C or higher, AP Calculus BC 4C or higher, or College Algebra CLEP 54 or higher. (Typically offered: Fall)

CHEM 1221L. Chemistry for Majors II Laboratory. 1 Hour.

Qualitative and quantitative laboratory with data interpretation and exercises covering the topics of stoichiometry, thermodynamics, kinetics, chemical equilibrium, pH, and descriptive inorganic chemistry. Laboratory notebooks are required as part of every experiment. Laboratory 3 hours per week. Students may not receive credit for both CHEM 1221L and CHEM 1121L. Corequisite: CHEM 1223 and related course component drill for CHEM 1223. (Typically offered: Spring)

This course is equivalent to CHEM 1121L.

CHEM 1223. Chemistry for Majors II. 3 Hours.

The second half of a two-semester course designed specifically for students planning to major in chemistry or biochemistry. Students may not receive credit for both CHEM 1223 and CHEM 1123. Pre- or Corequisite: MATH 1284C or higher. Corequisite: CHEM 1221L and related course component drill section for CHEM 1223. Prerequisite: CHEM 1203 and CHEM 1201L (or CHEM 1103 and CHEM 1101L). (Typically offered: Spring)

This course is equivalent to CHEM 1123.

CHEM 2261L. Analytical Chemistry Laboratory. 1 Hour.

Covers techniques of classical and instrumental methods of chemical separation and analysis. Laboratory 4 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Pre- or Corequisite: CHEM 2263. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or CLEP College Algebra 54 or higher. (Typically offered: Fall and Spring)

CHEM 2263. Analytical Chemistry Lecture. 3 Hours.

Principles of chemical separations, analysis by classical and instrumental methods, and chemical equilibrium in physical and biological systems. Lecture 3 hours per week. Chemistry Majors/Minors must take analytical lecture and lab prior to any physical chemistry course. Chemistry Majors/Minors should take analytical lecture and lab together. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L) or (CHEM 1073 and CHEM 1071L) and MATH 1203 or higher, or AP Calculus AB 3C or higher, or AP Calculus BC 4C or higher, or CLEP College Algebra 54 or higher. (Typically offered: Fall and Spring)

CHEM 2611L. Organic Physiological Chemistry Laboratory (ACTS Equivalency = CHEM 1224 Lab). 1 Hour.

A focus on properties of organic compounds as well as reactions of organic compounds with an emphasis on functional groups along with some classifications of certain types of compounds. Laboratory 3 hours per week. Corequisite: CHEM 2613 and related course component drill for CHEM 2613. (Typically offered: Fall, Spring and Summer)

CHEM 2613. Organic Physiological Chemistry (ACTS Equivalency = CHEM 1224 Lecture). 3 Hours.

One semester survey of organic chemistry necessary for understanding of biological systems, with some related physiological chemistry. Lecture 3 hours per week. Corequisite: CHEM 2611L and related course component drill section for CHEM 2613. Prerequisite: (CHEM 1073 and CHEM 1071L) or (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically offered: Fall, Spring and Summer)

CHEM 3203. Forensic Chemistry. 3 Hours.

Survey of chemistry used in criminal investigations. Topics may include detection and identification of drugs, alcohol, toxins, explosives and gun powder residue. Chemical analysis of paint, ink, paper, soil, glass and fibers. Chemical detection of blood and fingerprints. Extraction of DNA from evidence, DNA fingerprinting. Prerequisite: CHEM 2613, or CHEM 3613 (recommended), or CHEM 3613H, or CHEM 3713. (Typically offered: Irregular)

CHEM 3203H. Honors Forensic Chemistry. 3 Hours.

Survey of chemistry used in criminal investigations. Topics may include detection and identification of drugs, alcohol, toxins, explosives and gun powder residue. Chemical analysis of paint, ink, paper, soil, glass and fibers. Chemical detection of blood and fingerprints. Extraction of DNA from evidence, DNA fingerprinting. As a requirement of honors designation additional honors-level work is required of students enrolled in this section. Prerequisite: CHEM 2613, or CHEM 3613 (recommended), or CHEM 3613H, or CHEM 3713. (Typically offered: Irregular) This course is equivalent to CHEM 3203.

CHEM 3273. UAtach Research Methods. 3 Hours.

A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Corequisite: Drill component. Prerequisite: ARSC 1201 and ARSC 1221. (Typically offered: Spring) This course is cross-listed with PHYS 3273, BIOL 3273.

CHEM 3273H. Honors UAtach Research Methods. 3 Hours.

A project-based course for prospective science and mathematics teachers utilizing scientific research methods and inquiry to solve research problems. Prerequisite: ARSC 1201 and ARSC 1221 and junior standing. (Typically offered: Spring) This course is cross-listed with PHYS 3273, CHEM 3273, BIOL 3273.

CHEM 3451L. Elements of Physical Chemistry Laboratory. 1 Hour.

Experimental measurements of the physical properties, chemical systems, error analysis and report writing. Experiments cover topics in thermochemistry, heat capacity, chemical kinetics, spectroscopy, and phase/chemical equilibrium using a variety of physical chemistry techniques. Laboratory 4 hours per week. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3453 concurrently. Prerequisite: CHEM 2261L and PHYS 2031L (or PHYS 2074). (Typically offered: Fall)

CHEM 3453. Elements of Physical Chemistry. 3 Hours.

One semester accelerated course in physical chemistry primarily for students majoring/minoring in chemistry with biochemistry option, or pre-professional and agriculture students. Topics include thermodynamics, phase & chemical equilibrium, chemical kinetics, quantum chemistry and spectroscopy. Presented at the same level as the 2-semester course with some recourse to calculus, although covering fewer topics in quantum chemistry. Lecture 3 hours per week. Students cannot earn credit for both CHEM 3453 and CHEM 3514. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3451L concurrently. Prerequisite: CHEM 2263 and PHYS 2033 (or PHYS 2074), and MATH 2554 (or MATH 2043). (Typically offered: Fall)

CHEM 3504. Physical Chemistry I. 4 Hours.

First semester of a 2-semester course in physical chemistry designed for chemistry majors and chemistry minors with topics covering wave-particle duality, quantum chemistry, atomic and molecular structure, bonding, spectroscopy and elementary statistical mechanics. Lecture and recitation 4 hours per week. Pre- or Corequisite: MATH 2564. Prerequisite: CHEM 2263 and PHYS 2074. (Typically offered: Fall)

CHEM 3512L. Physical Chemistry Laboratory. 2 Hours.

Experimental studies of molecular structure, thermochemistry, and chemical kinetics, and the determination of other physicochemical properties of matter. Laboratory 8 hours per week. Students cannot earn credit for both CHEM 3451L and CHEM 3512L. Corequisite: Chemistry majors and chemistry minors must take CHEM 3514 concurrently. Prerequisite: CHEM 2261L and PHYS 2031L (or PHYS 2074). (Typically offered: Spring)

CHEM 3514. Physical Chemistry II. 4 Hours.

Second semester of a 2-semester course in physical chemistry aimed for B.S. chemistry majors/minors with topics covering the laws of thermodynamics, phase & chemical equilibria; structure and properties of solutions, chemical potential, and chemical kinetics. Lecture and recitation 4 hours per week. Students cannot earn credit for both CHEM 3453 and CHEM 3514. Corequisite: Chemistry majors and chemistry minors must enroll in CHEM 3512L concurrently. Prerequisite: CHEM 3504. (Typically offered: Spring)

CHEM 3601L. Organic Chemistry I Laboratory. 1 Hour.

Introduction to basic techniques for separation, purification, and identification of organic compounds. Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3603 and related course component drill for CHEM 3603. (Typically offered: Fall and Summer)

CHEM 3602M. Honors Organic Chemistry I Laboratory. 2 Hours.

Introduction to basic techniques for separation, purification, and identification of organic compounds. Drill lecture-discussion (1hr/wk) and laboratory (4hr/wk). Writing component. Required drill. Corequisite: CHEM 3603H and related course component drill sections for CHEM 3603H and CHEM 3602M. Prerequisite: Honors candidacy. (Typically offered: Fall and Summer) This course is equivalent to CHEM 3601L.

CHEM 3603. Organic Chemistry I. 3 Hours.

Introduction to organic compounds including alkanes, haloalkanes, alkenes and alkynes; properties including basic stereochemistry and reactions including nucleophilic substitution, elimination, and electrophilic addition reactions. Lecture 3 hours per week. Corequisite: CHEM 3601L and related course component drill section for CHEM 3603. Prerequisite: (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically offered: Fall and Summer)

CHEM 3603H. Honors Organic Chemistry I. 3 Hours.

In-depth introduction to organic compounds; properties and reactions. Including alkanes, haloalkanes, alkenes and alkynes; nucleophilic substitution, elimination, and electrophilic addition reactions. Lecture 3 hours per week. Corequisite: CHEM 3602M and related course component drill sections for CHEM 3603H and CHEM 3602M. Prerequisite: Honors candidacy and ((CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L)). (Typically offered: Fall and Summer) This course is equivalent to CHEM 3603.

CHEM 3611L. Organic Chemistry II Laboratory. 1 Hour.

Continuation of CHEM 3601L and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Laboratory exercises in organic chemistry. Meets 3 hours per week. Corequisite: CHEM 3613 and related course component drill for CHEM 3613. Prerequisite: CHEM 3601L. (Typically offered: Spring and Summer)

CHEM 3612M. Honors Organic Chemistry II Laboratory. 2 Hours.

Continuation of CHEM 3602M and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Drill lecture-discussion (1 hour/wk) and laboratory (4 hours/wk). Writing component. Drill required. Corequisite: CHEM 3613H and related course component drill sections for CHEM 3612M and CHEM 3613H. Prerequisite: Honors candidacy and CHEM 3602M. (Typically offered: Spring and Summer) This course is equivalent to CHEM 3611L.

CHEM 3613. Organic Chemistry II. 3 Hours.

Basic chemistry of aromatic and carbonyl compounds: properties and reactions. Lecture 3 hours per week. Corequisite: CHEM 3611L and related course component drill section for CHEM 3613. Prerequisite: (CHEM 3603 and CHEM 3601L) or (CHEM 3603H and CHEM 3602M) or (CHEM 3703 and CHEM 3702L). (Typically offered: Spring and Summer)

CHEM 3613H. Honors Organic Chemistry II. 3 Hours.

In-depth coverage of the basic chemistry of aromatic and carbonyl compounds; properties and reactions. Lecture 3 hours per week. Corequisite: CHEM 3612M and related course component drill sections for CHEM 3613H and CHEM 3612M. Prerequisite: Honors candidacy and CHEM 3603H and CHEM 3602M. (Typically offered: Spring and Summer)

This course is equivalent to CHEM 3613.

CHEM 3702L. Organic Chemistry I Lab for Chemistry Majors. 2 Hours.

Introduction to basic techniques for separation, purification, and identification of organic compounds. Drill lecture-discussion (1hr/wk) and laboratory (4hr/wk). Writing component. Required drill. Corequisite: CHEM 3703 and related course component drill sections for CHEM 3703 and CHEM 3702L. Prerequisite: Chemistry major or minor. (Typically offered: Fall)

CHEM 3703. Organic Chemistry I Lecture for Chemistry Majors. 3 Hours.

In-depth introduction to organic compounds including alkanes, haloalkanes, alkenes and alkynes; properties including basic stereochemistry and reactions including nucleophilic substitution, elimination, and electrophilic addition. Lecture 3 hours per week. Corequisite: CHEM 3702L and related course component drill sections for CHEM 3703 and CHEM 3702L. Prerequisite: Chemistry major or minor and (CHEM 1123 and CHEM 1121L) or (CHEM 1123H and CHEM 1121M) or (CHEM 1223 and CHEM 1221L). (Typically offered: Fall)

CHEM 3712L. Organic Chemistry II Lab for Chemistry Majors. 2 Hours.

Continuation of CHEM 3702L and introduction to basic techniques of synthesis, isolation, and determination of structure and reactivity of organic compounds. Drill lecture-discussion (1 hour/wk) and laboratory (4 hours/wk). Writing component. Drill required. Corequisite: CHEM 3713 and related course component drill sections for CHEM 3713 and CHEM 3712L. Prerequisite: Chemistry major or minor and CHEM 3702L. (Typically offered: Spring)

CHEM 3713. Organic Chemistry II Lecture for Chemistry Majors. 3 Hours.

Continuation of in-depth coverage of the basic chemistry of the compounds of carbon. Properties and reactions of aromatic and carbonyl functional groups. Lecture 3 hours per week. Corequisite: CHEM 3712L and related course component drill sections for CHEM 3713 and CHEM 3712L. Prerequisite: Chemistry major or minor and CHEM 3703 and CHEM 3702L. (Typically offered: Spring)

This course is equivalent to CHEM 3613.

CHEM 3813. Elements of Biochemistry. 3 Hours.

One semester survey course of the fundamentals of biochemistry. Structures, properties, and reactions of major classes of biomolecules. Basics of enzyme catalysis. Overview of metabolism. Credit for both CHEM 3813 and 4813H may not be counted toward a chemistry degree. Lecture 3 hours per week. Prerequisite: (CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L) or (CHEM 2613 and CHEM 2611L). (Typically offered: Fall, Spring and Summer)

CHEM 3923H. Honors Colloquium. 3 Hours.

Covers a special topic or issue. Offered as a part of the honors program. Prerequisite: Honors candidacy. (Typically offered: Fall, Spring and Summer)

CHEM 400V. Chemistry Research. 1-4 Hour.

Research problems. Students need to enroll in their supervising faculty mentor's section. CHBC students conducting research under a faculty mentor outside of CHBC must enroll in the CHBC chair's section. Additionally, honors students need the approval of the CHBC department honors advisor. Honors students must complete thesis in senior year. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CHEM 400VH. Honors Chemistry Research. 1-4 Hour.

Research problems. Students need to enroll in their supervising faculty mentor's section. CHBC students conducting research under a faculty mentor outside of CHBC must enroll in the CHBC chair's section. Additionally, honors students need the approval of the CHBC department honors advisor. Honors students must complete thesis in senior year. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

This course is equivalent to CHEM 400V.

CHEM 4011H. Honors Seminar. 1 Hour.

Research seminar for chemistry majors enrolled in the honors program. Enrollment is required the spring semester of the junior and senior years for honors students. Senior honors students must make one research presentation to graduate with honors. Prerequisite: Honors candidacy, chemistry major and junior or senior standing. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

CHEM 405V. Special Topics in Chemistry. 1-4 Hour.

Potential topics include: advanced spectroscopic methods, bioanalytical chemistry, bioinorganic chemistry, bioorganic chemistry, biophysical chemistry, chemical sensors, drug discovery and design, nanomaterials, pharmaceutical chemistry, process analytical chemistry, and protein folding and design. (Typically offered: Irregular)

CHEM 4123. Advanced Inorganic Chemistry I. 3 Hours.

Reactions and properties of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Prerequisite: CHEM 3453. (Typically offered: Fall)

CHEM 4153L. Nanotechnology Laboratory. 3 Hours.

Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, and CHEM 1123. (Typically offered: Fall)

This course is cross-listed with MEEG 4323L, PHYS 4793L.

CHEM 4153M. Honors Nanotechnology Laboratory. 3 Hours.

Provides students with hands-on experience in several major areas of nanotechnology, including nanoscale imaging, synthesis of nanomaterials, nanostructure assembly and manipulation, device and system integration, and performance evaluation. Students can earn credit for only one of the following courses: MEEG 4323L, BENG 4753L, BMEG 4103L, CHEM 4153L, PHYS 4793L. Corequisite: Drill component, junior standing and instructor consent. Prerequisite: MATH 2564, PHYS 2074, and CHEM 1123. (Typically offered: Fall)

This course is cross-listed with MEEG 4323L, CHEM 4153L, PHYS 4793L.

CHEM 4211L. Instrumental Analysis Laboratory. 1 Hour.

Provides laboratory experience in parallel with the lecture material in CHEM 4213. Laboratory 3 hours per week. Corequisite: CHEM 4213. (Typically offered: Spring)

CHEM 4213. Instrumental Analysis. 3 Hours.

Provides students, especially those in the agricultural, biological, and physical sciences, with an understanding of modern instrumental techniques of analysis. Lecture 3 hours per week. Corequisite: CHEM 4211L. Prerequisite: (CHEM 2263 and CHEM 2261L) and ((CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L)). (Typically offered: Spring)

CHEM 4283. Energy Conversion and Storage. 3 Hours.

Fundamental and applied concepts of energy storage and conversion, with sustainability implications. Chemical reactions (kinetics, thermodynamics, mass transfer), emphasizing oxidation-reduction, electrochemical, and interfacial processes, and impact on performance of fuel and biofuel cells, batteries, supercapacitors, and photochemical conversion. Prerequisite: CHEM 1123 and PHYS 2074. (Typically offered: Fall Even Years)

CHEM 4443. Physical Chemistry of Materials. 3 Hours.

Physical and chemical characteristics of materials and discussion of the science behind materials engineering and performance. Topics include theory, principles of characterization methods, modeling, and applications in the context of materials. Pre- or Corequisite: CHEM 3514. Prerequisite: CHEM 3453 or CHEM 3713 or MEEG 2403. (Typically offered: Spring Odd Years)

CHEM 4723. Experimental Methods in Organic Chemistry. 3 Hours.

Introduction to the application of synthetic and spectroscopic methods in organic chemistry, including mass spectrometry, infrared spectroscopy, and nuclear magnetic resonance spectrometry. Other laboratory techniques applicable to chemical research will be included. Lecture 3 hours and laboratory 3 hours per week. Lecture only meets the first half of the term. Laboratory meets the entire term. Corequisite: Lab component. Prerequisite: CHEM 3613 and CHEM 3611L, (or CHEM 3613H or CHEM 3612M), (or CHEM 3713 and CHEM 3712L). (Typically offered: Fall)

CHEM 4813H. Honors Biochemistry I. 3 Hours.

The first of a two-course series covering biochemistry for undergraduate students in biology, agriculture, and chemistry. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and nucleic acid and carbohydrate structures. Credit cannot be earned in both CHEM 3813 and CHEM 4813H. Additional honors-level work required in this section. Prerequisite: Honors candidacy and (CHEM 3613 and CHEM 3611L) or (CHEM 3613H and CHEM 3612M) or (CHEM 3713 and CHEM 3712L). (Typically offered: Fall)

CHEM 4843H. Honors Biochemistry II. 3 Hours.

A continuation of CHEM 4813H covering topics including biological membranes and bioenergetics, photosynthesis, lipids and lipid metabolism, nucleic acid structure, structure and synthesis, and molecular biology. Credit cannot be earned in both CHEM 3813 and CHEM 4843H. Additional honors-level work required in this section. Prerequisite: Honors candidacy and CHEM 4813H. (Typically offered: Spring)

CHEM 4853. Biochemical Techniques. 3 Hours.

Techniques for handling, purifying and analyzing enzymes, structural proteins, and nucleic acids. Lecture 1 hour, laboratory 6 hours per week. Corequisite: Lab component. Pre or Corequisite: CHEM 3813 or CHEM 4843H. (Typically offered: Spring)

CHEM 505V. Special Topics in Chemistry. 1-4 Hour.

(Formerly CHEM 405V.) Potential topics include: advanced spectroscopic methods, bioanalytical chemistry, bioinorganic chemistry, bioorganic chemistry, biophysical chemistry, chemical sensors, drug discovery and design, nanomaterials, pharmaceutical chemistry, process analytical chemistry, and protein folding and design. Graduate degree credit will not be given for both CHEM 405V and CHEM 505V. Prerequisite: Instructor consent. (Typically offered: Irregular)

CHEM 5101. Introduction to Research. 1 Hour.

This eight week course introduces new graduate students to research opportunities and skills in chemistry and biochemistry. Meets 2 hours per week in the first half of the semester. Safety and ethics in research and scholarship are discussed. Students learn about research programs in the department to aid in choosing an advisor. (Typically offered: Fall)

CHEM 5123. Advanced Inorganic Chemistry. 3 Hours.

Reactions and properties of inorganic compounds from the standpoint of electronic structure and the periodic table. Emphasis on recent developments. Knowledge comparable to material in CHEM 3453 is recommended. (Typically offered: Fall)

CHEM 5143. Advanced Inorganic Chemistry II. 3 Hours.

Chemistry of metallic and non-metallic elements emphasizing molecular structure, bonding and the classification of reactions. Knowledge of inorganic chemistry comparable to material in CHEM 4123 and CHEM 5123 is recommended. (Typically offered: Irregular)

CHEM 5153. Structural Chemistry. 3 Hours.

Determination of molecular structure by diffraction, spectroscopic, and other techniques. Illustrative examples will be chosen from inorganic chemistry and biochemistry. (Typically offered: Irregular)

CHEM 5213. Instrumental Analysis. 3 Hours.

Provides students, especially those in the physical, agricultural, and biological sciences, with an understanding of the theory and practice of modern instrumental techniques of analysis. Lecture 3 hours per week. Knowledge comparable to material in CHEM 2263 and CHEM 3603 is recommended. (Typically offered: Spring)

CHEM 5223. Chemical Instrumentation. 3 Hours.

Use and application of operational amplifiers to chemical instrumentation; digital electronic microprocessor interfacing; software development and real-time data acquisition. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Spring Odd Years)

CHEM 5233. Chemical Separations. 3 Hours.

Modern separation methods including liquid chromatography (adsorption, liquid-liquid partition, ion exchange, exclusion) and gas chromatography. Theory and instrumentation is discussed with emphasis on practical aspects of separation science. Prerequisite: CHEM 4213. (Typically offered: Fall Even Years)

CHEM 5243. Electrochemical Methods of Analysis. 3 Hours.

Topics will include diffusion, electron transfer kinetics, and reversible and irreversible electrode processes followed by a discussion of chronoamperometry, chronocoulometry, polarography, voltammetry, and chronopotentiometry. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Spring Even Years)

CHEM 5253. Spectrochemical Methods of Analysis. 3 Hours.

Principles and methods of modern spectroscopic analysis. Optics and instrumentation necessary for spectroscopy is also discussed. Topics include atomic and molecular absorption and emission techniques in the ultraviolet, visible, and infrared spectral regions. Knowledge of analytical chemistry comparable to material in CHEM 4213 is recommended. (Typically offered: Fall Odd Years)

CHEM 5263. Nuclear Chemistry. 3 Hours.

Nuclear structure and properties, natural and artificial radioactivity, radioactive decay processes, nuclear reaction and interactions of radiation with matter. Prerequisite: CHEM 3514. (Typically offered: Fall Odd Years)

CHEM 5273. Cosmochemistry. 3 Hours.

Laws of distribution of the chemical elements in nature, cosmic and terrestrial abundance of elements; origin and age of the earth, solar system, and the universe. Prerequisite: CHEM 3514. (Typically offered: Spring Odd Years)

CHEM 5283. Energy Conversion and Storage. 3 Hours.

Fundamental and applied concepts of energy storage and conversion with sustainability implications. Chemical reactions (kinetics, thermodynamics, mass transfer), emphasizing oxidation-reduction, electrochemical, and interfacial processes, and impact on performance of fuel and biofuel cells, batteries, supercapacitors, and photochemical conversion. (Typically offered: Fall Even Years)

CHEM 5383. Chemometrics. 3 Hours.

Chemometrics is the process of extracting relevant information from chemical data by mathematical and statistical tools. These tools allow for designing optimal experimental procedures, extracting important information from complex chemical systems, and better understanding of complex chemical systems. (Typically offered: Spring Even Years)

CHEM 5443. Physical Chemistry of Materials. 3 Hours.

Physical and chemical characteristics of materials and discussion of the science behind materials engineering and performance. Topics include theory, principles of characterization methods, modeling, and applications in the context of materials. Knowledge comparable to material in CHEM 3514 and CHEM 3504 or CHEM 3453 or CHEG 3713 or MEEG 2403 is recommended. (Typically offered: Irregular)

CHEM 5453. Quantum Chemistry I. 3 Hours.

Fundamental quantum theory: Hamiltonian formalism in classical mechanics, Schrodinger equation, operators, angular momentum, harmonic oscillator, barrier problems, rigid rotator, hydrogen atom, and interaction of matter with radiation. Knowledge of physical chemistry comparable to material in CHEM 3504 is recommended. (Typically offered: Spring Odd Years)

CHEM 5473. Chemical Kinetics. 3 Hours.

Theory and applications of the principles of kinetics to reactions between substances, both in the gaseous state and in solution. Knowledge of physical chemistry comparable to material in CHEM 3514 is recommended. (Typically offered: Spring)

CHEM 5513. Biochemical Evolution. 3 Hours.

Abiotic synthesis of biomolecules on Earth, the origin of cells, genetic information, origin of life on Earth and elsewhere, evolution and diversity, ecological niches, bacteria, archaea, eukaryotes, novel metabolic reshaping of the environment, life being reshaped by the environment, molecular data and evolution. Prerequisite: CHEM 5813. (Typically offered: Spring Even Years)

CHEM 5573. Statistical Thermodynamics. 3 Hours.

Covers fundamentals in thermodynamics, molecular dynamics, Monte Carlo, phase transitions, behavior of gases and liquids and basic concepts in chemical kinetics and physical kinetics. Knowledge comparable to physical chemistry materials in CHEM 3514 is recommended. (Typically offered: Irregular)

CHEM 5603. Physical Organic Chemistry. 3 Hours.

Introduction to the theoretical interpretation of reactivity, reaction mechanisms, and molecular structure of organic compounds. Application of theories of electronic structure; emphasis on recent developments. Knowledge of material comparable to CHEM 3613, CHEM 3613H, CHEM 3713 and CHEM 3514 is recommended. (Typically offered: Fall)

CHEM 5633. Organic Reactions. 3 Hours.

The more important types of organic reactions and their applications to various classes of compounds. Knowledge of organic chemistry comparable to material in CHEM 3603 is recommended. (Typically offered: Irregular)

CHEM 5723. Experimental Methods in Organic Chemistry. 3 Hours.

Introduction to the application of synthetic and spectroscopic methods in organic chemistry, including mass spectrometry, infrared spectroscopy, and nuclear magnetic resonance spectrometry. Lecture 3 hours per week. Knowledge comparable to material in CHEM 3613 is recommended. (Typically offered: Fall)

CHEM 5753. Methods of Organic Analysis. 3 Hours.

Interpretation of physical measurements of organic compounds in terms of molecular structure. Emphasis on spectroscopic methods (infrared, ultraviolet, magnet resonance, and mass spectra). Knowledge of organic chemistry comparable to material in CHEM 3603 is recommended. (Typically offered: Fall)

CHEM 5813. Biochemistry I. 3 Hours.

The first of a two-course series covering biochemistry for graduate students in biology, agriculture, and chemistry. Topics covered include protein structure and function, enzyme kinetics, enzyme mechanisms, and nucleic acid and carbohydrate structures. Knowledge of organic chemistry comparable to material in CHEM 3613 is recommended. (Typically offered: Fall)

CHEM 5843. Biochemistry II. 3 Hours.

A continuation of CHEM 5813 covering topics including biological membranes and bioenergetics, photosynthesis, lipids and lipid metabolism, nucleic acid and amino acid metabolism, and molecular biology. Knowledge of organic chemistry comparable to material in CHEM 3613 is recommended. Prerequisite: CHEM 5813. (Typically offered: Spring)

CHEM 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Chemistry graduate students enroll in this course as needed until all CUMES are passed and the student is officially a doctoral candidate. Prerequisite: Chemistry graduate student. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CHEM 6011. Chemistry Seminar. 1 Hour.

Weekly discussion of current chemical research. Departmental and divisional seminars in analytical chemistry, biochemistry, inorganic, organic, and physical chemistry are held weekly. Seminar credit does not count toward the minimum hourly requirements for any chemistry graduate degree. (Typically offered: Fall and Spring) May be repeated for degree credit.

CHEM 619V. Special Topics in Inorganic Chemistry. 1-3 Hour.

Topics which have been covered in the past include: technique and theory of x-ray diffraction, electronic structure of transition metal complexes, inorganic reaction mechanisms, and physical methods in inorganic chemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 6283. Mass Spectrometry. 3 Hours.

This course is devoted to the fundamental principles and applications of analytical mass spectrometry. Interactions of ions with magnetic and electric fields and the implications with respect to mass spectrometer design are considered, as are the various types of mass spectrometer sources. Representative applications of mass spectrometry in chemical analysis are also discussed. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

CHEM 629V. Special Topics in Analytical Chemistry. 1-3 Hour.

Topics that have been presented in the past include: electroanalytical techniques, kinetics of crystal growth, studies of electrode processes, lasers in chemical analysis, nucleosynthesis and isotopic properties of meteorites, thermoluminescence of geological materials, early solar system chemistry and analytical cosmochemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 649V. Special Topics in Physical Chemistry. 1-3 Hour.

Topics which have been covered in the past include advanced kinetics, solution chemistry, molecular spectra, nuclear magnetic resonance spectroscopy, and methods of the theoretical chemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 6633. Chemistry of Organic Natural Products. 3 Hours.

Selected topics concerned with structure elucidation and synthesis of such compounds as alkaloids, antibiotics, bacterial metabolites, plant pigments, steroids, terpenoids, etc. Prerequisite: CHEM 5603 and CHEM 5633. (Typically offered: Irregular)

CHEM 6643. Organometallic Chemistry. 3 Hours.

Theories and principles of organometallic chemistry. Concepts include bonding, stereochemistry, structure and reactivity, stereochemical principles, conformational, steric and stereoelectronic effects. Transition metal catalysis of organic reactions will also be described. Knowledge of material comparable to CHEM 3713 and CHEM 3514 is recommended. (Typically offered: Irregular)

CHEM 6673. Organic Reaction Mechanisms. 3 Hours.

A detailed description of the fundamental reactions and mechanisms of organic chemistry. Prerequisite: CHEM 5633. (Typically offered: Irregular)

CHEM 669V. Special Topics in Organic Chemistry. 1-3 Hour.

Topics which have been presented in the past include heterogeneous catalysis, isotope effect studies of organic reaction mechanisms, organometallic chemistry, stereochemistry, photochemistry, and carbanion chemistry. (Typically offered: Irregular) May be repeated for degree credit.

CHEM 6823. Physical Biochemistry. 3 Hours.

Physical chemistry of proteins, nucleic acids, and biological membranes. Ultracentrifugation, absorption and fluorescent spectrophotometry, nuclear magnetic resonance spectroscopy, x-ray diffraction, and other techniques. Prerequisite: CHEM 5813. (Typically offered: Fall Even Years)

CHEM 6863. Enzymes. 3 Hours.

Isolation, characterization, and general chemical and biochemical properties of enzymes. Kinetics, mechanisms, and control of enzyme reactions. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Fall Odd Years)

CHEM 6873. Molecular Biochemistry. 3 Hours.

Nucleic acid chemistry in vitro and in vivo, synthesis of DNA and RNA, genetic diseases, cancer biochemistry and genetic engineering. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Spring Odd Years)

CHEM 6883. Bioenergetics and Biomembranes. 3 Hours.

Cellular energy metabolism, photosynthesis, membrane transport, properties of membrane proteins, and the application of thermodynamics to biological systems. Prerequisite: CHEM 5813 and CHEM 5843. (Typically offered: Spring Even Years)

CHEM 700V. Doctoral Dissertation. 1-12 Hour.

Doctoral Dissertation. For chemistry graduate students who have passed all CUMES and have officially been admitted to doctoral candidacy. Prerequisite: Chemistry graduate student. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Chinese (CHIN)

Courses

CHIN 1003. Elementary Chinese I. 3 Hours.

Elementary Chinese. (Typically offered: Fall)

CHIN 1013. Elementary Chinese II. 3 Hours.

Elementary courses stress correct pronunciation, Aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability. (Typically offered: Spring)

CHIN 2003. Intermediate Chinese I. 3 Hours.

Intermediate courses lead to greater facility in spoken language and to more advanced reading skills. (Typically offered: Fall)

CHIN 2013. Intermediate Chinese II. 3 Hours.

Continued development of basic speaking comprehension and writing skills and intensive development of reading skills. (Typically offered: Spring)

CHIN 3003. Advanced Chinese. 3 Hours.

Continues to develop speaking, listening, reading and writing skills and presents more complex forms and structures of the language as well as additional characters. Prerequisite: CHIN 2013 (Typically offered: Fall)

CHIN 3033. Conversation. 3 Hours.

Guided conversation practice for the post-intermediate student. Prerequisite: CHIN 2013 or equivalent. (Typically offered: Spring)

CHIN 3103. Chinese Culture through Film. 3 Hours.

This course explores Chinese culture through the lens of Chinese films and with an emphasis on contemporary Chinese communicative culture. The course is designed to give students analytical insights into Chinese culture, especially how Chinese history, philosophy, society, language, education, customs, and economic developments shape contemporary Chinese culture and Chinese people's communication. This course is taught in English; no knowledge of the Chinese language is required. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

CHIN 3983. Special Studies. 3 Hours.

May be offered in subject not specifically covered by courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CHIN 4313. Culture and Society in China. 3 Hours.

Introduction of key principles, customs, and behaviors in Chinese society to help students understand the Chinese business context. This course is taught in English. (Typically offered: Spring)

CHIN 4333. Business Chinese Language in Speaking and Writing. 3 Hours.

Introduction of Chinese vocabulary, formats, and expressions in business environments, such as company structures, management, banking and accounting, as well as how to read and write contracts, letters, and other business documents. Prerequisite: CHIN 3003 or equivalent Chinese proficiency. (Typically offered: Fall)

Civil Engineering (CVEG)

Courses

CVEG 2002. Introduction to Civil Engineering Plans and CADD. 2 Hours.

Development and preparation of design and construction plans; plan terminology and features; introduction to computer-aided drafting and design (CADD) software. Corequisite: Drill component. Prerequisite: Civil Engineering major or departmental consent. (Typically offered: Fall, Spring and Summer)

CVEG 2013. Civil Engineering Mechanics I. 3 Hours.

CVEG 2013 provides the student with a foundation in the theory and principles of statics for use in subsequent civil engineering courses. The course applies mathematics and physics to solve practical problems of structural systems. Corequisite: MATH 2574. Prerequisite: MATH 2564 and PHYS 2054. (Typically offered: Fall and Spring)

CVEG 2023. Civil Engineering Mechanics II. 3 Hours.

CVEG 2023 provides the student with a foundation in the theory and principles of mechanics of materials for use in subsequent civil engineering courses. This course applies mathematics and physics to solve problems in mechanics. Prerequisite: CVEG 2013 or MEEG 2003. (Typically offered: Fall and Spring)

CVEG 2051L. Surveying Systems Laboratory. 1 Hour.

Laboratory exercises demonstrating the principles and practices of surveying systems. Corequisite: CVEG 2053. (Typically offered: Fall and Spring)

CVEG 2053. Surveying Systems. 3 Hours.

Coordinate geometry, measurements, and total integrated surveying systems; total stations, electronic data collection, and reduction; error analysis; applications to civil engineering and surveying practice. Corequisite: CVEG 2051L. Prerequisite: MATH 2554 or MATH 2445. (Typically offered: Fall and Spring)

CVEG 2113. Structural Materials. 3 Hours.

Production, properties, behavior, and structural applications of concrete, steel, timber, masonry, and plastic. Statistical analysis methods for quality control are also covered. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 2015 (formerly CVEG 2014) or MEEG 2003 or CVEG 2013. Pre- or Corequisite: MEEG 3013 or CVEG 2023. (Typically offered: Fall and Spring)

CVEG 2851. Engineering Professional Practice Issues. 1 Hour.

Study of various issues related to the professional practice of engineering including ethics, professionalism, professional licensure, project procurement, social and political issues, globalism, and other legal issues. (Typically offered: Fall and Spring)

CVEG 3131L. Soil Mechanics Laboratory. 1 Hour.

Index, strength, and consolidation properties of soils; test methods and specifications for soil sampling and testing. Corequisite: CVEG 3132 (Formerly CVEG 3133). (Typically offered: Fall and Spring)

CVEG 3132. Soil Mechanics. 2 Hours.

Introduction to geotechnical engineering. Properties of soils related to foundations, retaining walls, earth structures, and highways. Lecture 2 hours, laboratory 3 hours per week. Corequisite: CVEG 3131L. Pre- or Corequisite: CVEG 3213 and MATH 2584. Prerequisite: (MEEG 3013 or CVEG 2015) or CVEG 2023) and (GEOL 1113 or GEOL 3002) and CVEG 2002. (Typically offered: Fall and Spring)

CVEG 3213. Hydraulics. 3 Hours.

Study of incompressible fluids. Topics include fluid properties, fluid statics, continuity, energy and hydraulic gradients, fundamentals of flow in pipes and open channels. Hardy Cross analyses, measurement of flow of incompressible fluids, hydraulic similitude and dimensional analysis. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 2015 (Formerly CVEG 2014) or CVEG 2013 or MEEG 2003. (Typically offered: Fall and Spring)

CVEG 3223. Hydrology. 3 Hours.

Flood routing procedures in storage reservoirs and channels. Hydrologic planning including storage reservoir design, frequency duration analysis, and related techniques. Prerequisite: (CVEG 2053 or BENG 2643), (CVEG 3213 or MEEG 3503 or CHEG 2133). (Typically offered: Fall and Spring)

CVEG 3243. Environmental Engineering. 3 Hours.

Introduction to theories and fundamentals of physical, chemical, and biological processes with emphasis on water supply and wastewater collection, transportation, and treatment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 2584 and CHEM 1103. (Typically offered: Fall and Spring)

CVEG 3303. Structural Analysis. 3 Hours.

Truss analysis, influence lines for beams and frames, and effects of moving loads. Deformation of beams, frames, and trusses. Analysis of indeterminate structures by moment area, slope deflection, and moment distribution methods; approximate methods of analysis. Lecture 3 hours, drill 3 hours per week. Corequisite: Drill component. Prerequisite: MEEG 3013 or CVEG 2015 (Formerly CVEG 2014) or CVEG 2023. (Typically offered: Fall and Spring)

CVEG 3413. Transportation Systems Engineering. 3 Hours.

Transportation Systems Engineering: Introduction to transportation systems engineering and planning. Includes the following topics: transportation governance, financing, and the effect on the environment; traffic flow theory; safety; traffic operations and control; capacity; and travel demand modeling. Prerequisite: CVEG 2053 and INEG 2313. (Typically offered: Fall)

CVEG 4053. Land Surveying. 3 Hours.

Historical background of property surveys. Detailed consideration of original surveys and the United States Public Land Surveys. Writing adequate land descriptions. Interpretation of old descriptions. Excess and deficiency. Riparian rights. Field practice in relocation of old corners. Prerequisite: Senior standing and CVEG 2053. (Typically offered: Irregular)

CVEG 4083. Control Surveys. 3 Hours.

Sun and Polaris observations for astronomic azimuth, solar access studies; control traversing, leveling, triangulation; state plane coordinate systems. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 2053 and CVEG 2051L. (Typically offered: Irregular)

CVEG 4143. Foundation Engineering. 3 Hours.

Analysis and design of retaining walls, footings, sheet piles, and piles. Determination of foundation settlements in sand and clay. Prerequisite: CVEG 3132 and INEG 2413. (Typically offered: Fall and Spring)

CVEG 4203. Environmental Regulations and Permits. 3 Hours.

Topics include federal and state environmental regulations, the permitting process, permit requirements and related issues. Prerequisite: CVEG 3243 and senior standing. (Typically offered: Fall)

CVEG 4243. Environmental Engineering Design. 3 Hours.

Application of physical, biological, and chemical operations and processes to the design of water supply and wastewater treatment systems. Prerequisite: CVEG 3243 and INEG 2413. (Typically offered: Fall and Spring)

CVEG 4263. Air Pollution Control. 3 Hours.

Fundamentals of air pollution causes, effects, and measurements; as well as, control methods with application to current industrial problems. Prerequisite: CVEG 3213 or MEEG 3503. (Typically offered: Spring)

CVEG 4273. Open Channel Flow. 3 Hours.

Open Channel Flow includes advanced open channel hydraulics, flow measurement techniques, a hydrology review, culvert and storm drainage design, natural channel classification (fluvial geomorphology) and rehabilitation, computer methods and environmental issues. Prerequisite: CVEG 3213 and CVEG 3223. (Typically offered: Spring)

CVEG 4303. Reinforced Concrete Design I. 3 Hours.

Design of reinforced concrete elements with emphasis on ultimate strength design supplemented by working stress design for deflection and crack analysis. Prerequisite: CVEG 2113 and CVEG 3304. (Typically offered: Fall and Spring)

CVEG 4313. Structural Steel Design I. 3 Hours.

Design of structural steel elements by elastic design the Load and Resistance Factor Design method. Intensive treatment of tension members, beams, columns, and connections. Pre- or Corequisite: CVEG 2113. Prerequisite: CVEG 3303 (Formerly CVEG 3304). (Typically offered: Fall and Spring)

CVEG 4323. Structural Loadings. 3 Hours.

Theoretical background to and practical code requirements for various structural loadings. These include dead loads, occupancy loads, roof loads and ponding, snow loads, granular loads, vehicular loads, wind loading, and seismic loads. Prerequisite: CVEG 3303 (Formerly CVEG 3304), INEG 2413 and (CVEG 4303 or CVEG 4313). (Typically offered: Spring)

CVEG 4343. Reinforced Masonry Design. 3 Hours.

Properties of masonry materials and assemblages. Masonry workmanship and quality control. Design of reinforced masonry elements against gravity and lateral loads. Design of masonry connections and joints. Application to 1- and 2-story buildings. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 4353. Timber Design. 3 Hours.

Selection of timber beams, columns, and beam-columns. Physical properties of wood, analysis and design of timber connections. Truss design, glulam members, timber bridge design, treatment for decay, and fire protection. Pre- or Corequisite: CVEG 2113. Prerequisite: CVEG 3303 (formerly CVEG 3304). (Typically offered: Irregular)

CVEG 4413. Pavement Evaluation and Rehabilitation. 3 Hours.

Introduction of concepts and procedures for pavement condition surveys; evaluation by nondestructive and destructive testing; maintenance strategies; rehabilitation of pavement systems for highway and airfields; pavement management systems. Prerequisite: CVEG 4433. (Typically offered: Irregular)

CVEG 4423. Transportation Infrastructure. 3 Hours.

Transportation infrastructure includes discussion on the geometric design of roadways, roadway drainage, roadway materials, roadway structural design, and an economic analysis of roadways. This includes the design of horizontal and vertical alignment, cross section, intersections, pavement materials, and structural capacity. Prerequisite: CVEG 3413 and INEG 2413. (Typically offered: Fall and Spring)

CVEG 4433. Transportation Pavements and Materials. 3 Hours.

Study of the engineering properties and behavior of materials commonly used in transportation facilities as they relate to the design and performance of flexible and rigid pavement systems. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 3132, CVEG 3413, and INEG 2313. (Typically offered: Irregular)

CVEG 4513. Construction Management. 3 Hours.

Introduction to methods and procedures for management of civil engineering construction projects including organization, plans and specs, cost estimating and bidding, project planning and finance, quality control/ assurance, construction safety, cost management, labor issues, change orders, and subcontractor issues. Prerequisite: Senior standing and Civil Engineering majors only. (Typically offered: Fall and Spring)

CVEG 4812. Environmental Design Project. 2 Hours.

Comprehensive engineering design project primarily related to environmental issues. Corequisite: CVEG 4243. (Typically offered: Spring)

CVEG 4822. Geotechnical Design Project. 2 Hours.

Comprehensive engineering design project primarily related to geotechnical issues. Corequisite: CVEG 4143. Prerequisite: CVEG 4303. (Typically offered: Fall)

CVEG 4832. Structural Design Project. 2 Hours.

Comprehensive engineering design project primarily related to structural issues. Corequisite: CVEG 4323. Prerequisite: CVEG 4303 and CVEG 4313. (Typically offered: Spring)

CVEG 4842. Transportation Design Project. 2 Hours.

Comprehensive engineering design project primarily related to transportation issues. Corequisite: CVEG 4423. Prerequisite: CVEG 2002. (Typically offered: Fall)

CVEG 4863. Sustainability in Civil Engineering. 3 Hours.

Qualify and quantify the economic, environmental, societal, and engineering drivers behind sustainability in Civil Engineering. Justification of the feasibility and benefits of sustainability in environmental, geotechnical, structural, and transportation engineering through verbal and written communications. Prerequisite: Senior standing. (Typically offered: Irregular)

CVEG 488V. Special Problems. 1-6 Hour.

Special problems. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 488VH. Honors Special Problems. 1-6 Hour.

Service Learning in Belize. Prerequisite: Senior standing. (Typically offered: Irregular)

This course is equivalent to CVEG 488V.

CVEG 4890. Fundamentals of Engineering Seminar. 0 Hours.

Preparation for students taking the Fundamentals of Engineering (FE) examination, administered by the National Council of Examiners for Engineering and Surveying (NCEES). Concept review and problem-solving drills for topics covered on the FE-Civil examination. Prerequisite: Civil Engineering major and senior standing. (Typically offered: Fall and Spring)

CVEG 491VH. Honors Studies in Geotechnical Engineering. 1-6 Hour.

The study of advanced topics in the geotechnical engineering field. May include participation in geotechnical engineering courses normally available only to graduate students. Prerequisite: CVEG 3132 with a grade of C or better. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 492VH. Honors Studies in Environmental Engineering. 1-6 Hour.

The study of advanced topics in the environmental engineering field. May include participation in environmental engineering courses normally available only to graduate students. Prerequisite: CVEG 3243 with a grade of C or better. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 493VH. Honors Studies in Structural Engineering. 1-6 Hour.

The study of advanced topics in the structural engineering field. May include participation in structural engineering courses normally available only to graduate students. Prerequisite: CVEG 3304 with a grade of C or better. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 494VH. Honors Studies in Transportation Engineering. 1-6 Hour.

The study of advanced topics in the transportation engineering field. May include participation in transportation engineering courses normally available only to graduate students. Prerequisite: CVEG 3413 with a grade of C or better. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 4983H. Honors Undergraduate Thesis. 3 Hours.

Thesis research for civil engineering students enrolled in the honors college. Prerequisite: Honors College. (Typically offered: Irregular)

CVEG 5000. Graduate Seminar in Civil Engineering. 0 Hours.

A weekly seminar devoted to civil engineering research topics. Appropriate grade to be "S". (Typically offered: Fall and Spring)

CVEG 5103. Geosynthetic Applications in Civil Engineering. 3 Hours.

CVEG 5103 - Geosynthetic Applications in Civil Engineering: The functional properties of various geosynthetic materials are defined as they relate to; reinforcement, separation, filtration, and drainage applications. Design procedures are developed for the use of geosynthetics in transportation, environmental and geotechnical applications. Prerequisite: CVEG 3132 and CVEG 3131L or equivalent. (Typically offered: Irregular)

CVEG 5113. Soil Dynamics. 3 Hours.

This course covers propagation of stress waves in elastic and inelastic materials, dynamic loading of soils, and stiffness and damping properties of soils. Use of field and laboratory techniques to determine shear wave velocity of soils. Also includes applications of dynamic soil properties in site stiffness characterization, geotechnical earthquake engineering, evaluation of ground improvement, and design of machine foundations. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5123. Measurement of Soil Properties. 3 Hours.

Consideration of basic principles involved in measuring properties of soils. Detailed analysis of standard and specialized soil testing procedures and equipment. Lecture 2 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5133. Geotechnical Site Characterization. 3 Hours.

One of primary tasks of geotechnical engineers is to perform in-situ site characterization for engineering design of foundations, retaining structures, roads, bridges and other infrastructure. This course will focus on in-situ investigations performed for the purpose of collecting detailed site characterization data for direct and/or indirect use in geotechnical design. Specifically, we will study various static (e.g., SPT, CPT, VST, DMT, PMT) and dynamic (e.g., CHT, DHT, SW, GPR) in-situ tests used to obtain estimates of stratigraphy, density, strength, stress history, modulus, and permeability of geotechnical materials. We will predominantly focus on site characterization of soil sites, but will mention rock testing and design methods when appropriate. Prerequisite: CVEG 4143 or the equivalent. (Typically offered: Irregular)

CVEG 5143. Transportation Soils Engineering. 3 Hours.

Advanced study of the properties of surficial soils; soil classification systems; pedology; soil occurrence and variability; subgrade evaluation procedures; repeated load behavior of soils; soil compaction and field control; soil stabilization; soil trafficability and subgrade stability for transportation facilities. Prerequisite: CVEG 3132. (Typically offered: Irregular)

CVEG 5153. Earth Retaining Structures. 3 Hours.

This course will focus on the analysis and design of earth retaining structures. Specifically, we will discuss soil and rock property design parameter selection, lateral earth pressures for wall system design, and load and resistance factor design (LRFD) for retaining walls. Wall types discussed include gravity and semi-gravity walls, modular gravity walls, MSE walls, nongravity cantilever walls and anchored walls, and in-situ reinforced walls. Information on wall system feasibility and selection, construction materials and methods, cost information, and design and performance information will be discussed. Prerequisite: CVEG 4143 or equivalent. (Typically offered: Irregular)

CVEG 5163. Seepage and Consolidation. 3 Hours.

Investigation of the flow of water through soils and the time rate of compression of soils. Characterization of the hydraulic conductivity of soils in the field, seepage through earth dams, excavation cut-off walls, and other seepage control systems. Analytical and experimental investigations of soil volume change under hydraulic and mechanical loading. Design of earth and rock dams, well pumping, and vertical and radial consolidation in embankments. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5173. Advanced Foundations. 3 Hours.

Study of soil-supported structures. Topics include drilled piers, slope stability, pile groups, negative skin friction, foundation design from the standard penetration test and Dutch cone, and other specialized foundation design topics. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5183. Geo-Environmental Engineering. 3 Hours.

Study of the geotechnical aspects of waste containment systems and contaminant remediation applications. Analysis and measurement of flow of water and contaminants through saturated and unsaturated soils, clay mineralogy and soil-chemical compatibility, and mechanical and hydraulic behavior of geomembranes, geotextiles, and geosynthetic clay liners. Design and construction aspects of compacted clay and composite landfill liners, drainage systems, and landfill covers. Prerequisite: CVEG 3132 or graduate standing. (Typically offered: Irregular)

CVEG 5193. Geotechnical Earthquake Engineering. 3 Hours.

This course covers stress wave propagation in soil and rock; influence of soil conditions on seismic ground motion characteristics; evaluation of site response using wave propagation techniques; liquefaction of soils; seismic response of earth structures and slopes. Prerequisite: CVEG 4143 or graduate standing. (Typically offered: Irregular)

CVEG 5203. Water Chemistry. 3 Hours.

This course provides a basis for applying principles of physical chemistry to understanding the composition of natural waters and to the engineering of water and wastewater treatment processes. Topics covered include chemical equilibrium (algebraic, graphical, and computer-aided solution techniques); acid-base equilibria and buffering; oxidation and reduction reactions; and solid precipitation and dissolution. Prerequisite: Graduate standing or CVEG 3243 and instructor approval. (Typically offered: Spring)

CVEG 5213. Advanced Water Treatment Design. 3 Hours.

Design of industrial and municipal water treatment plants. Discussion of raw and treated water requirements for several uses. Prerequisite: CVEG 3243. (Typically offered: Spring)

CVEG 5224. Advanced Wastewater Treatment Design. 4 Hours.

Application of advanced techniques for the analysis of wastewater treatment facilities. Physical, chemical and biological processes for removing suspended solids, organics, nitrogen, and phosphorus. Laboratory treatability studies will be used to develop design relationships. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CVEG 4243 or graduate standing. (Typically offered: Fall)

CVEG 5233. Microbiology for Environmental Engineers. 3 Hours.

Fundamental and applied aspects of microbiology and biochemistry relating to water quality control, wastewater treatment, and stream pollution. Prerequisite: CVEG 3243. (Typically offered: Irregular)

CVEG 5243. Groundwater Hydrology. 3 Hours.

Detailed analysis of groundwater movement, well hydraulics, groundwater pollution and artificial recharge. Surface and subsurface investigations of groundwater and groundwater management, saline intrusion and groundwater modeling will be addressed. Prerequisite: CVEG 3223. (Typically offered: Irregular)

CVEG 5253. Physical-Chemical Processes for Water and Wastewater Treatment. 3 Hours.

This course provides a fundamental understanding of physical and chemical processes used in the treatment of drinking water and wastewater. Principals of mass balance are applied to understand the impact of reactor hydraulics (ideal and non-ideal flow) and reaction kinetics on process performance and identify important process variables. Chemical processes covered include disinfection, gas transfer, adsorption, and ion exchange; physical processes covered include coagulation, flocculation, sedimentation, filtration, and membranes. Prerequisite: Graduate standing and instructor consent. (Typically offered: Fall Odd Years)

CVEG 5273. Open Channel Flow. 3 Hours.

Open Channel Flow includes advanced open channel hydraulics, flow measurement techniques, a hydrology review, culvert and storm drainage facility design, natural channel classification (fluvial geomorphology) and rehabilitation, computer methods and environmental issues. Prerequisite: CVEG 3213 and CVEG 3223. (Typically offered: Irregular)

CVEG 5293. Water Reuse. 3 Hours.

CVEG 5293 is a graduate-level course that discusses topics related to water reclamation and reuse. Topics include past and current practices of water reuse, health and environmental issues related to water reuse, water technologies and systems for water reuse, and water reuse applications. Prerequisite: CVEG 3243 or equivalent course. (Typically offered: Spring Even Years)

CVEG 5303. Theory of Stability. 3 Hours.

Study of structural members subjected to compression. Analysis of compression members considering support conditions and within frame configurations. Analysis of beams considering lateral torsional buckling. AISC Steel Manual strength equations related to columns and beams are derived and discussed. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5313. Matrix Analysis of Structures. 3 Hours.

Energy and digital computer techniques of structural analysis as applied to conventional forms, space trusses, and frames. Prerequisite: CVEG 3303 (formerly CVEG 3304) or graduate standing. (Typically offered: Irregular)

CVEG 5323. Structural Dynamics. 3 Hours.

Dynamics response of single and multidegree of freedom systems. Modal analysis. Response spectra. Computer programs for dynamic analysis. Design considerations for structures subjected to time-varying forces including earthquake, wind, and blast loads. Prerequisite: CVEG 3303. (Typically offered: Irregular)

CVEG 5333. Concrete Materials. 3 Hours.

Topics include portland cement production, supplementary cementing materials, fresh and hardened concrete properties, mixture proportioning, chemical admixtures, curing, and specialty concretes. Corequisite: Lab component. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 5343. Highway Bridges. 3 Hours.

Economics of spans, current design and construction specifications, comparative designs. Possible refinements in design techniques and improved utilization of materials. Prerequisite: CVEG 4313 and CVEG 4303. (Typically offered: Irregular)

CVEG 5353. Prestressed Concrete Design. 3 Hours.

Analysis and design of prestressed concrete beams. Topics include flexural analysis, prestress bond, draping and debonding, allowable stresses, shear analysis and design, camber prediction, and prestress losses. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 5363. Advanced Topics in Reinforced Concrete. 3 Hours.

Analysis and design of reinforced concrete members. Topics include slender columns, one-way and two-way slab design, strut and tie design, and torsion. Prerequisite: CVEG 4303 or graduate standing. (Typically offered: Irregular)

CVEG 5373. Advanced Structural Steel Design. 3 Hours.

Design of structural steel components using the Load and Resistance Factor Design method. Intensive treatment of simple and eccentric connections, composite construction, plate girders, and plastic analysis and design. Prerequisite: CVEG 4313 or graduate standing. (Typically offered: Irregular)

CVEG 5383. Finite Element Methods in Civil Engineering. 3 Hours.

An understanding of the fundamentals of the finite element method and its application to structural configurations too complicated to be analyzed without computer applications. Application to other areas of civil engineering analysis and design such as soil mechanics, foundations, fluid flow, and flow through porous media. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5393. Advanced Strength of Materials. 3 Hours.

The course will continue from the basic material addressed in the undergraduate course and investigate in more detail stress analysis as it pertains to civil engineering type problems. Topics addressed in the course will include stress analysis (two-dimensional), constitutive relationships, solutions for two-dimensional problems, flexure, torsion, beams on elastic foundations, and energy methods. Prerequisite: CVEG 2015 (Formerly CVEG 2014) or CVEG 2023 or MEEG 3013. (Typically offered: Irregular)

CVEG 5403. Advanced Reinforced Concrete II. 3 Hours.

Design of circular and rectangular reinforced concrete tanks for fluid and granular loads. Prerequisite: CVEG 4303. (Typically offered: Irregular)

CVEG 5413. Transportation and Land Development. 3 Hours.

Study of interaction between land development and the transportation network. Application of planning, design, and operational techniques to manage land development impacts upon the transportation system, and to integrate land layout with transportation network layout. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5423. Structural Design of Pavement Systems. 3 Hours.

An introduction to the structural design of pavement systems including: survey of current design procedures; study of rigid pavement jointing and reinforcement practices; examination of the behavioral characteristics of pavement materials and of rigid and flexible pavement systems; introduction to structural analysis theories and to pavement management concepts. Prerequisite: CVEG 4433. (Typically offered: Irregular)

CVEG 5433. Traffic Engineering. 3 Hours.

A study of both the underlying theory and the use of traffic control devices (signs, traffic signals, pavement markings), and relationships to improved traffic flow and safety, driver and vehicle characteristics, geometric design, and societal concerns. Also includes methods to collect, analyze, and use traffic data. Prerequisite: CVEG 3413 or graduate standing. (Typically offered: Irregular)

CVEG 5463. Transportation Modeling. 3 Hours.

The use of mathematical techniques and/or computer software to model significant transportation system attributes. May compare model results with actual measured traffic attributes, using existing data sources and/or collecting and analyzing field data. Pre- or Corequisite: Lab component. Prerequisite: Graduate standing. (Typically offered: Irregular)

CVEG 5473. Transportation System Characteristics. 3 Hours.

Introduction to traffic flow theory, including traffic stream interactions and capacity. Applications for planning, design, operations. Prerequisite: CVEG 3413 or graduate standing. (Typically offered: Irregular)

CVEG 5483. Transportation Management Systems. 3 Hours.

Six transportation management systems are explored: pavement, bridge, intermodal, public transportation, safety, and congestion. System approaches are presented. Techniques are introduced on how to optimally allocate resources. Pavement and bridge structure basics are discussed and their performance parameters are presented. Case studies are used to illustrate the interfaces among various modes of transportation. Safety and congestion problems in transportation are addressed. (Typically offered: Irregular)

CVEG 562V. Research. 1-6 Hour.

Fundamental and applied research. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

CVEG 563V. Special Problems. 1-6 Hour.

Special problems in CVEG. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CVEG 5863. Fundamentals of Sustainability in Civil Engineering. 3 Hours.

Qualify and quantify the economic, environmental, societal and engineering drivers behind sustainability in Civil Engineering. Justification of the feasibility and benefits of sustainability in environmental, geotechnical, structural and transportation through verbal and written communications. Students cannot receive credit for both CVEG 4863 and CVEG 5863. Prerequisite: Graduate standing or instructor consent. (Typically offered: Irregular)

CVEG 5953. Fundamentals of Fracture and Fatigue in Structures. 3 Hours.

The course will cover the concepts of linear-elastic, elastic-plastic and time-dependent Fracture Mechanics as applied to fracture in a variety of materials, structures, and operating conditions. The examples will include fracture in large components such as aircraft, bridges and pressure vessels and also in bones and in soft materials and human tissue. Prerequisite: Graduate standing in Civil, Mechanical or Biomedical Engineering or consent of the instructor. (Typically offered: Fall)

This course is cross-listed with BMEG 5953, MEEG 5953.

CVEG 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CVEG 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Classical Studies (CLST) Courses

CLST 1003. Introduction to Classical Studies: Greece. 3 Hours.

An introduction to the world of Ancient Greece, from the Trojan War to Alexander the Great. Progresses chronologically, focusing on the literary, artistic, political, and philosophical ideas of the Greeks. Who were they and how are we like them? (Typically offered: Fall Odd Years)

CLST 1003H. Honors Introduction to Classical Studies: Greece. 3 Hours.

Honors. Prerequisite: Honors candidacy. (Typically offered: Fall Odd Years)
This course is equivalent to CLST 1003.

CLST 1013. Introduction to Classical Studies: Rome. 3 Hours.

A multi-faceted introduction to Roman culture, focusing on the literature, philosophy, architecture, history, art and archeology. Source material to be read in English. Lectures liberally illustrated with slides. (Typically offered: Spring Even Years)

CLST 1013H. Honors Introduction to Classical Studies: Rome. 3 Hours.

Honors introduction to Classical Studies: Rome. (Typically offered: Spring Even Years)

This course is equivalent to CLST 1013.

CLST 2323. Greek and Roman Mythology. 3 Hours.

A study of the stories, figures, and motifs in the mythology of Greece and Rome. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Irregular)

CLST 3003. Special Topics in Classical Studies. 3 Hours.

Close examination of subject matter not presented in regularly offered CLST courses. May be repeated for different topics. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

CLST 3003H. Honors Special Topics in Classical Studies. 3 Hours.

Close examination of subject matter not presented in regularly offered CLST courses. May be repeated for different topics. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit. This course is equivalent to CLST 3003.

CLST 399VH. Honors Course Classical Studies. 1-6 Hour.

CLST honors thesis projects or CLST honors study abroad programs. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

CLST 4003H. Honors Classical Studies Colloquium. 3 Hours.

Covers a special topic or issue in classical studies. Appropriate for honors program students and students pursuing classical studies. May be repeated when the content is changed. Prerequisite: Junior standing. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

CLST 4413. Greek Art and Archaeology. 3 Hours.

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. (Typically offered: Spring; Summer Odd Years) This course is cross-listed with ARHS 4413.

CLST 4413H. Honors Greek Art and Archaeology. 3 Hours.

Greek Art and Archaeology focuses on how visual and material culture shaped and were shaped by Greek society (religion, politics, military, economy, gender, etc.) from the Bronze Age through the Hellenistic period. Masterpieces of Greek art are analyzed alongside the material remains of everyday Greeks in civic and domestic spaces. (Typically offered: Spring; Summer Odd Years) This course is cross-listed with CLST 4413, ARHS 4413.

CLST 4423. Roman Art and Archaeology. 3 Hours.

Roman Art and Archaeology focuses on how visual and material culture shaped and were shaped by Roman society (religion, politics, economy, gender, ethnicity, etc.) from the Iron Age through the Late Antique period. We encounter famous masterpieces, but also the material remains of everyday Romans in civic and domestic spaces. (Typically offered: Spring and Summer Even Years) This course is cross-listed with ARHS 4423.

Communication (COMM)

Courses

COMM 1003. Basic Course in the Arts: Film Lecture. 3 Hours.

Introduction to film as entertainment and art. How to look at film through a study of composition, lighting, editing, sound and acting. Lectures and viewing time. (Typically offered: Fall, Spring and Summer)

COMM 1003H. Honors Basic Course in the Arts: Film Lecture. 3 Hours.

Introduction of film as entertainment and art. How to look at a film through a study of composition, lighting, editing, sound and acting. Lectures and viewing time. Corequisite: Drill component. (Typically offered: Fall) This course is equivalent to COMM 1003.

COMM 1023. Communication in a Diverse World. 3 Hours.

Introductory course that focuses on the skills and understandings associated with competent communication in a diverse society within interpersonal, group, organizational and intercultural communication contexts. (Typically offered: Fall and Spring)

COMM 1023H. Honors Communication in a Diverse World. 3 Hours.

Introductory course that focuses on the skills and understandings associated with competent communication in a diverse society within interpersonal, group, organizational and intercultural communication contexts. Prerequisite: Honors standing. (Typically offered: Fall) This course is equivalent to COMM 1023.

COMM 1233. Media, Community and Citizenship. 3 Hours.

Examines theory and research on how messages are processed, meanings constructed, communities formed and maintained through interaction with the media. Focus is on critical citizenship and media literacy in the context of the cognitive, social, cultural, political, and economic consequences of increasingly networked media systems. (Typically offered: Fall and Spring)

COMM 1233H. Honors Media, Community and Citizenship. 3 Hours.

Examines theory and research on how messages are processed, meanings constructed, communities formed and maintained through interaction with the media. Focus is on critical citizenship and media literacy in the context of the cognitive, social, cultural, political, and economic consequences of increasingly networked media systems. Prerequisite: Honors standing. (Typically offered: Spring) This course is equivalent to COMM 1233.

COMM 1313. Public Speaking (ACTS Equivalency = SPCH 1003). 3 Hours.

Application of the communication techniques needed to organize and deliver oral messages in a public setting. Emphasis given to theory and practice of message strategies and preparation, audience analysis, presentational skills including multimedia support, speech criticism, and the listening process. (Typically offered: Fall, Spring and Summer)

COMM 1313H. Honors Public Speaking. 3 Hours.

Application of the communication techniques needed to organize and deliver oral messages in a public setting. Emphasis given to theory and practice of message strategies and preparation, audience analysis, presentational skills including multimedia support, speech criticism, and the listening process. (Typically offered: Fall, Spring and Summer) This course is equivalent to COMM 1313.

COMM 2103. Interviewing. 3 Hours.

A study in the theory and practice of methods in selected interview settings, with an emphasis on interviewing through research, journalism, employment, and historical perspectives. (Typically offered: Fall)

COMM 2303. Advanced Public Speaking. 3 Hours.

Continuing study of the invention and adaptation of oral discourse to the needs of listeners. Consideration of the problems of communication in platform presentation. Prerequisite: COMM 1313. (Typically offered: Fall, Spring and Summer)

COMM 2323. Interpersonal Communication. 3 Hours.

Personal and interpersonal factors affecting communication in everyday life. Emphasis upon ways in which interpersonal perception, physical environment, semantic choices, and nonverbal cues affect communication primarily in the context of work, family, and other personal experiences. (Typically offered: Fall, Spring and Summer)

COMM 2333. Introduction to Communication Research. 3 Hours.

Introduction to the basic assumptions underlying communication inquiry; resources for and methods of data collection in communication research; and techniques for organization, interpretation, reporting, and evaluation of communication research. (Typically offered: Fall and Spring)

COMM 2343. Introduction to Small-Group Communication. 3 Hours.

An introduction to procedures used in exchanging information, solving problems, determining policies, and resolving differences in committees and other small groups. Prerequisite: COMM 1313. (Typically offered: Fall, Spring and Summer)

COMM 2353. Argumentation and Advocacy. 3 Hours.

An introduction to argumentation theory and practice, with concern for analyzing and producing logical, effective, and ethical public discourse. Examines contemporary models for analyzing argument, covers the common types of arguments and ways to evaluate their strengths and weaknesses, and introduces ways to test arguments for validity and fallacies. Prerequisite: COMM major or minor, or instructor consent. (Typically offered: Fall and Spring)

COMM 2613. Nonverbal Communication. 3 Hours.

Creates an understanding of the functions of nonverbal cues operating in human communication processes and develops familiarity with recent research in the field of nonverbal communication. Prerequisite: COMM 1023. (Typically offered: Irregular)

COMM 2813. Introduction to Mediated Communication. 3 Hours.

Introduction to media and media industries, particularly the social and cultural impact of their economic and regulatory structures. Emphasis on the historical development of media, business practices of media organizations, critical analysis of media messages, and cultural functions of the media. (Typically offered: Fall and Spring)

COMM 298V. Topics in Communication. 1-3 Hour.

Topics in communication not represented in other lower division courses. Prerequisite: Completion of at least 3 hours of COMM coursework. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

COMM 3143. Language and Expressive Culture. 3 Hours.

This course explores the complex interrelationship of language, culture, and social identity. Verbal art and expressive culture are examined from a variety of anthropological perspectives. Topics include ethnographies of speaking, discourse analysis, cultural performances, and the performative aspects of oral expression. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Irregular)
This course is cross-listed with ANTH 3143, ENGL 3143.

COMM 3173. Introduction to Linguistics. 3 Hours.

Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages reveal linguistic universals as well as phonological, syntactic, and semantic systems of individual languages. Related topics: language history, dialectology, language and its relation to culture and society, and the history of linguistic scholarship. Prerequisite: Junior standing, COMM 1313 and COMM 2333. (Typically offered: Irregular)
This course is cross-listed with ANTH 3173, ENGL 3173, WLLC 3173.

COMM 3263. African Americans in Film. 3 Hours.

A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: COMM 1003. (Typically offered: Irregular)
This course is cross-listed with AAST 3263, ENGL 3263, JOUR 3263.

COMM 3273. African Americans in Documentary Film. 3 Hours.

Exploration of the African-American image and experience in the context of time, historical record and varying production viewpoints from diverse documentarians. African-American history, culture and socio-political context are addressed in the analyses of these documentary films from the perspectives of mainstream media, independent filmmakers and minority documentarians. Prerequisite: Junior or senior standing. (Typically offered: Spring)

This course is cross-listed with JOUR 3273, AAST 3273.

COMM 3333. Communication Criticism. 3 Hours.

Basic elements and theoretical perspectives on criticism of public communication. Extensive practice in written analysis of events in public address, film, television, and other mass media. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Irregular)

COMM 3343. Contemporary Communication Theory. 3 Hours.

Study of the nature of the communication process as it is reflected in the individual, in interpersonal settings, in one-to-many situations, and in the mass media. Prerequisite: COMM 1023 or COMM 2323. (Typically offered: Spring)

COMM 3353. Argumentation: Reason in Communication. 3 Hours.

Concepts characterizing rational discourse, with a concern for examining validity and fallacy. Consider traditional and contemporary models for analyzing argument, including an examination of the philosophy of argument and a practical inquiry into the uses of argument in contemporary rhetorical discourse. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Fall)

COMM 3373. Leadership Communication. 3 Hours.

An analysis of leadership as a discursive process, focusing on how leadership emerges and is enacted on a daily basis through communication-related behaviors. Prerequisite: COMM 1023 or COMM 2343 or permission of instructor. (Typically offered: Irregular)

COMM 3383. Persuasion. 3 Hours.

Introduction to theories of persuasion with emphasis on application and effect. Prerequisite: COMM 1313 and COMM 2333, or instructor permission. (Typically offered: Fall, Spring and Summer)

COMM 3423. Science Fiction Film. 3 Hours.

This class concentrates on how science fiction in various communication media influences and is, in turn, influenced by broad features of cultural life. The class considers the impact of science fiction on science fact, the military, space travel, religion, race, gender, social class, education, politics, technology, and fashion styles. Prerequisite: COMM 1003. (Typically offered: Fall and Spring)

COMM 3433. Family Communication. 3 Hours.

Study of the nature, functions, and management of communication patterns in the family. Focus is on understanding routine interpersonal interactions, conflict patterns, authority structures, and decision-making processes within the context of the contemporary family. Prerequisite: COMM 1023 or COMM 2323. (Typically offered: Fall)

COMM 3443. Introduction to Rhetorical Theory. 3 Hours.

Interpretive-critical study of rhetoric in public contexts. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Fall)

COMM 3503. Popular Communication and Culture. 3 Hours.

This course is an introduction to basic theories and topics of Popular Communication and Culture studies. The course will emphasize understanding popular media communication forms. Prerequisite: COMM 1233 or COMM 2813. (Typically offered: Summer)

COMM 3673. Mediated Communication. 3 Hours.

Focuses on media messages and their social/cultural effects. Includes a critical examination of media institutions and the ways they vie for audiences. Other topics include the ways people construct meaning from messages, media's influence on attitudes, media's role in cultural life, and audiences as critical consumers of media. Prerequisite: COMM 1233 or COMM 2813. (Typically offered: Fall)

COMM 3703. Organizational Communication. 3 Hours.

An introduction to the theory, processes, and management of communication in organizations, with opportunities for simulated application. Prerequisite: COMM 1023 or COMM 2343. (Typically offered: Fall)

COMM 3763. Health Communication. 3 Hours.

Examines communication within health care organizations and teams. Issues may include patient-provider communication, communication among health care professionals, negative consequences of poor communication in health care delivery, and the use of technology in health-related information dissemination and campaigns. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Fall)

COMM 3803. Survey of Social Media. 3 Hours.

Surveys research on social media, focusing on the potential cognitive, social, cultural, political, and/or economic consequences of social media and on strategies for engaging with and through social media to promote personal, social and civic goals. Pre- or Corequisite: COMM 1233 or COMM 2813. (Typically offered: Spring Odd Years)

COMM 3883. Rhetoric of Social Movements. 3 Hours.

Study of the functions of rhetoric as it appears in the context of social movements such as American independence, women's equality, civil rights, populism, and new conservatism. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)

COMM 3923H. Honors Colloquium. 3 Hours.

Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in communication). (Typically offered: Irregular) May be repeated for degree credit.

COMM 3983. Special Topics. 3 Hours.

Communication topics which are not usually presented in depth in regular courses. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

COMM 3983H. Honors Special Topics. 3 Hours.

Communication topics which are not usually presented in depth in regular courses. Prerequisite: COMM 1313, COMM 2333 and honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit. This course is equivalent to COMM 3983.

COMM 3991H. Honors Course in Communication Research. 1 Hour.

The Honors Course in Communication is the student's first step toward developing an honors thesis project. The course is designed to facilitate the exploration of potential thesis topics, selection of a viable study for the thesis, and the conceptualization of that study. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring)

COMM 4113. Legal Communication. 3 Hours.

Examines communication processes in the legal environment and focuses on communication skills and behaviors among judges, attorneys, litigants, and jurors. Particular attention will be given to verbal strategies and nonverbal messages related to interviews, negotiation, mediation, and litigation and to the rhetorical functions of legal pleadings and judicial opinions. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)

COMM 4133. Media and the Family. 3 Hours.

This course is designed to examine our culture's images, definitions, and ideas regarding family and domestic life. This examination involves a critical analysis of media messages regarding families, as well as an in-depth exploration of media's roles in daily domestic life. Prerequisite: COMM 1233 or COMM 2813. (Typically offered: Irregular)

COMM 4143. American Film Survey. 3 Hours.

A survey of major American film genres, major directors and films that have influenced the development of motion pictures. Prerequisite: COMM 1003 or permission of instructor. (Typically offered: Fall)
This course is cross-listed with ENGL 4143.

COMM 4283. Communication in Contemporary Society. 3 Hours.

An examination of research and theory on the process and effects of communication in modern society. Prerequisite: COMM 1313 and COMM 2333 or permission of instructor. (Typically offered: Irregular)

COMM 4323. Communication and Conflict. 3 Hours.

Study of the processes, effects, and managements of communicative conflict, including a consideration of conflict styles, power, goals, tactics, assessment, self-intervention and third-party intervention. Prerequisite: COMM 1023 or COMM 2323 or permission of instructor. (Typically offered: Fall)

COMM 4333. Communication and Gender. 3 Hours.

Study of the nature, construction, functions, and effects of gender and gender-role stereotypes related to verbal and nonverbal communication, small-group and organizational interaction, and mass mediated images in contemporary culture. Prerequisite: COMM 1023 or COMM 2323 or permission of instructor. (Typically offered: Fall)

COMM 4343. Intercultural Communication. 3 Hours.

Study of intercultural communication skills, intercultural issues and their impact at home and abroad, and cross-cultural comparisons of communication phenomena from a variety of theoretical perspectives. Prerequisite: COMM 1023 or COMM 2323. (Typically offered: Spring)

COMM 4353. American Public Address. 3 Hours.

Historical and critical study of the leading American speakers, their speeches, the issues with which they were identified. Lectures, discussion, reports, and critical papers. Prerequisite: COMM 1313 or COMM 2353 or instructor permission. (Typically offered: Irregular)

COMM 4363. Gender, Race and Power. 3 Hours.

Examines how communication shapes gender, race, sexuality, and power. Rather than focusing exclusively on interpersonal communication, this course looks at theories of power that shape institutional macro communication. Prerequisite: COMM 2353. (Typically offered: Irregular)
This course is cross-listed with GNST 4363.

COMM 4373. Political Communication. 3 Hours.

Study of the nature and function of the communication process as it operates in the political environment. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Spring Even Years)
This course is cross-listed with PLSC 4373.

COMM 4383. Rhetoric of the Modern American Presidency. 3 Hours.

A study of the increasing reliance of contemporary presidents on public persuasion through rhetorical discourse. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Irregular)

COMM 4393. Freedom of Speech: Cases & Issues. 3 Hours.

Study of philosophy, cases, and issues relevant to the first amendment right to the free expression, with focus on issues relevant to internal security, obscenity, pornography, slander, and the regulation of communication. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Irregular)

COMM 4433. Community Resilience. 3 Hours.

Explores communication systems, community relationships, and strategic communication processes that constitute community resilience. Introduces various methodological approaches to assessing community resilience in order to develop communication-based interventions that promote belonging, transformative potential, and social capital. Prerequisite: COMM 1023 or COMM 2343 or instructor permission. (Typically offered: Fall)

COMM 4613. Rhetoric of American Women. 3 Hours.

Examines the social and cultural assumptions that have limited the role of women in public communication. Focus is on the rhetorical biographies of selected women and their arguments on important social and political issues. Prerequisite: COMM 1313 or COMM 2353. (Typically offered: Fall)

COMM 4633. History and Development of International Film I. 3 Hours.

A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from its origins to 1975. Prerequisite: COMM 1003. (Typically offered: Irregular)

COMM 4643. Environmental Communication. 3 Hours.

Explores how communication is used by individuals, corporations, and governments to shape public debates about environmental issues. Topics include rhetorical strategies, the public's right to information and input, dispute resolution techniques, advocacy campaigns, and green marketing. Prerequisite: COMM 1313 and COMM 2333 or permission of instructor. (Typically offered: Spring)

COMM 4653. International Film II. 3 Hours.

A critical survey of international film as a distinctive art form as a medium of expression and communication with attention given to films and cinema from 1976 to the present. Prerequisite: COMM 1003. (Typically offered: Irregular)

COMM 4683. Documentary Film. 3 Hours.

A study and analysis of the documentary film as a discrete film form and as an important contribution to the international cinematic scene. Prerequisite: Advanced standing. Prerequisite: COMM 1003. (Typically offered: Fall)

COMM 4733. Reel Women. 3 Hours.

An examination of films made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women's daily lives. Prerequisite: COMM 1003. (Typically offered: Fall)
This course is cross-listed with GNST 4733.

COMM 4743. Representational Issues in Film. 3 Hours.

An examination of the varying ways that race and ethnicity, gender, sexual orientation, gender identity, class, (dis)ability, and age are represented in and by film - both historically and culturally. Prerequisite: COMM 1003. (Typically offered: Spring)
This course is cross-listed with GNST 4743.

COMM 4763. Health Communication Campaigns. 3 Hours.

Canvasses the theoretical frameworks used in the conceptualization of communication campaigns focused on health information dissemination and the purposes these campaigns serve. Students participate in a service learning project by defining campaign goals; identifying, segmenting, and assessing target audiences; and designing messages for multi-mediated health campaigns. Prerequisite: COMM 1023. (Typically offered: Spring Odd Years)

COMM 4773. Treatment of Native Americans in Film. 3 Hours.

This course compares the treatment of Native Americans in film with how representatives of this group identify themselves. Particular attention is paid to how motion pictures focusing on Native Americans produced by indigenous filmmakers compare to treatments of this people produced by Hollywood and others. Prerequisite: COMM 1003 or instructor consent. (Typically offered: Irregular)

COMM 4803. Seminar in Social Media. 3 Hours.

This class encourages in depth examination of contemporary theory and research on the potential effects of social media on cognitive, social, cultural, political, affective, and economic structures. Focus is on critical thinking and contextualization of social media. Pre- or Corequisite: COMM 1233 or COMM 2813. (Typically offered: Spring Even Years)

COMM 4823. Children and Media. 3 Hours.

An in-depth examination of children's use of media and the effects of media content on child and adolescent development. Topics may include violence and sex in media, commercialism, and new media. Prerequisite: COMM 1233 or COMM 2813. (Typically offered: Spring Odd Years)

COMM 4843. Computer-Mediated Communication. 3 Hours.

Provides an in depth consideration of the nature of computer-mediated communication by examining its use and effects in interpersonal, work, educational, and societal contexts. Prerequisite: COMM 1233 or COMM 2813 or instructor permission. (Typically offered: Spring)

COMM 4863. Seminar in Media. 3 Hours.

Research/discussion of contemporary issues in media. Emphasis on the economic and social impact of advertising, news, censorship, programs directed toward children, portrayals of women and minorities, future trends in media technologies, and analysis of the changing media landscape. Prerequisite: COMM 1233 or COMM 2813 or instructor permission. (Typically offered: Spring)

COMM 4873. International Communication and Globalization. 3 Hours.

Examines aspects of international communication and the impact of globalization on the production, dissemination, and consumption of media technology and messages. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Irregular)
This course is cross-listed with INST 4873.

COMM 4883. Television and American Culture. 3 Hours.

Historical and critical study of how television shapes American culture and is shaped by it. Attention will be given to the study of television history, programs and audiences; particularly how race and gender shape content and reception of programming. Prerequisite: COMM 1233 or COMM 2813. (Typically offered: Fall)

COMM 490V. Special Problems. 1-6 Hour.

Credit arranged. Prerequisite: COMM 2333 and at least 9 hours of COMM coursework. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

COMM 4913. Internship in Communication. 3 Hours.

Internship in applied communication within public and private organizations. Prerequisite: COMM 1313 and COMM 2333. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

COMM 499VH. Honors Thesis. 1-3 Hour.

Honors thesis under the direction of a faculty member in the Department of Communication. Pre- or Corequisite: COMM 3991H. Prerequisite: Honors standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

COMM 5111. Colloquium in Communication Research. 1 Hour.

Presentation, evaluation, and discussion of research proposals or on-going research projects. Graduate students are required to register for this course each semester of residence. (Typically offered: Fall and Spring) May be repeated for degree credit.

COMM 5113. Historical and Legal Methods in Communication. 3 Hours.

Emphasizes the assumptions and procedures of historical and legal research methods in communication. (Typically offered: Fall) May be repeated for up to 3 hours of degree credit.

COMM 5123. Quantitative Research Methods in Communication. 3 Hours.

Emphasizes the assumptions and procedures of social scientific research methods in communication. (Typically offered: Fall)

COMM 5133. Media Processes & Effects. 3 Hours.

Introduction to scholarly research and theory in media processes and effects. Particular attention will be devoted to the impact of media messages on individuals and societies. Emphasis will be placed on the construction and development of theory. (Typically offered: Fall)

COMM 5143. Ethnographic Methods in Communication. 3 Hours.

This class focuses upon the fieldwork procedures and narrative writing strategies that comprise the methods of ethnographic research in communication. Students conduct fieldwork requiring in-depth interpersonal contact with members of a group or culture, and practice narrative writing skills. (Typically offered: Fall)

COMM 5163. Introduction to Communication Paradigms. 3 Hours.

Introduces the variety of modes of inquiry used in communication. Reviews the field's history and boundaries. Explores contemporary communication research. (Typically offered: Fall)

COMM 5173. Qualitative Methods in Communication. 3 Hours.

Emphasizes the assumptions and procedures of qualitative research methods in the examination of human communication behavior. (Typically offered: Spring)

COMM 5183. Interpretive Research Methods in Communication. 3 Hours.

Examines various perspectives used to analyze and critique various texts (e.g., media programming, speeches). (Typically offered: Spring)

COMM 5193. Seminar in Communication. 3 Hours.

Research, discussion, and papers focus on one of a variety of communication topics including symbolic processes in communication, philosophy of rhetoric, communication education, criticism of contemporary communication, interpersonal communication, organizational communication, and contemporary applications of rhetoric. Maximum credit is 9 semester hours. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

COMM 5303. Seminar in Rhetorical Theory. 3 Hours.

Humanistic theories of communication and rhetoric with emphasis upon the development of rhetorical theory in the classical world and upon contributions of contemporary theorists. Prerequisite: Graduate standing. (Typically offered: Fall Even Years)

COMM 5323. Seminar in Persuasion. 3 Hours.

Focus is on comparing theoretical accounts of persuasion and research evidence concerning the effects of various factors on persuasion. (Typically offered: Fall)

COMM 5333. Interpersonal Communication Theory. 3 Hours.

Survey of the theoretical orientations in interpersonal communication with primary focus on conceptual, philosophical and research issues. (Typically offered: Fall Even Years)

COMM 5343. Interpersonal Communication. 3 Hours.

Theory and research concerning the exchange of information and the mutual influencing of behavior among people. Prerequisite: Graduate standing. (Typically offered: Fall)

COMM 5353. Rhetorical Criticism. 3 Hours.

A seminar in rhetorical criticism. A study of the development of standards of rhetorical appraisal from the foundations of the art of speaking to the modern period; examination of contemporary approaches to rhetorical appraisal and practice in critical analysis of contemporary address. (Typically offered: Irregular)

COMM 5373. Content Analysis. 3 Hours.

Techniques for observing and analyzing the overt communication behavior of selected communicators. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5383. Seminar in Political Communication. 3 Hours.

Research seminar focusing on selected topics such as candidate imagery, diffusion of political information, or political symbolism. Prerequisite: Graduate standing. (Typically offered: Irregular)
This course is cross-listed with PLSC 5383.

COMM 5403. Organizational Communication Theory. 3 Hours.

A seminar on the historical development of theory and research into communication processes occurring within an organizational setting. Lecture, discussion, oral and written reports. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5413. Organizational Communication Research. 3 Hours.

A seminar on conducting applied research within an organizational setting. Prerequisite: COMM 5403 and graduate standing. (Typically offered: Summer)

COMM 5423. Seminar in Mass Media Cognition. 3 Hours.

Seminar exploring how people learn from written, aural and visual mass media messages. Topics to include attention, memory, comprehension, emotional response, arousal, unconscious processing, picture perception and person perception. Seminar will be concerned with most popular media (e.g., television radio, newspaper, and film), and with several content genres (e.g., entertainment, news, advertising). (Typically offered: Spring Even Years)

COMM 5433. Marital Communication. 3 Hours.

An exploration of the major theories and lines of research that examine marital communication in contemporary American life. (Typically offered: Irregular)

COMM 5443. Issues of Race and Gender in Interpersonal Communication. 3 Hours.

An exploration of the major theories and lines of research that examine how race and gender influence interpersonal communication in everyday life in America. (Typically offered: Spring Odd Years)

COMM 5453. Myth and Communication Criticism. 3 Hours.

Seminar in major theories of mythology, including archetypal and ideological perspectives, and their applications to the criticism of public communicative events. Practice in written critical analysis. Prerequisite: Graduate standing. (Typically offered: Irregular)

COMM 5463. Descriptive Linguistics. 3 Hours.

A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Fall)
This course is cross-listed with WLLC 5463, ANTH 5473, ENGL 5463.

COMM 5473. Treatment of Native Americans in Film. 3 Hours.

Compares the treatment of Native Americans in film with how representatives of this group identify themselves. Will also focus on motion pictures relating to Native Americans produced by indigenous filmmakers. (Typically offered: Irregular)

COMM 5503. Communication and Cultural Studies. 3 Hours.

Examinations of the role of communication in modern culture. Emphasis is upon the production and circulation of meanings with society, and special attention is given to the role of popular and mass media in this process. Prerequisite: Graduate standing. (Typically offered: Fall)

COMM 5513. Sustainability and Communication. 3 Hours.

Communication's role in creating and conveying an organization's environmental sustainability philosophy and initiatives. Discusses internal communication when establishing and communicating sustainability goals and initiatives. Covers communicating sustainability to external groups through websites, sustainability reports, and advocacy initiatives. For profit, nonprofit, governmental, NGOs, and/or advocacy organizations discussed. (Typically offered: Fall Even Years)

COMM 5533. Family Communication. 3 Hours.

An exploration of the major theories and lines of research that examine family communication in contemporary American life. (Typically offered: Fall Even Years)

COMM 569V. Seminar in Film Studies. 1-3 Hour.

Research, discussion; papers on a variety of film genres and areas including the new American film, the science-fiction film, directors, film comedy, the experimental film, criticism, and the film musical. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is cross-listed with ENGL 569V.

COMM 5763. Health Communication. 3 Hours.

Examines the difficulties of effective communication between health care providers and recipients including the following: issues of social support, conveying bad news, cultural issues, and identifying relevant communication skills associated with effective health care provision. Explores medical education models for training in effective patient-provider communication. (Typically offered: Irregular)

COMM 5823. Political Communication. 3 Hours.

Covers contemporary political communication theory and applies them to understand modern political campaigns. Topics covered include the rhetoric of politics, political advertising, the role of the media and public opinion, the impact of new technology, campaign speech genres, political debates, and the role of social identity in presidential campaigns. (Typically offered: Irregular)

COMM 5833. The Rhetoric of the Modern American Presidency. 3 Hours.

Study contemporary presidents' reliance on public persuasion, especially in efforts to bypass Congress and accomplish complicated political goals. Explore the origins of the concept of the "rhetorical presidency," specifically how it developed and changed the nature of the executive branch of government. Examine major genres of modern presidential rhetoric illustrating that trend. (Typically offered: Irregular)

COMM 5843. Legal Communication. 3 Hours.

Examines communication processes in the legal environment and focuses on communication skills and behaviors among judges, attorneys, litigants, and jurors. Particular attention will be given to verbal strategies and nonverbal messages related to interviews, negotiation, mediation, and litigation and to the rhetorical functions of legal pleadings and judicial opinions. (Typically offered: Irregular)

COMM 5853. American Film Survey. 3 Hours.

A survey of major American film genres, major directors and films that have influenced the development of motion pictures. (Typically offered: Fall and Summer)

COMM 5863. History and Development of International Film I. 3 Hours.

A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from its origins to 1975. (Typically offered: Irregular)

COMM 5873. History and Development of International Film II. 3 Hours.

A critical survey of international film as a distinctive art form and as a medium of expression and communication with attention given to films and cinema from 1975 to the present. (Typically offered: Irregular)

COMM 590V. Special Problems. 1-6 Hour.

Credit by arrangement. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

COMM 5913. Internship in Communication. 3 Hours.

Internship in applied communication within public and private organizations. Prerequisite: 15 hours graduate level communication in residence. (Typically offered: Fall, Spring and Summer)

COMM 5923. Capstone Course in Communication. 3 Hours.

Students organize and synthesize knowledge developed throughout their graduate coursework into a tangible capstone product which becomes part of their professional portfolio. (Typically offered: Fall, Spring and Summer)

COMM 5993. Readings In Cultural Studies. 3 Hours.

Classic and current theoretical approaches to cultural studies. Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular)

COMM 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for degree credit.

Communication Disorders (CDIS) Courses

CDIS 2253. Introduction to Communicative Disorders. 3 Hours.

An introductory course which surveys the professional interests of speech-language pathology and audiology with specific attention to the general recognition and classification of disorders of speech, language, and hearing, and general trends in rehabilitation. Consideration given to the classroom teacher's involvement in communication disorders. (Typically offered: Fall and Spring)

CDIS 2901H. Honors Introduction to Research in Communication Sciences and Disorders. 1 Hour.

This course introduces students to the research process in the field of communication sciences and disorders. Prerequisite: Acceptance into the COEHP Honors Program and instructor consent. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

CDIS 3103. Introduction to Audiology. 3 Hours.

Introduction to the basic concepts for administering and interpreting hearing tests, including the anatomy and physiology of the auditory system, disorders of the ear, and techniques for administering and interpreting basic pure tone threshold tests. Prerequisite or Corequisite: PHYS 1023 and PHYS 1021L, PHYS 2013 and PHYS 2011L or CHEM 1073 and CHEM 1071L. (Typically offered: Fall)

CDIS 3124. Normal Phonology and Articulatory Process. 4 Hours.

Analysis of the English speech sounds as a basis for speech improvement; physiological positions and movements; acoustic qualities and transcription in the international phonetic alphabet. Corequisite: Lab component. Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall)

CDIS 3203. Articulation Disorders. 3 Hours.

A study of the definition, etiology, pathology, and treatment procedures of problems of articulation. Prerequisite: CDIS 3124, CDIS 3213 and CDISBS major or departmental consent. (Typically offered: Spring)

CDIS 3213. Anatomy of Physiology of the Speech and Hearing Mechanisms. 3 Hours.

Structure and function of the organic mechanisms responsible for speech, language, and audition. Pre or Corequisite: BIOL 1543 and BIOL 1541L or higher. Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall)

CDIS 3223. Language Development in Children. 3 Hours.

Study of typical development of speech and language functions for communicative purposes in children from infancy to early school-age years, including the major components of language as well as the social, cognitive, biological and cultural factors related to language acquisition. Pre- or Corequisite: PSYC 2003. Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall)

CDIS 3223H. Honors Language Development in Children. 3 Hours.

Study of typical development of speech and language functions for communicative purposes in children from infancy to early school-age years, including the major components of language as well as the social, cognitive, biological, and cultural factors related to language acquisition. Pre- or Corequisite: PSYC 2003. Prerequisite: Honors candidacy and CDISBS major or departmental consent. (Typically offered: Fall)

This course is equivalent to CDIS 3223.

CDIS 3233. Introduction to Clinical Practice. 3 Hours.

An introduction to the various aspects of clinical operations including technical and interpersonal relationship skills necessary for case management and a survey of professional standards. Pre- or Corequisite: COMM 1313. Prerequisite: CDISBS major or departmental consent. (Typically offered: Spring)

CDIS 3253. Cultural Diversity in Communication Disorders. 3 Hours.

An introduction to various cultures, customs, and professional standards in health-related fields that helps to develop intercultural communication skills necessary to manage the increasingly diverse caseloads of health-related professionals. Pre- or Corequisite: COMM 1313. Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall)

CDIS 3901H. Honors Communication Disorders Thesis Tutorial. 1 Hour.

Designed to provide the foundation for the Honors Thesis/Project. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and CDISBS major. (Typically offered: Fall, Spring and Summer)

CDIS 3923H. Honors Colloquium. 3 Hours.

Treats a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in speech or dramatic art). (Typically offered: Irregular) May be repeated for degree credit.

CDIS 399VH. Honors Course. 1-6 Hour.

Honors course. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

CDIS 4001. Clinical Practicum Undergrad. 1 Hour.

Entry-level training in speech-language clinical practicum activities. This course is taken for satisfactory or unsatisfactory credit. Prerequisite: CDIS 3124 and CDIS 3203 and CDIS 3223 and CDIS 3233 plus satisfactory completion of specific program requirements for admission to clinical practice. (Typically offered: Fall and Spring)

CDIS 4103. Sign Language and Deafness. 3 Hours.

An introduction to American Sign Language (ASL) and the Deaf Community that uses it. This class will study expressive and sign language skills using ASL vocabulary, structure and grammar. The Deaf Community will be studied through videotapes and readings. Issues in Deaf Education will also be introduced. (Typically offered: Fall, Spring and Summer)

CDIS 4133. Introduction to Aural Rehabilitation. 3 Hours.

Study of the technique used in the rehabilitation of speech and language problems of the hearing impaired including the role of amplification, auditory training, and speech reading in rehabilitation. Prerequisite: CDIS 3103. (Typically offered: Spring)

CDIS 4183. Clinical Assessment of Speech and Language Disorders. 3 Hours.

Study of the basic diagnostic procedures used in speech-language pathology. Emphasis is placed on the clinical processes of assessment, including criteria for test selection, techniques in test administration, and interpretation of test. Pre- or Corequisite: Prior coursework in CDIS and ANTH 1023. Prerequisite: CDISBS major or departmental consent. (Typically offered: Spring)

CDIS 4213. Introduction to Speech and Hearing Science. 3 Hours.

Study of the acoustic structure of oral speech and the auditory skills underlying speech perception. Prerequisite: CDIS 3203, CDIS 3213, CDIS 3124 and its lab component and CDISBS major or departmental consent. Pre- or Corequisite: MATH 1203 or higher. (Typically offered: Spring)

CDIS 4223. Language Disorders in Children. 3 Hours.

Study of disorders of language acquisition and usage in children and adolescents, with emphasis upon the nature, assessment, and treatment of such disorders. Prerequisite: CDIS 3223 and CDISBS major or departmental consent. (Typically offered: Spring)

CDIS 4253. Neurological Bases of Communication. 3 Hours.

A study of the structures and functions of the central and peripheral nervous systems as they relate to human speech, language, and cognition. Prerequisite: CDIS 3213 and CDISBS major or departmental consent. (Typically offered: Fall)

CDIS 4263. Advanced Audiology. 3 Hours.

Study of the basic techniques used in audiological assessment of children and adults, including pure tone audiometry, speech audiometry, and special tests of hearing function. Prerequisite: CDIS 3103. (Typically offered: Fall)

CDIS 4273. Communication Behavior and Aging. 3 Hours.

Study of the effects upon communication of normal aspects of the aging process, from early adulthood throughout the lifespan. Changes in speech, language, and hearing functioning are identified; common alterations in communicative disorders commonly associated with advanced age are discussed. Prerequisite: CDISBS major or departmental consent. (Typically offered: Fall)

CDIS 490V. Special Problems. 1-3 Hour.

Special problems. Prerequisite: Advanced standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CDIS 498VH. Honors Communication Disorders Thesis/Project. 1-3 Hour.

Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, CDISBS major, and CDIS 3901H. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CDIS 5103. Research Methodology in Communication Disorders. 3 Hours.

An examination of methods of research in speech-language pathology and audiology and of the use of bibliographic tools. Focuses on purposes and problems of various forms of communication disorders research, procedures and instruments employed, and reporting of research. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5113. Seminar in Early Intervention. 3 Hours.

Study of a family-centered, transdisciplinary approach to early intervention with infants and toddlers at-risk for communication disorders. Topics include early communication development, service delivery in a family context, coordination with other disciplines, legislation mandating services, and providing services to children with multiple disabilities. Prerequisite: CDIS 3223 or equivalent, and graduate standing. (Typically offered: Spring)

CDIS 5121L. Feeding and Swallowing Disorders Lab. 1 Hour.

Observation and interpretation of techniques used for assessment and remediation of feeding and swallowing disorders in children and adults. Corequisite: CDIS 5122. Prerequisite: CDIS 3213 and graduate standing. (Typically offered: Fall)

CDIS 5122. Feeding and Swallowing Disorders. 2 Hours.

Study of the etiology, assessment, and remediation of feeding and swallowing disorders in children and adults. Prerequisite: CDIS 3213 or equivalent, and graduate standing. (Typically offered: Fall)

CDIS 5143. Cognitive-Communication Development and Disorders. 3 Hours.

Study of normal cognitive development, the role of communication in this development, and shifts that may occur in conjunction with various speech, language and/or hearing disorders. Prerequisite: CDIS 3223. (Typically offered: Fall)

CDIS 5153. TBI and Right-Hemisphere Disorders. 3 Hours.

Study of the speech and language disorders commonly resulting from traumatic brain injury and right hemisphere disorders. Prerequisite: CDIS 4253 or equivalent, and graduate standing. (Typically offered: Spring)

CDIS 5163. Seminar in Language Topics. 3 Hours.

Study of selected topics in normal and disordered language acquisition and/or language use. Implications of current research are reviewed and applied to evaluation and management of language impairment(s). Prerequisite: Graduate standing. (Typically offered: Irregular)

CDIS 5173. Sign Language and Deafness. 3 Hours.

(Formerly CDIS 4103.) An introduction to American Sign Language (ASL) and the Deaf Community that uses it. This class will study expressive and sign language skills using ASL vocabulary, structure and grammar. The Deaf Community will be studied through videotapes and readings. Issues in Deaf Education will also be introduced. Graduate degree credit will not be given for both CDIS 4103 and CDIS 5173. (Typically offered: Fall, Spring and Summer)

CDIS 5181. Advanced Clinical Practicum I. 1 Hour.

Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5193. Seminar in Problems of Oral Communication. 3 Hours.

Investigation of research in selected problems of oral communication; recent developments in speech-language pathology and audiology; individual problems for investigation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

CDIS 5203. Introduction to Aural Rehabilitation. 3 Hours.

(Formerly CDIS 4133.) Study of the technique used in the rehabilitation of speech and language problems of the hearing impaired including the role of amplification, auditory training, and speech reading in rehabilitation. Graduate degree credit will not be given for both CDIS 4133 and CDIS 5203. Prerequisite: CDIS 3103. (Typically offered: Spring)

CDIS 5213. Voice and Resonance Disorders. 3 Hours.

Study of disorders of phonation and resonance, including etiologies, diagnosis, and intervention strategies. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5223. Fluency Disorders. 3 Hours.

An examination of fluency disorders including theory, etiological factors, and development. In addition, the course is designed to address assessment and management of fluency disorders consistent with evidence-based practice for prospective speech-language pathologists. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5233. Speech Sound Disorders. 3 Hours.

Assessment and treatment of disorders in speech articulation. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5243. Language Disorders in Adults. 3 Hours.

Cognitive and communicative breakdown due to neurological trauma, including etiology, characteristics, assessment and treatment for aphasia, traumatic brain injury, and right hemisphere disorders. Prerequisite: Graduate standing. (Typically offered: Spring)

CDIS 5253. Motor Speech Disorders. 3 Hours.

Study of motor speech production disorders related to damage to central or peripheral nervous system motor centers and pathways. Cerebral palsy, adult dysarthria, apraxia, and dysphagia are emphasized. Both theoretical and treatment considerations are addressed. Prerequisite: CDIS 4253 or equivalent, and graduate standing. (Typically offered: Spring)

CDIS 5263. Advanced Audiology. 3 Hours.

(Formerly CDIS 4263.) Study of the basic techniques used in audiological assessment of children and adults, including pure tone audiometry, speech audiometry, and special tests of hearing function. Graduate degree credit will not be given for both CDIS 4263 and CDIS 5263. Prerequisite: CDIS 3103. (Typically offered: Fall)

CDIS 5273. Language, Learning and Literacy. 3 Hours.

An examination of language-based literacy skills, including consideration of development, disorders, assessment and intervention. (Typically offered: Summer)

CDIS 5281. Advanced Clinical Practicum II. 1 Hour.

Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5181. (Typically offered: Spring)

CDIS 5293. Augmentative and Alternative Communication. 3 Hours.

Approaches to communication management with the severely and profoundly handicapped child or adult, with primary emphasis on augmentative and alternative communication assessment and intervention. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5303. Clinical Assessment of Speech and Language Disorders. 3 Hours.

(Formerly CDIS 4183.) Study of the basic diagnostic procedures used in speech-language pathology. Emphasis is placed on the clinical processes of assessment, including criteria for test selection, techniques in test administration, and interpretation of test. Graduate degree credit will not be given for both CDIS 4183 and CDIS 5303. Pre- or Corequisite: Prior coursework in CDIS and ANTH 1023. (Typically offered: Spring)

CDIS 5313. Introduction to Speech and Hearing Science. 3 Hours.

(Formerly CDIS 4213.) Study of the acoustic structure of oral speech and the auditory skills underlying speech perception. Graduate degree credit will not be given for both CDIS 4213 and CDIS 5313. Prerequisite: CDIS 3203, CDIS 3213, CDIS 3124 and its lab component. Pre- or Corequisite: MATH 1203 or higher. (Typically offered: Spring)

CDIS 5323. Language Disorders in Children. 3 Hours.

(Formerly CDIS 4223.) Study of disorders of language acquisition and usage in children and adolescents, with emphasis upon the nature, assessment, and treatment of such disorders. Graduate degree credit will not be given for both CDIS 4223 and CDIS 5323. Prerequisite: CDIS 3223. (Typically offered: Spring)

CDIS 5353. Neurological Bases of Communication. 3 Hours.

(Formerly CDIS 4253.) A study of the structures and functions of the central and peripheral nervous systems as they relate to human speech, language, and cognition. Graduate degree credit will not be given for both CDIS 4253 and CDIS 5353. Prerequisite: CDIS 3213. (Typically offered: Fall)

CDIS 5373. Communication Behavior and Aging. 3 Hours.

(Formerly CDIS 4273.) Study of the effects upon communication of normal aspects of the aging process, from early adulthood throughout the lifespan. Changes in speech, language, and hearing functioning are identified; common alterations in communicative disorders commonly associated with advanced age are discussed. Graduate degree credit will not be given for both CDIS 4273 and CDIS 5373. (Typically offered: Fall)

CDIS 5381. Advanced Clinical Practicum III. 1 Hour.

Practicum activities in speech-language assessment and intervention. Prerequisite: Graduate standing and CDIS 5281. (Typically offered: Summer)

CDIS 5391. Clinical Practicum: Hearing Disorders. 1 Hour.

Practicum in audiology. (Typically offered: Fall, Spring and Summer)

CDIS 548V. Off-Campus Practicum: Public School Site. 1-6 Hour.

Practicum activities in speech-language disorders in a public school setting. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CDIS 5511. Professional Issues I. 1 Hour.

Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders. (Typically offered: Fall)

CDIS 5521. Professional Issues II. 1 Hour.

Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders. (Typically offered: Spring)

CDIS 5531. Professional Issues III. 1 Hour.

Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Graduate standing in communication disorders. (Typically offered: Fall)

CDIS 558V. Internship: Clinical Site. 3-6 Hour.

Field placement in approved clinical setting for clock hours in speech-language pathology assessment and treatment. Students in the master's program must enroll in a minimum of 3 credit hours of CDIS 558V or CDIS 578V during their last semester of graduate studies. Prerequisite: Graduate standing; Completion of one semester of either CDIS 548V or CDIS 568V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 568V. Off-Campus Practicum: Clinical Site. 1-6 Hour.

Practicum activities in speech-language disorders in an off-campus clinical site. Prerequisite: Graduate standing and completion of at least 2 semesters of CDIS 5281. (Typically offered: Fall, Spring and Summer)

CDIS 578V. Internship: Public School Site. 3-6 Hour.

Field placement in approved public school setting for clock hours in speech-language pathology assessment and treatment. Students in the Master's program must enroll in a minimum of 3 credit hours of CDIS 578V or CDIS 558V during their last semester of graduate studies. Prerequisite: Graduate standing; Completion of one semester of either CDIS 548V or CDIS 568V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 5813. Advanced Auditory (Re)Habilitation. 3 Hours.

This course provides students with an in-depth knowledge of hearing anatomy and physiology as well as current hearing and hearing assistive technologies. The development of auditory skills across the lifespan will be discussed as well as intervention techniques to facilitate auditory, speech, and spoken language skills across the lifespan. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5823. Language Learning with Multiple Disabilities. 3 Hours.

Approaches to services (assessment and intervention) for individuals who, as a result of multiple disabilities, are in the beginning stages of language development including the preintentional and presymbolic stages. Prerequisite: Graduate standing. (Typically offered: Fall)

CDIS 5843. Communication and Swallowing in Dementia. 3 Hours.

This course provides an in-depth examination of the communication and feeding/swallowing factors demonstrated by patients with dementia. Etiologies, symptoms, progression, evaluation, and appropriate interventions for of the most common forms of dementia are addressed. Prerequisite: Graduate standing. (Typically offered: Summer)

CDIS 5883. Policies & Procedures in Educational Speech-Language Pathology. 3 Hours.

Educational Speech Pathology is designed to familiarize the student the factors related to functioning as an SLP in an educational setting, including state and federal regulations/standards, service delivery considerations, eligibility criteria, and documentation. Prerequisite: Graduate Standing. (Typically offered: Summer)

CDIS 590V. Special Problems. 1-6 Hour.

Special problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CDIS 599V. Seminar in Professional Issues. 1-3 Hour.

Selected topics in professional issues in speech-language pathology and audiology. (Typically offered: Fall and Spring)

CDIS 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CDIS 699V. Seminar in Communication Sciences and Disorders. 1-6 Hour.

Discussion of pertinent topics and issues in the discipline of communication sciences and disorders. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

Community College Leadership (CCLE)

Community Health Promotion (CHLP)

Courses

CHLP 310V. Health Coaches I. 1-3 Hour.

This course, designed for students whose career goals are focused on community/healthcare service, is a study of key issues concerning community health care, aimed at developing practical approaches to supporting patients. Students study the medical, social, cultural, and economic challenges as well as opportunities that exist within evolving health care systems, and consider how these forces, in addition to behavioral and psychological factors, affect health outcomes of individual patients. Obstacles to effective health care as well as strategies for enabling at-risk patients to play more active roles in promoting their health and well-being are key issues. This course provides students with the academic foundation for the field-based Health Coaches II and III. (Typically offered: Fall and Spring)

CHLP 320V. Health Coaches II. 1-3 Hour.

Health Coaches II is the field-based second course in the three-course Health Coaches sequence. Health Coaches will become engaged in the processes of educating and motivating identified at risk patients to take an active and meaningful role in their health and well-being. Students are required to make scheduled visits to their assigned patients' homes, potentially attend doctor appointments with the patient, engage in phone interactions with patients and the healthcare team as needed, and meet face-to-face weekly with the care coordination healthcare team to discuss patient experiences and strategies for optimizing healthcare outcomes for individual patients. Prerequisite: CHLP 310V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CHLP 330V. Health Coaches III. 1-3 Hour.

Health Coaches III is the field-based third course in the three-course Health Coaches sequence. Health Coaches will to continue to be engaged in the processes of educating and motivating identified at risk patients to take an active and meaningful role in their health and well-being through scheduled visits to their assigned patients' homes or by phone, potentially attending doctor appointments with the patient, and participating in face-to-face weekly with the care coordination healthcare team to discuss patient experiences and strategies for optimizing healthcare outcomes for individual patients. In addition, students at this level will provide leadership within student care teams and provide community outreach under the direction of the professional healthcare team. Prerequisite: CHLP 310V and CHLP 320V. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

Computer Science and Computer Engineering (CSCE)

Courses

CSCE 2004. Programming Foundations I. 4 Hours.

Introductory programming course for students majoring in computer science or computer engineering. Software development process: problem specification, program design, implementation, testing and documentation. Programming topics: data representation, conditional and iterative statements, functions, arrays, strings, file I/O and classes. Using C++ in a UNIX environment. Corequisite: Lab component. Prerequisite: MATH 2445 or MATH 2554 or MATH 2554C with a grade of C or better. (Typically offered: Fall and Spring)

CSCE 2014. Programming Foundations II. 4 Hours.

This course continues developing problem solving techniques by focusing on fundamental data structures and associated algorithms. Topics include: abstract data types, introduction to object-oriented programming, linked lists, stacks, queues, hash tables, binary trees, graphs, recursion, and searching and sorting algorithms. Using C++ in a UNIX environment. Corequisite: Lab component. Prerequisite: CSCE 2004 with a grade of C or better. (Typically offered: Fall and Spring)

CSCE 2114. Digital Design. 4 Hours.

Introduction to the hardware aspects of digital computers, logic gates, flip-flops, reduction, finite state machines, sequential logic design, digital systems, software design tools, hardware description language (VHDL), and implementation technologies. Corequisite: Lab component. Prerequisite: MATH 2554 or MATH 2554C with a grade of C or better. (Typically offered: Fall and Spring)

This course is cross-listed with ELEG 2904.

CSCE 2214. Computer Organization. 4 Hours.

Presents the relationship between computing hardware and software with a focus on the concepts for current computers. CPU design topics are covered including various techniques for microprocessor design and performance evaluation. Corequisite: Lab component. Prerequisite: CSCE 2114 with a grade of C or better. (Typically offered: Fall and Spring)

CSCE 3193. Programming Paradigms. 3 Hours.

Programming in different paradigms with emphasis on object oriented programming and network programming. Survey of programming languages, event driven programming, and concurrency. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Fall and Spring)

CSCE 3193H. Honors Programming Paradigms. 3 Hours.

Programming in different paradigms with emphasis on object oriented programming and network programming. Survey of programming languages, event driven programming, and concurrency. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Fall)

This course is equivalent to CSCE 3193.

CSCE 3213. Cluster Computing. 3 Hours.

Cluster computing solves problems too large in terms of memory or run time for a single workstation. Common approaches to these problems combine the resources of multiple computers to collectively find the solution. High performance computing is quickly expanding to areas including: chemistry, physics, mathematics, engineering, bio-informatics, finance, logistics, etc. (Typically offered: Irregular)

CSCE 3513. Software Engineering. 3 Hours.

A modern approach to the current techniques used in software design and development. This course emphasizes the use of modern software development tools, multi-module programming, and team design and engineering. Prerequisite: CSCE 3193 or CSCE 3193H with a grade of C or better. (Typically offered: Fall and Spring)

CSCE 3613. Operating Systems. 3 Hours.

An introduction to operating systems including topics in system structures, process management, storage management, files, distributed systems, and case studies. Prerequisite: CSCE 2014 and CSCE 2214, each with a grade of C or better. (Typically offered: Fall and Spring)

CSCE 3613H. Honors Operating Systems. 3 Hours.

An introduction to operating systems including topics in system structures, process management, storage management, files, distributed systems, and case studies. Prerequisite: CSCE 2014 and CSCE 2214, each with a grade of C or better. (Typically offered: Spring)

This course is equivalent to CSCE 3613.

CSCE 3953. System Synthesis and Modeling. 3 Hours.

This course instructs the students in the use of modern synthesis and modeling languages and approaches for design automation. This course will teach students the use of HDLs and modeling languages for representing and implementing digital computer systems. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Fall)

CSCE 4013. Special Topics. 3 Hours.

Consideration of computer science topics not covered in other courses. Prerequisite: CSCE 3193 and CSCE 2214. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

CSCE 4023H. Honors Special Topics. 3 Hours.

Consideration of current computer engineering honors topics not covered in other courses. Prerequisite: Honors standing. (Typically offered: Irregular)

CSCE 4043. RFID Information Systems Security. 3 Hours.

Radio frequency identification (RFID) information systems provide information to users about objects with RFID tags. They require the application of information systems security (INFOSEC) to protect the information from tampering, unauthorized information disclosure, and denial of service to authorized users. This course addresses security and privacy in an RFID system. Prerequisite: INEG 2313. (Typically offered: Irregular)

CSCE 4114. Embedded Systems. 4 Hours.

The architecture, software, and hardware of embedded systems. Involves a mixture of hardware and software for the control of a system (including electrical, electro-mechanical, and electro-chemical systems). They are found in a variety of products including cars, VCRs, HDTVs, cell phones, pacemakers, spacecraft, missile systems, and robots for factory automation. Corequisite: Lab component. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Fall)

CSCE 4123. Programming Challenges. 3 Hours.

This course studies the principle methods used in the solution of programming contest problems, e.g., data structures strings, sorting, machine arithmetic and algebra, combinatorics, number theory, backtracking, graph traversal, graph algorithms, dynamic programming, grids, and computational geometry. Prerequisite: CSCE 2014. (Typically offered: Irregular)

CSCE 4133. Algorithms. 3 Hours.

Provides an introduction to formal techniques for analyzing the complexity of algorithms. The course surveys important classes of algorithms used in computer science and engineering. Prerequisite: CSCE 3193 and (MATH 2603 or MATH 2803) or MATH 4423. (Typically offered: Fall)

CSCE 4143. Data Mining. 3 Hours.

Topics include data preprocessing; data warehousing and online analytical processing; data cube; mining frequent patterns, associations and correlations; supervised learning including decision tree induction, naïve Bayesian classification, support vector machine and K-nearest neighbor learning; unsupervised learning including K-means clustering and hierarchical clustering; outlier analysis; and data mining in cloud computing, social media, bioinformatics and healthcare applications. Prerequisite: CSCE 4133 and INEG 2313. (Typically offered: Fall)

CSCE 4213. Computer Architecture. 3 Hours.

The architecture of modern scalar and parallel computing systems. Techniques for dynamic instruction scheduling, branch prediction, instruction level parallelism, shared and distributed memory multiprocessor systems, array processors, and memory hierarchies. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Spring)

This course is cross-listed with ELEG 4983.

CSCE 4233. Low Power Digital Systems. 3 Hours.

The reduction of power consumption is rapidly becoming one of the key issues in digital system design. Traditionally, digital system design has mainly focused on performance and area trade-offs. This course will provide a thorough introduction to digital design for lower consumption at the circuit, logic, and architectural level. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular)

CSCE 4253. Concurrent Computing. 3 Hours.

Programming concurrent processes; computer interconnection network topologies; loosely coupled and tightly coupled paralleled computer architectures; designing algorithms for concurrency; distributed computer architectures. Prerequisite: CSCE 3193. (Typically offered: Irregular)

CSCE 4263. Advanced Data Structures. 3 Hours.

This course continues the study of data structures, algorithmic analysis for these data structures, and their efficient implementation to support standard library in programming languages. Topics include: AVL trees, Red-Black trees, Splay trees, Optimal Binary Search trees, 2-3 tree, 2-3-4 tree, B-trees, Segment trees, Leftist Heaps, Binomial Heaps, Fibonacci Heap, Disjoint Set, Hashing, and big integer with hundreds to thousands of digits. Prerequisite: CSCE 3193. (Typically offered: Irregular)

CSCE 4323. Formal Languages and Computability. 3 Hours.

Finite Automata and regular languages, regular expressions, context-free languages and pushdown automata, nondeterminism, grammars, and Turing machines. Church's thesis, halting problem, time complexity, space complexity and undecidability. Prerequisite: MATH 2603 and CSCE 3193. (Typically offered: Spring)

CSCE 4333. Introduction to Integrated Circuit Design. 3 Hours.

Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design and layout strategies for large scale CMOS circuits. Students may not receive credit for both CSCE 4333 and CSCE 5223. Prerequisite: ELEG 3214 or ELEG 3933 and MATH 2584 (Typically offered: Fall)

CSCE 4353. CPLD/FPGA-Based System Design. 3 Hours.

Field Programmable Logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular) This course is cross-listed with ELEG 4963.

CSCE 4423. Computer Systems Modeling. 3 Hours.

Basic concepts of problem analysis, model design, and simulation experiments. A simulation will be introduced and used in this course. Prerequisite: CSCE 2014 with a grade of C or better and INEG 2313. (Typically offered: Irregular)

CSCE 4433. Cryptography. 3 Hours.

This course provides a general introduction to modern cryptography. Topics include: stream ciphers, block ciphers, message authentication codes, public key encryption, key exchange, and signature schemes. Prerequisite: CSCE 2014 with a grade of C or better and (MATH 2603 or MATH 2803). (Typically offered: Irregular)

CSCE 4523. Database Management Systems. 3 Hours.

Introduction to database management systems, architecture, storage structures, indexing, relational data model, E-R diagrams, query languages, SQL, ODBC, transaction management, integrity, and security. Prerequisite: CSCE 3193 or CSCE 3193H with a C or better. (Typically offered: Spring)

CSCE 4543. Software Architecture. 3 Hours.

A study of software architecture through the use of case studies drawn from real systems designed to solve real problems from technical as well as managerial perspectives. Techniques for designing, building, and evaluating software architectures. Prerequisite: CSCE 4133 and CSCE 3513. (Typically offered: Irregular)

CSCE 4561. Capstone I. 1 Hour.

CSCE students complete a comprehensive software capstone project during their final year of undergraduate studies. The project is done over 2 semesters in phases: concept, formal proposal, implementation, and presentation. The projects include and may require the integration of software and human factors and hardware elements and are developed to software engineering methodologies. Prerequisite: CSCE 3513 and (CSCE 3613 or CSCE 3613H) and completion of 96 credit hours. (Typically offered: Fall)

CSCE 4613. Artificial Intelligence. 3 Hours.

Introduction to intelligent agents, AI languages, search, first order logic, knowledge representation, ontologies, problem solving, natural language processing, machine vision, machine learning, and robotics. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 4623. Mobile Programming. 3 Hours.

An introduction to software development on mobile devices. The major topics covered in this course include underlying concepts and principles in mobile programming, as well as hands-on programming experience on mobile devices with an emphasis on smartphones. Prerequisite: CSCE 3193 or CSCE 3193H. (Typically offered: Irregular)

CSCE 4643. Graphics Processing Units Programming. 3 Hours.

This course provides an introduction to massively parallel programming using Graphics Processing Units (GPUs). Topics include basic programming model, GPU thread hierarchy, GPU memory architecture, and performance optimization techniques and parallel patterns needed to develop real-life applications. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 4753. Computer Networks. 3 Hours.

This course is an introductory course on computer networks. Using the Internet as a vehicle, this course introduces underlying concepts and principles of modern computer networks, with emphasis on protocols, architectures, and implementation issues. Prerequisite: INEG 2313. (Typically offered: Irregular)

CSCE 4813. Computer Graphics. 3 Hours.

Introduction to the theory and algorithms used in computer graphics systems and applications. Topics include: 2D and 3D geometric models (points, lines, polygons, surfaces), affine transformations (rotation, translation, scaling), viewpoint calculation (clipping, projection), lighting models (light-material interactions, illumination and shadow calculation). Students will implement their own graphics pipeline to demonstrate many of these techniques. Higher level computer graphics applications will be created using OpenGL. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 4853. Information Security. 3 Hours.

This course covers principles, mechanisms, and policies governing confidentiality, integrity, and availability of digital information. Topics to be covered include security concepts and mechanisms, security policies, multilevel security models, system vulnerability, threat and risk assessment, basic cryptography and its applications, intrusion detection systems. Prerequisite: CSCE 3193 or CSCE 3193H. (Typically offered: Irregular)

CSCE 490V. Individual Study. 1-3 Hour.

Individual study directed by faculty in current research topics, state of the art, or advanced methodology in one of the major computer science or computer engineering areas. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

CSCE 4914. Advanced Digital Design. 4 Hours.

To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Corequisite: Lab component. Prerequisite: CSCE 2114 or ELEG 2904. (Typically offered: Irregular) This course is cross-listed with ELEG 4914.

CSCE 491VH. Honors Thesis. 1-3 Hour.

To provide honors students with experience in presenting their research accomplishments to their peers and faculty. Prerequisite: Honors standing. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

CSCE 4963. Capstone II. 3 Hours.

CSCE students complete a comprehensive capstone project during their final year of undergraduate studies. The project is done over two consecutive semesters in phases: concepts, formal proposal, implementation, and presentation. The projects include and may require the integration of software, human factors, and hardware elements and are developed using software engineering methodologies. Prerequisite: CSCE 4561. (Typically offered: Spring)

CSCE 5013. Advanced Special Topics in Computer Science or Computer Engineering. 3 Hours.

Consideration of current computer engineering or computer science topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

CSCE 5033. Advanced Algorithms. 3 Hours.

Design of computer algorithms, with primary emphasis on the development of efficient implementation. (Typically offered: Irregular)

CSCE 5043. Advanced Artificial Intelligence. 3 Hours.

In-depth introduction to AI. Topics include: philosophical foundations, cognition, intelligent agents, AI languages, search, genetic algorithms, first order and modal logic, inference, resolution, knowledge representation, ontologies, problem solving, planning, expert systems, uncertainty, probabilistic reasoning, fuzzy logic, machine learning, natural language processing, machine vision, and robotics. Prerequisite: CSCE 4613. (Typically offered: Irregular)

CSCE 5053. Advanced Virtual Worlds. 3 Hours.

In depth study of 3D multi-user virtual worlds covering application domains like retail and healthcare logistics, simulations, training, and gaming as well as platform architectures. Students will apply their knowledge of programming and data structures while using synthetic worlds to explore, model and script future smart worlds where computing is pervasive. (Typically offered: Irregular)

CSCE 5063. Machine Learning. 3 Hours.

An introduction to machine learning, with particular emphasis on neural network techniques. This course presents the basic principles underlying algorithms that improve with experience, and covers using them effectively for modeling data and making predictions. (Typically offered: Irregular)

CSCE 5073. Data Mining. 3 Hours.

This course surveys the most common methods used in data mining and machine learning. It involves several projects in which students will implement tools that are useful for mining knowledge from data and making predictions. The course will study both heuristic algorithms and statistical techniques. Prerequisite: CSCE 3193 and (INEG 2313 or STAT 3013). (Typically offered: Irregular)

CSCE 5114. Embedded Systems. 4 Hours.

(Formerly CSCE 4114.) The architecture, software, and hardware of embedded systems. Involves a mixture of hardware and software for the control of a system (including electrical, electro-mechanical, and electro-chemical systems). They are found in a variety of products including cars, VCRs, HDTVs, cell phones, pacemakers, spacecraft, missile systems, and robots for factory automation. Graduate degree credit will not be given for both CSCE 4114 and CSCE 5114. Corequisite: Lab component. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Fall)

CSCE 5133. Algorithms. 3 Hours.

(Formerly CSCE 4133.) Provides an introduction to formal techniques for analyzing the complexity of algorithms. The course surveys important classes of algorithms used in computer science and engineering. Graduate degree credit will not be given for both CSCE 4133 and CSCE 5133. Prerequisite: CSCE 3193 and (MATH 2603 or MATH 2803) or MATH 4423. (Typically offered: Fall)

CSCE 5173. Formal Languages and Computability. 3 Hours.

(Formerly CSCE 4323.) Finite Automata and regular languages, regular expressions, context-free languages and pushdown automata, nondeterminism, grammars, and Turing machines. Church's thesis, halting problem, and undecidability. Graduate degree credit will not be given for both CSCE 4323 and CSCE 5173. Prerequisite: CSCE 4133 or CSCE 5133 (formerly CSCE 4133). (Typically offered: Spring)

CSCE 5183. Advanced Data Structures. 3 Hours.

(Formerly CSCE 4263.) This course continues the study of data structures, algorithmic analysis for these data structures, and their efficient implementation to support standard library in programming languages. Topics include: AVL trees, Red-Black trees, Splay trees, Optimal Binary Search trees, 2-3 tree, 2-3-4 tree, B-trees, Segment trees, Leftist Heaps, Binomial Heaps, Fibonacci Heap, Disjoint Set, Hashing, and big integer with hundreds to thousands of digits. Graduate degree credit will not be given for both CSCE 4263 and CSCE 5183. Prerequisite: CSCE 3193. (Typically offered: Irregular)

CSCE 5193. Concurrent Computing. 3 Hours.

(Formerly CSCE 4253.) Programming concurrent processes; computer interconnection network topologies; loosely coupled and tightly coupled paralleled computer architectures; designing algorithms for concurrency; distributed computer architectures. Graduate degree credit will not be given for both CSCE 4253 and CSCE 5193. Prerequisite: CSCE 3193. (Typically offered: Irregular)

CSCE 5203. Advanced Database Systems. 3 Hours.

Topics include: object databases, distributed databases, XML query, data warehouses, network as database systems, peer-peer data sharing architectures, data grids, data mining, logic foundations, semantic databases, spatial and temporal databases, and knowledge bases. Prerequisite: CSCE 4523 and graduate standing. (Typically offered: Irregular)

CSCE 5213. Bioinformatics. 3 Hours.

Application of algorithmic techniques to the analysis and solution of biological problems. Topics include an introduction to molecular biology and recombinant DNA technology, biological sequence comparison, and phylogenetics, as well as topics of current interest. Prerequisite: Instructor consent. (Typically offered: Irregular)

CSCE 5223. Introduction to Integrated Circuit Design. 3 Hours.

Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both CSCE 4333 and CSCE 5223. Prerequisite: ELEG 3214 or ELEG 3933 and MATH 2584. (Typically offered: Fall)

CSCE 5233. Low Power Digital Systems. 3 Hours.

(Formerly CSCE 4233.) The reduction of power consumption is rapidly becoming one of the key issues in digital system design. Traditionally, digital system design has mainly focused on performance and area trade-offs. This course will provide a thorough introduction to digital design for lower consumption at the circuit, logic, and architectural level. Graduate degree credit will not be given for both CSCE 4233 and CSCE 5233. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular)

CSCE 5253L. Integrated Circuit Design Laboratory I. 3 Hours.

Design and layout of large scale digital integrated circuits. Students design, check and simulate digital integrated circuits which will be fabricated, and tested in I.C. Design Laboratory II. Topics include computer aided design, circuit timing, and wire delay. Prerequisite: CSCE 4333. (Typically offered: Irregular)
This course is cross-listed with ELEG 5253L.

CSCE 5263. Computational Complexity. 3 Hours.

Turing machines, recursion theory and computability, complexity measures, NP-completeness, analysis on NP-complete problems, pseudo-polynomial and approximation. (Typically offered: Irregular)

CSCE 5273. Big Data Analytics and Management. 3 Hours.

Topics include principles of distributed data computing and management, design and implementation of non-relational data systems, crowd sourcing and human computation, big data analytics and scalable machine learning, real-time streaming data analysis, and social aware computing. Prerequisite: CSCE 3193 and INEG 2313. (Typically offered: Irregular)

CSCE 5283. Graph and Combinatorial Algorithms. 3 Hours.

A study of algorithms for graphs and combinatorics with special attention to computer implementation and runtime efficiency. (Typically offered: Irregular)

CSCE 5293. Computer Architecture. 3 Hours.

(Formerly CSCE 4213.) The architecture of modern scalar and parallel computing systems. Techniques for dynamic instruction scheduling, branch prediction, instruction level parallelism, shared and distributed memory multiprocessor systems, array processors, and memory hierarchies. Graduate degree credit will not be given for both CSCE 4213 and CSCE 5293. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Spring)

CSCE 5313. Advanced Operating Systems. 3 Hours.

Concurrent processes and process communication; mutual exclusion and synchronization principles; kernel philosophy; resource allocation and deadlock; and case studies of specific operating systems. Prerequisite: CSCE 3613. (Typically offered: Irregular)

CSCE 5323. Computer Security. 3 Hours.

Study of a broad selection of contemporary issues in computer security. Topics include access control, security policies, authentication methods, secure system design, and information assurance. Prerequisite: CSCE 3613. (Typically offered: Irregular)

CSCE 5333. Computer Forensics. 3 Hours.

Various methods for identification, preservation, and extraction of electronic evidence at a computer crime scene. Specific topics include auditing and investigation of network and host intrusions, computer forensics tools, resources for system administrators and information security officers, legal issues related to computer and network forensics. Prerequisite: CSCE 5323. (Typically offered: Irregular)

CSCE 5343. Advanced Software Engineering. 3 Hours.

This course is about software metrics and models. It will focus on quantitative methods and techniques for management of software projects, design of software systems, and improvement of software quality. The material covered will be metrics and models used in the software lifecycle, such as software requirements metrics, design metrics, implementation metrics, testing metrics, effort estimation model. Prerequisite: CSCE 3513. (Typically offered: Irregular)

CSCE 5353. CPLD/FPGA-Based System Design. 3 Hours.

(Formerly CSCE 4353.) Field Programmable Logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Graduate degree credit will not be given for both CSCE 4353 and CSCE 5353. Prerequisite: CSCE 2214 with a grade of C or better. (Typically offered: Irregular)

CSCE 5363L. Integrated Circuit Design Laboratory II. 3 Hours.

Students test the I.C. chips they designed in I.C. Design Laboratory I, and propose design corrections where needed. Topics include bipolar chip design, gate arrays, BICMOS, memory design, design for testability, and dynamic & domino logic. Prerequisite: CSCE 5253L. (Typically offered: Irregular)
This course is cross-listed with ELEG 5263L.

CSCE 5423. Cryptography. 3 Hours.

(Formerly CSCE 4433.) This course provides a general introduction to modern cryptography. Topics include: stream ciphers, block ciphers, message authentication codes, public key encryption, key exchange, and signature schemes. Graduate degree credit will not be given for both CSCE 4433 and CSCE 5423. Prerequisite: CSCE 2014 with a grade of C or better and (MATH 2603 or MATH 2803). (Typically offered: Irregular)

CSCE 5433. Advanced Cryptography. 3 Hours.

This course provides an in-depth look into some facet of either cryptographic theory or the implementation of cryptography. Topics may include: the discrete logarithm problem, integer factorization, information theory, elliptic curves, lattices, pseudorandom number generators, zero-knowledge proofs, and quantum cryptography. Prerequisite: CSCE 4433 or instructor consent. (Typically offered: Irregular)

CSCE 5523. Database Management Systems. 3 Hours.

(Formerly CSCE 4523.) Introduction to database management systems, architecture, storage structures, indexing, relational data model, E-R diagrams, query languages, SQL, ODBC, transaction management, integrity, and security. Graduate degree credit will not be given for both CSCE 4523 and CSCE 5523. Prerequisite: CSCE 3193 or CSCE 3193H with a C or better. (Typically offered: Spring)

CSCE 5533. Advanced Information Retrieval. 3 Hours.

Study of the architecture, implementation, and evaluation of current information retrieval systems. Students will apply their knowledge of programming and data structures to implement a large system with an emphasis on efficiency and scalability. They will study current research in the field and implement individual or group projects on advanced topics. (Typically offered: Irregular)

CSCE 5543. Statistical Natural Language Processing. 3 Hours.

Introduction to statistical natural language processing (NLP). Covers the theory and algorithms needed for building NLP tools, provides broad coverage of mathematical and linguistic foundations, and detailed discussion of statistical methods for text mining and information extraction. Current research and applications of statistical NLP will be discussed. Prerequisite: CSCE 2014 and (STAT 3013 or INEG 2313). (Typically offered: Irregular)

CSCE 5553. Software Architecture. 3 Hours.

(Formerly CSCE 4543.) A study of software architecture through the use of case studies drawn from real systems designed to solve real problems from technical as well as managerial perspectives. Techniques for designing, building, and evaluating software architectures. Graduate degree credit will not be given for both CSCE 4543 and CSCE 5553. Prerequisite: CSCE 4133 or CSCE 5133 (formerly CSCE 4133) and CSCE 3513. (Typically offered: Irregular)

CSCE 5613. Artificial Intelligence. 3 Hours.

(Formerly CSCE 4613.) Introduction to intelligent agents, AI languages, search, first order logic, knowledge representation, ontologies, problem solving, natural language processing, machine vision, machine learning, and robotics. Graduate degree credit will not be given for both CSCE 4613 and CSCE 5613. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 5623. Secure Digital System Design. 3 Hours.

This course is to give graduate students an insight of contemporary security-related issues in modern digital systems. In addition to lectures, students will be practicing secure digital system design during a project. (Typically offered: Irregular)

CSCE 5633. Network Performance Evaluation. 3 Hours.

A study of performance modeling tools for telecommunication networks, computer networks, and wireless networks. Prerequisite: STAT 3013. (Typically offered: Irregular)

CSCE 5643. Computer Communications Networks. 3 Hours.

A study of computer communication networks, including the data link layer, routing, flow-control, local area networks, TCP/IP, ATM, B-ISDN, queuing analysis, and recent developments in computer communications. (Typically offered: Irregular)

CSCE 5653. Network Security. 3 Hours.

This course introduces security and secrecy in a networked environment. It is intended to familiarize students with the elements of secure communication, and how they inter-relate to provide secure networks in public and private settings. (Typically offered: Irregular)

CSCE 5663. Database Security. 3 Hours.

This is an advanced course covering security issues in database systems. Topics to be covered include discretionary and mandatory access control policies, multilevel secure database systems, auditing, data recovery, database intrusion detection, database insider threat, etc. Prerequisite: CSCE 4523. (Typically offered: Irregular)

CSCE 5673. Mobile Programming. 3 Hours.

(Formerly CSCE 4623.) An introduction to software development on mobile devices. The major topics covered in this course include underlying concepts and principles in mobile programming, as well as hands-on programming experience on mobile devices with an emphasis on smartphones. Graduate degree credit will not be given for both CSCE 4623 and CSCE 5673. Prerequisite: CSCE 3193 or CSCE 3193H. (Typically offered: Irregular)

CSCE 5683. Image Processing. 3 Hours.

The objective of this class is to give students a hands-on introduction to the fundamentals of image processing. A variety of image processing techniques and applications will be discussed including image enhancement, noise removal, spatial domain and frequency domain filtering, image restoration, color image processing, image compression, edge detection and image segmentation. Prerequisite: CSCE 4813. (Typically offered: Irregular)

CSCE 5693. Graphics Processing Units Programming. 3 Hours.

(Formerly CSCE 4643.) This course provides an introduction to massively parallel programming using Graphics Processing Units (GPUs). Topics include basic programming model, GPU thread hierarchy, GPU memory architecture, and performance optimization techniques and parallel patterns needed to develop real-life applications. Graduate degree credit will not be given for both CSCE 4643 and CSCE 5693. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 5703. Computer Vision. 3 Hours.

The objective of this course is to give students a hands-on introduction to the fundamentals of computer vision. Topics include image formation, object modeling, image processing, feature and edge detection, image segmentation, motion estimation, depth from stereo, shape description and object recognition. Prerequisite: CSCE 4813 or CSCE 5683. (Typically offered: Irregular)

CSCE 5753. Wireless Systems Security. 3 Hours.

Wireless systems such as wireless local area networks, cellular and mobile networks, and sensor networks are vulnerable to attacks. The goal of the class is for students to understand how to design secure wireless systems. Security topics include confidentiality, integrity, availability, privacy, and control of fraudulent usage of networks. Issues addressed include basic wireless theory, cryptography, threat modeling, risks, and mitigation techniques. (Typically offered: Irregular)

CSCE 5763. Privacy Enhancing Technologies. 3 Hours.

This course introduces privacy enhancing technologies and hot privacy topics in modern computing systems. Students will be exposed to many interesting privacy problems, study privacy enhancing technologies, and apply their knowledge to explore an open research problem in a research-oriented project. After completing this course, students will gain broad knowledge of the state-of-the-art privacy enhancing technologies and open research problems. They will also develop skills and enhance potentials to do research on privacy and security. (Typically offered: Irregular)

CSCE 5773. Computer Networks. 3 Hours.

(Formerly CSCE 4753.) This course is an introductory course on computer networks. Using the Internet as a vehicle, this course introduces underlying concepts and principles of modern computer networks, with emphasis on protocols, architectures, and implementation issues. Graduate degree credit will not be given for both CSCE 4753 and CSCE 5773. Prerequisite: INEG 2313. (Typically offered: Irregular)

CSCE 5813. Computer Graphics. 3 Hours.

(Formerly CSCE 4813.) Introduction to the theory and algorithms used in computer graphics systems and applications. Topics include: 2D and 3D geometric models (points, lines, polygons, surfaces), affine transformations (rotation, translation, scaling), viewpoint calculation (clipping, projection), lighting models (light-material interactions, illumination and shadow calculation). Students will implement their own graphics pipeline to demonstrate many of these techniques. Higher level computer graphics applications will be created using OpenGL. Graduate degree credit will not be given for both CSCE 4813 and CSCE 5813. Prerequisite: CSCE 2014 with a grade of C or better. (Typically offered: Irregular)

CSCE 5823. Multiprocessor Systems on Chip. 3 Hours.

This course covers the latest trends in advanced computer architecture for multiprocessor systems on chip for embedded and real time systems. Topics covered include multicore architectures, modeling abstractions, run time systems, and MIMD/SIMD heterogeneous architectures, Hw/Sw co-design techniques. Prerequisite: CSCE 3613 and CSCE 4213. (Typically offered: Irregular)

CSCE 5833. Computer Architecture Security. 3 Hours.

This course will cover fundamental principles and emerging implementation strategies to reason about, design and construct architecture level security capabilities in the manycore era. Coverage includes formal security models, new and emerging considerations for heterogeneous multiprocessor system on chip architectures, hardware and software implementation methods, operating systems for run time security enforcement. Prerequisite: CSCE 4213. (Typically offered: Irregular)

CSCE 5843. Reconfigurable Computing. 3 Hours.

This course will cover emerging and proposed techniques and issues in Reconfigurable Computing. Topics will include FPGA technologies, CAD/CAE tools, Hw/Sw co-design, system level synthesis, programming models and abstractions. Prerequisite: CSCE 4213 and CSCE 3613. (Typically offered: Irregular)

CSCE 5853. Information Security. 3 Hours.

(Formerly 4853.) This course covers principles, mechanisms, and policies governing confidentiality, integrity, and availability of digital information. Topics to be covered include security concepts and mechanisms, security policies, multilevel security models, system vulnerability, threat and risk assessment, basic cryptography and its applications, intrusion detection systems. Graduate degree credit will not be given for both CSCE 4853 and CSCE 5853. Prerequisite: CSCE 3193 or CSCE 3193H. (Typically offered: Irregular)

CSCE 590V. Advanced Individual Study. 1-3 Hour.

Advanced graduate level individual study directed by faculty in current research topics, state of the art, or advanced methodology in one of the major computer science or computer engineering areas. (Typically offered: Irregular)

CSCE 5914. Advanced Digital Design. 4 Hours.

(Formerly CSCE 4914.) To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Graduate degree credit will not be given for both CSCE 4914 and CSCE 5914. Corequisite: Lab component. Prerequisite: CSCE 2114 or ELEG 2904. (Typically offered: Irregular)

CSCE 5943. Computer Arithmetic Circuits. 3 Hours.

Examination of fundamental principles of algorithms for performing arithmetic operations in computers. This course provides sufficient theoretical and practical information to prepare the digital design engineer with an awareness of basic techniques for the realization of arithmetic circuits. (Typically offered: Irregular)

CSCE 5983. Application Specific Integrated Circuit Design. 3 Hours.

ASIC design is taught with emphasis on industrial preparation. Topics include ASIC technologies, design entry, simulation, and synthesis. Advanced design methods and techniques are studied for cell based and gate array ASICs. Prerequisite: CSCE 4213. (Typically offered: Irregular)

CSCE 610V. Master's Thesis. 1-6 Hour.

Master's thesis. (Typically offered: Fall and Spring) May be repeated for degree credit.

CSCE 620V. Post-Master's Research. 1-18 Hour.

Post-master's research. (Typically offered: Fall and Spring)

CSCE 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Counselor Education (CNED) Courses

CNED 1011. Seminar. 1 Hour.

Single topic seminar focusing on further knowledge acquisition and training in specific developmental skills. Topics offered as needed. Prerequisite: Instructor consent required. (Typically offered: Fall and Spring) May be repeated for up to 3 hours of degree credit.

CNED 3053. The Helping Relationship. 3 Hours.

Development of an understanding of the helping relationship. Topics include establishing a working alliance, problem recognition and referral to appropriate resources. Prerequisite: PSYC 2003. (Typically offered: Fall and Spring)

CNED 3053H. Honors The Helping Relationship. 3 Hours.

Development of an understanding of the helping relationship. Topics include establishing a working alliance, problem recognition and referral to appropriate resources. Prerequisite: PSYC 2003. (Typically offered: Fall and Spring)

This course is equivalent to CNED 3053.

CNED 4003. Classroom Human Relations Skills. 3 Hours.

A study of interpersonal skills important to improving teacher-student relationships and achievement in classrooms. Human communication systems related to motivation, achievement, and educator-student relationships are studied. The attainment of effective human relations skills is emphasized. Prerequisite: Junior or Senior standing required. (Typically offered: Fall and Spring)

CNED 5003. Counseling and Human Development. 3 Hours.

This course is intended to give students a broad overview of human nature/behavior through knowledge of lifespan developmental theory, personality development, modern & post-modern approaches to the study of human nature/behavior, and learning theory. Throughout the course, close attention will be given to human ecology or those social/historical/cultural/environmental forces furthering or impeding development. Prerequisite: Graduate standing. (Typically offered: Fall and Spring)

CNED 5193. Clinical Mental Health Counseling. 3 Hours.

An introductory study of community counseling. The course content includes information concerning the educational, historical, philosophical, and psychological foundations of community counseling as well as specific traits and skills of professional community counselors. In addition, the course is designed to provide introductory level concepts and skills required for future certification and licensure as counseling professionals. Prerequisite: Graduate student status. (Typically offered: Spring)

CNED 5203. Foundations of the Counseling Profession. 3 Hours.

A study of the counseling profession applicable to school, college and community agency settings. Introduction to the basic educational, historical, philosophical foundations of counseling as well as specific traits and skills of counselors. The course is also designed to provide beginning level concepts and skills required for certification and licensure. Prerequisite: Must be taken first year in program. (Typically offered: Fall and Summer)

CNED 5213. Lifestyle & Career Development. 3 Hours.

Theories of career development and counseling, including the use of occupational information sources and career assessment tools and techniques. Prerequisite: CNED 5333. (Typically offered: Summer)

CNED 5223. Introduction to School Counseling. 3 Hours.

Philosophy, organization, and practices of a counseling program in the elementary and secondary school. The school counselor's role as counselor, consultant, and coordinator, professional identity, and legal issues are included. Includes a significant focus on ethical standards and issues. (Typically offered: Irregular)

CNED 5303. Individual Appraisal. 3 Hours.

Analysis of concepts, methods, and procedures utilized in individual appraisal. (Typically offered: Fall)

CNED 5313. Program Organization and Information Management. 3 Hours.

This course addresses needs and strategies for effective development and management of school counseling programs and guidance curriculum. Prerequisite: CNED 5223. (Typically offered: Fall)

CNED 5323. Counseling Theory. 3 Hours.

Introductory survey and critical analysis of major alternative theoretical perspectives in counseling. (Typically offered: Fall and Summer)

CNED 5333. Basic Counseling Techniques. 3 Hours.

Introduction to basic counseling techniques and skills common to multiple theoretical perspectives. Prerequisite: Master's students in Counseling. (Typically offered: Fall and Spring)

CNED 5343. Counseling Practicum. 3 Hours.

Supervised counseling practice. CNED faculty consent required. Pre- or Corequisite: CNED 5303 and CNED 5363 and CNED 5373. Prerequisite: CNED 5203, CNED 5323, CNED 5333, CNED 5403. (Typically offered: Fall and Spring)

CNED 5353. Psychopharmacology. 3 Hours.

Study of theory, research, & practice issues pertaining to psychopharmacology for non-medical practitioners. Prerequisite: CNED 5203, CNED 5323, and CNED 5333. (Typically offered: Summer)

CNED 5363. Dynamics of Group Counseling. 3 Hours.

Therapeutic and other theoretical information is presented regarding group process and the counselor's role in that process. An experiential group experience is required. Prerequisite: CNED 5333 and CNED 5323. (Typically offered: Fall and Spring)

CNED 5373. Ethical and Legal Issues in Counseling. 3 Hours.

Review of ethical and legal standards governing professional counselor training, research, and counseling practice; including client rights; confidentiality; the client-counselor relationship; and counseling research, training, and supervision. Prerequisite: CNED 5003 and CNED 5203. (Typically offered: Fall)

CNED 5383. Crisis Intervention Counseling. 3 Hours.

Analysis and application of short-term counseling intervention strategies in crisis situations, with special attention to incidents involving rape, physical, or emotional abuse, divorce, suicidal depression, grief, marital or family instability, and violent conflict. Prerequisite: CNED 5333. (Typically offered: Summer)

CNED 5403. Diagnosis and Treatment in Counseling. 3 Hours.

Procedures in case management utilizing both clinical and interview data in assisting children, adolescents, and adults in educational, vocational, personal, and social planning. Prerequisite: CNED 5303, CNED 5323 and CNED 5333. (Typically offered: Fall and Spring)

CNED 5443. Vocational Rehabilitation Foundations. 3 Hours.

Survey of the philosophy of vocational rehabilitation, including history and legislation. (Typically offered: Fall)

CNED 5453. Medical Aspects of Disability. 3 Hours.

Orientation to medical and medically related aspects of various disabling conditions with emphasis on the severely disabled. (Typically offered: Spring)

CNED 5463. Rehabilitation Case Management. 3 Hours.

Counseling process in the rehabilitation setting. Focusing upon effective counseling strategies, representative cases, and effective case management methods. (Typically offered: Spring)

CNED 5473. Psychological Aspects of Disability. 3 Hours.

Intensive study of the psychological aspects of adjustment to atypical physique and prolonged handicapping condition. (Typically offered: Spring)

CNED 5483. Counseling Research. 3 Hours.

An in-depth examination of counseling research methodology and issues to prepare students to critically evaluate and use counseling research in their professional practice. (Typically offered: Fall, Spring and Summer)

CNED 5493. Principles and Practices of Psychiatric Rehabilitation. 3 Hours.

The course introduces students to the principles and practices of recovery-oriented, evidence-based psychiatric rehabilitation. Through lectures, guest presentations, films, discussions, and readings, students (a) explore the clinical, psychosocial, and vocational aspects of psychiatric disabilities and (b) examine psychiatric rehabilitation principles and practices to facilitate community integration and successful employment outcomes for individuals with psychiatric disabilities. (Typically offered: Fall)

CNED 5513. Counseling and Human Diversity. 3 Hours.

Examination of human and cultural diversity, emphasizing issues of race, class, and socioeconomic status, and how they impact our clients as individuals and as family and society members. (Typically offered: Summer)

CNED 5523. Process and Behavioral Addictions. 3 Hours.

This course provides an overview of non-substance related addictive disorders such as technology (e.g., video games, Internet, television), gambling, eating, sex, shopping/buying and work as well as potential treatment options for these disorders. (Typically offered: Irregular)

CNED 5583. Placement of Persons with Disabilities. 3 Hours.

Focuses on placement theory and practice as they apply to persons who experience disabilities. Special attention is given to RehabMark approach. (Typically offered: Summer)

CNED 574V. Counseling Internship. 1-9 Hour.

A 600-clock-hour field placement in an approved setting over a minimum of two continuous semesters. For students completing a counseling internship in a school setting, successful completion of a criminal background check is required before beginning internship. Pre- or Corequisite: CNED 5213. Prerequisite: CNED 5203, CNED 5303, CNED 5323, CNED 5333, CNED 5343, CNED 5363, CNED 5373, CNED 5403, CNED 5513. CNED faculty consent required. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

CNED 599V. Seminar. 1-6 Hour.

Seminar. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CNED 6003. Theories and Foundations of Addictions. 3 Hours.

A study of behavioral and substance addictions, including an overview of differential treatment. Prerequisite: CNED 5323 and CNED 5333, and admission to the CNED masters or doctoral program or departmental consent. (Typically offered: Spring and Summer)

CNED 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CNED 6013. Advanced Counseling Theory and Methods. 3 Hours.

Critical analysis of major theoretical perspectives in counseling, including both group and individual counseling strategies for dealing with affective, cognitive, and behavioral dysfunction. Prerequisite: CNED doctoral standing or permission. (Typically offered: Spring Even Years)

CNED 6023. Foundations of Marriage and Family Counseling Therapy. 3 Hours.

Comprehensive exploration of the current theories/techniques of marriage, family and couples counseling. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or permission. (Typically offered: Summer)

CNED 6033. Advanced Group Theory and Methods. 3 Hours.

Comparative study of theories and processes of group counseling. Includes supervised experience in group facilitation with video recording and playback. Prerequisite: CNED 5363 or equivalent and CNED doctoral or masters standing or permission. (Typically offered: Spring Odd Years)

CNED 6043. Supervision of Counselors. 3 Hours.

Analysis, assessment, and practical application of counselor supervision techniques in treatment and training programs. Prerequisite: CNED doctoral standing and CNED faculty consent (Typically offered: Fall Even Years)

CNED 605V. Independent Study. 1-18 Hour.

Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CNED 6073. Advanced Research in Counseling. 3 Hours.

This course involves acquiring a knowledge and understanding of the use of research in counseling and the development of new research in the counseling profession that has heuristic value. Prerequisite: Graduate standing. (Typically offered: Spring)

CNED 6083. Consultation Theory and Methods. 3 Hours.

Strategies, practical application, and techniques for effective consultation with parents, teachers, and community agencies. Prerequisite: CNED 5333 (preferred) CNED doctoral or masters standing or permission. (Typically offered: Summer)

CNED 6093. Counseling Children and Adolescents Through Play. 3 Hours.

Introduction to counseling children and adolescents through play; including the process, theories, techniques, and materials applicable to children and adolescents in a pluralistic society. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or permission. (Typically offered: Spring)

CNED 6113. Theory to Practice: Working with Co-occurring Disorders. 3 Hours.

This course is designed to demonstrate the application of theory to practice in the treatment of co-occurring disorders. Specifically, it is intended to carefully review current research and literature on counseling individuals presenting with both a substance abuse disorder and mental-emotional challenges. Pre- or Corequisite: CNED 6003. Prerequisite: Graduate or license eligible. (Typically offered: Summer)

CNED 6123. Clinical Applications of Marriage and Family Counseling and Therapy. 3 Hours.

Advanced clinical methodology appropriate for family counseling, marriage counseling, and couples counseling (in all settings), with emphasis on solution-focused systems, Satir model and psychoeducational family work in schools. Includes supervision of clinical experience in marriage, family and couples counseling, video recording and school/community outreach. Prerequisite: CNED doctoral standing or permission. (Typically offered: Fall Odd Years)

CNED 6133. Introduction to Play Therapy. 3 Hours.

This course is an introduction to the basic concepts of child-centered play therapy (CCPT). Students will learn the conceptual framework of child-centered play therapy, as well as the attitudes and skills necessary to establish and maintain facilitative relationships with children that encourage their self-expression and facilitate change. Prerequisite: CNED 5323 and CNED 5333 and CNED doctoral or masters standing or consent. (Typically offered: Irregular)

CNED 6223. Foundations of Counselor Education and Supervision. 3 Hours.

This course is designed to enhance the professional development and acculturation of doctoral students in order to facilitate their success in professional leadership roles of counselor education, supervision, counseling practice, and research competencies. Prerequisite: CNED Doctoral status or permission. (Typically offered: Spring Odd Years)

CNED 6233. Employment Practices and Interventions. 3 Hours.

An intensive study of the employment experiences of workers with disabilities with emphasis on disincentives and barriers to employment and interventions to enable people with disabilities to participate in employment. Prerequisite: RHAB 5493 or equivalent. (Typically offered: Irregular)

CNED 6243. Disability Policy in the U.S.. 3 Hours.

An analysis of public policy approaches to disability in the U.S. Examines the political and philosophical origins of disability policy; reviews major disability legislation and its effects on policy stakeholders; describes recent initiatives; and analyzes evolution of disability policy within context of changing societal, economic, and political conditions. (Typically offered: Fall)

CNED 6253. Advanced Psychosocial Aspects of Disability. 3 Hours.

A theoretical and applied study of techniques that enable people to cope with 2 major life events: disability and unemployment. (Typically offered: Fall Odd Years)

CNED 6343. Cultural Foundations and Counseling. 3 Hours.

To gain learning experiences in pedagogy relevant to multicultural issues and competencies, including social change theory and advocacy action planning. To identify current multicultural issues as they relate to social change theories, ethical and legal considerations, disability, gender, sexuality, social justice, and advocacy models. Prerequisite: CNED or RHAB Doctoral Standing or Permission. (Typically offered: Fall Even Years)

CNED 6413. Advanced Individual Appraisal. 3 Hours.

To provide advanced knowledge and experience with those psychoeducational instruments and procedures used in conducting school related assessment. Prerequisite: CNED 5303 or equivalent and CNED doctoral standing or permission. (Typically offered: Fall Odd Years)

CNED 6713. Advanced Counseling Practicum. 3 Hours.

Supervised counseling practice. A 100-clock hour approved practical counseling experience. Prerequisite: CNED doctoral standing and permission of CNED faculty and Clinical Coordinator. (Typically offered: Spring) May be repeated for up to 3 hours of degree credit.

CNED 674V. Internship. 1-18 Hour.

Supervised field placement (Clinical/Instructorship/Supervision/Research). Prerequisite: CNED doctoral standing, CNED faculty consent and CNED Clinical Coordinator consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CNED 699V. Seminar. 1-18 Hour.

Seminar. Prerequisite: CNED Doctoral standing or permission. (Typically offered: Summer) May be repeated for up to 18 hours of degree credit.

CNED 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy and consent. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Criminology (CRIM)

Crop, Soil and Environmental Sciences (CSES)

Courses

CSES 1011. Introduction to Crop, Soil, and Environmental Science. 1 Hour.

An introduction to the CSES department and majors in Environmental Soil and Water Sciences and Crop Management. Emphasis will be placed on issues and opportunities within these disciplines and orienting students to the department and University of Arkansas. Required of all department majors with less than 24 semester credit hours. Recitation 1 hour 20 minutes per week for the first eight weeks of the semester. Prerequisite: Freshman and sophomore standing only. (Typically offered: Irregular)

CSES 1203. Introduction to Plant Sciences. 3 Hours.

An introduction to basics of agricultural crop plant structure, growth, and production. (Typically offered: Fall and Spring)

CSES 2003. Introduction to Weed Science. 3 Hours.

Fundamental, practical concepts of weed control and weed biology; equipment and techniques used in modern weed control practices; and basic recommendations and systems for specific agronomic and horticultural crops. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CSES 1203 or CSES 2103 or HORT 2003. (Typically offered: Irregular)

CSES 2012. Introduction to Organic Crop Production. 2 Hours.

An introduction to the principles of organic agriculture and ecology and the regulations defining organic production and certification. Additional topics include crop rotations for pest management and for increasing soil organic matter, feeding the soil and plant nutrition, soil health, and green manuring, corporate agriculture and genetically modified organisms. (Typically offered: Irregular)

CSES 2013. Pest Management. 3 Hours.

Introduction to basic principles of pest management as they relate to vertebrate animals, insects, plant disease and weeds. Selected pests are studied with emphasis on current management approaches and alternative pest control. (Typically offered: Spring)

CSES 2101L. Crop Science Laboratory. 1 Hour.

A series of laboratory experiments designed to reinforce principles of plant growth and development, reproduction, classification, and the utilization of plant products. Emphasis is placed on major crop plant species. Experiments are conducted by individuals or by teams. Laboratory consists of a single, 2-hour period each week. Required for Crop Management majors. Corequisite: CSES 2103. (Typically offered: Spring)

CSES 2103. Crop Science. 3 Hours.

Principles of crop growth, development, and utilization and how these principles relate to production. Emphasis on major agronomic crop species. Lecture 3 hours per week. (Typically offered: Spring)

CSES 2201L. Soil Science Laboratory. 1 Hour.

Field and laboratory exercises related to the study of the physical, chemical, and biological properties of soils. Laboratory mandatory for all crop management and environmental, soil, and water science majors and optional for others. Laboratory 2 hours per week. Pre- or Corequisite: CSES 2203. (Typically offered: Fall and Spring)

CSES 2203. Soil Science. 3 Hours.

Origin, classification, and physical, chemical, and biological properties of soils. Lecture 3 hours, discussion 1 hour per week. Corequisite: Drill component. Prerequisite: MATH 1203 and CHEM 1103 or CHEM 1073. (Typically offered: Fall and Spring)

CSES 3023. Crop, Soil, and Environmental Sciences Colloquium. 3 Hours.

A communication-intensive course covering topics in agronomy and environmental, soil, and water science with particular emphasis on spoken communication but also including written communication, group activities, professionalism, ethics, problem solving, and information retrieval. A student-oriented class with collaborative participation. Colloquium workshop: 3 hours per week. Prerequisite: COMM 1313 and Junior or Senior standing only. (Typically offered: Fall)

CSES 3112. Forage Management. 2 Hours.

Forage crops for pasture, hay, and silage with reference to growth and development, production, nutritional quality, and grazing systems. Lecture 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Irregular)

CSES 3214. Soil Resources and Nutrient Cycles. 4 Hours.

Integration of the fundamental concepts of the biological, chemical, and physical properties of soil systems and their roles in managing soil resources. Lecture 3 hours, laboratory 3 hours per week. Pre- or Corequisite: BIOL 2013 and BIOL 2011L. Corequisite: Lab component. Prerequisite: CSES 2203. (Typically offered: Spring Odd Years)

CSES 3312. Cotton Production. 2 Hours.

Principles and techniques associated with production of cotton. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Even Years)

CSES 3322. Soybean Production. 2 Hours.

An overview of the history and utilization of soybean as well as the physiological and environmental basis for the development of economical soybean production practices. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Odd Years)

CSES 3332. Rice Production. 2 Hours.

A study of the principles and practices involved in rice culture worldwide with major emphasis on the United States. Recitation 2 hours per week. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Fall Odd Years)

CSES 3342. Cereal Grain Production. 2 Hours.

An overview of the botany, production, cultural practices, soil & climatic adaptation and utilization of the major cereal grain crops. Prerequisite: CSES 1203 or CSES 2103. (Typically offered: Spring Even Years)

CSES 355V. Soil Profile Description. 1-2 Hour.

Training for soil profile description writing and membership of judging teams. (Typically offered: Fall) May be repeated for up to 8 hours of degree credit.

CSES 3603. Metrics for Sustainable Agricultural Systems. 3 Hours.

Analysis of productive agricultural systems necessary to meet expanding demand worldwide for food, feed, fiber and fuel while preserving critical ecosystem services to avoid future catastrophic failures of the biosphere. Characterization of sustainable systems using well-defined metrics, indicators and indices, including reference to sustainability certifications. Metrics for soil, water, atmosphere and biodiversity. Applications in crop and animal production with scales from field to watershed to eco-region. Examining the process and methodologies of integrating metrics into indices to support sustainable supply chain decisions. Discussion of life cycle analyses and current initiatives toward approaching agricultural systems sustainability. Technical course intended for students in agriculture, biology, business, engineering, and environmental sciences. (Typically offered: Fall)
This course is cross-listed with BENG 3603.

CSES 400V. Special Problems. 1-6 Hour.

Work on special problems in crop, soil and environmental sciences or related field. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CSES 4013. Advanced Crop Science. 3 Hours.

Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Prerequisite: CSES 2103 and CSES 2203. (Typically offered: Spring)

CSES 402V. Special Topics. 1-3 Hour.

Studies of selected topics in crop, soil and environmental sciences not available in other courses. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

CSES 4103. Plant Breeding. 3 Hours.

Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323. (Typically offered: Fall Even Years)

CSES 4133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours.

Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habitat of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003. (Typically offered: Fall)

CSES 4143. Principles of Weed Control. 3 Hours.

Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L. (Typically offered: Spring)

CSES 4224. Soil Fertility. 4 Hours.

Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Pre- or Corequisite: CHEM 1123 and CHEM 1121L or (CHEM 1073 and CHEM 1071L and CHEM 2613 and CHEM 2611L). Corequisite: Lab component. Prerequisite: CSES 2201L and CSES 2203. (Typically offered: Fall)

CSES 4253. Soil Classification and Genesis. 3 Hours.

Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L. (Typically offered: Fall Odd Years)

CSES 4303. Bioenergy Feedstock Production. 3 Hours.

Overview of production and characteristics of cultivated crops, perennial grasses, and woody species as feedstocks for bioenergy. Fundamentals of plant growth factors, culture, harvest and storage, quality and improvement, and introduction to environmental impact, modeling, and resource utilization. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203. Courses in introductory chemistry or soil science are preferred. (Typically offered: Spring)

CSES 4553. Wetland Soils. 3 Hours.

This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicators and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V. (Typically offered: Spring Odd Years)

CSES 462V. Internship. 1-6 Hour.

Supervised practical work experience in agronomy and environmental science to develop and demonstrate professional competence. Faculty approval of project proposal prior to enrollment and written and oral reports after the project is complete are required. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CSES 5001. Weed Science Practicum. 1 Hour.

Training for membership on weed team, through participation. Prerequisite: Graduate standing. (Typically offered: Summer)

CSES 5013. Crop Physiology. 3 Hours.

Understanding and quantitative measurement of physiological processes, plant responses, and environmental parameters in relation to the production of crops. Prerequisite: BIOL 4303. (Typically offered: Fall Odd Years)

CSES 5023. Physiology of Herbicide and Plant Interaction. 3 Hours.

The reproduction, growth, and development of weeds and the ecological factors affecting these processes; development and mechanisms of herbicide resistance, flow of herbicide-resistance genes; and development of herbicide-resistant crops. Corequisite: Lab component. Prerequisite: CSES 4143 or CSES 5143 (formerly CSES 4143) and (BIOL 4303 or CHEM 5813). (Typically offered: Spring Odd Years)

CSES 502V. Special Problems Research. 1-6 Hour.

Original investigations on assigned problems in agronomy. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

CSES 5033. Advanced Soil Fertility and Plant Nutrition. 3 Hours.

Study of water uptake, ion absorption, translocation and metabolism in higher plants. Lecture 3 hours per week. Prerequisite: BIOL 4303 and CHEM 2613 and CHEM 2611L. (Typically offered: Spring Even Years)

CSES 504V. Special Topics. 1-4 Hour.

Topics not covered in other courses or a more intensive study of specific topics in agronomy. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

CSES 5053. Scientific Writing. 3 Hours.

Open to graduate students, especially those in agricultural and life sciences. The course will cover searching the scientific literature, writing theses, proposals, journal articles, and other scientific documents. Emphasis on style and techniques used in scientific publication. Lecture and workshop 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Irregular)

CSES 5073. Advanced Crop Science. 3 Hours.

Fundamental concepts of crop physiology, crop improvement, seed science, and crop production systems. Recitation 3 hours per week. Graduate degree credit will not be given for both CSES 4013 and CSES 5073. (Typically offered: Fall)

CSES 5093. Plant Breeding. 3 Hours.

(Formerly CSES 4103.) Basic principles involved in plant breeding programs to improve crop plants and seed programs. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4103 and CSES 5093. Corequisite: Lab component. Prerequisite: ANSC 3123 or BIOL 2323. (Typically offered: Fall Even Years)

CSES 5103. Scientific Presentations. 3 Hours.

Experience in procedures required for professional presentations of scientific papers, seminars, posters; and research findings at meetings in conferences, and with discussion groups. Instruction in organization of materials, visual aids, and good speaking habits. Lecture 3 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall)

CSES 5114. Soil Fertility. 4 Hours.

Study of the soil's chemical, biological and physical properties, and human modification of these properties, as they influence the uptake and utilization of the essential nutrients by plants. Lecture 3 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4224 and CSES 5114. Corequisite: Lab component. (Typically offered: Fall)

CSES 5133. Ecology and Morphology of Weedy and Invasive Plants. 3 Hours.

(Formerly CSES 4133.) Study of weeds as economic pests occurring in both agricultural and nonagricultural situations and including poisonous plants and other specific weed problems. Gross morphological plant family characteristics which aid identification, habitat of growth and distribution, ecology, competition, and allelopathy are discussed. Lecture 2 hours, laboratory 2 hours a week. Graduate degree credit will not be given for both CSES 4133 and CSES 5133. Corequisite: Lab component. Prerequisite: CSES 2103 or HORT 2003. (Typically offered: Fall)

CSES 5143. Principles of Weed Control. 3 Hours.

(Formerly CSES 4143.) Advanced concepts and technology used in modern weed control practices and study of the chemistry and specific activity of herbicides in current usage. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4143 and CSES 5143. Corequisite: Lab component. Prerequisite: CHEM 1073 and CHEM 1071L. (Typically offered: Spring)

CSES 5214. Analytical Research Techniques in Agronomy. 4 Hours.

Preparation and analysis of plant and soil samples utilizing spectrophotometry, isotopes, and chromatographic separation methods. Additionally, measurements are made of photosyntheses, respiration, water relationships, light, and temperatures in whole plants. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. Prerequisite: BIOL 4303 and CHEM 2613 and CHEM 2611L. (Typically offered: Fall Even Years)

CSES 5224. Soil Physics. 4 Hours.

Physical properties of soils and their relation to other soil properties, growth of plants and transport of water, oxygen, heat, and solutes such as pesticides and plant nutrients. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CSES 2203 and MATH 1203. (Typically offered: Spring)

CSES 5233. Plant Genetic Engineering. 3 Hours.

Topics will be covered in the field of in vitro plant biology, transgene genetics and crop genetic engineering. Concepts and applications of transgenic plant technology will be discussed, with the emphasis on the strategies for crop improvement and gene discovery. Lecture 3 hours. (Typically offered: Spring Odd Years)

CSES 5253. Soil Classification and Genesis. 3 Hours.

(Formerly CSES 4253.) Lecture and field evaluation of soil properties and their relation to soil genesis and soil classification with emphasis on soils of Arkansas. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both CSES 4253 and CSES 5253. Corequisite: Lab component. Prerequisite: CSES 2203 and CSES 2201L. (Typically offered: Fall Odd Years)

CSES 5264. Microbial Ecology. 4 Hours.

A study of the microorganisms in soil and the biochemical processes for which they are responsible. Lecture 3 hours, laboratory 3 hours per week. Additional suggested prerequisites are BIOL 2013, CSES 2203, and ENSC 3003. Corequisite: Lab component. Prerequisite: BIOL 1543 and BIOL 3863 or ENSC 3223. (Typically offered: Fall Odd Years)

CSES 5303. Bioenergy Feedstock Production. 3 Hours.

(Formerly CSES 4303.) Overview of production and characteristics of cultivated crops, perennial grasses, and woody species as feedstocks for bioenergy. Fundamentals of plant growth factors, culture, harvest and storage, quality and improvement, and introduction to environmental impact, modeling, and resource utilization. Graduate degree credit will not be given for both CSES 4303 and CSES 5303. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203. (Typically offered: Spring)

CSES 5313. Crop Simulation Models in Research, Management and Policy. 3 Hours.

The basics of theory and practice of crop simulation models and their applications in crop research and management, and cropping systems planning and policy. Prerequisite: MATH 1203 and BIOL 1543 or CSES 1203 or consent of instructor. Courses in introductory chemistry and plant physiology are preferred. (Typically offered: Fall Even Years)

CSES 5323. Soil/Water Quality in Bioenergy Feedstock Production Systems. 3 Hours.

Examine concepts of soil and water quality in relation to bioenergy feedstock production, explore research related to biomass removal and by-product addition to soils, and examine the potential effects of proposed feedstock production systems on soil and water quality. Prerequisite: MATH 1203 and CSES 2203 or equivalent or consent of instructor, and CSES 4303 or CSES 5303 (formerly CSES 4303) preferred. (Typically offered: Fall Odd Years)

CSES 5453. Soil Chemistry. 3 Hours.

Application of the principles of chemistry to processes of agronomic and environmental importance in soils. Soil clay mineralogy, soil solution thermodynamics, structure and reactivity of humus, surface complexation and ion exchange, electro-chemical phenomena, and colloidal stability. Prerequisite: CSES 2203 and CHEM 1123 and CHEM 1121L. (Typically offered: Spring Even Years)

CSES 5533. Wetland Soils. 3 Hours.

(Formerly CSES 4553.) This course explains the chemical, physical, and morphological characteristics of wetland soils and describes the techniques for identifying wetland soils using field indicators and monitoring equipment. This course also explains principles of wetland creation, restoration, and mitigation - all key components in assuring the sustainability of valuable wetland resources. Graduate degree credit will not be given for both CSES 4553 and CSES 5533. Prerequisite: CSES 2203 and CSES 2201L or CSES 355V. (Typically offered: Spring Odd Years)

CSES 5543. Plant Genomics. 3 Hours.

Plant genetics based on the study of whole genome sequence, transcriptome and proteome. Provides an overview of the principles and techniques of experimental and in silico genomics. Covers all areas of genome research including structural, comparative and functional genomics as well as proteomics. Prerequisite: CHEM 5843 or any graduate level genetics course. (Typically offered: Spring Even Years)

CSES 5553. Forage-Ruminant Relations. 3 Hours.

Advanced chemical, physical, and botanical characteristics of forage plants, the dynamics of grazing, intake and digestion, and techniques of measuring forage utilization and systems analysis at the plant-animal interface. CSES 1203 recommended. Corequisite: Lab component. Prerequisite: ANSC 3143. (Typically offered: Spring Odd Years)

This course is cross-listed with ANSC 5553.

CSES 5653. Fate and Transport of Organic Contaminants. 3 Hours.

Fate and Transport of Organic Contaminants will present an overview of the transformation and transport processes that influence the environmental fate of organic contaminants, with an emphasis on agricultural pesticides. Biotic and abiotic factors influencing the movement and behavior of organic contaminants in soil and water will be covered extensively, with an emphasis on chemical mechanisms.

Prerequisite: CHEM 1123 and CHEM 1121L and CSES 2203, or instructor consent.

(Typically offered: Spring Odd Years)

CSES 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CSES 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Curriculum and Instruction (CIED) Courses

CIED 1003. Introduction to Technology in Education. 3 Hours.

A study of computer technology as it relates to teacher education. This course introduces students interested in teacher education to the knowledge and skills required to demonstrate their proficiency in technology and learning. (Typically offered: Fall, Spring and Summer)

CIED 1013. Introduction to Education. 3 Hours.

Integrates psychological, sociological, and philosophical foundations of education with concurrent involvement in field experiences. Encourages prospective teachers to become reflective practitioners by emphasizing organization of school systems, planning and implementation of effective classroom environments, development of teaching styles, and new directions in education. An 18-hour early field experience designed to give prospective teachers opportunities to observe and participate in a variety of school settings is incorporated in this introductory course to education. (Typically offered: Fall and Spring)

CIED 2173. Literacy in America. 3 Hours.

A course that examines the myriad definitions of literacy (and illiteracy) and their connections to issues of social class, occupational status, economic and political structures, educational institutions, cultural organizations, and the media. (Typically offered: Fall and Spring)

This course is cross-listed with ENGL 2173.

CIED 2943. Foundations of Language and Literacy. 3 Hours.

A foundational study of language and literacy with an emphasis on content knowledge for teachers that is essential to the components and principles of science-based literacy. (Typically offered: Fall and Spring)

CIED 3001. Early Childhood Education Practicum. 1 Hour.

This practicum course provides opportunities for students to observe and practice providing instruction and guidance in preschool settings. Corequisite: CIED 3003. (Typically offered: Fall, Spring and Summer)

CIED 3003. Early Childhood Education. 3 Hours.

The study of kindergarten and preschool programs: social context of early childhood education, purposes, research basis, curriculum development, methods, and materials. Corequisite: CIED 3001. Prerequisite: CIED 1013. (Typically offered: Spring and Summer)

CIED 3013. Development and Learning Theories in the K-6 Classroom. 3 Hours.

This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 3013H. Honors Development and Learning Theories in the K-6 Classroom. 3 Hours.

This course allows students to cultivate an understanding of how elementary students develop, process information, and learn; studies educational applications pertaining to theories of development, intelligence, and thinking dispositions. Students study various learning theories, their implications for instruction, and their role in the K-6 classroom. Field experience required. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)

This course is equivalent to CIED 3013.

CIED 3023. Survey of Exceptionalities. 3 Hours.

A survey of the characteristics of students with exceptional needs. Reviews the definitions of exceptionalities, learning and behavior characteristics of individuals with exceptionalities and the legal basis for the education of persons with exceptionalities in both elementary and secondary schools. Prerequisite: CIED 1013 or MUED 2012; or AGED 1123 and AGED 1031, or HESC 1501 or PSYC 2003. (Typically offered: Fall, Spring and Summer)

CIED 3033. Classroom Learning Theory. 3 Hours.

A survey of the major theories of learning with special emphasis on human learning and implications for education. Prerequisite: CIED 1013; or MUED 2012; or PHED 1003; or AGED 1123; or PSYC 2003. (Typically offered: Fall, Spring and Summer)

CIED 3043. Introduction to Middle Level Principles and Methods. 3 Hours.

A comprehensive overview of the key components, principles, methodologies, and research foundations to middle level education. Reflective activities and site-based field experience are integrated with course content to provide continuity between theory and practice. Portfolio expectations will be a primary means of course evaluation. Prerequisite: CIED 3053. (Typically offered: Fall)

CIED 3053. The Emerging Adolescent. 3 Hours.

This course is a study of the developmental characteristics (social, emotional, physical, moral, and intellectual) of early adolescents (ages 10-15 years). The implications of these changes for motivation, instruction, learning, and classroom management in the classroom are emphasized. Course has field component. Prerequisite: CIED 1013. (Typically offered: Fall and Spring)

CIED 3063. Literacy Strategies for Middle Level Learners. 3 Hours.

This course is designed to examine theories and practice regarding literacy development and assessment grounded in the knowledge of the characteristics of the middle level learner. A ten-hour field experience is required. Corequisite: CIED 3073. Prerequisite: CIED 3043. (Typically offered: Spring)

CIED 3063H. Honors Literacy Strategies for Middle Level Learners. 3 Hours.

This course is designed to examine theories and practice regarding literacy development and assessment grounded in the knowledge of the characteristics of the middle level learner. A ten-hour field experience is required. Corequisite: CIED 3073 and honors candidacy. Prerequisite: CIED 3043. (Typically offered: Spring)

This course is equivalent to CIED 3063.

CIED 3073. Early Adolescent Literature. 3 Hours.

A study of rationales and strategies for incorporating early adolescent literature across the middle level curriculum. Includes an examination of genres and selected texts from each. Corequisite: CIED 3063. Prerequisite: CIED 3043. (Typically offered: Spring)

CIED 3073H. Honors Early Adolescent Literature. 3 Hours.

A study of rationales and strategies for incorporating early adolescent literature across the middle level curriculum. Includes an examination of genres and selected texts from each. Corequisite: CIED 3063. Prerequisite: CIED 3043 and honors candidacy. (Typically offered: Spring)
This course is equivalent to CIED 3073.

CIED 3083. Arts Integration in the Classroom. 3 Hours.

Content course in arts integration including the pedagogy, design, and implementation of lesson plans which teach skills through the visual and performing arts to students. (Typically offered: Fall)

CIED 3093. Essentials of Literacy. 3 Hours.

An undergraduate foundational course focusing on literacy development and processes of children from the emergent to developmental stages, materials and effective research-based teaching strategies for classroom practice. Not for credit in Childhood Education (CHED) degree program. (Typically offered: Fall and Spring)

CIED 3103. Children and Adolescent Literature. 3 Hours.

A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Prerequisite: CHEDBS or ELELBS or HDFBS BRKD or HDFBS CDEV or PSPED major. (Typically offered: Fall and Spring)

CIED 3103H. Honors Children and Adolescent Literature. 3 Hours.

A survey of children's literary works, authors, and illustrators with emphasis on elementary grade and adolescent literature. Corequisite: CIED 3113. Prerequisite: CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3103.

CIED 3113. Emergent Literacy. 3 Hours.

An understanding of emergent literacy development through a study of science-based literacy pedagogy and practical field experiences. Prerequisite: ENGL 1013, ENGL 1023, CIED 2943 and CHEDBS or ELELBS or HDFBS BRKD or HDFBS CDEV or SPEDBS major. (Typically offered: Fall and Spring)

CIED 3113H. Honors Emergent and Developmental Literacy. 3 Hours.

This course focuses on theories of children's emerging literacy and on the continuing development of literacy abilities in pre-kindergarten and early elementary years. Prerequisite: ENGL 1013, ENGL 1023, and CIED 3262, CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)
This course is equivalent to CIED 3113.

CIED 3123. Mathematics Methods in the K-6 Classroom. 3 Hours.

An examination of the content of elementary mathematics courses. Special emphasis given to methods of teaching the content as well as enrichment materials. Prerequisite: MATH 1203, MATH 2213, MATH 2223, STAT 2303, and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 3133. Integrated Social Studies for the K-6 Classroom. 3 Hours.

Focuses on the methodology of facilitating elementary students' development in language arts and social studies. Integrates the curriculum and teaching strategies in language arts and social studies. Prerequisite: CHEDBS or ELELBS major, and PLSC 2003 and HIST 2003 and HIST 2013, and (HIST 1113 or HIST 1123), and (GEOS 1123 or ANTH 1023), and (ECON 3053 or ECON 2143), and ARHS 1003, and MLIT 1003. (Typically offered: Fall and Spring)

CIED 3143. Teaching Science in the Elementary Grades. 3 Hours.

Study of the methods and materials in teaching science. Classroom applications of teaching strategies with analysis of teacher effectiveness in seminar settings are emphasized. Prerequisite: (BIOL 1543 and BIOL 1541L), and (GEOS 1113 and GEOS 1111L), and (PHYS 1034 or ASTR 2003 and ASTR 2001L), and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 3262. Language Development for the Educator. 2 Hours.

Nature of speech-language development in preschool and school-aged children, including cognitive prerequisites, social contexts, and relationships between language acquisition and literacy. Language differences (dialectal, bilingual) and speech-language disorders are explored. The role of the educator in facilitating language acquisition is emphasized. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 3453. Developmental Literacy. 3 Hours.

A deep and comprehensive application of the development of literacy skills from decoding to fluent, comprehending readers. Field experience required. Prerequisite: CIED 2943, CIED 3113, and admission into ELELBS or CHEDBS programs. (Typically offered: Fall and Spring)

CIED 3901H. Honors Curriculum and Instruction Education Thesis Tutorial. 1 Hour.

Designed to provide the foundation for the Honors Thesis. Students and faculty tutors work "one-on-one" exploring a specific topic which has been agreed upon by the student and the professor. Prerequisite: Honors candidacy and CATEBS, CHEDBS, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDBA majors. (Typically offered: Fall, Spring and Summer)

CIED 4003. Elementary Seminar. 3 Hours.

This course is designed to synthesize the foundational content presented in the Bachelor of Science in Education, Elementary Education program. It focuses on refinement of generalized knowledge to accommodate specialized content relevant to elementary students. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4013. Capstone Course for Foreign Language Licensure. 3 Hours.

This course is designed to identify and provide evidence of content language specific proficiencies in the four skills of reading, writing, listening, and speaking a foreign language. (Typically offered: Spring)

CIED 4023. Teaching in Inclusive Secondary Settings. 3 Hours.

This course is designed to prepare pre-service teachers to teach in inclusive classroom settings at the secondary level. Course content will focus on the ways in which exceptionality, specifically focused on high-incidence disabilities and culture, specifically focused on English language learners mediate the learning experiences of secondary level students. (Typically offered: Summer)

CIED 4083. Creativity in Daily Practice. 3 Hours.

Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium. (Typically offered: Spring Even Years) May be repeated for up to 6 hours of degree credit.

CIED 4101. Practicum. 1 Hour.

Practicum. Corequisite: CIED 3133. (Typically offered: Spring)

CIED 4101H. Honors Practicum. 1 Hour.

Practicum. Corequisite: CIED 4113. (Typically offered: Spring)
This course is equivalent to CIED 4101.

CIED 4113. Integrated Communication Skills for the K-6 Classroom. 3 Hours.

Focuses on the methodology of facilitating elementary students' literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4113H. Honors Integrated Communication Skills for the K-6 Classroom. 3 Hours.

Focuses on the methodology of facilitating elementary students' literacy development. Emphasis is on the integration of the communication skills of reading, writing, speaking, and listening across the curriculum. Prerequisite: COMM 1313 or COMM 2323 and CHEDBS or ELELBS major and honors. (Typically offered: Fall and Spring)

This course is equivalent to CIED 4113.

CIED 4123. Literacy Assessment and Interventions in the Elementary Classroom. 3 Hours.

An undergraduate course focusing on literacy assessment and intervention for prospective classroom teachers. Participants become familiar with assessment procedures and instruments for identifying student strengths and weaknesses in literacy, determining effective intervention strategies for literacy improvement, and principles of reporting assessment and intervention outcomes. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4131. Practicum for Secondary and Multilevel Tracks in Education. 1 Hour.

This practicum is a requirement for entry into the EDUC MA, Master of Arts in Teaching program. Students will be involved in documented experiences with children for a minimum of 60 hours in grades K-12. Students enrolled in the multilevel track will be placed in a combination of elementary, middle, and high school settings. Students enrolled in the secondary track will be placed in a combination of middle and high school settings. Prerequisite: Cleared background check. (Typically offered: Spring and Summer)

CIED 4133. Measurement and Research in the K-6 Classroom. 3 Hours.

This course is designed to provide an introduction to educational assessment, research methods, and what research has to say about trends and topics in elementary education. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Summer)

CIED 4143. Curriculum Design and Applications of Instructional Practice. 3 Hours.

A course in the design and adaptation of curriculum for students in regular, elementary classrooms. Theoretical bases and curriculum models will be reviewed. Corequisite: CIED 4173. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

CIED 4153. Classroom Management in the Elementary Grades. 3 Hours.

This course focuses on a number of different management techniques for elementary classrooms that can be used in general education settings. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4163. Senior Project. 3 Hours.

This course is designed to provide students with the research skills necessary to complete their senior project. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Summer)

CIED 4173. Student Teaching. 3 Hours.

Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 4183. Instruction and Assessment of Writing. 3 Hours.

Develop knowledge, skills and dispositions about writing processes, genres, and pedagogy. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

CIED 4286. Teaching Experience. 6 Hours.

The teaching experience is an essential component of the Bachelor of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. Teacher candidates are placed in K-12 or 7-12 levels depending on their content area for licensure. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to the B.A.T. program. (Typically offered: Spring) May be repeated for up to 12 hours of degree credit.

CIED 4323. Instructional Design for Teachers. 3 Hours.

Study of the design of instruction for students with exceptionalities. Emphasis is placed on synthesizing a broad range of existing and emerging perspectives and methods of instruction and applying them to practical classroom practice. Prerequisite: CIED 3023 and CHEDBS or ELELBS major. (Typically offered: Fall)

CIED 4363. Disciplinary Literacy in the K-6 Classroom. 3 Hours.

Focuses on the methodology of extending K-6 learners' basic literacy development, as a foundation for intermediate and disciplinary literacy. Emphasis is on the engagement of students in the distinct reading, writing, speaking, and listening requirements of different disciplines. Prerequisite: CIED 3113 and CHEDBS or ELELBS major. (Typically offered: Fall and Spring)

CIED 4403. Understanding Cultures in the Classroom. 3 Hours.

This course provides pre-and in-service teachers knowledge and skills necessary for educating ethnically and linguistically diverse classrooms. Students have the opportunity to understand positive relationships while removing stereotypes and prejudices. It addresses issues for social justice education through understanding ways that children learn and communicate in their homes and communities. Students will examine how topics in multicultural education inform instructional goals, curriculum planning/implementation, and teaching practices across content areas in public K-12 classrooms. Some sections of this course will contain a service learning component. (Typically offered: Fall)

CIED 4413. Acquiring a Second Language. 3 Hours.

The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly of English. (Typically offered: Spring)

CIED 4423. Teaching English as a Second Language. 3 Hours.

This course is designed to provide teacher candidates with the basic knowledge and teaching skills necessary to address the linguistic needs of English language learners (ELLs) in regular classrooms. The students in this class will learn about and use multiple strategies for promoting ELLs' reading, writing, listening, and speaking skills. Emphasis will be placed especially on differentiating early reading instruction for ELLs. Prerequisite: CHEDBS or ELELBS major. (Typically offered: Spring)

CIED 4433. The Moral Mind in Action. 3 Hours.

The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Fall)

CIED 4443. Moral Courage. 3 Hours.

Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. (Typically offered: Spring)

CIED 4463. Culture and Learning. 3 Hours.

Culture, its meanings, dimensions, and manifestations are explored in this course. How these cultural elements impact perceptions of students, classroom practices, and educational processes are explored in this course. A strength-based approach is employed to explore the issues associated with including all students within classrooms. (Typically offered: Fall, Spring and Summer)

CIED 4503H. Honors Charles Darwin and the Legacy of Evolution. 3 Hours.

This highly integrated honors class draws on various perspectives to examine the life of Charles Darwin and the legacy and impact of evolution. Topics and guest instructors change each semester, but the course will focus on evolution from the perspectives of biology, anthropology, the law, philosophy, history, culture and literature. (Typically offered: Spring Even Years)

CIED 4513. Teaching Children with Mild Disabilities. 3 Hours.

This course is a study of the characteristics of young students with disabilities and methods for teaching this group of students. The course will provide future teachers with an understanding of interventions useful in teaching individuals with special learning needs during grades P-4. (Typically offered: Fall and Spring)

CIED 4513H. Honors Teaching Children with Mild Disabilities. 3 Hours.

This course is a study of the characteristics of young students with disabilities and methods for teaching this group of students. The course will provide future teachers with an understanding of interventions useful in teaching individuals with special learning needs during grades P-4. (Typically offered: Irregular)

This course is equivalent to CIED 4513.

CIED 4523. Teaching Children with Severe Disabilities. 3 Hours.

This course is a study of the characteristics of young students with severe disabilities and methods for teaching this group of students. The course will provide future teachers with an understanding of interventions useful in teaching individuals with special learning needs during grades P-4. (Typically offered: Spring and Summer)

CIED 4523H. Honors Teaching Children with Severe Disabilities. 3 Hours.

This course is a study of the characteristics of young students with severe disabilities and methods for teaching this group of students. The course will provide future teachers with an understanding of interventions useful in teaching individuals with special learning needs during grades P-4. (Typically offered: Spring and Summer)

This course is equivalent to CIED 4523.

CIED 4533. Reading Comprehension Through Children's and Adolescent Literature. 3 Hours.

An examination of the major genres of children and adolescent literature to develop and extend K-6 students' skills in reading comprehension. Field experience required. Prerequisite: CIED 2943, CIED 3113, CIED 3453, and admission into CHEDBS or ELELBS programs. (Typically offered: Fall and Spring)

CIED 498VH. Curriculum and Instruction Honors Thesis/Project. 1-3 Hour.

Designed to provide facilitation of the Honors Thesis/Project. Students and faculty work "one-on-one" to complete the honors thesis/project. Prerequisite: Honors candidacy, CIED 3901H, and CATEBS, CHEDBS, EDSTBS, EGEDBA, ELELBS, FREDBA, GREDBA, SNEDBA, SPEDBS, or SSEDDBA major. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CIED 499V. Special Topics in Curriculum and Instruction Education. 1-6 Hour.

Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CIED 499VH. Honors Special Topics in Curriculum and Instruction Education. 1-3 Hour.

Discussion and advanced studies on selected topics in curriculum and instruction. Special focus on recent and emerging topics in education. (Typically offered: Fall, Spring and Summer)

This course is equivalent to CIED 499V.

CIED 5003. Elementary Education Seminar. 3 Hours.

This course is designed to synthesize the foundational content presented in the Master of Arts in Teaching core courses. It focuses on refinement of the generalized knowledge to accommodate specialized content children. Professional attitudes, knowledge and skills relevant to elementary students. Professional attitudes, knowledge and skills applicable to today's elementary educator are addressed. Prerequisite: Admission to the CHED M.A.T. (Typically offered: Spring)

CIED 5012. Measurement, Research, and Statistical Concepts for Teachers. 2 Hours.

An introduction to constructing, analyzing, and interpreting tests, types of research and the research process, qualitative and quantitative techniques for assessment, and descriptive and inferential statistics. (Typically offered: Summer)

CIED 5013. Measurement, Research and Statistical Concepts in the Schools. 3 Hours.

An introduction to constructing, analyzing, and interpreting tests; types of research and the research process; qualitative and quantitative techniques for assessment; and descriptive and inferential statistics. Prerequisite: Admission to graduate school. (Typically offered: Summer)

CIED 5022. Classroom Management Concepts. 2 Hours.

A number of different classroom management techniques are studied. It is assumed that a teacher must possess a wide range of knowledge and skills to be an effective classroom manager. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5032. Curriculum Design Concepts for Teachers. 2 Hours.

The design and adaptation of curriculum for students in regular and special K-6 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to the M.A.T. program. (Typically offered: Spring)

CIED 5043. Content Area Reading in Elementary Grades. 3 Hours.

This course teaches the integration of reading and writing in the content areas. Reading and writing as integrated strands of the language process is presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall and Summer)

CIED 5052. Seminar: Multicultural Issues. 2 Hours.

This seminar provides an introduction to the major concepts and issues related to multicultural education. The ways in which race, ethnicity, class, gender, and exceptionality influence students' behavior are discussed. Prerequisite: Admission to the M.A.T. program. (Typically offered: Summer)

CIED 5053. Multicultural Issues in Elementary Education. 3 Hours.

This course provides an introduction to the major concepts and issues related to multicultural education in elementary classrooms. The ways in which race, class, gender and exceptionality influence students' behavior are discussed. Prerequisite: Admission to graduate school. (Typically offered: Spring Odd Years; Summer)

CIED 5063. Disciplinary and Interdisciplinary Literacies in Education. 3 Hours.

This course teaches the integration of reading, writing, and new literacies within the discipline and across disciplines. Theory and strategy are presented as integrated strands of the language process as presented in the context of instructional principles and suggested teaching practices. A solid research base is emphasized while keeping the focus on practical application. Prerequisite: Admission to Teacher Education M.A.T. Program. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

CIED 5073. Action Research in Elementary Education. 3 Hours.

Provides the students with experience in conducting case studies and action research related to childhood education. In addition, students gain knowledge regarding practices used in ethnographic research. Prerequisite: Admission to M.A.T. program. (Typically offered: Spring)

CIED 508V. Elementary Education Cohort Teaching Internship. 1-6 Hour.

Full-time student teaching in grades K-6 to be repeated both fall and spring semesters. Students will practice and master instructional strategies under the supervision of qualified mentor teachers and university faculty members. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 5093. Methods of Instruction for Middle Level I. 3 Hours.

A study of methods and materials in the special content areas (math, science, English/language arts, and social studies). The planning of instruction, microteaching, and the development of middle school instructional materials are included. Prerequisite: Admission to M.A.T. program. (Typically offered: Summer)

CIED 5103. Advanced Middle Level Principles. 3 Hours.

An in-depth examination of recent research on the major issues, practices, and policies for middle level education. Emphasis is on analysis of cutting edge issues germane to the life, education, and welfare of the early adolescent via the integration of theory and practice. Prerequisite: Admission to Masters of Arts in Teaching program. (Typically offered: Spring)

CIED 5113. Reading in Middle Schools. 3 Hours.

An overview of methods and materials for teaching reading to early adolescents. Reflective activities and site-based field experiences are integrated with course content to provide continuity between theory and practice. Portfolio expectations will be a primary means of course evaluation. Prerequisite: Admission to the middle level education program and CIED 3113. (Typically offered: Fall, Spring and Summer)

CIED 5123. Writing Process Across the Curriculum (Middle Level). 3 Hours.

This course will provide an overview of the research, and methods for incorporating writing across all curriculum. Writing as a process will be emphasized. Reflective activities and site-based field experience will be integrated into the course content. Prerequisite: Admission to M.A.T. Program. (Typically offered: Spring)

CIED 5132. Research in Middle Level Curriculum and Instruction. 2 Hours.

An introduction to inquiry and research in middle level curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Practicum in educational research and evaluation is done as part of the class. Prerequisite: Admission to the MAT program. (Typically offered: Fall)

CIED 5143. Internship: Middle Level. 3 Hours.

The internship for middle level education is an extended field experience in which a pre-service teacher integrates knowledge and skills developed in education classes with practice in the field. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 5153. Creativity in Daily Practice. 3 Hours.

(Formerly CIED 4083.) Arts integration course including the ideas, design, and implementation of practices in the classroom, board room, and professional field that enrich the experiences of all stakeholders while building right-brain thinking skills for the new millennium. Graduate degree credit will not be given for both CIED 4083 and CIED 5153. (Typically offered: Spring Even Years) May be repeated for up to 6 hours of degree credit.

CIED 5162. Applied Practicum. 2 Hours.

Provides laboratory experiences for CIED 5173 (Literacy Assessment and Intervention) and CIED 5183 (Readings in Early Childhood Education). Corequisite: CIED 5183 and CIED 5173. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5173. Literacy Assessment and Intervention. 3 Hours.

Focuses on assessment of young children's literacy skills. Techniques discussed include informal observation, miscue analysis, and portfolio assessment. Prerequisite: Admission to graduate school. (Typically offered: Fall and Summer)

CIED 5183. Readings in Early Childhood Education. 3 Hours.

Will continue to develop understandings of classic studies and will explore the impact these have had on the most recent issues in early childhood education. Prerequisite: Admission to the CHED M.A.T. (Typically offered: Fall)

CIED 5193. Methods of Instruction for Middle School II. 3 Hours.

Second special methods course for teaching at the middle level. Emphasizes further refinement of teaching skills and methods; the integration of the sciences, mathematics, and technology; science, technology, and society (STS) issues; and the integration of social studies and English language arts. Prerequisite: CIED 5093 and admission to the M.A.T. program. (Typically offered: Fall)

CIED 5203. English Language Arts/Speech & Drama Methods of Instruction. 3 Hours.

This course provides an introduction to teaching English language arts (ELA) and speech/drama in the context of elementary, middle and high school settings. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching provide the major tenets of instruction. (Typically offered: Summer)

CIED 5213. Issues and Trends in Literacy. 3 Hours.

This course provides an examination of practices to teaching literacy, broadly defined. The topics, issues, methods, and materials encompassing philosophical, cognitive, and psychological dimensions of teaching provide the major tenets of instruction. Prerequisite: Admission to M.A.T. (EDUCMA) Secondary program or instructor consent. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

CIED 5223. Learning Theory. 3 Hours.

This course provides the student with information about foundational issues in education, including history and philosophy of American Education, psychological and social theories of education, characteristics of learners, and learning processes. Prerequisite: Admission to M.A.T. degree program. (Typically offered: Summer)

CIED 5232. Interdisciplinary Studies. 2 Hours.

Introduction to the nature of interdisciplinary study: curricular content, course planning (topics and themes), instructional strategies, and evaluation and assessment. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 5243. The Moral Mind in Action. 3 Hours.

(Formerly CIED 4433.) The Moral Mind in Action explores how people reason through moral dilemmas and prepares students to more effectively recognize and resolve moral problems. Best practices of teachers and administrators of K-16 character education programs are discussed. Graduate degree credit will not be given for both CIED 4433 and CIED 5243. (Typically offered: Fall)

CIED 5253. Moral Courage. 3 Hours.

(Formerly CIED 4443.) Moral Courage explores the factors that support translating moral thinking into moral action. This course draws from the field of positive psychology to guide students as they leverage existing strengths and develop new strategies for acting with moral courage in their personal and professional lives. Best practices of teachers and administrators of K-16 character education programs are discussed. Graduate degree credit will not be given for both CIED 4443 and CIED 5253. (Typically offered: Spring)

CIED 5263. Assessment, Evaluation, and Practitioner Research. 3 Hours.

A study of assessment, testing, and evaluative procedures in classrooms including types of tests, abuses of tests, test construction, scoring, analysis and interpretation, statistical methods, and alternative evaluation and assessment techniques. Classroom-based data collection and analysis. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall)

CIED 5273. Research in Curriculum and Instruction. 3 Hours.

An introduction to inquiry and research in curriculum and instruction. It examines the principles, strategies, and techniques of research, especially qualitative inquiry. Qualitative method in assessment and evaluation are considered. Practicum in educational research and evaluation is done as part of the class. Prerequisite: Admission to the M.A.T. program. (Typically offered: Fall, Spring and Summer)

CIED 528V. Teaching Experience. 1-6 Hour.

The teaching experience is an essential component of the Masters of Arts in Teaching degree. The two semester experience allows Teacher Candidates (TC) to make further application of theoretical principles of teaching and learning. Teacher Candidates will be assigned placement in area schools for both fall and spring semesters. The fall semester consists of a field experience including observation, co-planning, and co-teaching. The spring semester consists of an immersion experience for teacher candidates to plan and teach independently. Prerequisite: Admission to the M. A. T. Program (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 5293. Special Methods, Interdisciplinary Section. 3 Hours.

The third and final part of the middle level special methods course. Provides interns with the knowledge, dispositions, and skills for developing an interdisciplinary course of study in conjunction with the members of their interdisciplinary team. Prerequisite: CIED 5093 and admission to M.A.T. program. (Typically offered: Spring)

CIED 5303. Adolescence and Learning. 3 Hours.

Study of the developmental characteristics (physical, emotional, social and intellectual) of early and late adolescence (ages 10-18; grades 5 to 12). The progression from early to late adolescence and the implications this evolution has for learning, motivation, instruction and classroom practices are emphasized. Prerequisite: PSYC 2003. (Typically offered: Spring)

CIED 5313. Principles of Qualitative Research in Curriculum & Instruction. 3 Hours.

Designed specifically for aspiring qualitative researchers who wish to conduct research in settings unique to curriculum and instruction. Methods of research design, data analysis, and writing for publication will be emphasized. Strongly recommended for graduate students who are considering a qualitative thesis or dissertation in curriculum and instruction. (Typically offered: Spring Odd Years)

CIED 5323. Transition Planning for Persons with Disabilities. 3 Hours.

Prepares students to plan, evaluate, and implement transition programs within both regular and special classrooms at the elementary, middle and secondary school levels. (Typically offered: Spring)

CIED 5333. Curriculum Theory and Development for Educators. 3 Hours.

The design and adaptation of curriculum for students in regular and special K-12 classrooms. Theoretical bases and curriculum models are reviewed. Concurrent clinical experiences in each area of emphasis are included. Prerequisite: Admission to the M.A.T. program. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

CIED 5353. Teaching Students with Diverse Needs in Middle Education Settings. 3 Hours.

To provide future scholar-practitioners with a knowledge base concerning the issues involved in the successful instruction of persons with special learning needs during middle school years. (Typically offered: Irregular)

CIED 5363. Methods and Assessment in K-12 Online Teaching. 3 Hours.

The study of curriculum, instructional methods and assessment techniques to facilitate student learning in K-12 virtual and hybrid teaching environments. Students enrolled in the course will be required to demonstrate knowledge of prevalent and relevant models of K-12 curriculum, web-based instructional methods, assessment techniques and utilize tools for the development and implementation of effective instruction in the K-12 virtual classroom. Prerequisite: Graduate standing. (Typically offered: Fall)

CIED 5393. Introduction to Linguistics. 3 Hours.

This course is an introduction to human language. The goal is to understand what it means to speak a language, including an introduction to phonetics and phonology (specifically the sound system of American English), morphology (the rules of English at the word level), syntax (rules that govern sentence level language), semantics (meanings of words) and sociolinguistics (or the study of language use in its social context). (Typically offered: Fall)

CIED 5403. Early Childhood Education: Rationale and Curriculum. 3 Hours.

Rationale and curriculum of an early childhood education program, with special attention given curricular frameworks and professional organization policies. (Typically offered: Irregular)

CIED 5423. Curriculum and Instruction: Models and Implementation. 3 Hours.

The study of models of curriculum and instruction and their implementation to facilitate student learning in a variety of instructional environments. (Typically offered: Spring)

CIED 5433. Methods and Materials for Teaching Children's and Adolescent Literature. 3 Hours.

Issues and trends in children's literature. Contemporary works are evaluated and reviewed based on changing social political conditions. Multicultural approach to children's literature is emphasized. Prerequisite: Undergraduate course in children's literature. (Typically offered: Irregular)

CIED 5443. Methods of Teaching Foreign Language K-12. 3 Hours.

Study of the methods and materials in the teaching of foreign language in K-12 settings as well as the theories of second language acquisition. Includes philosophical, cognitive, and psychological dimensions of teaching foreign languages. The planning of instruction, microteaching, and the development of instructional materials are included. Prerequisite: Admission to the MAT program. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

CIED 5453. Evaluation Techniques. 3 Hours.

Evaluation of learning using traditional means of assessment as well as alternative or authentic assessment techniques. (Typically offered: Irregular)

CIED 5461. Capstone Research Seminar. 1 Hour.

This course provides students with basic knowledge and practical skills in understanding, utilizing and implementing a research design project with a focus in the discipline of curriculum and instruction with particular emphasis of some aspect of teaching and/or learning. As a part of this course students will design, conduct and report the results of an action research study undertaken in the teaching internship. Prerequisite: Admission to M.A.T. program. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

CIED 5483. Teaching Mathematics. 3 Hours.

Content, methods, and materials for teaching multiple strands of elementary school mathematics. Emphasis on principles and procedures of a conceptual and integrated approach to learning mathematics. Prerequisite: Undergrad coursework in teaching elementary or early childhood mathematics. (Typically offered: Irregular)

CIED 5493. Teaching Social Studies. 3 Hours.

Purpose, content, psychology, materials, and methods for teaching the social sciences in the elementary school. Emphasis on principles and procedures for combining the social studies with other areas of the curriculum in broad unit instruction. Prerequisite: Undergraduate coursework in teaching elementary or early childhood social studies. (Typically offered: Irregular)

CIED 5503. Teaching Science. 3 Hours.

The influence of science on the community, on the home, and the child. Use of science in the living and learning of the child at school. (Typically offered: Spring and Summer)

CIED 5513. Sound System of American English. 3 Hours.

This course will study the structure and development of American English (AE). Topics include: 1) the structure/systems of American English pronunciation, 2) vowels, 3) consonant system (including such features as minimal pairs, 4) prosody, intonation, rhythm, and stress, and 5) regionalism and social varieties, and 6) pedagogical approaches to teaching the features of American English. (Typically offered: Fall)

CIED 5523. Instructional Practices in Teaching Foreign Language. 3 Hours.

A pedagogical studies course based on the theoretical and practical aspects of methods, techniques, and materials for effective teaching of foreign languages in K-12 schools. Prerequisite: Admission to M.A.T. Program. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

CIED 5533. Teaching Language Arts. 3 Hours.

The place of the language arts in the elementary curriculum. Exploration of materials, content, practices, and methods, used in reading, speaking, listening, and writing experiences. (Typically offered: Spring)

CIED 5543. Structures of American English. 3 Hours.

This course provides an introduction to the grammars of English, including (but not restricted to) traditional, structural, and transformational-generative (universal grammar). It includes approaches to the teaching of all types of grammars. (Typically offered: Spring and Summer)

CIED 5553. Social Justice and Multicultural Issues in Education. 3 Hours.

This seminar provides an introduction to the major concepts and issues related to multicultural education and social justice in education and the ways in which race, ethnicity, class, gender, and exceptionality influence students' behavior. The course also examines the intersection of teacher and student perceptions of identity, schooling, and learning and the effects on educational systems. Prerequisite: Admission to MAT. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

CIED 5563. Teaching Internship/Action Research. 3 Hours.

During this course, Master's candidates will be provided with classroom time to prepare to teach and then will be assigned to a classroom or classrooms. During this time the candidates will have an opportunity (under supervision) to observe, to teach and to participate in classroom activities. Additionally, candidates will research some area of their own pedagogy relevant to the experience. (Typically offered: Irregular)

CIED 5573. Foundations of Literacy. 3 Hours.

Teaching of reading to children; techniques, research, and modern practices. (Typically offered: Fall, Spring and Summer)

CIED 5583. Correlates of Reading Process. 3 Hours.

The developmental program is emphasized through a student of the reading process. Learning theory and research are related to reading instruction and materials through the development and application of evaluative criteria based on an understanding of reading process. Prerequisite: CIED 5573. (Typically offered: Irregular)

CIED 5593. Advanced Diagnosis and Intervention. 3 Hours.

Emphasizes the diagnosis and remediation of reading difficulties in the classroom setting. Students are expected to become familiar with cause of reading failure, diagnosis instruments and procedures, principles of report writing, and corrective instructional methods and materials. The course is open to graduate students with instructor's consent. Enrollment limited to 20. Prerequisite: CIED 5573. (Typically offered: Irregular)

CIED 5603. Innovations in School Education. 3 Hours.

An examination of the change process in education with emphasis on those elements which support or hinder change in the schools, and the detailed study of schools innovations on national, state, and local levels. (Typically offered: Fall, Spring and Summer)

CIED 5613. Contemporary Issues in Education. 3 Hours.

A study of issues pertaining to the goals, objectives, organization, and curriculum of the schools with an analysis of the teacher's role in dealing with current concerns in these areas. (Typically offered: Fall Odd Years)

CIED 5623. The School Curriculum. 3 Hours.

General principles and techniques of selecting and organizing curricular materials. (Typically offered: Fall, Spring and Summer)

CIED 5633. Analysis of Instruction. 3 Hours.

A survey of the research and literature related to the systematic study of the field of teaching. An examination of the definitions of teaching and the knowledge base on which teaching is predicated. A study of the implications of the research of effective teaching and the key curricular and instructional issues. (Typically offered: Spring Even Years)

CIED 564V. Science Instructional Strategies. 1-6 Hour.

Methods and materials in teaching specific science content with a focus on that content and/or the pedagogical perspectives necessary for effective and engaging instruction. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CIED 5653. Methods of Middle School Instruction. 3 Hours.

Philosophy, rationale, and instructional practices of middle school instruction. Prerequisite: Graduate standing. (Typically offered: Summer)

CIED 5663. Evaluation of Instruction. 3 Hours.

Examination of methods and philosophies of evaluation. Consideration will be given to grading, techniques of grading, and construction of behavioral objectives and test items. (Typically offered: Summer Even Years)

CIED 567V. Teaching Foreign Cultures in Social Studies Curricula. 1-6 Hour.

Extensive examination of foreign cultures (West Europe, USSR, China, Latin America) and methods of teaching about them in secondary school social studies. (Typically offered: Fall, Spring and Summer)

CIED 5683. Adolescent Literature. 3 Hours.

Content course in adolescent literature including selection, reading, evaluation, and psychological basis of classic and contemporary works. (Typically offered: Fall, Spring and Summer)

CIED 5703. English Language Arts and Reading Standards: Contents and Quality. 3 Hours.

This course will (1) examine the purposes, contents, and quality of K-12 English language arts and reading standards, (2) analyze their relationship to classroom and school district curricula, student assessment, educator licensing regulations, licensure tests, and professional development, (3) and explore educational, social, and political issues raised by ELA/R standards. (Typically offered: Irregular)

CIED 5713. Integrating the Elementary Curriculum. 3 Hours.

This course focuses on meaningful integration of science, mathematics, literacy, social studies, art, and music in the elementary classroom. A strong foundation for integrating the elementary curriculum will be developed by providing students with theoretical frameworks, research, resources, and methods related to classroom practice. Strategies to coordinate the integration of these subject areas for the K-4 classroom will be modeled. (Typically offered: Summer)

CIED 5723. Nature and Needs of Persons with Mild Disabilities. 3 Hours.

Educational, psychological, and social characteristics of individuals who have mild disabilities with emphasis on educational methods and modifications. Prerequisite: CIED 3023. (Typically offered: Fall)

CIED 5793. Practicum in Literacy. 3 Hours.

Laboratory experience in which students diagnose reading difficulties and practice remedial measures under the direct supervision of the instructor. Emphasis is given to continuous diagnosis and to the use of commercially produced materials and trade books in remediation. Enrollment limited to 15. Prerequisite: CIED 5593. (Typically offered: Fall, Spring and Summer)

CIED 5803. Nature and Needs of the Gifted and Talented. 3 Hours.

Educational, psychological, and social characteristics of gifted and talented children. Prerequisite: Graduate standing. (Typically offered: Fall)

CIED 5813. Curriculum Development in Gifted and Talented. 3 Hours.

Examines the various models for developing curriculum and providing services for students identified for gifted programs. Prerequisite: CIED 5803. (Typically offered: Spring)

CIED 5823. Gifted and Talented (Structured) Practicum. 3 Hours.

Supervised field experience in gifted education programs, schools, institutions, and other facilities for gifted/talented children. Prerequisite: CIED 5813. (Typically offered: Summer)

CIED 5833. Gifted and Talented (Flex) Practicum. 3 Hours.

Students design and implement an individualized practicum experience (Type III Renzulli) that provides the opportunity to refine and enhance personal attitudes, beliefs, and skills in gifted education. Prerequisite: CIED 5823. (Typically offered: Fall)

CIED 5843. Representations of American Education in Film. 3 Hours.

This course provides an examination of students, teachers, administrators, schools, and schooling as they exist on the silver screen. Of particular interest is how film representations and misrepresentations potentially affect public perceptions of education. This course draws on educational theory and the field of cultural studies. (Typically offered: Irregular)

CIED 5853. Issues in Mathematics Education. 3 Hours.

Study of research in mathematics education and applications to classroom teaching and learning. Emphasis will be given past and current research in the areas of students' cognitive development in mathematics, mathematics curriculum development, and teaching practices and assessment. (Typically offered: Irregular)

CIED 5863. Teaching Global Issues. 3 Hours.

Global interdependence and its consequent issues have become an integral part of most social studies programs in American schools. Some schools developed specific courses, required or elective, and others include them in existing history, economics, government and civic courses. Secondary social studies teachers and their students explore these issues as part of current events discussions. Prerequisite: Graduate standing. (Typically offered: Spring Odd Years)

CIED 5913. Parent/Family Engagement for Culturally & Linguistically Diverse Students. 3 Hours.

Students will investigate characteristics of family-community engagement systems and models serving culturally and linguistically diverse (CLD) students and families. Identify qualities of a welcoming, accepting environment for CLD families and implement some of these characteristics in their classroom and schools. Support communication and facilitate contributions by CLD families to the school and community including leadership roles. Demonstrate knowledge, skills, best practices and resources to enhance CLD family-community engagement by developing and implementing a service-learning project in their school or community. Prerequisite: Graduate standing. (Typically offered: Summer)

CIED 5923. Second Language Acquisition. 3 Hours.

This is one of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course gives an introduction to the basics in research and learning theories involved in the acquisition of second languages and cultures, particularly ESL. (Typically offered: Fall)

CIED 5933. Second Language Methodologies. 3 Hours.

This is one of a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces the basics in approaches, methodologies, techniques, and strategies for teaching second languages, especially ESL. (Typically offered: Spring)

CIED 5943. Teaching People of Other Cultures. 3 Hours.

This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course focuses on cultural awareness, understanding cultural differences, and instruction methods for integrating second cultures, especially the culture of the United States, into the curriculum. (Typically offered: Fall)

CIED 5953. Second Language Assessment. 3 Hours.

This is one in a series of four courses leading to Arkansas approved endorsement for teaching English as a Second Language (ESL). The course introduces basic methods for testing, assessing and evaluating second language, especially ESL, learners for placement purposes and academic performance. (Typically offered: Spring)

CIED 5963. Reading in Middle and Secondary Schools. 3 Hours.

Methods and materials of teaching reading in secondary schools with emphasis on remedial and developmental reading problems of students. (Typically offered: Irregular)

CIED 5973. Practicum in Secondary Education. 3 Hours.

Students will engage in action research in a school setting to advance their knowledge of teaching and learning venues including schools and informal learning environments. Prerequisite: Permission. (Typically offered: Fall and Spring)

CIED 5983. Practicum in Curriculum & Instruction. 3 Hours.

This course will provide degree candidates with advance knowledge of teaching in the elementary or secondary schools. This will be accomplished through a semester-long practicum during which an action research project will be designed, enacted, and reported. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

CIED 599V. Special Topics. 1-18 Hour.

Special topics. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

CIED 600V. Master's Thesis. 1-6 Hour.

This course is designed for students completing a thesis at the master's level in curriculum and instruction and related programs. It may be taken multiple times for 1-6 credits but no more than 6 credits will be counted toward the degree. Prerequisite: Graduate Standing (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

CIED 6013. Curriculum Theory, Development, and Evaluation. 3 Hours.

Principles and concepts of curriculum and development, with an analysis of the factors basic to planning, the aims of the educational program, the organization of the curriculum, curriculum models, and elements desirable in the curriculum of schools including evaluation. (Typically offered: Fall Odd Years)

CIED 6023. Instructional Theory. 3 Hours.

Study of psychological, anthropological, sociological, and educational theories of instruction and learning. Emphasis is placed on synthesizing a broad range of existing and emerging perspectives in understanding individual, interactional and contextual phenomena of instruction and learning. (Typically offered: Spring Even Years)

CIED 6033. Content Specific Pedagogy. 3 Hours.

This course explores the relationship between the content of courses taught in schools and the pedagogical principles that the teaching of the content requires. Students will discuss and synthesize findings from the research literature and from personal investigation. (Typically offered: Irregular)

CIED 6043. Analysis of Teacher Education. 3 Hours.

This course examines issues, problems, trends, and research associated with teacher education programs in early childhood, elementary, special education, and secondary education. Prerequisite: CIED 6023. (Typically offered: Summer Even Years)

CIED 6053. Curriculum and Instruction: Learner Assessment and Program Evaluation. 3 Hours.

This course provides an overview of designing, implementing and analyzing learner assessments as well as systemic and program evaluations in a variety of instructional environments. Prerequisite: Admissions to Ed.S. or Ph.D. program. (Typically offered: Spring Even Years)

CIED 6063. Systemic Change In Education. 3 Hours.

This course is designed to critically examine education and society and interplay their interdependence between them, to differentiate between meaningful and superficial change, and to explore the agents of change in a diverse and complex social environment. Prerequisite: Admission to Ed.S. or Ph.D. program. (Typically offered: Spring Odd Years)

CIED 6073. Seminar in Developing Creativity. 3 Hours.

A study of the facets of creativity, how they can be applied to be used in one's everyday life, how they can be applied in all classrooms, and how to encourage the development of these in students. (Typically offered: Irregular)

CIED 6083. Piaget's Theory and Instruction. 3 Hours.

Piaget's theory has been applied to classroom instruction in various settings. This course will investigate the theory in depth, study classroom application, and students will devise application. Prerequisite: CIED 6023. (Typically offered: Spring Odd Years)

CIED 6093. Vygotsky in the Classroom. 3 Hours.

This course introduces the cultural-historical theory of L. Vygotsky and considers its complexity. The comprehensive nature of Vygotsky's heritage and the importance of the sociocultural context for understanding his work is emphasized, as well as the implications of his theories for contemporary educational settings. (Typically offered: Fall Even Years)

CIED 6113. Trends and Issues in Social Studies Education. 3 Hours.

Analysis of social studies education including an examination of the historical, political and social issues that have shaped curriculum, pedagogy and the educator's role in the increasingly complex endeavor to prepare future citizens. (Typically offered: Spring Odd Years)

CIED 6123. New Literacy Studies. 3 Hours.

In the past decade scholars have expressed an interest in the diverse literacy practices in which adolescents engage outside of school. In using new media, adolescents interweave multiple sign system, including word and image, to construct a narrative or communicate information. How do readers interpret these texts? What conventions do authors manipulate to influence the meanings they construct? This course aims to answer these and other questions. (Typically offered: Fall Odd Years) May be repeated for up to 12 hours of degree credit.

CIED 6133. Trends and Issues in Curriculum and Instruction. 3 Hours.

Analysis of trends and issues in curriculum and instruction with emphasis on political/social contexts and prevailing philosophies/theories/practices across disciplines. Prerequisite: Admittance in Ed.D., Ed.S. or Ph.D. program. (Typically offered: Fall Even Years)

CIED 6143. Differentiated Instruction for Academically Diverse Learners. 3 Hours.

Major focus of this course will be the examination of differentiated instruction, a teaching philosophy appropriate for a wide range of learners. (Typically offered: Summer Even Years)

CIED 6153. Theories of Literacy Learning. 3 Hours.

In this seminar, students consider theories of literacy learning and their implications for practice and research. Theories are viewed as historically and socially situated, and students reflect on how their own work might be situated within these theories. The ways in which theories support research methodology are also explored. (Typically offered: Spring Odd Years)

CIED 6163. Social and Emotional Components of Gifted and Talented Students. 3 Hours.

Purpose of this course is to study the theoretical and practical aspects of those affective issues, behaviors, and experiences often associated with gifted and talented students. (Typically offered: Summer Even Years)

CIED 6173. Reviews of Research in Reading Comprehension. 3 Hours.

In this online course, students will learn types of reviews of research, including qualitative systematic reviews and meta-analyses, and will conduct a review of research on a topic related to reading comprehension. Students will consider implicit and explicit definitions of comprehension and the influence various definitions have on assessment, instruction, policy and research and will examine comprehension in different contexts, disciplines, genres, and platforms. The course is a CIED Area of Study or Cognate Course (not part of the Inquiry Core). (Typically offered: Summer Even Years)

CIED 6183. Theory and Research in Arts Integration. 3 Hours.

Content course in arts integration including the pedagogy, design, and implementation of lesson plans which simultaneously address core curriculum learning targets and teach skills through the visual and performing arts in order to address the needs of the learners of the new millennium. Prerequisite: Instructor consent. (Typically offered: Spring and Summer)

CIED 6193. Teaching English Language Learners in the Content Areas. 3 Hours.

This course prepares teachers to teach English language learners in math, science, and social studies. These subject areas each have their own vocabulary that must be mastered by English language learners. The course focuses on teachers of both children and adults. (Typically offered: Spring)

CIED 6233. Organization of Reading Programs. 3 Hours.

Study of the problem of organizing the classroom, individual school, and school system, for the improvement of reading instruction. Emphasis is given to the development of program organization rationale based on requirements of the teaching-learning setting. (Typically offered: Fall, Spring and Summer)

CIED 6313. Issues, History, and Rationale of Science Education. 3 Hours.

This course is the foundation experience for those interested in the discipline of science education. It provides an overview of the fundamental issues in and vocabulary of science education. The course includes the research basis for science teaching, the literature of science education, and the issues and controversies surrounding the teaching of science. (Typically offered: Irregular)

CIED 6333. Nature of Science: Philosophy of Science for Science Educators. 3 Hours.

The Nature of Science is a hybrid arena consisting of aspects of the philosophy, history and sociology of science along with elements of the psychology of scientific observations all targeting the complete understanding of how science actually functions. Prerequisite: Admission to grad school. (Typically offered: Irregular)

CIED 6343. Advanced Science Teaching Methods. 3 Hours.

This course is designed for those educators who have had some previous instruction in science teaching methods and/or had some prior science teaching experience. Students will gain new or renewed perspectives with respect to their personal teaching ability while engaging in discussions and activities designed to assist others in professional growth in science instruction. Prerequisite: Admission to graduate school. (Typically offered: Irregular)

CIED 6443. Mixed Methods Research. 3 Hours.

This course will provide opportunities for students to acquire the skills, knowledge, and strategies necessary to design and implement a mixed methods research study. Emphasis is upon developing research questions, developing a research design, selecting a sample, and utilizing appropriate techniques for analyzing data. (Typically offered: Fall)

CIED 6503. Effective Teaching: Concepts and Processes. 3 Hours.

This course is designed to assist students in examining a variety of effective teaching practices and conditions found in classrooms and in acquiring knowledge, concepts, and ideas about ways to effectively influence the interests, learning and development of students. Prerequisite: Admission to the Ph.D. program. (Typically offered: Spring)

CIED 6533. Problem-Based Learning and Teaching. 3 Hours.

A course in the design, development, and delivery of the problem-based learning (PBL) model. Theoretical cases and curriculum models will be centered on issues and models related to PBL. (Typically offered: Irregular)

CIED 6603. Multicultural Education. 3 Hours.

This course is designed to trace, examine, discuss, and promote understanding of issues related to multicultural education, different views of multicultural education, and the impact of multicultural education upon the schooling process. Emphasis is upon schooling experiences of culturally diverse students, language issues, gender issues, and evaluation issues. Prerequisite: Admission to the Ed.S. or Ph.D. program. (Typically offered: Spring)

CIED 660V. Workshop. 1-18 Hour.

Workshop. (Typically offered: Irregular) May be repeated for up to 18 hours of degree credit.

CIED 6623. Research Methods and Scholarship in Curriculum and Instruction. 3 Hours.

In this course students will look at methods and practices in writing a successful dissertation proposal. Emphasis will be placed on research studies, collection of reliable and valid data, and analysis of data. Throughout the course, topics will focus on what scholarship looks like in curriculum and instruction. Prerequisite: Advanced standing in the doctoral program. (Typically offered: Fall)

CIED 674V. PhD Research Internship. 1-6 Hour.

This research internship is for doctoral level students in curriculum and instruction. The goal is to provide research experience within the doctoral course of study. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

CIED 680V. Ed.S. Project. 1-6 Hour.

Instructor permission required to register. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)

CIED 684V. PhD Teaching Internship. 1-6 Hour.

This teaching internship is for doctoral level students in curriculum and instruction. The goal is to provide teaching experience within the doctoral course of study. (Typically offered: Fall, Spring and Summer)

CIED 694V. Special Topics. 1-6 Hour.

Discussion and advanced studies on selected topics in curriculum and instruction. Specific focus on recent developments. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

CIED 695V. Independent Study. 1-6 Hour.

Independent study. (Typically offered: Fall, Spring and Summer)

CIED 699V. Doctoral Seminar. 1-3 Hour.

Doctoral seminar. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

CIED 700V. Dissertation. 1-18 Hour.

Dissertation. Prerequisite: Candidacy (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Dance (DANC) Courses

DANC 1003. Basic Course in the Arts: Movement and Dance. 3 Hours.

Introduction to the nature and scope of ballet, modern dance, and ethnic-ritual-world dance forms, their potential for contributing towards multicultural literacy, and to the shaping of an American audience. Comprised of lectures, videos, and movement experiences in the form of Studio Labs. (Typically offered: Fall, Spring and Summer)

DANC 1003H. Honors Basic Course in the Arts: Movement and Dance. 3 Hours.

Introduction to the nature and scope of ballet, ethnic, and modern dance forms, their potential for contributing towards multicultural literacy, and to the shaping of an American audience. Comprised of lectures, videos, and movement experiences in the form of studio labs. Prerequisite: Honors standing. (Typically offered: Fall, Spring and Summer)

This course is equivalent to DANC 1003.

DANC 1912. Beginning Modern Dance. 2 Hours.

Introduction to basic techniques with an emphasis on acquiring flexibility, strength, and coordination. (Typically offered: Fall and Spring)

DANC 1922. Beginning Modern Dance II. 2 Hours.

A continuation of basic modern dance techniques from DANC 1912, with emphasis on weight, time, and shape in movement. (Typically offered: Spring)

DANC 1932. Beginning Ballet. 2 Hours.

Introduction to the basic techniques of ballet in the recognized classic form including barre exercises, port de bras, and center practice. (Typically offered: Fall and Spring)

DANC 1942. Beginning Ballet II. 2 Hours.

A continuation of the basic techniques of classical ballet from DANC 1932. This course is not recommended for those students who have extensive training, but the student must be versed in the basic fundamentals of ballet. (Typically offered: Spring)

Dance Education Activity (DEAC) Courses

DEAC 1961. Ballroom Dance. 1 Hour.

The fundamentals of ballroom dance. (Typically offered: Spring)

Economics (ECON) Courses

ECON 2013. Principles of Macroeconomics (ACTS Equivalency = ECON 2103). 3 Hours.

Macroeconomic analysis, including aggregate employment, income, fiscal and monetary policy, growth and business cycles. Credit will be allowed for only one of ECON 2013 and AGECE 2103. Prerequisite: MATH 1203 or higher, or a score of 26 on the math component of the ACT exam, or 600 on the math component of the old SAT or 620 on the math component of the new SAT. (Typically offered: Fall, Spring and Summer)

This course is cross-listed with AGECE 2103.

ECON 2013H. Honors Principles of Macroeconomics. 3 Hours.

Macroeconomic analysis, including aggregate employment, income, fiscal and monetary policy, growth and business cycles. Credit will be allowed for only one of ECON 2013H and AGECE 2103. Prerequisite: MATH 1203 or higher or a score of 26 on the math component of the ACT exam, or 600 on the math component of the old SAT or 620 on the math component of the new SAT, and honors standing. (Typically offered: Fall)

This course is cross-listed with ECON 2013, AGECE 2103.

ECON 2023. Principles of Microeconomics (ACTS Equivalency = ECON 2203). 3 Hours.

Microeconomic analysis, including market structures, supply and demand, production costs, price and output, and international economics. Credit will be allowed for only one of ECON 2023 and AGECE 1103. Prerequisite: MATH 1203 or higher, or a score of at least 26 on the math component of the ACT exam, or a score of at least 600 on the math component of the old SAT or 620 on the math component of the new SAT. (Typically offered: Fall, Spring and Summer)

This course is cross-listed with AGECE 1103.

ECON 2023H. Honors Principles of Microeconomics. 3 Hours.

Microeconomic analysis, including market structures, supply and demand, production costs, price and output, and international economics. Credit will be allowed for only one of ECON 2023H and AGECE 1103. Prerequisite: MATH 1203 or higher, or a score of 26 on the math component of the ACT exam, or 600 on the math component of the old SAT or 620 on the math component of the new SAT, and honors standing. (Typically offered: Spring)

This course is cross-listed with ECON 2023, AGECE 1103.

ECON 2143. Basic Economics: Theory and Practice. 3 Hours.

Surveys basic micro, macro principles and analytical tools needed to study contemporary economic problems such as inflation, unemployment, poverty, and pollution. Walton College majors are not eligible to register for the course. No degree credit for Walton College majors. (Typically offered: Fall, Spring and Summer)

ECON 2143H. Honors Basic Economics: Theory and Practice. 3 Hours.

Surveys basic micro, macro principles and analytical tools needed to study contemporary economic problems such as inflation, unemployment, poverty, and pollution. Not open to students majoring in Economics or Business Administration. (Typically offered: Fall, Spring and Summer)

This course is equivalent to ECON 2143.

ECON 3033. Microeconomic Theory. 3 Hours.

Nature, scope, and purpose of economic analysis; theories of demand, production, cost, firm behavior, allocation of resources, etc., in a market-oriented system. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and (MATH 2043 or MATH 2554). (Typically offered: Fall, Spring and Summer)

ECON 3053. Economics for Elementary Teachers. 3 Hours.

For students who plan to become teachers in elementary schools. Acquaints students with basic concepts and functioning of the American economic system. Walton College majors are not eligible to register for the course. No degree credit for Walton College majors. Recommended to be completed in the fall semester of junior year. Prerequisite: 40 hours of completed course work. (Typically offered: Fall)

ECON 3063. Economics for Secondary Educators. 3 Hours.

Economics for Secondary Educators teaches basic economics understandings equipping students to make sound economics decisions as consumers, investors, voters and savers. Lessons and activities appropriate for secondary classes will be demonstrated. The course will survey materials available for government, economics, world and U.S. history, environmental science, language arts, business education, personal finance and entrepreneurship classes. Walton College majors are not eligible to register for the course. No degree credit for Walton College majors. Recommended to be completed in the fall semester of junior year. Prerequisite: 40 hours of completed course work. (Typically offered: Irregular)

ECON 3133. Macroeconomic Theory. 3 Hours.

Theoretical determinations of national aggregate employment, income, consumption, investment, price level, etc. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143) and ((MATH 2043 or MATH 2554)). (Typically offered: Fall and Spring)

ECON 330V. Economics Study Abroad. 3-6 Hour.

Open to undergraduate students studying abroad in officially sanctioned programs in Economics in the Walton College. Topics vary by location of study abroad opportunities. To be eligible for credit, students must have junior standing and Walton College majors must have completed all pre-business requirements prior to studying abroad. Prerequisite: Departmental consent, Junior standing and completion of pre-business course requirements, each with a grade of C or better, a pre-business cumulative GPA of 2.5 or better and an overall GPA of 2.5 or better. (Typically offered: Irregular)

ECON 3333. Public Economics. 3 Hours.

Governmental functions, revenues; tax shifting, incidence; public expenditures, their effects; and fiscal policy. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular)

ECON 3433. Money and Banking. 3 Hours.

Financial history; theory and practice of financial institutions; monetary policy in theory and practice. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular)

ECON 3533. Labor Economics. 3 Hours.

Economic analysis of labor markets. Topics include analysis of labor demand and supply; human capital investment; wage differentials; discrimination; economic effects of labor unions and collective bargaining; public sector labor markets; unemployment; and labor market effects on inflation. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular)

ECON 3633. Economics of Advertising. 3 Hours.

An examination of how economists define and categorize types of products and advertising campaigns. Alternative views of advertising -- persuasive vs. informative -- are discussed. Models of the relationship between advertising and sales, profits, market structure, product quality, and price are examined. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Irregular)

ECON 3843. Economic Development, Poverty & the Role of the World Bank and IMF in Low-Income Countries. 3 Hours.

Examine theories and patterns of economic development in emerging economies. The role of the World Bank and IMF as multilateral lenders and examination of their success and failures in fostering development. Measures of poverty and inequality and their implications for economic development. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Fall and Spring)

ECON 3853. Emerging Markets. 3 Hours.

An analysis of the business and economic environment in emerging countries; focusing in Latin America, South East Asia and Transition Economies. The topics and issues covered include market structure and market failures, financial and legal background, current institutions and political economy issues, and current business opportunities. Prerequisite: ECON 2143; or ECON 2013 and ECON 2023. (Typically offered: Fall)

ECON 3933. The Japanese Economic System. 3 Hours.

This class presents essential facts about the Japanese economy and then subjects them to modern economic analyses. Japanese institutions and policies are contrasted with their American counterparts, and these economies are compared in terms of performance. Current issues including contemporary economic conditions and US - Japanese trade relations are also examined. Pre- or Corequisite: ECON 2023. Prerequisite: ECON 2013 or ECON 2143. (Typically offered: Spring)

ECON 399VH. Honors Course. 1-3 Hour.

Primarily for students participating in Honors program. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ECON 4003H. Honors Economics Colloquium. 3 Hours.

Explores events, concepts and/or new developments in the field of Economics. Prerequisite: Senior standing. (Typically offered: Fall)

ECON 4033. History of Economic Thought. 3 Hours.

Historical, critical analysis of economic theories relative to their instructional background. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143 or ECON 3053. (Typically offered: Spring)

ECON 410V. Special Topics in Economics. 1-6 Hour.

Covers special topics in economics not available in other courses. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ECON 410VH. Honors Special Topics in Economics. 1-6 Hour.

Covers special topics in economics not available in other courses. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit. This course is equivalent to ECON 410V.

ECON 4173. Nation Model United Nations. 3 Hours.

This class is designed to prepare students for their participation in a Nation Model United Nations (NMUN) Conference. The NMUN Conference is sponsored by The National Collegiate Conference Association (NCCA), which is the largest college-level Model United Nations conference. This course is designed to advance the research skills of the students by requiring extensive background position papers covering various economic and social issues of their assigned committee and ultimately preparing resolution documents they develop during the conference. They will present their positions via speeches and in caucus settings. This course will broaden the students' international perspective while they gain a thorough understanding of the primary activities of the United Nations. Prerequisite: Junior standing and departmental consent. (Typically offered: Fall)

ECON 4333. Economics of Organizations. 3 Hours.

An economic perspective on the design of organizations. Applies developments in game theory and contract theory to analyze the role of information and incentives within and between firms. Covers the boundaries of firms, integration and outsourcing, authority and incentives, and alternative organizational structures in an evolving business environment. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Fall)

ECON 4423. Behavioral Economics. 3 Hours.

Both economics and psychology systematically study human judgment, behavior, and well-being. This course surveys attempts to incorporate psychology into economics to better understand how people make decisions in economic situations. The course will cover models of choice under uncertainty, choice over time, as well as procedural theories of decision making. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Spring)

ECON 4433. Experimental Economics. 3 Hours.

The course offers an introduction to the field of experimental economics. Included are the methodological issues associated with developing, conducting, and analyzing controlled laboratory experiments. Standard behavioral results are examined and the implications of such behavior for business and economic theory are explored. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Fall)

ECON 450V. Independent Study. 1-6 Hour.

Permits students on individual basis to explore selected topics in economics. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ECON 4533. China's Foreign Trade and International Order: History, Policy, and Theory. 3 Hours.

This interdisciplinary course explores China's foreign trade and international order by introducing students to the historical context and economic theory necessary for understanding China's role in the international trading system from the ancient past to the contemporary era. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular)

This course is cross-listed with PLSC 4533.

ECON 4633. International Trade. 3 Hours.

Problems of the international economy from a microeconomic perspective. Topics include analysis of the pattern and content of trade; trade in factors of production; and the applications of trade theory to the study of trade barriers such as tariffs and quotas. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Fall and Spring)

ECON 4643. International Macroeconomics and Finance. 3 Hours.

Problems of the international economy from a macroeconomic perspective. Topics include national income accounting and the balance of payments; exchange rates and the foreign exchange markets; exchange rate policy; macroeconomic policy coordination; developing countries and the problem of 3rd world debt; and the global capital market. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Fall and Spring)

ECON 468V. International Economics and Business Seminar. 1-6 Hour.

Offered primarily in conjunction with international study abroad programs with an emphasis on international economics and business. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ECON 4743. Introduction to Econometrics. 3 Hours.

Introduction to the application of statistical methods to problems in economics. Prerequisite: ((ECON 2013 and ECON 2023) or ECON 2143) and ((MATH 2043 or MATH 2554 or higher)) and (WCOB 1033 or STAT 2303). (Typically offered: Spring)

ECON 4753. Forecasting. 3 Hours.

The application of forecasting methods to economics, management, engineering, and other natural and social sciences. The student will learn how to recognize important features of time series and will be able to estimate and evaluate econometric models that fit the data reasonably well and allow the construction of forecasts. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and (MATH 2043 or MATH 2554) and (WCOB 1033 or STAT 2303). (Typically offered: Fall)

ECON 5243. Managerial Economics. 3 Hours.

This course will provide students with a strong foundation in core economics principles, with emphasis on industrial organization issues and applications geared toward the supply-chain and retail focus of the redesigned MBA program. (Typically offered: Fall and Spring)

ECON 5253. Economics of Management and Strategy. 3 Hours.

Information economics and applied game theory. (Typically offered: Irregular)

ECON 5263. Applied Microeconomics. 3 Hours.

The framework for this course is the economic way of thinking. Both the theory and application of important economics questions are presented, showing students the applicability of various economic methodologies in a number of different contexts. To gain competence in the applied side of economic analysis, students will use MS Excel or other software to apply class concepts to solve concrete problems. Prerequisite: ECON 5243 and ECON 5743. (Typically offered: Spring)

ECON 537V. Global Business. 1-3 Hour.

Integrated overview of the global business environment and the organizational challenges of a multinational firm. To enhance understanding of the business and cultural environment of prominent emerging markets, the course includes a 2-3 week overseas immersion project to fulfill a predefined goal. Project is integrated with global content upon return. (Typically offered: Fall and Spring)
This course is cross-listed with MGMT 537V.

ECON 5423. Behavioral Economics. 3 Hours.

(Formerly ECON 4423.) Both economics and psychology systematically study human judgment, behavior, and well-being. This course surveys attempts to incorporate psychology into economics to better understand how people make decisions in economic situations. The course will cover models of choice under uncertainty, choice over time, as well as procedural theories of decision making. Graduate degree credit will not be given for both ECON 4423 and ECON 5423. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Spring)

ECON 5433. Experimental Economics. 3 Hours.

(Formerly ECON 4433.) The course offers an introduction to the field of experimental economics. Included are the methodological issues associated with developing, conducting, and analyzing controlled laboratory experiments. Standard behavioral results are examined and the implications of such behavior for business and economic theory are explored. Graduate degree credit will not be given for both ECON 4433 and ECON 5433. Prerequisite: ECON 2023 or ECON 2143. (Typically offered: Fall)

ECON 5743. Introduction to Econometrics. 3 Hours.

(Formerly ECON 4743.) Introduction to the application of statistical methods to problems in economics. Graduate degree credit will not be given for both ECON 4743 and ECON 5743. Prerequisite: ((ECON 2013 and ECON 2023) or ECON 2143) and ((MATH 2043 or MATH 2554 or higher)) and (WCOB 1033 or STAT 2303). (Typically offered: Spring)

ECON 5753. Forecasting. 3 Hours.

(Formerly ECON 4753.) The application of forecasting methods to economics, management, engineering, and other natural and social sciences. The student will learn how to recognize important features of time series and will be able to estimate and evaluate econometric models that fit the data reasonably well and allow the construction of forecasts. Graduate degree credit will not be given for both ECON 4753 and ECON 5753. Prerequisite: (ECON 2013 and ECON 2023) or (ECON 2143) and (MATH 2043 or MATH 2554) and (WCOB 1033 or STAT 2303). (Typically offered: Fall)

ECON 5763. Economic Analytics. 3 Hours.

This course provides students with a good overview of modern big data methods, including Machine Learning, along with hands-on experience of in-depth analytics projects using real data. After 3 weeks of introductory lectures on the big data methods by the instructor, students will form groups and propose research projects they will develop over the semester. Knowledge of some statistical software is recommended, including Python, R and MATLAB. Prerequisite: ECON 5743 and ECON 5783. (Typically offered: Spring)

ECON 5783. Applied Microeconometrics. 3 Hours.

This course covers the principles of causal inference. Methods include panel data models, instrumental variables, regression discontinuity designs, difference-in-differences, and matching. Emphasis on developing a solid understanding of the underlying econometric principles of the methods taught as well as on their empirical application. Prerequisite: ECON 5743. (Typically offered: Fall)

ECON 5853. International Economics Policy. 3 Hours.

An intensive analysis of the operation of the international economy with emphasis on issues of current policy interest. (Typically offered: Irregular)

ECON 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ECON 6133. Mathematics for Economic Analysis. 3 Hours.

This course will develop mathematical and statistical skills for learning economics and related fields. Topics include calculus, static optimization, real analysis, linear algebra, convex analysis, and dynamic optimization. Prerequisite: Graduate standing and MATH 2554 or equivalent. (Typically offered: Summer)

ECON 6213. Microeconomic Theory I. 3 Hours.

Introductory microeconomic theory at the graduate level. Mathematical formulation of the consumer choice, producer behavior, and market equilibrium problems at the level of introductory calculus. Discussion of monopoly, oligopoly, public goods, and externalities. (Typically offered: Fall)

ECON 6223. Microeconomic Theory II. 3 Hours.

Advanced treatment of the central microeconomic issues using basic real analysis. Formal discussion of duality, general equilibrium, welfare economics, choice under uncertainty, and game theory. (Typically offered: Spring)

ECON 6313. Macroeconomic Theory I. 3 Hours.

Theoretical development of macroeconomic models that include and explain the natural rate of unemployment hypothesis and rational expectations, consumer behavior, demand for money, market clearing models, investment, and fiscal policy. (Typically offered: Fall)

ECON 6323. Macroeconomic Theory II. 3 Hours.

Further development of macroeconomic models to include uncertainty and asset pricing theory. Application of macroeconomic models to explain real world situations. (Typically offered: Spring)

ECON 636V. Special Problems in Economics. 1-6 Hour.

Independent reading and investigation in economics. (Typically offered: Fall, Spring and Summer) May be repeated for up to 9 hours of degree credit.

ECON 643V. Seminar in Economic Theory and Research I. 1-3 Hour.

Seminar. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

ECON 644V. Seminar in Economic Theory and Research II. 1-3 Hour.

Independent research and group discussion. (Typically offered: Spring)

ECON 6533. Seminar in Advanced Economics I. 3 Hours.

This seminar will cover advanced fields of current research importance in economics. This will facilitate the development of research directions for doctoral study and research. Prerequisite: Graduate standing. (Typically offered: Irregular)

ECON 6543. Seminar in Advanced Economics II. 3 Hours.

This seminar will cover advanced fields of current research importance in economics. This will facilitate the development of research directions for doctoral study and research. Prerequisite: Graduate standing. (Typically offered: Irregular)

ECON 6613. Econometrics I. 3 Hours.

Use of economic theory and statistical methods to estimate economic models. The single equation model is examined emphasizing multicollinearity, autocorrelation, heteroskedasticity, binary variables and distributed lags. Prerequisite: MATH 2043 and knowledge of matrix methods, which may be acquired as a corequisite, and ECON 2023, and an introductory statistics course or equivalent. (Typically offered: Fall)

ECON 6623. Econometrics II. 3 Hours.

Use of economic theory and statistical methods to estimate economic models. The treatment of measurement error and limited dependent variables and the estimation of multiple equation models and basic panel data models will be covered. Additional frontier techniques may be introduced. Prerequisite: ECON 6613. (Typically offered: Spring)

ECON 6633. Econometrics III. 3 Hours.

Use of economic theory and statistical methods to estimate economic models. Nonlinear and semiparametric/nonparametric methods, dynamic panel data methods, and time series analysis (both stationary and nonstationary processes) will be covered. Additional frontier techniques may be covered. Prerequisite: ECON 6613. (Typically offered: Spring)

ECON 6713. Industrial Organization I. 3 Hours.

This course will develop the theory of modern industrial organization. The latest advances in microeconomic theory, including game theory, information economics and auction theory will be applied to understand the behavior and organization of firms and industries. Theory will be combined with empirical evidence on firms, industries and markets. Prerequisite: ECON 6213 and ECON 6223. (Typically offered: Fall)

ECON 6723. Industrial Organization II. 3 Hours.

This course surveys firm decisions, including setting prices, choosing product lines and product quality, employing price discrimination, and taking advantage of market structure. It will also cover behavioral IO, which reconsiders the assumption that firms and consumers are perfectly rational and examines the role of regulation. Prerequisite: ECON 6133. (Typically offered: Spring)

ECON 6833. International Development I. 3 Hours.

A first graduate level course in development economics with a focus on foundational theoretical issues. We explore the causation, implications, and remedies for pervasive and persistent poverty in low-income countries. Emphasis will be primarily on microeconomics topics. May be taken either as a precursor to International Development Economics II or stand-alone. Prerequisite: ECON 6213, (ECON 6613 or AGECE 5613) or by instructor's permission. (Typically offered: Fall)

ECON 6843. International Development II. 3 Hours.

A second graduate level course in development economics that focuses on the empirical aspect of development in low-income countries. The course explores various microeconomics topics related to poverty, human capital accumulation, and their interactions with role of public policy. Prerequisite: ECON 6213, (ECON 6613 or AGE 5613) or instructor consent. (Typically offered: Spring)

ECON 6913. Experimental Economics. 3 Hours.

The course develops advanced concepts in the use of controlled experiments to test economic theory and explore behavioral regularities relating to economics. The class focuses on the methodology of experimental economics while reviewing a variety of established results. Prerequisite: ECON 6213. (Typically offered: Fall)

ECON 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Education (EDHP)

Courses

EDHP 1001. Freshman Seminar. 1 Hour.

The course is designed to support and assist freshmen in becoming successful, self-directed learners. Focus will be upon campus resources to help learners accomplish this goal and upon strategies for successful learning. The course will meet twice a week for the first eight weeks. Students will receive one hour of ungraded credit or a grade of F. (Typically offered: Fall)

EDHP 1012. College Learning I. 2 Hours.

EDUC 1012 supports students as they make the transition into a university environment. The focus is on developing and applying college-level thinking and learning skills to specific University courses and on developing a student support base through a class learning community. The course is required for students admitted provisionally to the University. (Typically offered: Fall and Spring)

EDHP 1201. Inquiry Approaches to Teaching: UAteach Step I. 1 Hour.

For students exploring teaching as a career. Following an introduction to the theory and practice behind inquiry-based science and mathematics instruction, students teach lessons in elementary classrooms to obtain firsthand experience in planning and implementation. (Typically offered: Fall)

This course is cross-listed with ARSC 1201.

EDHP 1600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

EDHP 2600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

EDHP 3003. Seminar in Education. 3 Hours.

This course provides a seminar experience on a topic in the field of education. The topics covered vary by semester and offering, but might include leadership, issues in public education, educational politics and finance, and trends in education. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

EDHP 3013. Introduction to Human Wellness Studies. 3 Hours.

This seminar provides an overview of Human Wellness Studies as an academic major and the primary constructs that comprise how different populations approach the idea of wellness. (Typically offered: Fall)

EDHP 3103. Seminar in Health Professions. 3 Hours.

This course provides a seminar experience on a topic in the field of health professions. The topics covered vary by semester and offering, but might include leadership, issues in public health, the politics and financing of American health, and trends in health professions. (Typically offered: Irregular)

EDHP 3600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

EDHP 3923H. Honors Education Seminar. 3 Hours.

Special topics or issues in education for the Honors student. Prerequisite: Honors candidacy. (Typically offered: Irregular) May be repeated for degree credit.

EDHP 4600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

Education Reform (EDRE)

Courses

EDRE 4913H. Honors Social Studies through Fiction. 3 Hours.

As common references to utopian schemes and Orwellian newspeak show, some of the most important works of politics are fictional. This course explores classic and contemporary works of political fiction, to better understand recent political history and such concepts as power, freedom, totalitarianism, discrimination, and social class. (Typically offered: Fall)

EDRE 499V. Special Topics in Education Policy. 1-3 Hour.

Topics vary by instructor. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

EDRE 5053. Philosophy and History of Education and Education Reform. 3 Hours.

This course traces the historical development of the philosophical debates concerning education and its role in society as well as how those ideas and consequent demands for reform affected the educational system and its structures. (Typically offered: Spring Even Years)

EDRE 559V. Field Research. 1-6 Hour.

Directed graduate-level field research in education policy settings. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

EDRE 6023. Economics of Education. 3 Hours.

This course applies the principles of economic analysis to education and education reform. Topics include: Human capital and signaling theories; education labor markets; educational production functions; public policy and market forces. The course also features empirical evidence evaluating economic theories of education. (Typically offered: Spring Odd Years)

EDRE 6033. Politics of Education. 3 Hours.

This course explores historical and institutional forces that help shape education policymaking. Particular attention will be paid to the experience of past education reform movements as well as the influence of interest groups, federalism, bureaucracy, governance structures, public opinion, and judicial review on education policy. (Typically offered: Fall)

EDRE 6043. Finance and Education Policy. 3 Hours.

This course examines K-12 education finance from the standpoint of education reform policy. The tools of analysis include economics, public finance, law and political science. Topics include: revenue sources and fiscal federalism, standards-based reform and school finance, school funding formulas, adequacy lawsuits, the politics of school funding, school funding and markets. The course also features empirical evidence on the educational impact of education finance. (Typically offered: Spring Even Years)

EDRE 6053. Measurement of Educational Outcomes. 3 Hours.

This course will train students to consider the various types of outcome and assessment measures used for education at the K-12 level throughout the United States; further, the students will engage in analyses of research that relies on these various outcome measures. (Typically offered: Fall)

EDRE 6103. Quantitative Analytical Techniques for Education Policy. 3 Hours.

This course introduces students to the quantitative techniques required for the evaluation of education policies and interventions. The class will focus on the identification and estimation of causal effects, necessary assumptions, and how to deal with the failure of these assumptions. Major topics covered include randomized experiments, the ordinary least squares regression method, matching estimators, instrumental variable methods, regression discontinuity, difference in difference methods, and introduction to estimation strategies with panel data models. (Typically offered: Fall)

EDRE 6113. Advanced Quantitative Analytical Techniques for Education Policy. 3 Hours.

This course introduces students to advanced estimation methods and empirical models often used in education policy empirical research, such as Maximum Likelihood to estimate discrete choice models, censored models and selection models, duration models, Generalized Method of Moments to estimate dynamic panel data models, and bootstrapping of standard errors and simulation-based inference. Prerequisite: EDRE 6103. (Typically offered: Spring Odd Years)

EDRE 6213. Program Evaluation and Research Design. 3 Hours.

This course provides students with training in the methods used to generate evidence-based answers to questions regarding the efficacy and impacts of education programs. The central questions that motivate most educational program evaluations are: (1) What is the problem? (2) What policies or programs are in place to address the problem? (3) What is their effect? (4) What works better? (5) What are the relative benefits and costs of alternatives? (Typically offered: Fall)

This course is cross-listed with ESRM 6613.

EDRE 6223. Research Seminar in Education Policy. 3 Hours.

This course provides students with the opportunity to learn about education policy research by interacting directly with the leading scholars and practitioners in the field. Students will also gain a foundation in the field of education policy research by reading and discussing some of the founding works of the field. (Typically offered: Fall)

EDRE 636V. Special Problems. 1-6 Hour.

Independent reading and investigation in education policy under faculty supervision. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

EDRE 6413. Issues in Education Policy. 3 Hours.

This course examines how K-12 education policy is designed and implemented in the United States. Students will develop a working knowledge of policymaking frameworks to examine major education policies of current interest and debate key policy issues that arise at each level of government. In great measure, the goals of the course will be accomplished through the consideration of opposing stances on key educational policy debates and issues that are of current import. (Typically offered: Spring)

This course is cross-listed with EDFD 5683.

EDRE 6423. Seminar in School Choice Policy. 3 Hours.

This course examines parental school choice - perhaps the most controversial education reform of our age. Students will be introduced to the full set of school choice policies, including charter schools and vouchers, and evaluate their benefits and drawbacks as educational interventions. (Typically offered: Fall Even Years)

EDRE 6433. Seminar in Education Accountability Policy. 3 Hours.

This course examines K-12 school and district accountability under state and Federal law (e.g. NCLB), as well as teacher and student accountability (e.g. exit exams). Topics include the theory of incentives and politics of tradeoffs, measurement issues of policy implementation, and statistical evidence on policy effects on performance. (Typically offered: Spring Odd Years)

EDRE 6443. Seminar in Education Leadership Policy. 3 Hours.

This course will examine the individual and systemic prerequisites of effective leadership of schools and school systems, and effective leadership techniques. It will consider the differences between public and private sector leadership. It will also explore ways to identify effective and ineffective leaders, and design and evaluate systems to recruit and train the former and reassign the latter. (Typically offered: Fall Odd Years)

EDRE 6453. Seminar in Teacher Quality and Public Policy. 3 Hours.

Examines how our public system of education shapes the preparation and continued professional development of K-12 teachers, and how that system has been influenced by standards-based education reform as well as efforts to enhance the quality of teaching and learning in public schools. Uses education reform legislation in several states as case studies to illustrate the successes and pitfalls of attempts to reform teacher education and licensure through public policy. (Typically offered: Spring Even Years)

EDRE 6463. Psychology of Education. 3 Hours.

This course explores psychological science findings that pertain to education research and policy with a focus on empirical evidence. Particular emphasis will be on studying individual differences in the context of education. Historical, methodological, and measurement perspectives will be introduced and psychological constructs studied and applied in educational contexts will be examined. (Typically offered: Spring Odd Years)

EDRE 674V. Internship in Education Policy. 1-6 Hour.

Internship at a public or private entity involved in the making or implementation of education policy. Paper required on a significant aspect of the internship experience. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular)

EDRE 699V. Special Topics. 1-3 Hour.

Topics vary depending on instructor. Prerequisite: Approval of EDRE Graduate Director. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

EDRE 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Irregular) May be repeated for degree credit.

Educational Foundations (EDFD) Courses

EDFD 5353. Philosophy of Education. 3 Hours.

Introduction to the method and attitude essential to effective analysis and interpretation of issues and values within a society reflecting cultural, ethnic, gender, and global diversity. Prerequisite: Graduate standing. (Typically offered: Irregular)

EDFD 5373. Psychological Foundations of Teaching and Learning. 3 Hours.

Psychological principles and research applied to classroom learning and instruction. Social, emotional, and intellectual factors relevant to topics such as readiness, motivation, discipline, and evaluation in the classroom. (Typically offered: Irregular)

EDFD 5573. Life-Span Human Development. 3 Hours.

Basic principles of development throughout the human life-cycle. Physical, cognitive, social, emotional, and personality development. (Typically offered: Fall, Spring and Summer)

EDFD 5673. Principles of Motivation. 3 Hours.

This course focuses on theories and concepts of human motivation. Students explore what motivates students to learn and examine strategies, techniques, and interventions that promote and sustain learner motivation. (Typically offered: Spring)

EDFD 5683. Issues in Educational Policy. 3 Hours.

This course examines how K-12 education policy is designed and implemented in the United States. Students will develop a working knowledge of policymaking frameworks to examine major education policies of current interest and debate key policy issues that arise at each level of government. (Typically offered: Fall, Spring and Summer)

This course is cross-listed with EDRE 6413.

EDFD 5773. Advanced Topics in Educational Psychology. 3 Hours.

This course provides an opportunity for advanced study of socio-cognitive variables that play a crucial role in working in administration, teaching, and the evaluation of the success of students and academic programs. Prerequisite: ESRM 6403 and EDFD 5373. (Typically offered: Fall Even Years)

Educational Leadership (EDLE) Courses

EDLE 5003. Schools and Society. 3 Hours.

Schools and Society is an introduction to the social, structural, political and historical forces that have created the American school system. (Typically offered: Summer Even Years)

EDLE 5013. School Organization and Administration. 3 Hours.

Analysis of structure and organization of American public education; fundamental principles of school management and administration. (Typically offered: Fall; Summer Odd Years)

EDLE 5023. The School Principalship. 3 Hours.

Duties and responsibilities of the public school building administrator; examination and analysis of problems, issues, and current trends in the theory and practice of the principalship. (Typically offered: Spring and Summer)

EDLE 5033. Psychology of Learning. 3 Hours.

This course prepares educational leaders to create and sustain a learning centered environment in school settings. Students will study learning theory across the lifespan and apply it to the practice of instructional leadership, curriculum design, and staff development. (Typically offered: Spring; Summer Odd Years)

EDLE 5043. Leadership Ethics. 3 Hours.

Leadership Ethics is an experiential based course grounded in ethical decision making theory that uses case study and practice to study school based ethical dilemmas. (Typically offered: Fall; Summer Odd Years)

EDLE 5053. School Law. 3 Hours.

Legal aspects of public and private schooling: federal and state legislative statutes and judicial decisions, with emphasis upon Arkansas public education. (Typically offered: Fall; Summer Odd Years)

EDLE 5063. Instructional Leadership, Planning, and Supervision. 3 Hours.

Instructional Leadership, Planning, and Supervision is designed to prepare practitioners to seize the role of educational leader at the school site level through the development of a vision that will be used to drive a data driven instructional school plan. (Typically offered: Fall; Summer Odd Years)

EDLE 5073. Research for Leaders. 3 Hours.

This course introduces research methodology that will support school leaders as consumers of educational research and supervisors of action research within their schools. Practical application of research for school leaders is emphasized. (Typically offered: Spring; Summer Odd Years)

EDLE 5083. Analytical Decision-Making. 3 Hours.

Analytical Decision Making is a performance based examination of the principles and practices related to the building administrator's role in the development, administration, and evaluation of curricular programs in public schools. This includes creating a school culture, fostering communication, aligning curriculum with state mandated standards, and staff development. (Typically offered: Spring Even years; Summer)

EDLE 5093. Effective Leadership for School Improvement. 3 Hours.

A performance based examination of strategic planning, group facilitation and decision-making, organizational behavior and development, professional ethics and standards, student services administration, and principles of effective leadership. (Typically offered: Spring and Summer)

EDLE 574V. Internship. 1-6 Hour.

Supervised in-school/district experiences individually designed to afford opportunities to apply previously-acquired knowledge and skills in administrative workplace settings. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

EDLE 599V. Seminar. 1-6 Hour.

Important foundational topics in educational leadership that are current and critical will be taught in this Master's-level seminar. Topics range from the psychology of learning and leading to how schools and society interact in the 21st century. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

EDLE 6013. Problems of Practice for Educational Leaders. 3 Hours.

Problems of Practice is designed to extend and refine students' thinking, experience, and knowledge about the Education Doctorate (EdD), as well as selecting a Problem of Practice that can contribute to the following program goals: advanced analytical reasoning skills; positive impact on professional practice; and the refinement of the scholar-practitioner. (Typically offered: Summer)

EDLE 6023. School Facilities Planning and Management. 3 Hours.

School facilities planning, management, cost analysis, operations, and maintenance of the school plant. (Typically offered: Fall Odd Years)

EDLE 6053. School-Community Relations. 3 Hours.

Community analysis, politics and education; power groups and influences; school issues and public responses; local policy development and implementation; effective communication and public relations strategies. (Typically offered: Spring Even Years)

EDLE 605V. Independent Study. 1-6 Hour.

Independent study. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 6093. School District Governance: The Superintendency. 3 Hours.

Analysis of the organizational and governance structures of American public education at national, state, and local levels. (Typically offered: Fall Even Years)

EDLE 6103. School Finance. 3 Hours.

Principles, issues and problems of school funding formulae and fiscal allocations to school districts. (Typically offered: Spring Odd Years)

EDLE 6173. School Business Management. 3 Hours.

Fiscal and resource management in public schools: budgeting, insurance, purchasing, and accounting. (Typically offered: Summer Odd Years)

EDLE 6333. Advanced Legal Issues in Education. 3 Hours.

The examination and discussion of advanced legal issues affecting public school education. Prerequisite: Advanced graduate standing. (Typically offered: Fall Even Years)

EDLE 6433. Legal Aspects of Special Education. 3 Hours.

A study of litigation and legislation in special education, federal and state laws and court cases, and due process hearings. (Typically offered: Irregular)
This course is cross-listed with SPED 6433.

EDLE 6503. Topics in Educational Research for School Administration. 3 Hours.

Application of educational research in the school setting by educational administrators. Emphasis placed on the use of state and local school or district data, data analysis, interpretation and reporting, hands-on experience with SPSS, and the formal process of writing a research report. Prerequisite: Advanced graduate standing. (Typically offered: Fall Odd Years)

EDLE 6513. Program Evaluation in Education. 3 Hours.

Program Evaluation in Education is designed to introduce students to concepts and methods of policy and program evaluation. Emphasis will be placed on preparing educational leadership students to conduct a program evaluation specialist project of dissertation. (Typically offered: Summer)

EDLE 6523. Advanced Application of Educational Leadership. 3 Hours.

A review of seminal and current works on leadership as applied to the educational setting. Provides knowledge of classic and contemporary strategies for leadership. (Typically offered: Summer Odd Years)

EDLE 6533. Educational Policy. 3 Hours.

Examination of the research and theory related to the evolution of local, state, and federal governance and educational policy. Emphasis given to the consideration of procedures involving policy formulation, implementation, and analysis. (Typically offered: Spring Odd Years)

EDLE 6543. Introduction to Qualitative Research. 3 Hours.

This course offers an introduction to the qualitative approach to research in the Social Sciences. In particular, this course focuses on initial qualitative research designs that support planning, problem solving, and evaluation for educational leaders. Developing a conceptual framework, gaining an initial understanding of the methods of data collection and analysis, and establishing credibility in qualitative research are discussed. This course will be taught online using Blackboard and will require synchronous online class meetings that will require a webcam and microphone. (Typically offered: Fall)

EDLE 6553. Advanced Qualitative Methods in Educational Research. 3 Hours.

This course has been designed to provide graduate students with a more in-depth understanding of qualitative research methods. Emphasis will be placed on preparing educational leadership students to design a qualitative or mixed-method dissertation study. Prerequisite: ESRM 6543 or HRWD 572V. (Typically offered: Spring)

EDLE 674V. Internship. 1-6 Hour.

Internship. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 680V. Educational Specialist Project. 1-6 Hour.

An original project, research project, or report required of all Ed.S. Degree candidates. Prerequisite: Admission to the Ed.S. program. (Typically offered: Fall, Spring and Summer)

EDLE 699V. Seminar. 1-6 Hour.

Seminar. Prerequisite: Advanced graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EDLE 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Educational Statistics and Research Methods (ESRM) Courses

ESRM 2403. Statistics in Nursing. 3 Hours.

Introduction to descriptive and inferential statistics used in nursing research. (Typically offered: Fall, Spring and Summer)

ESRM 5013. Research Methods in Education. 3 Hours.

General orientation course which considers the nature of research problems in education and the techniques used by investigators in solving those problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

ESRM 5393. Statistics in Education and Health Professions. 3 Hours.

Applied statistics course for Master's degree candidates. Includes concepts and operations for frequency distributions, graphing techniques, measures of central tendency and variation, sampling, hypothesis testing, and interpretation of statistical results. (Typically offered: Fall, Spring and Summer)

ESRM 5653. Educational Assessment. 3 Hours.

Introduction to measurement issues and basic test theory. Focus on types and usage of assessment tools, data management, and analysis and interpretation of educational data. Practical training in the utilization and interpretation of academic achievement data in Arkansas. (Typically offered: Irregular)

ESRM 599V. Seminar. 1-6 Hour.

Seminar. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ESRM 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ESRM 605V. Independent Study. 1-6 Hour.

Independent study. (Typically offered: Fall, Spring and Summer)

ESRM 6403. Educational Statistics and Data Processing. 3 Hours.

Theory and application of frequency distributions, graphical methods, central tendency, variability, simple regression and correlation indexes, chi-square, sampling, and parameter estimation, and hypothesis testing. Use of the computer for the organization, reduction, and analysis of data (required of doctoral candidates). Prerequisite: ESRM 5013 or equivalent. (Typically offered: Fall, Spring and Summer)

ESRM 6413. Experimental Design in Education. 3 Hours.

Principles of experimental design as applied to educational situations. Special emphasis on analysis of variance techniques used in educational research. Prerequisite: ESRM 6403 or equivalent. (Typically offered: Spring)

ESRM 6423. Multiple Regression Techniques for Education. 3 Hours.

Introduction to multiple regression procedures for analyzing data as applied in educational settings, including multicollinearity, dummy variables, analysis of covariance, curvi-linear regression, and path analysis. Prerequisite: ESRM 6403. (Typically offered: Fall)

ESRM 6453. Applied Multivariate Statistics. 3 Hours.

Multivariate statistical procedures as applied to educational research settings including discriminant analysis, principal components analysis, factor analysis, canonical correlation, and cluster analysis. Emphasis on use of existing computer statistical packages. Prerequisite: ESRM 6413. (Typically offered: Spring)

ESRM 6513. Hierarchical Linear Modeling. 3 Hours.

This course covers the theory and applications of hierarchical linear modeling (HLM) also known as multilevel modeling. Both the conceptual and methodological issues for analyses of nested (clustered) data in using HLM will be reviewed, including linear models, non-linear models, growth models, and some alternative designs. Prerequisite: ESRM 6413 and ESRM 6423. (Typically offered: Fall Even Years)

ESRM 6523. Structural Equation Modeling. 3 Hours.

This course provides a detailed introduction to structural equation modeling (SEM) based on students' previous knowledge of multiple linear regression. Topics include path analysis, confirmatory factor analysis, full latent variable models, estimation techniques, data-model fit analysis, model comparison, and other topics, potentially equivalent models, specification searches, latent mean models, parameter invariance, multi-group models, and models of discrete data. Prerequisite: ESRM 6423. (Typically offered: Spring)

ESRM 6533. Qualitative Research. 3 Hours.

Introduction of non-quantitative methods, including data collection through interviews, field observation, records research, internal and external validity problems in qualitative research. Prerequisite: ESRM 6403. (Typically offered: Fall and Spring)

ESRM 6543. Advanced Qualitative Research. 3 Hours.

Preparation for the conduct of qualitative research, structuring, literature reviews, data collection and analysis, and reporting results. Prerequisite: ESRM 6533. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

ESRM 6553. Advanced Multivariate Statistics. 3 Hours.

Builds on the foundation provided in Multivariate and introduces techniques that extend methodological elements of canonical, discriminant, factor analytic, and longitudinal analyses, providing the mathematical and theoretical foundations necessary for these designs. Prerequisite: ESRM 6453. (Typically offered: Spring Even Years)

ESRM 6613. Evaluation of Policies, Programs, and Projects. 3 Hours.

Introduction to evaluation in social science research, including why and how evaluations of programs, projects, and policies are conducted; includes analysis of actual evaluations in a variety of disciplines. Prerequisite: ESRM 6403. (Typically offered: Fall)

This course is cross-listed with EDRE 6213.

ESRM 6623. Techniques of Research in Education. 3 Hours.

Use of scientific method in attacking educational problems. Emphasis placed on the planning and design of research studies, collection of reliable and valid data, sampling methods, and analysis and interpretation of data. Prerequisite: ESRM 6403. (Typically offered: Spring and Summer)

ESRM 6633. Survey Research Methods. 3 Hours.

The course addresses all phases of conducting a survey research study, including conceptualization, sample selection, instrument development, and analysis and reporting of findings. Prerequisite: ESRM 6403. (Typically offered: Spring Even Years)

ESRM 6653. Measurement and Evaluation. 3 Hours.

Fundamentals of measurement: scales, scores, norms, reliability, validity. Test and scale construction and item analysis. Standardized measures and program evaluation models in decision making. Prerequisite: ESRM 6403. (Typically offered: Fall)

ESRM 668V. Practicum in Research. 1-6 Hour.

Practical experience in educational research on campus, in school systems, or in other agencies in educational program development. (Typically offered: Irregular)

ESRM 6753. Item Response Theory. 3 Hours.

Topics of measurement in the psychometric field focusing on item response theory; item level and test level analyses including differential item functioning, test dimensionality, computer adaptive testing, equating, and general evaluation and usage of measurement instruments. Prerequisite: ESRM 6653. (Typically offered: Spring Odd Years)

ESRM 699V. Seminar. 1-6 Hour.

Seminar. Prerequisite: Advanced graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ESRM 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Educational Studies (EDST) Courses

EDST 2003. Introduction to Educational Studies. 3 Hours.

The course explores the field of education through the lens of educational studies, a unique interdisciplinary association of looking at education as a function of society, psychology, politics, religion, and economic interests. This course introduces non-education field students to the difference between the various fields of study within education, including, but not limited to: instruction, curriculum, comparative education, multicultural education, informal education, content education, pedagogy, education policy, support services, and community education. No field observation hours are required for this course. (Typically offered: Fall and Spring)

EDST 3003. Formative Readings for Cultural Education. 3 Hours.

This course examines some of the historically important readings stemming from identification of the America Reads project produced by the Library of Congress (2014-2016). Special attention will be devoted to the understanding of the relevance of these historical documents and texts to the American identity. The course will focus on the role education plays in the creation of the current society through cultural transmission. The role of education through public schooling in the formations of citizens has been historically documented and deemed necessary under American political thought. This course is constructed to establish linkages of educational trends in the promotion of literacy and the popularization of popular cultural literature of the 18th, 19th, and 20th century that has shaped the social, economic, environmental, and political landscape that a citizen may navigate over their lifetime. (Typically offered: Fall and Spring)

EDST 3113. Legal & Historical Developments in Education. 3 Hours.

This lecture provides an overview of issues in the field of education coming out of political and legal developments in the United States over the last two centuries. Special interest is paid to educational legislation, case law, and global comparative education. (Typically offered: Fall)

EDST 3203. Multicultural Education Issues. 3 Hours.

The purpose of this course is to give pre-service educators an opportunity to explore various facets of multiculturalism and their implications for future practice. We will examine the impact of race, class, gender, sexual orientation, religion, and other aspects of social group identities on teaching and learning as they relate to contexts in multiple learning environments. While this course is broad in scope, the primary aim is to assist future educators in exploring what it means to be an educator in a society that is multicultural, within a vast educational system (public and private) which is stratified according to multiple factors. Students should not be in enrolled in EDST 3203 & CIED 4403 during the same semester. (Typically offered: Fall)

EDST 3223. American Educational History. 3 Hours.

This course is designed to offer a comprehensive study of the history of the American education system. Students completing this course will be able to document the diverse and often competing influences into what has become the public school structure, as well as, the second system of American schools, parochial schools, arising out of the schooling conflict of the 1880's. Starting with the development of literacy skills and the formation of township or colony schools, the lineage of schooling will be investigated from the late 1600's to the present time. (Typically offered: Fall and Spring)

EDST 3333. Children's & Young Adult Literature in Educational Settings. 3 Hours.

This course provides a comprehensive overview of children's, adolescent, and young adult literature across educational settings, both formal and informal. Picture books, novels, informational texts, and the novelization of movies and vice versa for children and adolescent audiences will be explored. This course is not part of the K-6 license program. (Typically offered: Fall)

EDST 3913. Formal Classroom Internship in Education. 3 Hours.

The internship is a prearranged onsite work experience serving in an educationally related field. The formal classroom internship is taken after the completion of CIED 1013 and either along with or after the completion of CIED 3033. Locations have been selected by the EDST program and Office of Teacher Education. Internships may be served at a variety of public or private based educational services or agencies. The internship experience must include a minimum number of practical work hours (120), reflective journaling, mid-semester evaluation, and final report. All arrangements for internships are coordinated through the COEHP Office of Field Placement by the Director of Field Placement. State of Arkansas background checks may be required for individuals completing internships at locations serving populations of minors. Prerequisite: CIED 1013. Pre- or Corequisite: CIED 3033 and EDST 3113. (Typically offered: Fall)

EDST 3923. Informal Based or Outdoor Internship in Education. 3 Hours.

The internship is a prearranged onsite work experience serving in an educationally related field. The informal/outdoor internship is taken during or after taking EDST 4113. Locations have been selected by the EDST program and Office of Teacher Education; during the summer, students may petition for a camp based informal experience that is outside of the typical semester offering. Internships may be served at a variety of public or private based educational services or agencies. The internship experience must include a minimum number of practical work hours (120), reflective journaling, mid-semester evaluation, and final report. All arrangements for internships are coordinated through the COEHP Office of Field Placement by the Director of Field Placement. State of Arkansas background checks may be required for individuals completing internships at locations serving populations of minors. Prerequisite: EDST 3113. Pre- or Corequisite: EDST 4113. (Typically offered: Fall, Spring and Summer)

EDST 399V. Special Topics in Educational Studies. 1-3 Hour.

Discussion and advanced studies on selected topics in educational studies. Special focus on recent and emerging topics in education. Junior (3000) level course offerings. Course may be repeated only for unique topic enrollments. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.

EDST 399VH. Honors Special Topics in Educational Studies. 1-3 Hour.

Discussion and advanced studies on selected topics in educational studies. Special focus on recent and emerging topics in education. Junior (3000) level course offerings. Each offering of EDST 399VH must be unique. Student may not repeat the same topic for degree credit multiple times. (Typically offered: Irregular) May be repeated for up to 15 hours of degree credit.

EDST 4003. Philosophy and Inquiry in Education. 3 Hours.

This course provides a review of philosophical ideas in education and an introduction to research, methodologies, foundation theories in education. Students explore historical ideas in philosophy pertaining to education and how those ideas contribute to current educational practices. Students in the course learn about the nature of research, both theoretical and applied, and the process of developing future research based agendas. Prerequisite: (EDST 3113 and EDST 4113) OR (PHIL 2003, PHIL 2103, PHIL 2203 and HIST 2003, HIST 2013). (Typically offered: Spring)

EDST 4003H. Honors Philosophy & Inquiry in Education. 3 Hours.

This course provides a review of philosophical ideas in education and an introduction to research, methodologies, foundation theories in education. Students explore historical ideas in philosophy pertaining to education and how those ideas contribute to current educational practices. Students in the course learn about the nature of research, both theoretical and applied, and the process of developing future research based agendas. Prerequisite: (EDST 3113 and EDST 4113) OR (HIST 2003, HIST 2013 and PHIL 2003, PHIL 2013, PHIL 2203). (Typically offered: Spring)

EDST 4113. Teaching and Funding Outdoor & Informal Education. 3 Hours.

In-depth exploration of natural/outdoors education and informal education and grant writing for education will be covered. Methods and techniques in the preparation and delivery of teaching in nontraditional instructional settings (informal education) will be developed. Course participants will be required to teach an outdoor and/or informal education class and participate in a collaborative grant application process. Prerequisite: EDST 3113. (Typically offered: Spring)

EDST 4213. Religion, Education, & Religious Education. 3 Hours.

This course provides a comprehensive introduction on the influences of religion in education, particularly in relation to the dynamic of religion in public education in the United States. Students in the course learn about the nature of the study of religion, religious studies, and religious education, as well as the teaching of religion. Prerequisite: (EDST 3113 and EDST 3223) or Religious Studies minor, or instructor consent. (Typically offered: Fall)

EDST 4933. Capstone Seminar and Final Internship in Education. 3 Hours.

The capstone course provides students with a culminating experience for Educational Studies. The course provides an opportunity for students to develop a portfolio of their learning and to evaluate their overall program performance in preparation for completion of their degrees. This course contains 100 hours of internship experience and will serve as the final internship experience for EDSTBS majors. This course includes 20 hours of coursework along with the required internship experience. This course should only be enrolled in after the completion of two EDST 3023 internship and during the students final year of coursework. All internship placements are arranged by the Office of Field Placement and the Director of Field Placement. Prerequisite: EDST 3913, EDST 3923, EDST 4113, and CIED 3033. (Typically offered: Fall, Spring and Summer)

Educational Technology (ETEC) Courses

ETEC 5203. Foundations of Educational Technology. 3 Hours.

Provides learners with a comprehensive survey of the major trends, issues, people, processes, and products that have significantly affected the evolution of the field of educational technology. (Typically offered: Spring and Summer)

ETEC 5213. Educational Media. 3 Hours.

Instruction in selecting, utilizing and evaluating instructional materials and equipment. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

ETEC 5243. Instructional Design Theory & Models. 3 Hours.

A study of the instructional development process as it pertains to the design and production of instructional materials which use modern technologies. Goal analysis, objectives, evaluation, instructional strategy development, production of an educational product, and revision of the instructional materials are considered. Prerequisite: Graduate standing. (Typically offered: Fall)

ETEC 5253. Information Technologies. 3 Hours.

Students perform intensive examinations of the role of new technologies and their implications for instructional practice. Emphasis is on identification and evaluation of new technologies in instructional environments. Establishing and maintaining learning environments, exploring selected theories and concepts, assessing potential uses of IT, and utilization of new technologies will occur. (Typically offered: Irregular)

ETEC 5263. Grant Writing in Instructional Technology. 3 Hours.

Students will have an opportunity to find grant funding sources, write a grant, and submit an actual grant proposal to an agency for consideration. Will survey research in instructional media over the past 60 years and learn specific criteria for reading and evaluating research reports and articles. Will investigate current issues and topics related to research and grant writing in instructional media. (Typically offered: Fall and Summer)

ETEC 5273. Advanced Design of Educational Media. 3 Hours.

Instruction in the planning and local production of instructional materials.

Prerequisite: ETEC 5213. (Typically offered: Spring)

ETEC 5283. Field Experiences in Educational Technology. 3 Hours.

Field experience in educational technology settings. Prerequisite: Graduate standing and 6 hours of graduate work in educational technology. (Typically offered: Fall, Spring and Summer)

ETEC 5303. Learning with Computers in K-12 Classrooms. 3 Hours.

Students learn how technology can be used to support K-12 classroom environments. Various learning theories and technologies will be explored and projects will be developed that utilize technologies and current learning theories in K-12 settings. Emphasis is on identification, evaluation, and the effective use of technologies to support classroom environments. Prerequisite: Graduate standing. (Typically offered: Spring)

ETEC 5313. Principles in Visual Literacy. 3 Hours.

Students gain understanding of visual literacy research and learn to create graphics that support learning. Literature in the area of visual literacy and learning theories as well as tools that facilitate effective visual literacy will be used to create visuals that are clear, communicate well, and help enhance learner performance. (Typically offered: Spring and Summer)

ETEC 5373. Web Design. 3 Hours.

Students design, create, and analyze Web sites by applying processes, standards and techniques used to identify target audience; ensure compliance with copyright and disability laws, measure effectiveness, and coordinate Web design. Topics include copyright and fair use, user and task analysis, usability, accessibility, testing, search engine optimization, and web analytics. Prerequisite: ETEC 5213 or equivalent experience. (Typically offered: Spring) May be repeated for up to 3 hours of degree credit.

ETEC 5743. Internship. 3 Hours.

A supervised field placement in educational technology that provides experience consistent with the student's professional goals and training emphasis. Internship experiences are planning and directed under the guidance of a faculty member. On-campus and on-site supervision is required. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ETEC 5981. Eportfolio Production. 1 Hour.

This is a capstone course that is typically taken in the last semester of coursework and designed to: 1) review key constructs presented within the Educational Technology curriculum; 2) provide ETEC students the opportunity for reflection relative to his/her learning of the key concepts; and 3) utilize technology to assemble student-created artifacts that demonstrate mastery of the key concepts. (Typically offered: Fall, Spring and Summer)

ETEC 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ETEC 6053. Special Problems in Educational Technology. 3 Hours.

Individually designed and conducted studies of educational technology under the guidance of a faculty member. Negotiated learning contract with supervising faculty required before enrollment. On-campus supervision required. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ETEC 6223. Strategic Planning and IDT Programs. 3 Hours.

The course offers readings and experiences intended to develop strategic planning knowledge, values, attitudes, and skills in future instructional design and technology leaders. Topics covered include strategic planning and leadership. (Typically offered: Fall)

ETEC 6243. Advanced Instructional Design. 3 Hours.

This course explores advanced topics in instructional design to facilitate understanding of grounded models, advanced theories, and research. This course focuses on: 1) design and development of contextualized technology-supported learning environments; 2) analysis and application of advanced theoretical foundations of design; and 3) examination and critique of instructional design research. Prerequisite: ETEC 5243 or equivalent. (Typically offered: Spring)

ETEC 6253. Distance Learning. 3 Hours.

An intensive examination of the role of telecommunications and distance education technologies and their implications for educational practices. Emphasis is on techniques of development, utilization and evaluation of telecommunication and distance education technologies in classroom environments. (Typically offered: Spring and Summer)

ETEC 6393. Issues and Trends in Instructional Design and Technology. 3 Hours.

Critical challenges posed as a result of the increasing infusion of technology into the school and training environments are explored. The course prepares students to make and defend policy decisions and become conversant with current trends and issues in the field. (Typically offered: Fall)

Electrical Engineering (ELEG) Courses

ELEG 2104. Electric Circuits I. 4 Hours.

Introduction to circuit variables, elements, and simple resistive circuits. Analysis techniques applied to resistive circuits. The concept of inductance, capacitance and mutual inductance. The natural and step responses of RL, RC, and RLC circuits. Corequisite: Lab component. Pre- or Corequisite: MATH 2564 or MATH 2564C. (Typically offered: Fall and Summer)

ELEG 2114. Electric Circuits II. 4 Hours.

Introduction to complex numbers. Sinusoidal steady-state analysis of electric circuits, active, reactive, apparent and complex power; balanced and unbalanced three-phase circuits; mutual inductance; the use of the Laplace transform for electric circuit analysis and two-port networks. Corequisite: Lab component. Pre- or Corequisite: MATH 2584. Prerequisite: ELEG 2104. (Typically offered: Spring and Summer)

ELEG 287V. Special Topics in Electrical Engineering. 1-4 Hour.

Consideration of current electrical engineering topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

ELEG 2904. Digital Design. 4 Hours.

To introduce students to modern logic concepts, problem solving and design principles, and vocabulary and philosophy of the digital world. Corequisite: Lab component. Prerequisite: Engineering major. (Typically offered: Fall)
This course is cross-listed with CSCE 2114.

ELEG 3124. System & Signal Analysis. 4 Hours.

Definition and description of signals and systems; analog, digital, continuous- and discrete-time and frequency analysis of systems, Z- and Fourier Transforms, sampling and signal reconstruction, filter design and engineering applications. Pre- or Corequisite: MATH 2584. Corequisite: Lab component. Prerequisite: ELEG 2104 or ELEG 3903 or BMEG 2904. (Typically offered: Fall)

ELEG 3124H. Honors System & Signal Analysis. 4 Hours.

Definition and description of signals and systems; analog, digital, continuous- and discrete-time and frequency analysis of systems, Z- and Fourier Transforms, sampling and signal reconstruction, filter design and engineering applications. Pre- or Corequisite: MATH 2584. Corequisite: Lab component. Prerequisite: ELEG 2104 or ELEG 3903 or BMEG 2904. (Typically offered: Fall)

This course is equivalent to ELEG 3124.

ELEG 3143. Probability & Stochastic Processes. 3 Hours.

Review of system analysis, probability, random variables, stochastic processes, auto correlation, power spectral density, systems with random inputs in the time and frequency domain, and applications. Pre- or Corequisite: ELEG 3124. (Typically offered: Spring)

ELEG 3143H. Honors Probability & Stochastic Processes. 3 Hours.

Review of system analysis, probability, random variables, stochastic processes, auto correlation, power spectral density, systems with random inputs in the time and frequency domain, and applications. Pre- or Corequisite: ELEG 3124. (Typically offered: Spring)

This course is equivalent to ELEG 3143.

ELEG 3214. Electronics I. 4 Hours.

Introduction to electronic systems and signal processing, operational amplifiers, diodes, non-linear circuit applications, MOSFETS, and BJTs. Course has a lab component. Pre- or Corequisite: MATH 2574 and ELEG 2114. Corequisite: Lab component. Prerequisite: PHYS 2074. (Typically offered: Fall and Spring)

ELEG 3214H. Honors Electronics I. 4 Hours.

Introduction to electronic systems and signal processing, operational amplifiers, diodes, non-linear circuit applications, MOSFETS, and BJTs. Pre- or Corequisite: MATH 2574 and ELEG 2114. Corequisite: Lab component. Prerequisite: PHYS 2074. (Typically offered: Fall and Spring)

This course is equivalent to ELEG 3214.

ELEG 3224. Electronics II. 4 Hours.

Differential pair amplifier, current mirrors, active loads, multistage amplifiers, amplifier frequency response, bode plots, Millers theorem, short circuit and open circuit time constant methods, feedback amplifiers, and stability of feedback amplifiers. Corequisite: Lab component. Prerequisite: ELEG 3214 and MATH 2584. (Typically offered: Spring)

ELEG 3224H. Honors Electronics II. 4 Hours.

Differential pair amplifier, current mirrors, active loads, multistage amplifiers, amplifier frequency response, bode plots, Millers theorem, short circuit and open circuit time constant methods, feedback amplifiers, and stability of feedback amplifiers. Corequisite: Lab component. Prerequisite: ELEG 3214 and MATH 2584. (Typically offered: Spring)

This course is equivalent to ELEG 3224.

ELEG 3304. Energy Systems. 4 Hours.

Steady state analysis of DC machines, transformers, induction machines and synchronous machines. Introduction to speed control of electric machines using power electronics. Corequisite: Lab component. Prerequisite: ELEG 2114. (Typically offered: Spring)

ELEG 3304H. Honors Energy Systems. 4 Hours.

Steady state analysis of DC machines, transformers, induction machines and synchronous machines. Introduction to speed control of electric machines using power electronics. Corequisite: Lab component. Prerequisite: ELEG 2114. (Typically offered: Spring)

This course is equivalent to ELEG 3304.

ELEG 3704. Applied Electromagnetics. 4 Hours.

Analysis of transmission lines with sinusoidal and transient excitation. Development and use of the Smith Chart and methods of impedance matching. Vector analysis, static form of Maxwell's equations, electrostatics, and magnetostatics. Corequisite: Lab component. Pre- or Corequisite: PHYS 2074 and MATH 2574. Prerequisite: ELEG 2114. (Typically offered: Fall)

ELEG 3704H. Honors Applied Electromagnetics. 4 Hours.

Analysis of transmission lines with sinusoidal and transient excitation. Development and use of the Smith Chart and methods of impedance matching. Vector analysis, static form of Maxwell's equations, electrostatics, and magnetostatics. Corequisite: Lab component. Pre- or Corequisite: PHYS 2074 and MATH 2574. Prerequisite: ELEG 2114. (Typically offered: Fall)

This course is equivalent to ELEG 3704.

ELEG 387V. Special Topics in Electrical Engineering. 1-4 Hour.

Consideration of current electrical engineering topics not covered in other courses. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ELEG 3903. Electric Circuits and Machines. 3 Hours.

Basic electrical principles and circuits; Introduction to sinusoidal steady-state analysis of electric circuits, active, reactive, and complex power; balanced three-phase circuits; Steady-state analysis of electric machines and transformers. Introduction to power electronics for machine speed control and alternative energy sources. For engineering students other than those in electrical engineering. Prerequisite: MATH 2564 and PHYS 2074. (Typically offered: Fall and Spring)

ELEG 3924. Microprocessor Systems Design. 4 Hours.

Introduction to 8-bit microprocessors and their application. Microprocessor architecture and assembly language; interface devices; system design using microprocessors. Corequisite: Lab component. Pre- or Corequisite: ELEG 2904. (Typically offered: Fall)

ELEG 3924H. Honors Microprocessor Systems Design. 4 Hours.

Introduction to 8-bit microprocessors and their application. Microprocessor architecture and assembly language; interface devices; system design using microprocessors. Corequisite: Lab component. Prerequisite: ELEG 2904. (Typically offered: Fall)

This course is equivalent to ELEG 3924.

ELEG 3933. Circuits & Electronics. 3 Hours.

Basic principles of electric and electronic circuits and devices. For engineering students who are not pursuing a degree in electrical engineering. Prerequisite: MATH 2584 and PHYS 2074. (Typically offered: Spring)

ELEG 400VH. Honors Senior Thesis. 1-3 Hour.

Honors senior thesis. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer)

ELEG 4063. Electrical Engineering Design I. 3 Hours.

Capstone design and application in electrical engineering. Prerequisite: ELEG 3224 and ELEG 3924. (Typically offered: Fall and Spring)

ELEG 4063H. Honors Electrical Engineering Design I. 3 Hours.

Design and application in electrical engineering. Prerequisite: ELEG 3224 and ELEG 3924. (Typically offered: Fall and Spring)

This course is equivalent to ELEG 4063.

ELEG 4071. Electrical Engineering Design II. 1 Hour.

Design and application in electrical engineering. Prerequisite: ELEG 4063. (Typically offered: Fall and Spring)

ELEG 4071H. Honors Electrical Engineering Design II. 1 Hour.

Design and application in electrical engineering. Prerequisite: ELEG 4063. (Typically offered: Fall and Spring)

This course is equivalent to ELEG 4071.

ELEG 4203. Semiconductor Devices. 3 Hours.

Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p/n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: MATH 2584 and ELEG 3214, or graduate standing. (Typically offered: Irregular)

ELEG 4203H. Honors Semiconductor Devices. 3 Hours.

Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p/n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: MATH 2584 and ELEG 3214, or graduate standing. (Typically offered: Irregular)

This course is equivalent to ELEG 4203.

ELEG 4223. Design and Fabrication of Solar Cells. 3 Hours.

Solar insolation and its spectral distribution; p-n junction solar cells in dark and under illumination; solar cell parameters efficiency limits and losses; standard cell technology; energy accounting; design of silicon solar cells using simulation; fabrication of designed devices in the lab and their measurements. Students may not receive credit for both ELEG 4223 and ELEG 5223. Prerequisite: ELEG 4203. (Typically offered: Irregular)

ELEG 4233. Introduction to Integrated Circuit Design. 3 Hours.

Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both ELEG 4233 and ELEG 5923. Prerequisite: ELEG 3214 or ELEG 3933 and ELEG 2904 or equivalent. (Typically offered: Fall)

ELEG 4233H. Honors Introduction to Integrated Circuit Design. 3 Hours.

Design and layout of large scale digital integrated circuits using NMOS and CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale NMOS and CMOS circuits. Prerequisite: ELEG 3214 or ELEG 3933 and ELEG 2904 or equivalent. (Typically offered: Irregular)

This course is equivalent to ELEG 4233.

ELEG 4243. Analog Integrated Circuits. 3 Hours.

Theory and design techniques for linear and analog integrated circuits. Current mirrors, voltage to base emitter matching, active loads, compensation, level shifting, amplifier design techniques, circuit simulation using computer-assisted design programs. Prerequisite: ELEG 3224. (Typically offered: Irregular)

ELEG 4253. Nanotechnology in Engineering & Medicine. 3 Hours.

The objective of this course is to present a concise and concurrent introduction to Nanotechnology and its applications in engineering and medicine, particularly for nanoelectronics, nanosensors and nanocomputing. This course presents basic aspects of the nanotechnology, its fabrication and imaging technologies and integration of biomolecules with electronic systems for the design of devices in nanoelectronics, nanobioelectronics and Nanomedicine. Prerequisite: Senior standing or instructor consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ELEG 4283. Mixed Signal Test Engineering I. 3 Hours.

Overview of mixed signal testing, the test specification process, DC and parametric measurements, measurement accuracy, tester hardware, sampling theory, DSP-based testing, analog channel testing, digital channel testing. Prerequisite: Senior or graduate standing. (Typically offered: Irregular)

ELEG 4293. Mixed-Signal Modeling & Simulation. 3 Hours.

Study of basic analog, digital & mixed signal simulation solution methods. Modeling with hardware description languages. Use of state-of-the-art simulators and HDLs. Students may not receive credit for both ELEG 4293 and ELEG 5993. Prerequisite: ELEG 3224. (Typically offered: Irregular)

ELEG 4303. Introduction to Nanomaterials and Devices. 3 Hours.

This course provides the students with an introduction to nanomaterials and devices. The students will be introduced to the quantization of energy levels in nanomaterials, growth of nanomaterials, electrical and optical properties, and devices based on these nanomaterials, such as tunneling resonant diodes, transistors, detector, and emitters. Graduate students will be given additional or different assignments. Graduate students will be expected to explore and demonstrate an understanding of the material with a greater level of depth and breadth than the undergraduates. Each group of students will have different expectations and grading systems. The instructor will prepare and distribute two distinct syllabi. Corequisite: ELEG 4203. Prerequisite: ELEG 3214 and PHYS 2074. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ELEG 4343. Organic Electronics Technology. 3 Hours.

Students become familiar with recent developments in and process technology for organic material based devices and sensors in the classroom, but also gain hands on experience with fabrication processes using micro-fabrication tools in the lab. Students may not receive credit for both ELEG 4343 and ELEG 5343. (Typically offered: Irregular)

ELEG 4403. Control Systems. 3 Hours.

Mathematical modeling of dynamic systems, stability analysis, control system architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics in microprocessor implementation. Students may not receive credit for both ELEG 4403 and ELEG 5403. Prerequisite: ELEG 3124. (Typically offered: Irregular)

ELEG 4403H. Honors Control Systems. 3 Hours.

Mathematical modeling of dynamic systems, stability analysis, control system architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics in microprocessor implementation. Students may not receive credit for both ELEG 4403 and ELEG 5403. Prerequisite: ELEG 3124. (Typically offered: Irregular)

ELEG 4413. Advanced Control Systems. 3 Hours.

A second course in linear control systems. Emphasis on multiple-input and multiple-output systems: State-space analysis, similarity transformations, eigenvalue and eigenvector decomposition, stability in the sense of Lyapunov, controllability and observability, pole placement, quadratic optimization. Students may not receive credit for both ELEG 4413 and ELEG 5413. Prerequisite: ELEG 4403 or equivalent course. (Typically offered: Irregular)

ELEG 4423. Optimal Control. 3 Hours.

Introductory theory of optimizing dynamic systems: Formulation of performance objectives; calculus of variations; linear quadratic optimal control; discrete-time optimization; robustness and frequency domain techniques; reinforcement learning and optimal adaptive control. Prerequisite: ELEG 4403. (Typically offered: Irregular)

ELEG 4463L. Control Systems Laboratory. 3 Hours.

Experimental study of various control systems and components. The use of programmable logic controllers in the measurement of systems parameters, ladder-logic applications, process-control applications, and electromechanical systems. Prerequisite: ELEG 3924 and ELEG 3124. (Typically offered: Irregular)

ELEG 4473. Power System Operation and Control. 3 Hours.

Study of the control and operation of electric power systems: Modeling, dynamics, and stability of three-phase power systems. Design and implementation of control systems related to generation and transmission. Overview of the related industry and government regulations for power system protection and reliability. Students may not receive credit for both ELEG 4473 and ELEG 5473. Prerequisite: ELEG 3124 and ELEG 3304. (Typically offered: Irregular)

ELEG 4503. Design of Advanced Electric Power Distribution Systems. 3 Hours.

Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Prerequisite: ELEG 3304. (Typically offered: Irregular)

ELEG 4503H. Honors Design of Advanced Electric Power Distribution Systems. 3 Hours.

Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Students may not receive credit for both ELEG 4503H and ELEG 5503. Prerequisite: ELEG 3304. (Typically offered: Irregular)

This course is equivalent to ELEG 4503.

ELEG 4513. Power and Energy Systems Analysis. 3 Hours.

Modeling and analysis of electric power systems: Energy sources and conversion; load flow analysis; reference frame transformations; symmetrical and unsymmetrical fault conditions; load forecasting and economic dispatch. Students may not receive credit for both ELEG 4513 and ELEG 5513. Prerequisite: ELEG 2114. (Typically offered: Irregular)

ELEG 4523. Quality of Electric Power. 3 Hours.

This course addresses concepts related to the quality of electric power (in particular wiring and grounding, voltage sags and interruptions, harmonics, and transients), distributed generation and power electronic systems, power quality benchmarking, as well as instrumentation and PQ analyzers. Students may not receive credit for both ELEG 4523 and ELEG 5523. Prerequisite: ELEG 3304. (Typically offered: Irregular)

ELEG 4533. Power Electronics and Motor Drives. 3 Hours.

Characteristics of Insulated Gate Bipolar Transistors (IGBTs), Silicon Carbide (SiC) MOSFETs, Gallium Nitride (GaN) devices, Design of driver and snubber circuits for IGBTs and SiC MOSFETs, and an introduction to electric motor drives. Students may not receive credit for both ELEG 4533 and ELEG 5533. Prerequisite: ELEG 3304 and ELEG 3224. (Typically offered: Irregular)

ELEG 4543. Introduction to Power Electronics. 3 Hours.

Presents basics of emerging areas in power electronics and a broad range of topics such as power switching devices, electric power conversion techniques and analysis, as well as their applications. Students may not receive credit for both ELEG 5543 and ELEG 4543. Prerequisite: ELEG 2114 and ELEG 3214. (Typically offered: Irregular)

ELEG 4553. Switch Mode Power Conversion. 3 Hours.

Basic switching converter topologies: buck, boost, buck-boost, Cuk, flyback, resonant; pulse-width modulation; integrated circuit controllers; switching converter design case studies; SPICE analyses of switching converters; state-space averaging and linearization; and switching converter transfer functions. Prerequisite: ELEG 3224 and ELEG 3124. (Typically offered: Irregular)

ELEG 4563. EMI in Power Electronics Converters: Generation, Propagation and Mitigation. 3 Hours.

Concepts of electro-magnetic-interference issues in power electronics converters. Basic concepts of EMI measurement, modeling and mitigation, with a focus on conducted EMI in power electronics converters. The course is structured with lectures and a lab session. Students can not receive credit for both ELEG 4563 and ELEG 5563. Prerequisite: ELEG 2104 or equivalent and MATH 2574. (Typically offered: Irregular)

ELEG 4603. Deterministic Digital Signal Processing System Design. 3 Hours.

Design of Digital Signal Processing systems with deterministic inputs. Sampling, quantizing, oversampling, ADC trade-offs, distortion, equalizers, anti-aliasing, coherency, frequency domain design, audio and video compression. Prerequisite: ELEG 3124. (Typically offered: Irregular)

ELEG 4623. Communication Systems. 3 Hours.

Various modulation systems used in communications. AM and FM fundamentals, pulse modulation, signal to noise ratio, threshold in FM, the phase locked loop, matched filter detection, probability of error in PSK, FKS, and DPSK. The effects of quantization and thermal noise in digital systems. Information theory and coding. Pre- or Corequisite: ELEG 3143. (Typically offered: Irregular)

ELEG 4703. Introduction to RF and Microwave Design. 3 Hours.

An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 4703H. Honors Introduction to RF and Microwave Design. 3 Hours.

An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Prerequisite: ELEG 3704. (Typically offered: Irregular)

This course is equivalent to ELEG 4703.

ELEG 4773. Electronic Response of Biological Tissues. 3 Hours.

Understand the electric and magnetic response of biological tissues with particular reference to neural and cardiovascular systems. Passive and active forms of electric signals in cell communication. We will develop the central electrical mechanisms from the membrane channel to the organ, building on those excitation, dielectric models for tissue behavior, Debye, Cole-Cole models. Role of bound and free water on tissue properties. Magnetic response of tissues. Experimental methods to measure tissue response. Applications to Electrocardiography & Electroencephalography, Microwave Medical Imaging, RF Ablation will be discussed that are common to many electrically active cells in the body. Analysis of Nernst equation, Goldman equation, linear cable theory, and Hodgkin-Huxley Model of action potential generation and propagation. High frequency response of tissues to microwave. Prerequisite: ELEG 3704 or equivalent; MATH 2584 or equivalent; basic Biology. (Typically offered: Irregular)

ELEG 4783. Introduction to Antennas. 3 Hours.

Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Corequisite: Drill component. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 4783H. Honors Introduction to Antennas. 3 Hours.

Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Corequisite: Drill component. Prerequisite: ELEG 3704. (Typically offered: Irregular)

This course is equivalent to ELEG 4783.

ELEG 487V. Special Topics in Electrical Engineering. 1-3 Hour.

Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ELEG 487VH. Honors Special Topics in Electrical Engineering. 1-3 Hour.

Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Senior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

This course is equivalent to ELEG 487V.

ELEG 488V. Special Problems. 1-3 Hour.

Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: Senior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

ELEG 488VH. Honors Special Problems. 1-3 Hour.

Individual study and research on a topic mutually agreeable to the student and a faculty member. Prerequisite: Senior standing. (Typically offered: Irregular) This course is equivalent to ELEG 488V.

ELEG 4914. Advanced Digital Design. 4 Hours.

To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Students may not receive credit for both ELEG 4914 and ELEG 5914. Corequisite: Lab component. Prerequisite: ELEG 2904 or CSCE 2114. (Typically offered: Irregular)

This course is cross-listed with CSCE 4914.

ELEG 4914H. Honors Advanced Digital Design. 4 Hours.

To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Students may not receive credit for both ELEG 4914H and ELEG 5914. Corequisite: Lab component. Prerequisite: ELEG 2904 or CSCE 2114. (Typically offered: Irregular)

This course is cross-listed with ELEG 4914, CSCE 4914.

ELEG 4963. CPLD/FPGA Based System Design. 3 Hours.

Field Programmable logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Corequisite: Lab component. Prerequisite: ELEG 4914. (Typically offered: Irregular) This course is cross-listed with CSCE 4353.

ELEG 4963H. Honors CPLD/FPGA Based System Design. 3 Hours.

Field Programmable logic devices (FPGAs/CPLDs) have become extremely popular as basic building blocks for digital systems. They offer a general architecture that users can customize by inducing permanent or reversible physical changes. This course will deal with the implementation of logic options using these devices. Corequisite: Lab component. Prerequisite: ELEG 4914. (Typically offered: Irregular) This course is cross-listed with ELEG 4963, CSCE 4353.

ELEG 4983. Computer Architecture. 3 Hours.

Design of a single board computer including basic computer organization, memory subsystem design, peripheral interfacing, DMA control, interrupt control, and bus organization. Prerequisite: ELEG 3924. (Typically offered: Irregular) This course is cross-listed with CSCE 4213.

ELEG 5173L. Digital Signal Processing Laboratory. 3 Hours.

Use of DSP integrated circuits. Lectures, demonstrations, and projects. DSP IC architectures and instruction sets. Assembly language programming. Development tools. Implementation of elementary DSP operations, difference equations, transforms and filters. Prerequisite: ELEG 3124. (Typically offered: Irregular)

ELEG 5193L. Advanced DSP Processors Laboratory. 3 Hours.

Familiarization with, and use of, advanced DSP processors. Parallel processor configurations, timing consideration, specialized programming techniques, and complex pipelines. Prerequisite: ELEG 5173L. (Typically offered: Irregular)

ELEG 5203. Semiconductor Devices. 3 Hours.

Crystal properties and growth of semiconductors, energy bands and charge carriers in semiconductors, excess carriers in semiconductors, analysis and design of p/n junctions, analysis and design of bipolar junction transistors, and analysis and design of field-effect transistors. Students may not receive credit for both ELEG 4203 and ELEG 5203. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5213. Integrated Circuit Fabrication Technology. 3 Hours.

Theory and techniques of integrated circuit fabrication technology; crystal growth, chemical vapor deposition, impurity diffusion, oxidation, ion implantation, photolithography and medullization. Design and analysis of device fabrication using SUPREM and SEDAN. In-process analysis techniques. Student review papers and presentations on state of the art fabrication and device technology. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Irregular)

ELEG 5223. Design and Fabrication of Solar Cells. 3 Hours.

Solar insolation and its spectral distribution/ p-n junction solar cells in dark and under illumination; solar cell parameters efficiency limits and losses; standard cell technology; energy accounting; design of silicon solar cells using simulation; fabrication of designed devices in the lab and their measurements. Students cannot receive credit for both ELEG 4223 and ELEG 5223. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Irregular)

ELEG 5243L. Microelectronic Fabrication Techniques and Procedures. 3 Hours.

The Thin-Film Fabrication course is designed to prepare students to use the thin-film equipment and processes available at the Engineering Research Center's thin-film cleanroom. The process modules to be trained on include lithography, metal deposition and etching, oxide deposition, growth and etching, reactive dry etching, tantalum anodization, photodefinable spin-on dielectric and electroplating. The related metrology modules include microscope inspection, spectrophotometric measurement of oxide, profilometry and four-point probe measurements. Prerequisite: ELEG 5273. (Typically offered: Irregular)

ELEG 5253L. Integrated Circuit Design Laboratory I. 3 Hours.

Design and layout of large scale digital integrated circuits. Students design, check, and simulate digital integrated circuits which will be fabricated and tested in I.C. Design Laboratory II. Topics include computer-aided design, more in-depth coverage of topics from ELEG 4233, and design of very large scale chips. Prerequisite: ELEG 4233 or ELEG 5923. (Typically offered: Irregular) This course is cross-listed with CSCE 5253L.

ELEG 5273. Electronic Packaging. 3 Hours.

An introductory treatment of electronic packaging, from single chip to multichip, including materials, substrates, electrical design, thermal design, mechanical design, package modeling and simulation, and processing considerations. Credit cannot be earned for both MEEG 5273 and ELEG 5273. Prerequisite: Graduate standing. (Typically offered: Irregular) This course is cross-listed with MEEG 5273.

ELEG 5283. Mixed Signal Test Engineering II. 3 Hours.

Focus calibrations, DAC testing, ADC testing, DIB design, Design for Test, Data Analysis, and Test Economics. Prerequisite: ELEG 4283. (Typically offered: Irregular)

ELEG 5293L. Integrated Circuits Fabrication Laboratory. 3 Hours.

Experimental studies of silicon oxidation, solid-state diffusion, photolithographical materials and techniques, bonding and encapsulation. Fabrication and testing of PN diodes, NPN transistors and MOS transistors. Prerequisite: ELEG 5213. (Typically offered: Irregular)

ELEG 5313. Power Semiconductor Devices. 3 Hours.

Carrier transport physics; breakdown phenomenon in semiconductor devices; power bipolar transistors, thyristors, power junction field-effect transistors, power field-controlled diodes, power metal-oxide-semiconductor field-effect transistors, and power MOS-bipolar devices. Prerequisite: ELEG 4203 or graduate standing. (Typically offered: Irregular)

ELEG 5323. Semiconductor Nanostructures I. 3 Hours.

This course is focused on the basic theoretical and experimental analyses of low dimensional systems encountered in semiconductor heterojunctions and nanostructures with the emphasis on device applications and innovations. Prerequisite: ELEG 4203 or instructor permission. (Typically offered: Irregular)

ELEG 5333. Semiconductor Nanostructures II. 3 Hours.

This course is a continuation of ELEG 5323 Semiconductors Nanostructures I. It is focused on the transport properties, growth, electrical and optical properties of semiconductor nanostructures, and optoelectronic devices. Prerequisite: ELEG 5323 or instructor permission. (Typically offered: Irregular)

ELEG 5343. Organic Electronics Technology. 3 Hours.

Students become familiar with recent developments in and process technology for organic material based devices and sensors in the classroom, but also gain hands on experience with fabrication processes using micro-fabrication tools in the lab. (Typically offered: Irregular)

ELEG 5353. Semiconductor Optoelectronic Devices. 3 Hours.

This course will provide graduate students a detailed background in semiconductor optoelectronic devices such as light emitting diodes and lasers, photodetectors, solar cells, modulators. The applications of these devices will also be discussed. Prerequisite: ELEG 4203 or ELEG 5203. (Typically offered: Spring Odd Years)

ELEG 5363. Semiconductor Material and Device Characterization. 3 Hours.

This course provides an overview of semiconductor characterization techniques in industry: Electrical measurements, Optical measurements, Electron and ion beam measurements, X-ray and probe measurements. Prerequisite: ELEG 4203 or ELEG 5203 and instructor consent. (Typically offered: Irregular)

ELEG 5383. Introduction of Integrated Photonics. 3 Hours.

This course is designed to provide junior and senior graduate students detailed knowledge of integrated photonics by using silicon photonics as an example. The course covers a cycle of design, fabrication, and testing of photonic devices by using analytic and numerical methods. The course will focus on designing an interferometer, which is widely used in communication and sensing applications. Students will be exposed to use the state-of-art design simulation tool, Lumerical, to design the photonic circuits and to evaluate the performances. In the course project, students will extend the design rules to design a set of components to be used for integrated microwave photonics based on Ge on Si, SiGeSn, or Si₃N₄ on sapphire platform. Prerequisite: ELEG 4203 and ELEG 5353. (Typically offered: Irregular)

ELEG 5393. Electronic Materials. 3 Hours.

This is a lecture course designed to provide a fundamental introduction to materials science. Upon this fundamental basis, we will survey many of the properties and materials relevant to modern electronics. This course will cover semiconductors, but only briefly. The focus will be on properties and materials not generally well covered in other electrical engineering courses from a materials perspective. This will include, but not be limited to metals, dielectrics, and magnetic and optical materials. Prerequisite: Graduate standing; A knowledge of quantum mechanics is helpful but not required. (Typically offered: Spring)

ELEG 5403. Control Systems. 3 Hours.

Mathematical modeling of dynamic systems, stability analysis, control systems architectures and sensor technologies. Time-domain and frequency-domain design of feedback control systems: lead, lag, PID compensators. Special topics on microprocessor implementation. Credit not given for both ELEG 4403 and ELEG 5403. Prerequisite: Graduate standing or ELEG 3124. (Typically offered: Irregular)

ELEG 5413. Modern Control Systems. 3 Hours.

A second course in linear control systems. Emphasis on multiple-input and multiple-output systems: State-space analysis, similarity transformations, eigenvalue and eigenvector decomposition, stability in the sense of Lyapunov, controllability and observability, pole placement, quadratic optimization. Credit not given for both ELEG 4413 and ELEG 5413. Prerequisite: ELEG 5403 or equivalent. (Typically offered: Irregular)

ELEG 5423. Optimal Control Systems. 3 Hours.

Basic concepts, conditions for optimality, the minimum principle, the Hamilton Jacobi equation, structure and properties of optimal systems. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5433. Digital Control Systems. 3 Hours.

Signal processing in continuous-discrete systems. System modeling using the z-transform and state-variable techniques. Analysis and design of digital control systems. Digital redesign for continuous control. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5443. Nonlinear Systems Analysis and Control. 3 Hours.

Second-order nonlinear systems. Nonlinear differential equations. Approximate analysis methods. Lyapunov and input-output stability. Design of controllers, observers, and estimators for nonlinear systems. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5453. Adaptive Filtering and Control. 3 Hours.

Models for deterministic systems. Parameter estimation. Adaptive control. Stochastic models. Stochastic state and parameter estimation. Adaptive control of stochastic systems. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5463. Biomedical Control Systems. 3 Hours.

Study of control systems analysis and design as applied to human physiological systems: Modeling and dynamics of biological processes, biomedical sensors, time and frequency domain analysis, identification of physiological systems. Overview of medical device regulations. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5473. Power System Operation and Control. 3 Hours.

Study of the control and operation of electric power systems: Modeling, dynamics, and stability of three-phase power systems. Design and implementation of control systems related to generation and transmission. Overview of the related industry and government regulations for power system protection and reliability. Prerequisite: ELEG 4403 or graduate standing. (Typically offered: Irregular)

ELEG 5503. Design of Advanced Power Distribution Systems. 3 Hours.

ELEG 5503 Design of Advanced Power Distribution Systems. 3 credit hours. Design considerations of electric power distribution systems, including distribution transformer usage, distribution system protection implementation, primary and secondary networks design, applications of advanced equipment based on power electronics, and use of capacitors and voltage regulation. Students may not receive graduate credit for both ELEG 4503 and ELEG 5503. Prerequisite: ELEG 3304 or graduate standing. (Typically offered: Irregular)

ELEG 5513. Power Systems Analysis. 3 Hours.

Modeling and analysis of electric power systems: Energy sources and conversion; load flow analysis; reference frame transformations; symmetrical and unsymmetrical fault conditions; load forecasting and economic dispatch. Credit not given for both ELEG 4513 and ELEG 5513. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5523. Electric Power Quality. 3 Hours.

The theory and analysis of electric power quality for commercial, industrial and residential power systems. Specific topics include harmonics, voltage sags, wiring and grounding, instrumentation, distributed generation and power electronic systems, and site surveys. Case studies complement the theoretical concepts. Prerequisite: ELEG 3304 or graduate standing. (Typically offered: Irregular)

ELEG 5533. Power Electronics and Motor Drives. 3 Hours.

Fundamentals of power electronics, diode bridge rectifiers, inverters, general concepts on motor drives, induction motor drives, synchronous motor drives, and dc motor drives. Students may not receive credit for both ELEG 4533 and ELEG 5533. Prerequisite: Graduate standing or ELEG 3224 and ELEG 3304. (Typically offered: Irregular)

ELEG 5543. Introduction to Power Electronics. 3 Hours.

Presents basics of emerging areas in power electronics and a broad range of topics such as power switching devices, electric power conversion techniques and analysis, as well as their applications. Students may not receive credit for both ELEG 5543 and ELEG 4543. Prerequisite: ELEG 2114 and ELEG 3214, or graduate standing. (Typically offered: Irregular)

ELEG 5553. Switch Mode Power Conversion. 3 Hours.

Basic switching converter topologies, control scheme of switching converters, simulation of switching converters, resonant converters, isolated converters, dynamic analysis of switching converters. Students will not receive graduate credit for both ELEG 4553 and ELEG 5553. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5563. EMI in Power Electronics Converters: Generation, Propagation and Mitigation. 3 Hours.

Concepts of electro-magnetic-interference issues in power electronics converters. Basic concepts of EMI measurement, modeling and mitigation, with a focus on conducted EMI in power electronics converters. The course is structured with lectures and a lab session. Students can not receive credit for both ELEG 4563 and ELEG 5563. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5613. Introduction to Telecommunications. 3 Hours.

Overview of public and private telecommunication systems; traffic engineering; communications systems basics, information technology, electromagnetics, and data transmission. Prerequisite: ELEG Graduate Standing or ELEG 3124. (Typically offered: Irregular)

ELEG 5623. Information Theory. 3 Hours.

Continuous and discrete source and channel models, measure of information, channel capacity, noisy-channel coding theorem, coding and decoding techniques. Prerequisite: ELEG 3143 or ELEG 4623 or graduate standing. (Typically offered: Irregular)

ELEG 5633. Detection and Estimation. 3 Hours.

Binary and multiple decisions for single and multiple observations; sequential, composite, and non-parametric decision theory; estimation theory; sequential, non-linear, and state estimation; optimum receiver principles. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5653. Artificial Neural Networks. 3 Hours.

Fundamentals of artificial neural networks, both theory and practice. Teaches basic concepts of both supervised and unsupervised learning, and how they are implemented using artificial neural networks. Topics include the perceptron, back propagation, the competitive Hamming net, self-organizing feature maps, topological considerations, requirements for effective generalization, subpattern analysis, etc. Prerequisite: MATH 2584. (Typically offered: Irregular)

ELEG 5663. Communication Theory. 3 Hours.

Principles of communications. Channels and digital modulation. Optimum receivers and algorithms in the AWGN and fading channels. Coherent, non-coherent detectors and matched filters. Bounds on the performance of communications, and comparison of communications systems. Background in stochastic processes and probabilities, communication systems is desirable. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

ELEG 5693. Wireless Communications. 3 Hours.

Comprehensive course in fast developing field of wireless mobile/cellular personal telecommunications. Topics include cellular system structures, mobile radio propagation channels, etc. Prerequisite: Graduate standing. (Typically offered: Irregular)

ELEG 5703. RF & Microwave Design. 3 Hours.

An introduction to microwave design principles. Transmission lines, passive devices, networks, impedance matching, filters, dividers, and hybrids will be discussed in detail. Active microwave devices will also be introduced. In addition, the applications of this technology as it relates to radar and communications systems will be reviewed. Selected topics for device fabrication and measurements will be covered. Cannot get credit if student has taken ELEG 4703. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 5723. Advanced Microwave Design. 3 Hours.

This course is an advanced course in microwave design building on the introduction to microwave design course. A detailed discussion of active devices, biasing networks, mixers, detectors, Microwave Monolithic Integrated Circuits (MMIC), and wideband matching networks will be provided. In addition, a number of advanced circuits will be analyzed. Prerequisite: ELEG 3704 and ELEG 4703 or ELEG 5703. (Typically offered: Irregular)

ELEG 5763. Advanced Electromagnetic Scattering & Transmission. 3 Hours.

Reflection and transmission of electromagnetic waves from a flat interface, the Poynting theorem, the complex and average power, the rectangular wave guides, TE and TM modes, radiation from antennas in free space and introduction to computational electromagnetics. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 5773. Electronic Response of Biological Tissues. 3 Hours.

Understand the electric and magnetic response of biological tissues with particular reference to neural and cardiovascular systems. Passive and active forms of electric signals in cell communication. We will develop the central electrical mechanisms from the membrane channel to the organ, building on those that are common to many electrically active cells in the body. Analysis of Nernst equation, Goldman equation, linear cable theory, and Hodgkin-Huxley Model of action potential generation and propagation. High frequency response of tissues to microwave excitation, dielectric models for tissue behavior, Debye, Cole-Cole models. Role of bound and free water on tissue properties. Magnetic response of tissues. Experimental methods to measure tissue response. Applications to Electrocardiography & Electroencephalography, Microwave Medical Imaging, RF Ablation will be discussed. Students may not receive credit for both ELEG 4773 and ELEG 5773. Prerequisite: MATH 2584, ELEG 3704 or BIOL 2533 or equivalent. (Typically offered: Irregular)

ELEG 5783. Introduction to Antennas. 3 Hours.

Basic antenna types: small dipoles, half wave dipoles, image theory, monopoles, small loop antennas. Antenna arrays: array factor, uniformly excited equally spaced arrays, pattern multiplication principles, nonuniformly excited arrays, phased arrays. Use of MATLAB programming and mathematical techniques for antenna analysis and design. Emphasis will be on using simulation to visualize variety of antenna radiation patterns. Students cannot get credit for ELEG 5783 if they have taken ELEG 4783. Prerequisite: ELEG 3704. (Typically offered: Irregular)

ELEG 587V. Special Topics in Electrical Engineering. 1-3 Hour.

Consideration of current electrical engineering topics not covered in other courses. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ELEG 588V. Special Problems. 1-6 Hour.

Opportunity for individual study of advanced subjects related to a graduate electrical engineering program to suit individual requirements. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ELEG 5903. Engineering Technical Writing. 3 Hours.

In this course, advanced graduate students (PhD candidates and selected MS students) will be trained in rephrasing and preparing technical papers, including scientific reports. Illustrations step by step will be explained. Each student is required to prepare technical papers based on their own research results and will be guided from selecting a title to a finished product. The emphasis will be placed on the structures of the articles including figures and table preparation, abstract writing, citations and references, and acknowledgments. The students will also be trained to prepare letters to the journals' editors and how to respond to reviewers' comments. Prerequisite: Graduate standing. (Typically offered: Fall)

ELEG 5914. Advanced Digital Design. 4 Hours.

To master advanced logic design concepts, including the design and testing of synchronous and asynchronous combinational and sequential circuits using state of the art CAD tools. Students may not receive credit for both ELEG 5914 and ELEG 4914 or CSCE 4914. Corequisite: Lab component. Prerequisite: ELEG 2904 or CSCE 2114. (Typically offered: Irregular)

ELEG 5923. Introduction to Integrated Circuit Design. 3 Hours.

Design and layout of large scale digital integrated circuits using CMOS technology. Topics include MOS devices and basic circuits, integrated circuit layout and fabrication, dynamic logic, circuit design, and layout strategies for large scale CMOS circuits. Students may not receive credit for both ELEG 4233 and ELEG 5923. Prerequisite: ELEG 3214 or ELEG 3933 and MATH 2584. (Typically offered: Fall)

ELEG 5993. Mixed-signal Modeling and Simulation. 3 Hours.

Study of basic analog, digital & mixed signal simulation solution methods. Modeling with hardware description languages. Use of state-of-the-art simulators and HDLs. Students may not receive credit for both ELEG 4293 and ELEG 5993. Prerequisite: ELEG 3224 or graduate standing. (Typically offered: Irregular)

ELEG 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ELEG 6801. Graduate Seminar. 1 Hour.

Papers presented by candidates for the Doctor of Philosophy degree in electrical engineering on current research or design problems in the field of electrical engineering. (Typically offered: Fall, Spring and Summer)

ELEG 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Engineering (ENGR) Courses

ENGR 1600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

ENGR 2600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

ENGR 3600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

ENGR 4600. Undergraduate Research Assistant. 0 Hours.

Undergraduate research. (Typically offered: Fall, Spring and Summer)

English (ENGL) Courses

ENGL 0002. Basic Writing. 2 Hours.

A required course for entering freshmen with ACT English scores lower than 19 or SAT verbal scores lower than 470. These students must also enroll in ENGL 1013, Composition I, as a corequisite and successfully complete both courses to fulfill the remediation requirement. Credit earned in this course may not be applied to the total required for a degree. Corequisite: ENGL 1013. (Typically offered: Fall, Spring and Summer)

ENGL 0013. Reading Strategies for College Students. 3 Hours.

The course focuses on developing reading and learning skills and strategies essential for college success with frequent application to college textbooks in a variety of disciplines. University credit is earned, but the course does not count toward a degree. Required of students not meeting U of A reading placement standards. (Typically offered: Fall, Spring and Summer)

ENGL 1013. Composition I (ACTS Equivalency = ENGL 1013). 3 Hours.

Required of all freshmen unless exempted by the Department of English. Prerequisite: ENGL 0002 or an acceptable score on the English section of the ACT or another approved test. (Typically offered: Fall, Spring and Summer)

ENGL 1013H. Honors Composition I. 3 Hours.

A course for freshmen with high placement scores. (Typically offered: Fall) This course is equivalent to ENGL 1013.

ENGL 1023. Composition II (ACTS Equivalency = ENGL 1023). 3 Hours.

Continuation of ENGL 1013. Prerequisite: ENGL 1013 or equivalent. (Typically offered: Fall, Spring and Summer) This course is cross-listed with ENGL 1023H, ENGL 1033.

ENGL 1023H. Honors Composition II. 3 Hours.

Continuation of ENGL 1013H. Prerequisite: Honors candidacy and ENGL 1013H or ENGL 1013 and an acceptable score on the English section of the ACT or another approved test. (Typically offered: Spring) This course is cross-listed with ENGL 1023, ENGL 1033.

ENGL 1033. Technical Composition II (ACTS Equivalency = ENGL 1023). 3 Hours.

Continuation of ENGL 1013, intended for students majoring in Engineering or Business. Prerequisite: ENGL 1013 or equivalent and ENGR or WCOB majors only. (Typically offered: Fall, Spring and Summer) This course is cross-listed with ENGL 1023, ENGL 1023H.

ENGL 1213. Introduction to Literature. 3 Hours.

Approaches to reading and writing about fiction, drama, and poetry at the college level. (Typically offered: Fall and Spring)

ENGL 1213H. Honors Introduction to Literature. 3 Hours.

Approaches to reading and writing about fiction, drama, and poetry at the college level. Prerequisite: Honors standing. (Typically offered: Fall and Spring) This course is equivalent to ENGL 1213.

ENGL 2003. Advanced Composition. 3 Hours.

Review course in English composition. Exemption for this course may be granted for certain majors that require it by a grade of at least a "B" in ENGL 1013 and ENGL 1023 (or equivalent courses from an accredited institution), by achieving a score of 4 or 5 on the AP Language and Composition Examination and the AP Literature and Composition Examination, or by achieving a 6 HL or 7 HL on the IB Examination in English. Cannot be counted toward a major in English. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall, Spring and Summer)

ENGL 2013. Essay Writing. 3 Hours.

This course focuses on analyzing and writing creative nonfiction, paying special attention to essay forms: memoir, braided essay, collage or hermit crab essay, and personal reportage. Students enrolling in this course must possess a sound knowledge of sentence structure and standard usage. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Spring and Summer)

ENGL 2023. Creative Writing I (ACTS Equivalency = ENGL 2013). 3 Hours.

Beginning level workshop course in which students write original poems and stories. Reading and detailed discussion of poems and stories in anthologies is required. Designed to teach the student the fundamental techniques of fiction and poetry. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2173. Literacy in America. 3 Hours.

A course that examines the myriad definitions of literacy (and illiteracy) and their connections to issues of social class, occupational status, economic and political structures, educational institutions, cultural organizations, and the media. (Typically offered: Spring)

This course is cross-listed with CIED 2173.

ENGL 2303. English Literature from the Beginning through the 17th Century (ACTS = ENGL 2673). 3 Hours.

A critical and historical survey of the development of literature in the British Isles from its beginnings to the end of the seventeenth century. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2303C. English Literature from the Beginning through the 17th Century (ACTS = ENGL 2673). 3 Hours.

A critical and historical survey of the development of literature in the British Isles from its beginnings to the end of the seventeenth century. Lecture and drill. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall)

ENGL 2313. Survey of English Literature from 1700 to 1900 (ACTS Equivalency = ENGL 2683). 3 Hours.

A critical and historical survey of the development of literature in the British Isles from 1700 to 1900. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2323. Survey of Modern and Contemporary British, Irish, and Postcolonial Literature. 3 Hours.

A survey of modern and contemporary literature in English written in Great Britain, Ireland, Africa, Asia, and the Caribbean. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2343. Survey of American Lit from the Colonial Period through Naturalism (ACTS Equiv=ENGL 2653). 3 Hours.

A survey of major American writers from the colonial period to 1900. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2353. Survey of Modern and Contemporary American Literature (ACTS Equivalency = ENGL 2663). 3 Hours.

A survey of American writers after 1900. Prerequisite: ENGL 1013 and ENGL 1023. (Typically offered: Fall and Spring)

ENGL 2413. Introductory Topics in English. 3 Hours.

Students will understand concepts and issues of theme, form, and motif in literary works about the designated topic. Students will improve in their abilities to read literary works carefully and critically and to write about literature correctly and cogently. Topics and content will vary from semester to semester. (Typically offered: Irregular)

ENGL 3013. Creative Writing II. 3 Hours.

Laboratory course for students who wish to attempt original work in the various literary forms. Prerequisite: ENGL 2023 or equivalent. (Typically offered: Fall and Spring)

ENGL 3053. Technical and Report Writing (ACTS Equivalency = ENGL 2023). 3 Hours.

Intensive practice in such types of writing as processes, descriptions of mechanism, abstracts, and laboratory and research reports. The criteria for effective written exposition in the scientific areas, including agriculture and engineering. Prerequisite: ENGL 1013 and ENGL 1023 or equivalent. (Typically offered: Fall and Spring)

ENGL 3113. Folklore. 3 Hours.

Popular literature (ballads, folktales, etc.). Prerequisite: Junior standing. (Typically offered: Irregular)

ENGL 3123. Folk and Popular Music Traditions. 3 Hours.

Introduction to folk and popular music studies. Emphasis on American traditions. (Typically offered: Irregular)

ENGL 3143. Language and Expressive Culture. 3 Hours.

This course explores the complex interrelationship of language, culture, and social identity. Verbal art and expressive culture are examined from a variety of anthropological perspectives. Topics include ethnographies of speaking, discourse analysis, cultural performances, and the performative aspects of oral expression. (Typically offered: Irregular)

This course is cross-listed with ANTH 3143, COMM 3143.

ENGL 3173. Introduction to Linguistics. 3 Hours.

Introduction to language study with stress upon modern linguistic theory and analysis. Data drawn from various languages reveal linguistic universals as well as phonological, syntactic, and semantic systems of individual languages. Related topics: language history, dialectology, language and its relation to culture and society, the history of linguistic scholarship. Prerequisite: Junior standing. (Typically offered: Irregular)

This course is cross-listed with ANTH 3173, COMM 3173, WLLC 3173.

ENGL 3203. Poetry. 3 Hours.

A critical introduction to the genre. (Typically offered: Fall and Spring)

ENGL 3213. Fiction. 3 Hours.

A critical introduction to the genre. (Typically offered: Fall and Spring)

ENGL 3223. Drama. 3 Hours.

A critical introduction to the genre. (Typically offered: Irregular)

ENGL 3263. African Americans in Film. 3 Hours.

A survey of the history of images of African Americans in film, especially as these images are examined in the context of stereotypical renditions and/or realistic representations of African American experiences. Issues of African American history, culture, and socio-political context will be addressed in the analyses of these films. Prerequisite: ENGL 1023 and advanced standing. (Typically offered: Irregular)

This course is cross-listed with AAST 3263, JOUR 3263, COMM 3263.

ENGL 3283. Topics in Popular Culture and Popular Genres. 3 Hours.

Survey of a broad topical area in popular culture and popular genres, such as science fiction or detective fiction. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3433. Introduction to Chaucer. 3 Hours.

Course designed primarily for undergraduates. Extensive reading in Chaucer's major works. (Typically offered: Irregular)

ENGL 3543. Topics in U.S. Latino/Latina Literature and Culture. 3 Hours.

The study of works of U.S. Latino/Latina literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3553. Topics in Native American Literature and Culture. 3 Hours.

The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3573. Special Topics in Diversity. 3 Hours.

The study of literature and culture with specific focus on issues of diversity, inclusion, and equality. Courses may be organized around specific theories, themes, genres, authors, historical moments, artistic movements, comparative and intersectional approaches, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3583. Topics in Arab American Literature and Culture. 3 Hours.

The study of works of Arab American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. No knowledge of Arabic necessary. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3593. Topics in Gender, Sexuality, and Literature. 3 Hours.

The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3603. Topics in Rhetoric and Composition. 3 Hours.

The study of special topics in the field of Rhetoric and Composition. Content will vary. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3623. The Bible as Literature. 3 Hours.

The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms. (Typically offered: Irregular)
This course is cross-listed with WLIT 3623.

ENGL 3713. Topics in Medieval Literature and Culture. 3 Hours.

Study of the languages, literature, and civilization of the British Isles from approximately 500 to 1500 CE (including Old English, Middle English, Celtic, Anglo-Norman, and Scandinavian). Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3723. Topics in Renaissance Literature and Culture. 3 Hours.

The study of literary works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3723H. Honors Topics in Renaissance Literature and Culture. 3 Hours.

The study of literary works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. Prerequisite: Honors standing. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is equivalent to ENGL 3723.

ENGL 3743. Topics in Nineteenth-Century British Literature and Culture. 3 Hours.

The study of literature of the 19th century, with attention to particular themes, genres, authors, literary movements, historical movements, or other organizing principles. Course content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3753. Topics in Modern and Contemporary British Literature and Culture. 3 Hours.

The study of a special topic in the field of modern and contemporary British literature and culture. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3763. Topics in Postcolonial Literature and Culture. 3 Hours.

Survey of a broad topical area related to postcolonial literature and culture. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3833. Topics in American Literature and Culture to 1900. 3 Hours.

The study of American literature and culture to 1900, with attention to particular themes, genres, authors, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3843. Topics in Modern and Contemporary American Literature and Culture. 3 Hours.

The study of a special topic in the field of modern and contemporary American literature and culture. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3853. Topics in African-American Literature and Culture. 3 Hours.

The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

This course is cross-listed with AAST 3853.

ENGL 3863. Topics in Literature and Culture of the American South. 3 Hours.

The study of works of literature of the American South, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3873. Medical Humanities Colloquium. 3 Hours.

Combines literary and critical texts that lead students to consider the ways in which literature and the humanities enrich and inform medical education and practice. Students will practice critical analysis and reflection to instill in them a commitment to compassionate, community responsive, and culturally competent medical care. (Typically offered: Spring)

ENGL 3873H. Honors Medical Humanities Colloquium. 3 Hours.

Combines literary and critical texts that lead students to consider the ways in which literature and the humanities enrich and inform medical education and practice. Students will practice critical analysis and reflection to instill in them a commitment to compassionate, community responsive, and culturally competent medical care. (Typically offered: Spring)
This course is equivalent to ENGL 3873.

ENGL 3903. Special Topics. 3 Hours.

Survey of a broad topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 3923H. Honors Colloquium. 3 Hours.

Covers a special topic or issue. Offered as part of the honors program. Prerequisite: honor candidacy (not restricted to candidacy in English). (Typically offered: Irregular) May be repeated for degree credit.

ENGL 399VH. Honors Course. 1-6 Hour.

Honors course. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 4003. English Language and Composition for Teachers. 3 Hours.

Subject matter and methods of approach for the teaching of composition in high school. (Typically offered: Irregular)

ENGL 4013. Undergraduate Poetry Workshop. 3 Hours.

Gives close attention to individual manuscripts in a workshop environment. Prerequisite: ENGL 3013 or equivalent. (Typically offered: Irregular)

ENGL 4023. Undergraduate Fiction Workshop. 3 Hours.

Gives close attention to individual manuscripts in a workshop environment. Prerequisite: ENGL 3013 or equivalent. (Typically offered: Irregular)

ENGL 4073. Film Writing Workshop. 3 Hours.

A workshop in writing the screenplay with close attention given to student manuscripts and adaptations. Prerequisite: Advanced standing. (Typically offered: Irregular)

ENGL 4113. Undergraduate Independent Study. 3 Hours.

Undergraduate original research and writing. Prerequisite: 'B' average and two-thirds (21 hours) of regular requirements for English major completed. Departmental approval and instructor approval required. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ENGL 4133. Writing Nature. 3 Hours.

Study of writings about nature, both scientific and literary. Examination of the basis of each author's relationship with (and definition of) the natural world while examining the literary/aesthetic aspects of that experience. Prerequisite: ENGL 1023. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

ENGL 4133H. Honors Writing Nature. 3 Hours.

Study of writings about nature, both scientific and literary. Examination of the basis of each author's relationship with (and definition of) the natural world while examining the literary/aesthetic aspects of that experience. Prerequisite: ENGL 1023. (Typically offered: Spring) May be repeated for up to 9 hours of degree credit.

This course is equivalent to ENGL 4133.

ENGL 4143. American Film Survey. 3 Hours.

A survey of major American genres, major directors, and films that have influenced the development of motion pictures. (Typically offered: Irregular)

This course is cross-listed with COMM 4143.

ENGL 4213. Senior Research Seminar. 3 Hours.

Seminar on a topic in literature in English with a substantial research paper required. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ENGL 4303. Introduction to Shakespeare. 3 Hours.

Extensive reading in Shakespeare's comedies, histories, tragedies, and nondramatic poetry. (Typically offered: Fall, Spring and Summer)

ENGL 4503. Introduction to Literary Theory. 3 Hours.

A historical survey of literary theory from Plato onwards. (Typically offered: Irregular)

ENGL 4513. Studies in Literary Criticism and Theory. 3 Hours.

A survey of contemporary trends in literary criticism. Emphasis will be placed on engaging the practices of a particular theory. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4523. Studies in U.S. Latino/Latina Literature and Culture. 3 Hours.

The study of works of U.S. Latino/a literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4553. Studies in Native American Literature and Culture. 3 Hours.

The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4563. Studies in Major Authors. 3 Hours.

The concentrated study of works by one or more major authors. At least one major paper will be required. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4573. Studies in Major Literary Movements. 3 Hours.

This course focuses on the literature either of a major literary movement such as Romanticism or Modernism or of a more specific topic such as Utopianism in twentieth-century writing. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4583. Studies in Arab American Literature and Culture. 3 Hours.

The study of works of Arab American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. Research paper required. No knowledge of Arabic necessary. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4593. Studies in Gender, Sexuality, and Literature. 3 Hours.

The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4603. Special Studies. 3 Hours.

Concentrated study of a specific topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

ENGL 4603H. Honors Special Studies. 3 Hours.

Concentrated study of a specific topical area related to literature and culture but not otherwise encompassed by the curriculum. Content varies. (Typically offered: Irregular) May be repeated for degree credit.

This course is equivalent to ENGL 4603.

ENGL 4673. Special Studies in Diversity. 3 Hours.

The study of literature and culture with specific focus on issues of diversity and inclusion. May be organized around specific theories, themes, genres, authors, or other organizing principles. At least one major research paper will be required. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4713. Studies in Medieval Literature and Culture. 3 Hours.

Study of the languages, literature, and civilization of the British Isles from approximately 500 to 1500 CE (including Old English, Middle English, Celtic, Anglo-Norman, and Scandinavian). Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4723. Studies in Renaissance Literature and Culture. 3 Hours.

The study of literary works of the English Renaissance, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Course content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4733. Studies in Restoration and Eighteenth-Century Literature. 3 Hours.

The study of Restoration and eighteenth-century literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4743. Studies in Nineteenth-Century British Literature and Culture. 3 Hours.

The study of literature of the nineteenth century, with attention to particular themes, genres, authors, literary movements, historical movements, or other organizing principles. Course content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4753. Studies in Modern and Contemporary British Literature and Culture. 3 Hours.

The study of modern and contemporary British literature and culture. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4763. Studies in Postcolonial Literature and Culture. 3 Hours.

The study of postcolonial literature and culture. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4833. Studies in American Literature and Culture to 1900. 3 Hours.

The study of American literature and culture to 1900, with attention to particular themes, genres, authors, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4843. Studies in Modern and Contemporary American Literature and Culture. 3 Hours.

The study of modern and contemporary American literature and culture, with attention to particular themes, genres, authors, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4853. Studies in African American Literature and Culture. 3 Hours.

The study of works of African American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.
This course is cross-listed with AAST 4853.

ENGL 4863. Studies in Literature and Culture of the American South. 3 Hours.

The study of works of literature of the American South, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4903. Studies in Rhetoric and Composition. 3 Hours.

Concentrated study of a specific topical area related to Rhetoric and Composition. Content varies. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 4933. Studies in Popular Culture and Popular Genres. 3 Hours.

The study of a focused topical area in popular culture and popular genres, such as science fiction or detective fiction. Content varies. At least one major research paper will be required. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

ENGL 498V. Senior Thesis. 1-6 Hour.

Honors thesis under the direction of a faculty member in the Department of English. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENGL 5003. Composition Pedagogy. 3 Hours.

Introduction to teaching college composition. Designed for graduate assistants at the University of Arkansas. (Typically offered: Fall)

ENGL 5023. Writing Workshop: Fiction. 3 Hours.

Fiction writing workshop. Prerequisite: Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit.

ENGL 5033. Writing Workshop: Poetry. 3 Hours.

Poetry writing workshop. Prerequisite: Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit.

ENGL 5043. Translation Workshop. 3 Hours.

Problems of translation and the role of the translator as both scholar and creative writer; involves primarily the discussion in workshop of the translations of poetry, drama, and fiction done by the students, some emphasis upon comparative studies of existing translations of well-known works. Primary material will vary. Prerequisite: Reading knowledge of a foreign language and Creative Writing MFA students only. (Typically offered: Irregular) May be repeated for up to 24 hours of degree credit.
This course is cross-listed with WLLC 504V.

ENGL 5063. English Language and Composition for Teachers. 3 Hours.

Subject matter and methods of approach for the teaching of composition in high school. (Typically offered: Fall and Spring)

ENGL 507V. Creative Non-Fiction Workshop. 1-3 Hour.

The theory and practice of the "New Journalism" with a study of its antecedents and special attention to the use of "fictional" techniques and narrator point of view to make more vivid the account of real people and real events. (Typically offered: Irregular)

Specialized topics related to professional issues in the humanities, e.g. academic and alternative-academic job searches, publication workshops, public humanities, and/or the teaching of language and literature at various levels. (Typically offered: Irregular)

ENGL 510V. Readings in English and American Literature. 1-6 Hour.

Open to Honors candidates and graduate students. Prerequisite: Departmental approval and instructor approval required. (Typically offered: Irregular) May be repeated for degree credit.

ENGL 5173. Advanced Studies in Medieval Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5183. The Structure of Present English. 3 Hours.

Structural analysis of the language. (Typically offered: Spring)

ENGL 5193. Graduate Internship in English. 3 Hours.

Internship changes depending on availability and student interest. Departmental consent required. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENGL 5203. Introduction to Graduate Studies. 3 Hours.

Develop knowledge and strategies for successfully negotiating graduate work and the profession. Topics covered include, but are not limited to, scholarly habits and practices, writing and publishing skills, scholarly associations, journals, conferences, university structures, and career paths. Emphasis on the development of individual academic and professional goals. (Typically offered: Irregular)

ENGL 5213. Portfolio Workshop. 3 Hours.

Workshop designed for students in the M.A. Program in English who are using the Portfolio Option to complete the program. Instructor consent required. (Typically offered: Spring)

ENGL 5223. Advanced Studies in Renaissance Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5233. Craft of Translation: I. 3 Hours.

An examination of the principal challenges that confront translators of literature, including the recreation of style, dialect, ambiguities, and formal poetry; vertical translation; translation where multiple manuscripts exist; and the question of how literal a translation should be. (Typically offered: Irregular)

ENGL 5243. Special Topics. 3 Hours.

Designed to cover subject matter not offered in other courses. (Typically offered: Irregular) May be repeated for degree credit.

ENGL 5263. Craft of Fiction: I. 3 Hours.

Such aspects of the genre as scene, transition, character, and conflict. Discussion is limited to the novel. (Typically offered: Irregular)

ENGL 5273. Craft of Poetry: I. 3 Hours.

An examination of perception, diction, form, irony, resolution, and the critical theories of the major writers on poetry, such as Dryden, Coleridge, and Arnold. (Typically offered: Irregular)

ENGL 5283. Craft of Fiction: II. 3 Hours.

Second part of the study of the techniques of fiction. Discussion is limited to the short story. Prerequisite: ENGL 5263. (Typically offered: Irregular) May be repeated for degree credit.

ENGL 5293. Craft of Poetry: II. 3 Hours.

Second part of the study of the techniques of poetry; independent study of a poet or a problem in writing or criticism of poetry. (Typically offered: Irregular)

ENGL 5313. Introduction to Literary Theory. 3 Hours.

An advanced introductory survey of a number of theoretical approaches to literature. (Typically offered: Irregular)

ENGL 5403. Advanced Studies in Nineteenth-Century British Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5413. Advanced Studies in Modern and Contemporary British Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5463. Descriptive Linguistics. 3 Hours.

A scientific study of language with primary emphasis on modern linguistic theory and analysis. Topics include phonology, morphology, syntax, semantics, language acquisition, and historical development of world languages. (Typically offered: Fall) This course is cross-listed with WLLC 5463, ANTH 5473.

ENGL 5513. Document Design for Technical Writers. 3 Hours.

Focuses on the role of document design in technical and professional writing. Covers industry standard software and theories of rhetorically-centered document design. Special emphasis on creating print-ready technical documents such as manuals, catalogs, and infographics. (Typically offered: Fall Odd Years)

ENGL 5523. Technical Writing for Online Audiences. 3 Hours.

Investigates the medium-specific challenges of preparing technical documents for online audiences. Covers user-centered theory, strategies, and skills for online writing, HTML, CSS, and web standards. Specific focus on creating organizational websites with editorial workflows geared towards technical writers. (Typically offered: Fall Even Years)

ENGL 5533. Technical Writing Praxis. 3 Hours.

Focuses on the process of applying theory to situated practice in technical writing. The first portion of the course will lay out the fundamentals of technical writing theory, with the second half situating that theory within genre-specific practice. Second-half topics will vary by instructor interest and expertise. (Typically offered: Summer) May be repeated for up to 6 hours of degree credit.

ENGL 5543. Advanced Studies in U.S. Latino/Latina Literature and Culture. 3 Hours.

The study of works of U.S. Latino/a literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5563. Advanced Studies in Native American Literature and Culture. 3 Hours.

The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5583. Advanced Studies in Arab American Literature and Culture. 3 Hours.

The study of works of Arab American literature and criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. Research paper required. No knowledge of Arabic necessary. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5593. Advanced Studies in Gender, Sexuality, and Literature. 3 Hours.

The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5603. World Literature and Culture in English. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5623. The Bible as Literature. 3 Hours.

The several translations of the Bible; its qualities as great literature; its influence upon literature in English; types of literary forms. (Typically offered: Irregular) This course is cross-listed with WLIT 5623.

ENGL 5633. English Drama from Its Beginning to 1642. 3 Hours.

Early forms, Tudor drama, Shakespeare's contemporaries, and Stuart drama to the closing of the theatres. (Typically offered: Irregular)

ENGL 5653. Shakespeare: Plays and Poems. 3 Hours.

An introduction to a broad selection of Shakespeare's work. (Typically offered: Irregular)

ENGL 569V. Seminar in Film Studies. 1-3 Hour.

Research, discussion; papers on a variety of film genres and areas including the new American film, the science-fiction film, directors, film comedy, the experimental film, criticism, the film musical. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit. This course is cross-listed with COMM 569V.

ENGL 5703. Advanced Studies in American Literature and Culture Before 1900. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5723. Advanced Studies in Literature and Culture of the American South. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5763. Advanced Studies in Postcolonial Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5803. Advanced Studies in Modern and Contemporary American Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5863. Advanced Studies in African American Literature and Culture. 3 Hours.

The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5923. Advanced Studies in Film and Media. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5933. Advanced Studies in Popular Culture and Popular Genres. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5943. Advanced Studies in Criticism and Literary Theory. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5953. Advanced Studies in Literary History. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 5963. Advanced Studies in Technical Writing and Public Rhetorics. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. Course will cover various topics relevant to students working in Technical Writing and Public Rhetorics. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENGL 5973. Advanced Studies in Rhetoric and Composition. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6113. Seminar in Medieval Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6193. The Development of English. 3 Hours.

Intensive course in the fundamentals of linguistic study and their application to the history of English from prehistoric times to the present. (Typically offered: Fall)

ENGL 6203. Seminar in Renaissance Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6243. Seminar in Special Topics. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6443. Seminar in Nineteenth-Century British Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6513. Seminar in Modern and Contemporary British Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6543. Seminar in U.S. Latino/Latina Literature and Culture. 3 Hours.

The study of works of U.S. Latino/a literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6553. Seminar in Native American Literature and Culture. 3 Hours.

The study of works of Native American literature, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6583. Seminar in Arab American Literature and Culture. 3 Hours.

The study of works of Arab American literature and criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. Research paper required. No knowledge of Arabic necessary. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6593. Seminar in Gender, Sexuality, and Literature. 3 Hours.

The study of gender or sexuality and literature, with attention to specific theories, themes, genres, authors, historical moments, literary movements, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6723. Seminar in American Literature and Culture Before 1900. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6733. Seminar in Literature and Culture of the American South. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6763. Seminar in Postcolonial Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6803. Seminar in Modern and Contemporary American Literature and Culture. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6853. Seminar in African American Literature and Culture. 3 Hours.

The study of works of African American literature and literary criticism, with attention to particular themes, genres, authors, literary movements, historical moments, or other organizing principles. Content varies. At least one major research paper, suitable for presentation or publication, will be required. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6923. Seminar in Film and Media. 3 Hours.

Extensive research into, and discussion of, a focused topic in film studies, with emphasis upon film as text. Extended project required. Course topic varies. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6933. Seminar in Popular Culture and Popular Genres. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6943. Seminar in Criticism and Literary Theory. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6953. Seminar in Literary History. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 6973. Seminar in Rhetoric and Composition. 3 Hours.

Subject matter changes depending on student interest and faculty expertise. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENGL 698V. Master's Thesis. 1-6 Hour.

Master's thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ENGL 699V. Master of Fine Arts Thesis. 1-6 Hour.

Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ENGL 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

English Language and Cultural Studies (ELAC)

Courses

ELAC 0011. Writing Workshop: Grammar through Editing. 1 Hour.

This class is designed to assist upper-intermediate to advanced non-native speakers of English improve their academic writing at the sentence level. Students' writing is analyzed for grammatical accuracy; students develop strategies for editing their writing more independently and learn to produce clearer, more grammatically correct writing. Not for degree credit. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 0023. Introduction to Academic Writing. 3 Hours.

To enhance reading comprehension and academic writing skills of non-native speakers of English at the upper-intermediate level. Through extended readings, students improve their ability to recognize main ideas, distinguish support, respond to content & build vocabulary. Students improve their writing at the paragraph and essay level. Not for degree credit. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 1023. Academic Writing Across Disciplines. 3 Hours.

The class is designed to improve the academic writing and critical thinking skills for non-native speakers of English in all fields. Through focused instruction and extensive practice, students will improve their academic lexicon, grammatical accuracy, discourse organization and fluency in formal academic writing. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 1033. English Language through Mass Media. 3 Hours.

Students expand their communicative language skills through the study of news and media. By analyzing the messages and methods used in a variety of sources, students improve their listening, speaking, reading and writing skills. Students develop critical thinking skills as they evaluate and synthesize ideas from the texts. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 1012. English Phonology for Non-Native Speakers. 2 Hours.

In this course students study the basic principles of phonetics and phonology of English in order to develop their ability to produce the standard American accents. Not for degree credit in the Fulbright College of Arts and Sciences. (Typically offered: Fall and Spring)

ELAC 2023. Business English Communications. 3 Hours.

This is a course for non-native English speakers to develop their oral communication skills for professional business settings. From informal dialogues to formal business presentations, students learn appropriate verbal and non-verbal communication strategies and develop confidence to communicate effectively and comprehensibly. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 2033. Principles of Research Writing for Non-Native Speakers. 3 Hours.

This advanced level, research-focused writing class is designed to help non-native speakers of English communicate their understanding of course material and research more accurately and effectively. Students also improve their ability to orally present their ideas with confidence and clarity. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative. Undergraduates require instructor permission. (Typically offered: Fall and Spring)

ELAC 2043. Seminar in United States Culture, Communication, and Institutions. 3 Hours.

Through an in-depth study of American life, culture, communicative style and institutions, non-native speakers of English improve their oral and written communication skills. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / UofA ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 2053. Academic Presentations. 3 Hours.

For advanced non-native speakers of English to build skills and strategies for delivering effective, clear presentations in academic and professional settings. Students learn about organization, best use of visual aids, connecting with an audience, facilitating questions and answers, and intercultural issues that affect perception and comprehensibility. Not for degree credit in the Fulbright College of Arts and Sciences. Prerequisite: At the request of an instructor or through TOEFL (iBT) exam, spoken portion of the International English Language Testing System (IELTS), or the University of Arkansas Spoken Language Proficiency Test (SLPT). (Typically offered: Fall and Spring)

ELAC 4033. Research Writing for the Social Sciences and Education. 3 Hours.

This research-focused writing class will help non-native English speakers in the social sciences and education communicate their understanding of course material and research more accurately and effectively. Students will focus on the genres specific to their fields. They will also improve their ability to orally present their ideas. Prerequisite: Language assessment required. (Typically offered: Fall, Spring and Summer)

ELAC 4043. Research Writing in the STEM Fields. 3 Hours.

A research-based writing class for non-native speakers of English that focuses on the demands of writing in the STEM fields. Students will develop their ability to accurately and effectively use the conventions of scientific writing. Students will improve their ability to orally present their research. Prerequisite: Language assessment required. (Typically offered: Fall, Spring and Summer)

ELAC 5033. Research Writing for the Social Sciences and Education. 3 Hours.

This research-focused writing class will help graduate-level non-native English speakers in the social sciences and education communicate their understanding of course material and research more accurately and effectively. Students will focus on the genres specific to their fields. They will also improve their ability to orally present their ideas. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / U of A ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 5043. Research Writing in the STEM Fields. 3 Hours.

A research-based writing class for graduate-level non-native speakers of English that focuses on the demands of writing in the STEM fields. Students will develop their ability to accurately and effectively use the conventions of scientific writing. Students will improve their ability to orally present their research. Prerequisite: Placement through TOEFL iBT Writing / TOEFL TWE / IELTS writing / U of A ELPT (writing) / GRE Analytical Writing / GMAT Analytical Writing / TOEFL Alternative. (Typically offered: Fall and Spring)

ELAC 5050. International Graduate Teaching Assistant Training. 0 Hours.

To prepare international graduate assistants to assist or teach in U.S. university classes. The course focuses on enhancing teaching and communication skills, and cultural knowledge. Students are non-native speakers of English who currently have a teaching assistantship or plan to obtain one in the following semester. Not for degree credit. Prerequisite: Language assessment required. (Typically offered: Fall and Spring)

ELAC 5060. Intensive Training for International Graduate Teaching Assistants. 0 Hours.

This is a three-week intensive training course to prepare international graduate assistants to assist or teach in university classes. The course content focuses on enhancing teaching and communication skills, and cultural knowledge. Not for degree credit. Pre- or Corequisite: This course is for students that have already been awarded a teaching assistantship. Prerequisite: At the request of an instructor or self-placement or through TOEFL (iBT) exam, spoken portion of the International English Language Testing System (IELTS), or the University of Arkansas Spoken Language Proficiency Test (SLPT). (Typically offered: Summer)

English as Second Language (EASL)

Courses

EASL 0053. ESL Listening and Speaking. 3 Hours.

For improvement of aura/oral skills by international students. Includes the basic practice in fluency, clarity, intonation, stress, and pronunciation. Students give presentations and participate in academic discussions. Credit earned in this course may not be applied to the total required for a degree. Prerequisite: ESL placement test. (Typically offered: Fall, Spring and Summer)

Entomology (ENTO)

Courses

ENTO 1021L. Insects in Science, the Arts, and Human History Laboratory. 1 Hour.

To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. The lab will be a hands-on approach to reinforcing entomological concepts addressed in lecture. Corequisite: ENTO 1023. (Typically offered: Spring)

ENTO 1023. Insects, Science and Society. 3 Hours.

To educate students on the importance of insects in biology and science, human and animal medicine, ecosystems, agriculture, pollination, genetic research, the arts, and human culture and history. Corequisite: ENTO 1021L. (Typically offered: Spring)

ENTO 3011L. Introduction to Insect Identification Lab. 1 Hour.

Introductory lab course on insect identification, collection, and curation techniques, primarily designed as an intensive add-on to ENTO 3013 for students wanting a more in-depth examination of insect diversity. Insect collection required. Course includes field trips. Students are encouraged to contact instructor before enrolling. Pre- or Corequisite: ENTO 3013. (Typically offered: Fall)
This course is cross-listed with BIOL 3011L.

ENTO 3013. Introduction to Entomology. 3 Hours.

Fundamentals of insect biology including structure and function, development, ecology, behavior, plant feeding and disease transmission. Lecture 3 hours/week. Students interested in a more intensive examination of insects, including collection, curation, and identification techniques, should sign up for the separate one credit lab ENTO 3011L. Students are strongly encouraged to take BIOL 1543 before registering for this course. (Typically offered: Fall)
This course is cross-listed with BIOL 3013.

ENTO 400V. Special Problems. 1-4 Hour.

Special problems. (Typically offered: Fall, Spring and Summer)

ENTO 4013. Insect Behavior and Chemical Ecology. 3 Hours.

Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory/discussion 2 hours per week. Corequisite: Lab component (Typically offered: Spring Even Years)
This course is cross-listed with BIOL 4013.

ENTO 4024. Insect Diversity and Taxonomy. 4 Hours.

Principles and practices of insect classification and identification with emphasis on adult insects. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Fall Even Years)

This course is cross-listed with BIOL 4024.

ENTO 4043. Apiculture. 3 Hours.

Review of social behavior of insects and its exemplification in Honeybees. Previous knowledge of basic entomology is helpful but not required. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Spring Odd Years)

ENTO 4053. Insect Ecology. 3 Hours.

To develop understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. Corequisite: Lab component. (Typically offered: Fall Even Years)
This course is cross-listed with BIOL 4053.

ENTO 410V. Special Topics. 1-3 Hour.

Topics not covered in other courses or a more intensive study of specific topics in entomology. (Typically offered: Irregular) May be repeated for degree credit.

ENTO 4123. Insect Pest Management. 3 Hours.

Study of principles and concept of insect pest management. Areas covered include survey of arthropod pests and damage, population dynamics, damage thresholds, physiological units, prediction models, surveillance, arthropod sampling, strategies and tactics utilized to maintain pest populations below economic injury levels. Prerequisite: ENTO 3013. (Typically offered: Spring Odd Years)

ENTO 4133. Advanced Applied Entomology. 3 Hours.

Biology and ecology of major arthropod pests as model applied management systems. Activities include independent study, literature review and group discussions. Knowledge of general entomology and pest management is required. Self-learning modules are available. Lecture 2 hours/week and direct self-study laboratory 2 hours/week. Corequisite: Lab component. Prerequisite: ENTO 3013. (Typically offered: Spring Even Years)

ENTO 462V. Internship. 3-6 Hour.

Supervised practical work experience in pest management to develop and demonstrate professional competence. A maximum of 6 hours credit per semester or summer session is permitted. Faculty approval of projects proposal prior to enrollment, and written or oral reports are required. (Typically offered: Irregular)

ENTO 500V. Special Problems. 1-4 Hour.

Special problems. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

ENTO 5013. Morphology of Insects. 3 Hours.

Origin, evolution, and functional significance of external insect structure. Structure and function of major internal systems. Previous knowledge of basic entomology is helpful, but not required. Lecture 2 hours, laboratory 4 hours per week. Corequisite: Lab component. (Typically offered: Fall Odd Years)

ENTO 5024. Insect Diversity and Taxonomy. 4 Hours.

Principles and practices of insect classification and identification with emphasis on adult insects. 2.5 hours lecture, 4 hours lab. Prerequisite: ENTO 3013 or instructor consent. Corequisite: Lab component. (Typically offered: Fall)
This course is cross-listed with BIOL 5024.

ENTO 5043. Apiculture. 3 Hours.

To acquaint the student with social insects in general and honey bees in particular, to promote an interest in apiculture as a hobby, occupation, and/or science, to give the students the basic knowledge of how to keep honey bees, and to increase awareness of the contribution that pollinating insects make to agriculture, natural ecosystems, and human life. Prerequisite: Instructor consent. (Typically offered: Spring Odd Years)

ENTO 5053. Insect Ecology. 3 Hours.

To develop an understanding of important ecological concepts through study of dynamic relationships among insects and their environment. To become familiar with the literature of insect ecology, and interpretation and critique of ecological research. Previous knowledge of basic entomology and/or ecology will be assumed. 2 hours lecture/2 hours lab. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Fall Even Years)

This course is cross-listed with BIOL 5053.

ENTO 510V. Special Topics. 1-3 Hour.

Topics not covered in other courses or a more intensive study of specific topics in entomology. (Typically offered: Irregular) May be repeated for degree credit.

ENTO 5113. Insect Behavior and Chemical Ecology. 3 Hours.

Basic concepts in insect senses and patterns of behavioral responses to various environmental stimuli. Previous knowledge of basic entomology is helpful, but not required. Prerequisite: Instructor consent. Corequisite: Lab component. (Typically offered: Spring Even Years)

This course is cross-listed with BIOL 5113.

ENTO 5123. Biological Control. 3 Hours.

Theoretical and practical basis for biological control of arthropod pests and weeds via parasites, predators, and pathogens. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall Odd Years)

ENTO 5133. Insect Molecular Genetics. 3 Hours.

A hands on course in insect molecular genetic techniques including molecular diagnostics and population genetics. Students will learn how to apply advanced molecular genetic methodologies and Internet database resources to insects that they are using for their graduate research. (Typically offered: Spring Even Years)

This course is cross-listed with BIOL 5133.

ENTO 5153. Insect Pest Management. 3 Hours.

Study of principles and concept of insect pest management. Areas covered include a survey of arthropod pests and damage, population dynamics, damage thresholds, physiological units, prediction models, surveillance, arthropod sampling, strategies and tactics utilized to maintain pest populations below economic injury levels. Prerequisite: Instructor consent. (Typically offered: Spring Odd Years)

ENTO 5163. Advanced Applied Entomology. 3 Hours.

Topics will include the integration of tactics, integration of disciplines and specific case histories in insect management, or use of insects to manage weeds. Prerequisite: Instructor consent. (Typically offered: Spring Even Years)

ENTO 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

ENTO 6071. Seminar. 1 Hour.

Fall: special topics not covered in regular course work. Spring: critical review of research papers in entomology. Seminar will be taken by graduate student majors for both semesters. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ENTO 6113. Insect Physiology and Molecular Biology. 3 Hours.

Overview of insect physiology and modern molecular techniques to study physiological processes. Previous knowledge of basic entomology is helpful, but not required. Two lectures per week (1 hour 20 minutes each). (Typically offered: Spring Even Years)

This course is cross-listed with BIOL 6113.

ENTO 6213. Insect Toxicology. 3 Hours.

Toxicology of chemicals to insects and humans including techniques of testing collecting data, and factors that influence reactions to different classes of insecticides. Previous knowledge of organic physiological chemistry is helpful, but not required. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall Odd Years)

ENTO 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Environmental Dynamics (ENDY) Courses

ENDY 5043. GIS Analysis and Modeling. 3 Hours.

Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. (Typically offered: Spring)

This course is cross-listed with GEOS 5653, ANTH 5653.

ENDY 5053. Quaternary Environments. 3 Hours.

An interdisciplinary study of the Quaternary Period including dating methods, deposits soils, climates, tectonics and human adaptations. (Typically offered: Fall)

This course is cross-listed with ANTH 5053, GEOS 5053.

ENDY 5113. Global Change. 3 Hours.

Examines the interacting natural and anthropogenic factors involved in global change, concentrating on climate variability and change. Prerequisite: Graduate standing or instructor's approval. (Typically offered: Spring)

This course is cross-listed with GEOS 5113.

ENDY 5153. Environmental Site Assessment. 3 Hours.

Principles, problems, and methods related to conducting an environmental site assessment. An applied course covering field site assessment, regulatory documentation, and report preparation. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Irregular)

This course is cross-listed with GEOS 5153.

ENDY 5853. Environmental Isotope Geochemistry. 3 Hours.

Introduction to principles of isotope fractionation and distribution in geological environments isotopic analytical methods, and extraction of isotope samples; application of isotopes in characterization of geologic processes and interaction with hydrologic, surficial, and biologic attenuation, paleothermometry soil and biochemical processes. (Typically offered: Spring)

This course is cross-listed with GEOS 5853.

ENDY 6013. Environmental Dynamics. 3 Hours.

Required course for ENDY doctoral candidates. Overview of Earth Systems: Lithosphere; Hydrosphere, Atmosphere, Biosphere, Cryosphere, and human interaction across Earth systems. Emphasis on understanding of processes within Earth systems and interactions across Earth Systems as they pertain to global self-regulation, secular variation, climate stability, development and sustainability of human societies. Prerequisite: Graduate standing. (Typically offered: Fall)

ENDY 6023. Seminar in Environmental Dynamics. 3 Hours.

Seminar examining specific contemporary topic of topics in Environmental Dynamics. Topics will change with each offering. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENDY 602V. Current Topics Seminar. 1-2 Hour.

Various aspects of the environment will be explored through topic specific seminars. Subject matter will change each semester addressing current environmental issues and research. Seminars will be one or two hours credit. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

ENDY 6033. Society and Environment. 3 Hours.

This course examines the complex interrelationships between human societies and the natural environment. Drawing on diverse and interdisciplinary perspectives in archaeology, ethnography, history, geography, and palaeo-environmental studies, readings and discussion will explore the co-production of social and environmental systems over time. (Typically offered: Spring)

This course is cross-listed with ANTH 6033.

ENDY 689V. Special Problems in Environmental Dynamics. 1-6 Hour.

Independent study of a topic related to environmental dynamics under the guidance of an ENDY faculty member. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

ENDY 6991. Environmental Dynamics Colloquium. 1 Hour.

Weekly meetings for discussion of current research in environmental dynamics. Graduate students must register for colloquium each semester. Colloquium credit does not count towards minimum hours required for the doctorate. Prerequisite: Graduate standing. (Typically offered: Fall and Spring) May be repeated for up to 6 hours of degree credit.

ENDY 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral dissertation. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Environmental Science (ENSC) Courses

ENSC 1001L. Environmental Science Laboratory. 1 Hour.

Laboratory, field trip, and discussion sessions covering the concepts and information allowing students to critically evaluate environmental issues. Topics will include: laboratory safety, recycling, composting, geographic information systems, soil testing, water quality, hazardous wastes, waste disposal, wetlands, wastewater treatment, and sustainable food systems. Laboratory 2 hours/week. Corequisite: ENSC 1003. (Typically offered: Fall and Spring)

This course is cross-listed with BIOL 1001L.

ENSC 1001M. Honors Environmental Science Laboratory. 1 Hour.

Laboratory, field trip, and discussion sessions covering the concepts and information allowing students to critically evaluate environmental issues. Topics will include: laboratory safety, recycling, composting, geographic information systems, soil testing, water quality, hazardous wastes, waste disposal, wetlands, wastewater treatment, and sustainable food systems. Laboratory 2 hours/week. Corequisite: ENSC 1003. (Typically offered: Fall and Spring)

This course is cross-listed with ENSC 1001L, BIOL 1001L.

ENSC 1003. Environmental Science. 3 Hours.

Series of lectures and discussions introducing the topic of environmental science including factors related to water, soil, and air quality. Corequisite: ENSC 1001L. (Typically offered: Fall and Spring)

This course is cross-listed with BIOL 1003.

ENSC 1003H. Honors Environmental Science. 3 Hours.

Series of lectures and discussions introducing the topic of environmental science including factors related to water, soil, and air quality. If taking course for University core Natural Science credit, ENSC 1001L is a co-requisite. Corequisite: ENSC 1001L. (Typically offered: Fall and Spring)

This course is cross-listed with ENSC 1003, BIOL 1003.

ENSC 1833. Soils and Civilization. 3 Hours.

Humankind's use of and dependence on soil from the Neolithic Revolution to the present day. The composition and basic properties of soils. The importance of soils as components of ecosystems, and ecosystem services provided by soils. The nature and causes of soil degradation. The need for conservation of soils. Soil as a key factor in sustaining life on Earth. (Typically offered: Spring)

ENSC 3003. Introduction to Water Science. 3 Hours.

Properties, occurrence, and description of the types, functions, quality and quantity, potential contaminants, uses, and guiding policies and regulations of the various water resources in the environment. Prerequisite: (ENSC 1003 OR CHEM 1053 (or higher) OR GEOS 1113 (or higher) OR BIOL 1543). (Typically offered: Spring)

ENSC 3103. Plants and Environmental Restoration. 3 Hours.

Selection, establishment, and use of plants to promote soil stabilization, water quality, and wildlife habitat. Principles and practices of managing plants for soil remediation, nutrient and sediment trapping, and restoration of plant communities. Prerequisite: CSES 1203 or HORT 2003 or BIOL 1613. (Typically offered: Fall Even Years)

ENSC 3103H. Honors Plants and Environmental Restoration. 3 Hours.

Selection, establishment, and use of plants to promote soil stabilization, water quality, and wildlife habitat. Principles and practices of managing plants for soil remediation, nutrient and sediment trapping, and restoration of plant communities. Prerequisite: CSES 1203 or HORT 2003 or BIOL 1613 and honors standing. (Typically offered: Fall)

This course is equivalent to ENSC 3103.

ENSC 3221L. Ecosystems Assessment Laboratory. 1 Hour.

The purpose of this laboratory is to complement concepts learned in lecture by carrying out experiments that familiarize students with methods used in soil and aquatic ecology. Students will collect samples, analyze and interpret data obtained from soil and water samples. Lab will meet once per week for 3 hours. Corequisite: ENSC 3223. (Typically offered: Fall Even Years)

ENSC 3223. Ecosystems Assessment. 3 Hours.

Application of basic ecological principles to gain an appreciation for ecosystem assessment and management. Lecture 3 hours per week. Prerequisite: BIOL 1543. (Typically offered: Fall Even Years)

ENSC 3263. Soil and Water Conservation. 3 Hours.

Effect of land use on water quality. Major sources of agricultural nonpoint pollutants. Best management practices used to minimize water quality impacts. Prerequisite: CSES 2203. (Typically offered: Fall)

ENSC 3413. Principles of Environmental Economics. 3 Hours.

An introductory, issues-oriented course in the economics of the environment. What is involved in society making decisions about environmental quality will be studied. Environmental issues important to the State of Arkansas and the United States will be emphasized. Prerequisite: AGECE 1103 or ECON 2023. (Typically offered: Spring) This course is cross-listed with AGECE 3413.

ENSC 3603. GIS for Environmental Science. 3 Hours.

Provide instruction on the uses of GIS techniques in solving practical environmental and agricultural land use problems. Areas include: 1) an introduction to spatial variability in soils with an emphasis on the application of GIS techniques to map and understand spatial parameters important to different land uses, and 2) development of individual experience in the use of GIS in solving environmental and agricultural problems using an oral and written term project. Prerequisite: CSES 2203. (Typically offered: Spring Odd Years)

ENSC 3933. Environmental Ethics. 3 Hours.

The course addresses ethical questions about nature and the natural environment. Topics of discussion include anthropocentric and biocentric ethics, population control, obligations to future generations, animal rights, moral considerability, Leopold's land ethic, deep ecology, and ecofeminism. Lecture/discussions 3 hours per week. Prerequisite: ENSC 1003 or PHIL 2003 or PHIL 2103. (Typically offered: Spring)

This course is cross-listed with PHIL 3113.

ENSC 400V. Special Problems. 1-3 Hour.

Work on special problems in environmental science or related fields. (Typically offered: Irregular) May be repeated for up to 8 hours of degree credit.

ENSC 4021L. Water Quality Laboratory. 1 Hour.

Field and laboratory experience in physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Laboratory experiments in water sampling, measurement of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc., and instrumentation. Prerequisite or Corequisite: ENSC 4023 (Typically offered: Fall)

ENSC 4023. Water Quality. 3 Hours.

Physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Discussion of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc. Aquatic processes of pollutants and principles of modeling. Prerequisite: CHEM 1123 and CHEM 1121L and BIOL 1543 and BIOL 1541L. (Typically offered: Fall)

ENSC 4034. Analysis of Environmental Contaminants. 4 Hours.

Methods of analysis for inorganic and organic contaminants, radionuclides and microorganisms in soil and water. Quality assurance and quality control, sampling protocols, sample handling, instrumentation and data analysis. Lecture 2 hours and laboratory 4 hours per week. Corequisite: Lab component. Pre- or Corequisite: CHEM 2613 and CHEM 2611L or CHEM 3603 and CHEM 3601L. (Typically offered: Spring Even Years)

ENSC 404V. Special Topics. 1-3 Hour.

Studies of selected topics in environmental sciences not available in other courses. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

ENSC 4263. Environmental Soil Science. 3 Hours.

Study of the behavior of pesticides, toxic organic compounds, metals, nutrients, and pathogenic microorganisms in the soil/plant/water continuum. Lecture 3 hours per week. Pre- or Corequisite: PHYS 2013 and PHYS 2011L. Prerequisite: CSES 3214. (Typically offered: Spring Even Years)

ENSC 4401. Professional Certification Preparation. 1 Hour.

This class is meant to reinforce concepts and skills already learned in other soil and environmental science and related courses and to provide the opportunity to prepare to take a national certification examination. If so chosen, students may pursue certification as soil or environmental science professionals. Prerequisite: Senior standing. (Typically offered: Spring)

ENSC 5021L. Water Quality Laboratory. 1 Hour.

Field and laboratory experience in physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Laboratory experiments in water sampling, measurement of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc., and instrumentation. (Typically offered: Fall)

ENSC 5023. Water Quality. 3 Hours.

Physical, chemical, and biological characteristics of natural waters (rain, river, lake, soil, ground, etc.). Discussion of water quality parameters such as pH, alkalinity and acidity, redox, hardness, BOD, TSS, etc. Aquatic processes of pollutants and principles of modeling. Prerequisite: CHEM 1123, CHEM 1121L, BIOL 1543 and BIOL 1541L or equivalent courses from undergraduate institution. (Typically offered: Fall)

ENSC 5034. Analysis of Environmental Contaminants. 4 Hours.

Methods of analysis for inorganic and organic contaminants in soil and water. Quality assurance and quality control, sampling protocols, sample handling, instrumentation and data analysis. Corequisite: Lab component. Prerequisite: (CHEM 2613 and CHEM 2611L) or (CHEM 3603 and CHEM 3601L) or equivalent chemistry course. (Typically offered: Spring Even Years)

ENSC 5401. Professional Certification Preparation. 1 Hour.

This class is meant to reinforce concepts and skills already learned in other soil and environmental science and related courses and to provide the opportunity to prepare to take a national certification examination. If so chosen, students may pursue certification as soil or environmental science professionals. (Typically offered: Spring)

Ethnomusicology (MUSY)

Courses

MUSY 2003. Music in World Cultures. 3 Hours.

Provides an overview of music from around the world. Examines the role of music in different social and cultural contexts. A variety of indigenous, folk, religious, popular, and art music traditions will be explored, along with the people and cultures that create them. (Typically offered: Fall and Spring)

MUSY 2003H. Honors Music in World Cultures. 3 Hours.

Provides an overview of music from around the world. Examines the role of music in different social and cultural contexts. A variety of indigenous, folk, religious, popular, and art music traditions will be explored, along with the people and cultures that create them. (Typically offered: Fall and Spring)

This course is equivalent to MUSY 2003.

MUSY 4113. Pro-Seminar: Ethnomusicology. 3 Hours.

An introduction to ethnomusicological study, with readings and discussion of seminal writings in the field and practical experience in ethnomusicological analysis and description. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

MUSY 4113H. Honors Pro-Seminar: Honors Ethnomusicology. 3 Hours.

An introduction to ethnomusicological study, with readings and discussion of seminal writings in the field and practical experience in ethnomusicological analysis and description. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

This course is equivalent to MUSY 4113.

MUSY 4313H. Honors Special Topics in Asian and Middle Eastern Musics. 3 Hours.

Research seminars on selected topics in Asian and Middle Eastern Musics. (Typically offered: Irregular)

MUSY 477V. Independent Research in Ethnomusicology. 1-4 Hour.

Subject matter not covered in other courses. In-depth study of specialized topics in contemporary, historical, or systematic ethnomusicology, and practical instruction in essay-structuring and presentation. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

MUSY 477VH. Honors Independent Research in Ethnomusicology. 1-4 Hour.

Subject matter not covered in other courses. In depth study of specialized topics in contemporary, historical, or systematic ethnomusicology, and practical instruction in essay-structuring and presentation. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

This course is equivalent to MUSY 477V.

MUSY 5113. Proseminar: Ethnomusicology. 3 Hours.

An introduction to ethnomusicological study, with readings and discussion of seminal writings in the field and practical experience in ethnomusicological analysis and description. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

MUSY 5313. Proseminar: Topics in Asian and Middle Eastern Musics. 3 Hours.

Research seminars on selected topics, such as The Performing Arts in East Asia; and Music and Ritual. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

MUSY 5323. Seminar: Topics in Asian and Middle Eastern Poetry and Music. 3 Hours.

Reading seminars on selected topics, such as Poetry and Music in Persian, Arabic and Turkish Cultures of the Islamic World; and Poetry and Song in Early East Asia. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

MUSY 5343. Seminar: Special Topics in Traditional Musics and Dance of Europe and the Americas. 3 Hours.

Topics including, but not limited to: European Folk Music; the musical or scholarly legacy of a particular figure. (Typically offered: Irregular)

MUSY 5413. Proseminar: Cross-cultural Performance Practices. 3 Hours.

A survey of performance practices from historic western art music through modern non-western music. An introductory course with readings from seventeenth- and eighteenth-century performance treatises as well as a study of written and aural traditions of non-western music. (Typically offered: Irregular)

MUSY 6333. Advanced Studies in Ethnomusicology. 3 Hours.

Advanced level studies, individually tailored and supervised, including Ethnomusicology (prerequisite MUSY 5113); The Music or Dance of a Selected Area (prerequisite at least one of MUSY 5313, MUSY 5323, MUSY 5343); Historic Performance Practices (prerequisite MUSY 5413); Historical East Asian Musicology (prerequisite MUSY 5313 or MUSY 5323); and Historical Central Asian or Middle- and Near-Eastern Musicology (prerequisite MUSY 5313 or MUSY 5323). (Typically offered: Irregular)

Exercise Science (EXSC) Courses

EXSC 2733. Introduction to Exercise Science. 3 Hours.

This class will cover introductory topics for the Exercise Science students in preparation for entry into the profession. In addition to specific topics, students will prepare their resumes and make a formal presentation. Prerequisite: EXSC major or instructor consent. (Typically offered: Fall and Spring)

EXSC 3013. Functional Anatomy for Exercise Science. 3 Hours.

This course will include the study of functional human anatomy with emphasis on musculoskeletal and neurological systems. There will be an introduction to the clinical application and location of anatomical structures with some common injuries from a health professions perspective. Prerequisite: BIOL 2443 and BIOL 2441L. (Typically offered: Spring)

EXSC 3153. Exercise Physiology. 3 Hours.

Examination of effects of exercise on the physiology of the systems of the body. The exploration includes effects during, immediately after, and as long term results of work and exercise. Prerequisite: (BIOL 2213 and BIOL 2211L) and (BIOL 2443 and BIOL 2441L). (Typically offered: Fall and Spring)

EXSC 3353. Mechanics of Human Movement. 3 Hours.

An introduction to basic analysis of motor skills. No credit given toward major in Zoology. Prerequisite: (BIOL 2213 and BIOL 2211L), (BIOL 2443 and BIOL 2441L), and KINSBS major or by instructor consent. (Typically offered: Fall and Spring)

EXSC 3393. Prevention and Care of Athletic Injuries. 3 Hours.

Introduction to the prevention and care of athletic related injuries. Includes athletic injury recognition and management. Prerequisite: BIOL 2443 and BIOL 2441L. (Typically offered: Irregular)

EXSC 3423. Principles and Theories of Strength and Conditioning. 3 Hours.

This course will provide the practical skills necessary to design strength and conditioning programs. Special emphasis is placed on the ability to evaluate exercise movements, prescribe appropriate exercise programs, administer tests, and support program prescription with a sound knowledge of anatomical and physiological adaptation to exercise. The course will include laboratory experiences integrated with didactic learning. The laboratory experiences will in teach students various skills such as how to set up and run speed, agility, and quickness drills, how to select and administer the appropriate tests for athletic performance, and how to evaluate Olympic lifting technique. Everyone must participate in the labs as subjects. Come to lab prepared to exercise. When students are finished with this course, they will be well prepared to take the CSCS exam given by the National Strength and Conditioning Association. Prerequisite: (BIOL 2443 and BIOL 2441L) and (BIOL 2213 and BIOL 2211L). (Typically offered: Spring)

EXSC 3533. Laboratory Techniques. 3 Hours.

Practical experience in testing physical fitness in both the laboratory and non-laboratory settings. Pre- or Corequisite: EXSC 3153. (Typically offered: Fall, Spring and Summer)

EXSC 3723. Research Methods in Exercise Science. 3 Hours.

This course will provide an overview of research methods for experimental research designs in an exercise science setting. The students will learn facets of research including: developing a research idea, getting funding for research, obtaining IRB/IACUC approval, data collection, data input, statistical analyses, and preparing manuscripts for publication. Designed for exercise science honor students in spring of their junior year or the summer prior to their senior year to prepare them for their honor's thesis. (Typically offered: Spring)

EXSC 3723H. Honors Research Methods in Exercise Science. 3 Hours.

This course will provide an overview of research methods for experimental research designs in an exercise science setting. The students will learn facets of research including: developing a research idea, getting funding for research, obtaining IRB/IACUC approval, data collection, data input, statistical analyses, and preparing manuscripts for publication. Designed for exercise science honor students in spring of their junior year of the summer prior to their senior year to prepare them for their honor's thesis. Prerequisite: Honors standing. (Typically offered: Spring)
This course is equivalent to EXSC 3723.

EXSC 4013. Clinical Exercise Physiology. 3 Hours.

The course is designed to build upon prior knowledge of Exercise Physiology and Exercise Testing. We will examine the physiological impacts of exercise and exercise training with specific emphasis on how they relate to clinical outcomes and clinical testing. At the end of the course students should have developed competencies congruent with the objectives of the American College of Sports Medicine's (ACSM) certification for Clinical Exercise Physiologist. Prerequisite: EXSC 3153 and EXSC 3533. (Typically offered: Fall)

EXSC 405V. Independent Study. 1-3 Hour.

Provides students an opportunity to pursue special study of research problems. (Typically offered: Fall, Spring and Summer) May be repeated for up to 12 hours of degree credit.

EXSC 405VH. Honors Independent Study. 1-4 Hour.

Provides students an opportunity to pursue special study of research problems. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.
This course is equivalent to EXSC 405V.

EXSC 4323. Exercise Prescription. 3 Hours.

This course is designed to provide knowledge and application of sound exercise prescription principles and design of exercise programs in cardiorespiratory fitness, muscular fitness, body composition, flexibility, and balance. Pre- or corequisite: EXSC 3533. Prerequisite: EXSC 3153 and EXSC 3353. (Typically offered: Fall and Spring)

EXSC 4323H. Honors Exercise Prescription. 3 Hours.

This course is designed to provide knowledge and application of sound exercise prescription principles and design of exercise programs in cardiorespiratory fitness, muscular fitness, body composition, flexibility, and balance. Pre- or corequisite: EXSC 3533. Prerequisite: EXSC 3153 and EXSC 3353. (Typically offered: Fall and Spring)

This course is equivalent to EXSC 4323.

EXSC 4353. Advanced Mechanics of Human Movement. 3 Hours.

Students will build upon their foundation in qualitative biomechanics to quantitatively analyze human movement. Biomechanics of the musculoskeletal system will be covered in the first half of the course, and fundamental laws and principles of mechanics will be covered in the second course half of the course. Examples will be provided throughout the course to demonstrate how biomechanics can be used to enhance and maintain human health, fitness, and performance. Prerequisite: EXSC 3353 and PHYS 2013. (Typically offered: Irregular)

EXSC 4353H. Honors Advanced Mechanics of Human Movement. 3 Hours.

Students will build upon their foundation in qualitative biomechanics to quantitatively analyze human movement. Biomechanics of the musculoskeletal system will be covered in the first half of the course, and fundamental laws and principles of mechanics will be covered in the second course half of the course. Examples will be provided throughout the course to demonstrate how biomechanics can be used to enhance and maintain human health, fitness, and performance. Prerequisite: EXSC 3353 and PHYS 2013. (Typically offered: Irregular)

This course is equivalent to EXSC 4353.

EXSC 4643. Psychology of Sports Injury and Rehabilitation. 3 Hours.

The purpose of this course is to explore and discuss factors related to the psychological aspects of athletic injuries. These factors include the sociocultural, mental, emotional, and physical dimensions of injury rehabilitation. (Typically offered: Irregular)

EXSC 4773. Performance and Drugs. 3 Hours.

The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. Prerequisite: EXSC 3153. (Typically offered: Fall and Spring)

EXSC 4773H. Honors Performance and Drugs. 3 Hours.

The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. Prerequisite: EXSC 3153 and honors standing. (Typically offered: Fall and Spring)

This course is equivalent to EXSC 4773.

EXSC 4783. Sport and Exercise Psychology. 3 Hours.

This course examines how individuals behave in physical activity, exercise, and sport settings. Psychological antecedents and consequences of primary and secondary involvement in exercise, sport, and related physical activities will be introduced. (Typically offered: Fall)

EXSC 4783H. Honors Sport and Exercise Psychology. 3 Hours.

This course examines how individuals behave in physical activity, exercise, and sport settings. Psychological antecedents and consequences of primary and secondary involvement in exercise, sport, and related physical activities will be introduced. (Typically offered: Fall)

This course is equivalent to EXSC 4783.

EXSC 4833. Exercise Applications for Special Populations. 3 Hours.

The study of the effects of exercise, exercise training, and other stressors in special groups. A detailed study of the biomechanical and physiological effects of exercise on the elderly, the diabetic, the post-coronary, and the individual with functional limitations. Prerequisite: EXSC 3353, EXSC 3153, and EXSC 3533. (Typically offered: Fall and Spring)

EXSC 4833H. Honors Exercise Applications for Special Populations. 3 Hours.

The study of the effects of exercise, exercise training, and other stressors in special groups. A detailed study of the biomechanical and physiological effects of exercise on the elderly, the diabetic, the post-coronary, and the individual with functional limitations. Prerequisite: EXSC 3353 or EXSC 3353H, EXSC 3153 or EXSC 3153H, and EXSC 3533 or EXSC 3533H. (Typically offered: Fall and Spring)

This course is equivalent to EXSC 4833.

EXSC 4903. Internship in Exercise Science. 3 Hours.

Provides opportunities for students in Exercise Science to gain experience in clinics, hospitals, fitness centers, athletic training facilities or related settings. Pre- or Corequisite: EXSC 3533. Prerequisite: EXSC 3353 and EXSC 3153. (Typically offered: Fall, Spring and Summer)

EXSC 5023. Advanced Teaching in Exercise Science. 3 Hours.

Examination and practical exposure to the principles and practices of undergraduate teaching in exercise science. Includes course planning, teaching techniques, assessment strategies, and supervised practice. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EXSC 5323. Biomechanics I. 3 Hours.

Intended to serve as an introduction to biomechanics and focuses on scientific principles involved in understanding and analyzing human motion. (Typically offered: Fall)

EXSC 5333. Instrumentation in Biomechanics. 3 Hours.

The application of knowledge and skills necessary for data collection for sports analysis. Provides valuable information on instrumentation used specifically in biomechanics. Prerequisite: EXSC 5323. (Typically offered: Irregular)

EXSC 5353. Exercise Psychology. 3 Hours.

Exercise Psychology is a lecture and discussion format for students interested in learning about theoretical and research information related to exercise adherence. (Typically offered: Fall)

EXSC 5443. Seminar in Brain Injury and Behavior. 3 Hours.

The Brain Injury and Behavior Seminar will immerse you in specific topics pertaining to the study of human brain-behavior relationships. Emphasis will be placed on traumatic brain injury (TBI), including moderate-to-severe injuries, as well as mild TBI or concussion. The first half of the course will focus on research related to how individuals sustain and recover from TBI. The second half of the course will focus on sports-related concussion in youth, collegiate, and professional athletes, with an emphasis on how athletes sustain concussions, how concussions are assessed, treated, and managed, and how return-to-play decision are made. This course will introduce you to research in a variety of fields that include physiology, neurology, and neuropsychology through primary source material in the form of book chapters and journal articles. (Typically offered: Irregular)

EXSC 5513. Physiology Exercise I. 3 Hours.

A study of the foundation literature in exercise physiology. Emphasis is placed on the muscular, cardiovascular, and respiratory systems. (Typically offered: Fall)

EXSC 5523. Muscle Metabolism in Exercise. 3 Hours.

A study of the metabolic changes that occur in muscle as a result of exercise, exercise training, and other stressors. Prerequisite: EXSC 5513 or equivalent. (Typically offered: Spring)

EXSC 5533. Cardiac Rehabilitation Program. 3 Hours.

An examination of the concepts, design, and implementation of cardiac rehabilitation programs. Emphasis on exercise programs but reference to nutrition, psychology, and other lifestyle interventions. (Typically offered: Spring Even Years)

EXSC 5543. Cardiovascular Function in Exercise. 3 Hours.

Study of the effects of exercise training and other stressors on the cardiovascular system. Detailed study of the components of the cardiovascular system and the responses and adaptations of those components to selected stimuli. Corequisite: EXSC 5513 or equivalent. (Typically offered: Fall Even Years)

EXSC 5593. Practicum in Laboratory Instrumentation. 3 Hours.

Practical experience in testing physical fitness utilizing laboratory equipment. Objective is to quantify physiological parameters, leading to the individualized exercise prescription. (Typically offered: Fall and Summer)

EXSC 5613. Physical Dimensions of Aging. 3 Hours.

This course will focus on the physiological changes with healthy aging, pathophysiology of age-related diseases, testing issues, exercise interventions, and the psychosocial aspects of aging. Prerequisite: EXSC 5513. (Typically offered: Spring Odd Years)

EXSC 5643. Advanced Psychology of Sports Injury and Rehabilitation. 3 Hours.

The purpose of this course is to explore and discuss factors related to the psychological aspects of athletic injuries. These factors include the sociocultural, mental, emotional, and physical dimensions of injury rehabilitation. Prerequisite: Students must be accepted into the Masters of Athletic Training graduate program. (Typically offered: Spring)

EXSC 5773. Performance and Drugs. 3 Hours.

The pharmacological and physiological effects of ergogenic aids upon the athlete and performance coupled with the ethical and moralistic viewpoints of drug taking. Practical laboratory experiences are provided with pertinent statistical surveys of athletes; their drug taking habits and relevant psychological impact on performance. (Typically offered: Spring)

EXSC 6313. Muscle Physiology. 3 Hours.

To expand the student's knowledge of the skeletal muscle form and function. Specifically, how muscle is formed to how it can adapt as a post-mitotic tissue. This course will focus on the morphological, physiological, cellular, and molecular factors that affect skeletal muscle form and function. (Typically offered: Fall Even Years)

EXSC 6323. Biomechanics II. 3 Hours.

Analysis of human movement with emphasis on sports skills by application of principles of anatomy, kinesiology, and cinematographical analysis. Prerequisite: EXSC 5323. (Typically offered: Irregular)

EXSC 6343. Physiology of Exercise II. 3 Hours.

Detailed study of the body systems affected by exercise, the functions of these systems during exercise, the effects of age, sex, body type, and nutrition on capacity for exercise, the techniques of assessing work capacity, and a critical analysis of research literature in this area. (Typically offered: Irregular)

EXSC 6443. Thermoregulation and Fluid Balance. 3 Hours.

Comprehensive overview of human thermoregulatory responses to exercise in heat and cold. (Typically offered: Spring Even Years)

Extension Education (EXED)

Courses

EXED 4183. Management of Volunteer Programs. 3 Hours.

Recruiting, training, management, evaluation, and recognition of volunteers in agricultural-related agencies, non-profit organizations, community groups, and advisory committees. Prerequisite: Junior standing. (Typically offered: Irregular)

EXED 475V. Internship in Extension. 3-6 Hour.

A supervised practical work experience in Cooperative Extension which is designed to give the student an insight into the role of Extension employees and an opportunity to gain professional competence in this area. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

EXED 5113. Program Development and Evaluation. 3 Hours.

Principles and proceedings of program development process including planning, designing, implementing, and evaluating of extension education programs. An emphasis on the framework for applying adult and non-formal education principles to the change process. (Typically offered: Irregular)

EXED 5183. Management of Volunteer Programs. 3 Hours.

(Formerly EXED 4183.) Recruiting, training, management, evaluation, and recognition of volunteers in agricultural-related agencies, non-profit organizations, community groups, and advisory committees. Graduate degree credit will not be given for both EXED 4183 and EXED 5183. (Typically offered: Irregular)

Fay Jones Architecture and Design (FJAD)

Finance (FINN)

Courses

FINN 1003. Your Money and Credit. 3 Hours.

Introduction to personal finance. Topics include building wealth, do's and don'ts of credit, car and home ownership. Lectures on theory and concepts; 'learning from the masters' video on best practices; financial simulations and case exercises. (Typically offered: Fall, Spring and Summer)

FINN 3003. Personal Financial Management. 3 Hours.

Topics covered include budgeting, financial planning, managing credit, taxes, insurance, investments, and retirement planning. (Typically offered: Fall and Spring)

FINN 3013. Financial Analysis. 3 Hours.

Focuses on how information contained in financial statements can be used in financial decision-making; in particular, to assess financial performance, evaluate credit and default risk, forecast future funds needs, weigh the risk-reward of debt vs. equity financing, and develop estimates of intrinsic value using relative valuation metrics and discounted cash flow methods. Prerequisite: WCOB 2043 or FINN 3043. (Typically offered: Fall, Spring and Summer)

FINN 3043. Principles of Finance. 3 Hours.

Introduction to the financial system and financial management. Addresses the role and functions of financial intermediaries and markets for fixed income and equity securities; understand how interest rates are determined and assets valued; learn how firms effectively manage financial resources and create value through investment and financing decisions. Prerequisite: ACCT 2013, ECON 2013, ECON 2023, WCOB 1033, and (ACCT 2023 or MGMT 2053), each with a grade of C or better. (Typically offered: Spring)

FINN 3043H. Honors Principles of Finance. 3 Hours.

Introduction to the financial system and financial management. Addresses the role and functions of financial intermediaries and markets for fixed income and equity securities; understand how interest rates are determined and assets valued; learn how firms effectively manage financial resources and create value through investment and financing decisions. Prerequisite: ACCT 2013, ECON 2013, ECON 2023, WCOB 1033 and (ACCT 2023 or MGMT 2053), each with a grade of C or better. (Typically offered: Spring)
This course is equivalent to FINN 3043.

FINN 3053. Financial Markets and Institutions. 3 Hours.

Role and operations of financial markets and institutions in the economy. Supply of, demand for, funds, interest rates and flow of funds analysis. Financial policies, practices of bank and nonbank financial institutions. Prerequisite: (ECON 2013 and ECON 2023) or ECON 2143. (Typically offered: Fall, Spring and Summer)

FINN 3063. Investments. 3 Hours.

Introduction to basic investment concepts including: risk-return and mean-variance efficient frontiers, diversification and the pricing of risk, security valuation. Corequisite: FINN 3013. Prerequisite: WCOB 2043 or FINN 3043. (Typically offered: Fall, Spring and Summer)

FINN 3103. Financial Modeling. 3 Hours.

Develop strong computer skills in financial analysis by integrating conceptual material with spreadsheet-based numerical solution and simulation techniques. Prerequisite: WCOB 2043 or FINN 3043. (Typically offered: Fall, Spring and Summer)

FINN 3133. Commercial Banking. 3 Hours.

Commercial bank administration, management; loans; bond portfolios; credit analysis; public relations; analysis and interpretations of Federal Reserve regulations and publications. Prerequisite: WCOB 2043 or FINN 3043. (Typically offered: Fall and Spring)

FINN 3163. Fixed Income Securities I. 3 Hours.

The markets and institutional settings of fixed income securities; valuation and risk analysis of money market and capital market instruments; strategies and management of bond portfolios; taxable and tax-exempt securities; U.S. and non-U.S. fixed income securities; term structure of interest rate; and interest rate derivatives as hedging tools. Corequisite: FINN 3103 and FINN 3063. Prerequisite: Departmental consent. (Typically offered: Fall)

FINN 3173. Fixed Income Securities II. 3 Hours.

Continuation of FINN 4163. The markets and institutional settings of fixed income securities; valuation, and risk analysis of money market and capital market instruments; strategies and management of bond portfolios; taxable and tax-exempt securities; U.S. and non-U.S. fixed income securities; term structure of interest rate; and interest rate derivatives as hedging tools. Prerequisite: FINN 3163. (Typically offered: Spring)

FINN 3603. Corporate Finance. 3 Hours.

Develop analytical competencies in financial planning, cost of capital estimation, application of discounted cash flow approach to valuation and capital allocation, lease analysis, evaluation of merger and organizational restructuring strategies. Prerequisite: WCOB 2043 or FINN 3043 and FINN 3013. (Typically offered: Fall, Spring and Summer)

FINN 3623. Risk Management. 3 Hours.

A survey of the extent and types of risk in business; ways of dealing with business risk; use of security and commodity exchanges; survey of insurance for risk bearing purposes. (Typically offered: Fall and Spring)

FINN 3703. International Finance. 3 Hours.

Introduction to international financial markets, exchange rates and exchange rate determination, balance of trade measures, and vehicles for foreign trade financing. (Typically offered: Fall, Spring and Summer)

FINN 3933. Real Estate Principles. 3 Hours.

Comprehensive, covering economics of real estate, real estate value, real estate finance, rights in real property and their transfer, public programs, policies relating to real property. (Typically offered: Fall and Spring)

FINN 4003H. Honors Finance Colloquium. 3 Hours.

Explores important concepts, significant events and/or new developments in the field of Finance. Prerequisite: Senior standing. (Typically offered: Fall)

FINN 4013. Seminar in Personal Financial Planning. 3 Hours.

Explores financial planning function, including contact, data acquisition, plan development and implementation; covers all areas of personal financial planning including investments, insurance, taxes, and estate planning; addresses planning techniques and financial planning ethical issues; emphasis on case studies. Pre- or Corequisite: FINN 4733. Prerequisite: FINN 3003, FINN 3063, FINN 3623, and ACCT 3843. (Typically offered: Spring)

FINN 410V. Special Topics in Finance. 1-6 Hour.

Explore current events, new developments and special topics in Finance not covered in other courses. Prerequisite: FINN 3043. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FINN 4133. Advanced Investments. 3 Hours.

Sound training in the principles of security analysis and portfolio management and certain advanced techniques of financial management. Modern portfolio theory and its application to portfolio management practices will be emphasized. Prerequisite: FINN 3063. (Typically offered: Fall and Spring)

FINN 4143. Portfolio Management I. 3 Hours.

This course applies modern investment theory to the practical management of the Rebsament Trust. Students prepare a statement of investment objectives, recommend an asset allocation strategy based on a quantitative analysis of asset class returns, and select securities using fundamental analysis. Classes are organized as management meetings and visits to investment firms are an important part of the class. Application, interview and instructor approval are required. Corequisite: FINN 3063 and ACCT 3723. Prerequisite: Departmental consent. (Typically offered: Fall)

FINN 4153. Portfolio Management II. 3 Hours.

This course is a continuation of FINN 4143. Topics covered include technical analysis, dynamic asset allocation and derivative strategies. Visits to major investments firms and organized exchanges in New York City or other locations are generally planned. Selection is by invitation. Prerequisite: FINN 4143 and by invitation only. (Typically offered: Spring)

FINN 4173. Energy Finance. 3 Hours.

This course is as a comprehensive introduction to the field of Energy Finance, i.e., the application of Finance principles to energy, energy-service, and related industries. Topics covered include: (1) physical fossil fuel markets; (2) physical electricity markets; (3) financially traded energy products; and (4) credit, counterparty, and country risk. Pre- or Corequisite: ACCT 3723. Prerequisite: FINN 3013 and FINN 3043. (Typically offered: Fall and Spring)

FINN 4233. Advanced Corporate Finance. 3 Hours.

Addresses complex and multifaceted issues and problems in financial decision-making. Prerequisite: FINN 3603. (Typically offered: Irregular)

FINN 4313. Advanced Commercial Banking. 3 Hours.

Problems and cases emphasizing application of analytical tools and techniques in commercial bank risk measurement and management. Evaluation of small business credit risk; analysis of liquidity, capital, and interest rate risk; stress testing; hedging risk with derivatives. Prerequisite: FINN 3133. (Typically offered: Spring)

FINN 4413. Real Estate Appraisal. 3 Hours.

Valuation theories applied to real estate. Characteristics which affect value are studied and valuation methodologies are learned and performed by the students. Focus is on residential real estate but all types of real estate are addressed. Students prepare in actual residential appraisal report. Prerequisite: FINN 3933. (Typically offered: Fall)

FINN 4433. Real Estate Finance and Investment. 3 Hours.

Consideration of professional aspects of the real estate field. Emphasis is placed upon finance techniques and investment analysis. The focus is on commercial real estate. Brokerage, property management, appraisal, property development and current problems are also addressed. Students prepare a feasibly study on a commercial development project. Prerequisite: FINN 3933. (Typically offered: Spring)

FINN 450V. Independent Study. 1-3 Hour.

Permits students on an individual basis to explore selected topics in finance, with the consent of instructor. (Typically offered: Irregular)

FINN 4733. Life and Health Insurance I. 3 Hours.

Basic principles, functions, uses of life and health insurance; types of policy contracts; calculation of premiums, reserves; organizations, management, supervision, of companies. (Typically offered: Fall)

FINN 4833. Property and Casualty Insurance I. 3 Hours.

Forms and functions of fire, marine, inland marine, automobile title, miscellaneous types insurance and bonds for business, personal use. (Typically offered: Spring)

FINN 5113. Corporate Financial Management. 3 Hours.

Financial analysis, planning and control; decision making and modeling for financial managers; and financial policies for management. (Typically offered: Spring)

FINN 5133. Advanced Investments. 3 Hours.

(Formerly FINN 4133.) Sound training in the principles of security analysis and portfolio management and certain advanced techniques of financial management. Modern portfolio theory and its application to portfolio management practices will be emphasized. Graduate degree credit will not be given for both FINN 4133 and FINN 5133. Prerequisite: FINN 3063. (Typically offered: Fall and Spring)

FINN 5173. Energy Finance and Risk Management. 3 Hours.

This course provides an advanced introduction to energy finance, defined as the application of finance principles to energy, energy service, and related industries, concerning all aspects of the energy value chain. Topics include: (1) physical fossil fuel markets; (2) physical electricity markets; (3) financially traded energy products; and (4) credit, counterpart, country, and enterprise risk. It also introduces students to business valuation and investment banking applications in the energy industry vertical. Prerequisite: FINN 5113 or FINN 5223. (Typically offered: Fall)

FINN 5223. Financial Markets & Valuation. 3 Hours.

Analysis of financial information by capital markets in the determination of security values with specific applications to retail and logistics companies. This course views these and other companies from the point of view of the capital markets. (Typically offered: Spring) May be repeated for degree credit.

FINN 5233. Advanced Corporate Finance. 3 Hours.

(Formerly FINN 4233.) Addresses complex and multifaceted issues and problems in financial decision-making. Graduate degree credit will not be given for both FINN 4233 and FINN 5233. Prerequisite: FINN 3603. (Typically offered: Irregular)

FINN 5303. Advanced Corporate Financial Management. 3 Hours.

Focus on financial policy issues using real situational cases. Topics include cost of capital, capital budgeting and long-term planning, value-based management, real options, as well as project financing and valuation. Prerequisite: FINN 5223. (Typically offered: Irregular)

FINN 5333. Investment Theory and Management. 3 Hours.

Integration of theory, practice of investments with solution of individual and institutional portfolio management problems; Institute of Chartered Financial Analysts' Problems; variable annuity in estate planning. Prerequisite: FINN 5223. (Typically offered: Fall)

FINN 541V. Shollmier Investment Project. 1-3 Hour.

Provide students with the opportunity to design and apply complex investment strategies used in institutional portfolio management on the Shollmier MBA Fund that can involve fixed income and equity securities as well as derivatives. Students will use top down asset allocation models, bottom up security selection, and hedge fund strategies. Prerequisite: FINN 5223 and FINN 5333. (Typically offered: Fall and Spring) May be repeated for up to 9 hours of degree credit.

FINN 5433. Real Estate Finance and Investment. 3 Hours.

(Formerly FINN 4433.) Consideration of professional aspects of the real estate field. Emphasis is placed upon finance techniques and investment analysis. The focus is on commercial real estate. Brokerage, property management, appraisal, property development and current problems are also addressed. Students prepare a feasibly study on a commercial development project. Graduate degree credit will not be given for both FINN 4433 and FINN 5433. Prerequisite: FINN 3933. (Typically offered: Spring)

FINN 5443. Retail Finance. 3 Hours.

The financial success of retail product and service offerings depends on a clear understanding of the socio-economic as well as demographic and environmental factors that drive the changing patterns of consumption. This course introduces the fundamentals and use of consumer and trade area analysis tools, specifically geographic information systems (GIS) and psychographic market analysis, to make informed financial decisions. Extensive case studies are utilized throughout the course to learn concepts and best practices. Prerequisite: FINN 5223. (Typically offered: Spring)

FINN 550V. Independent Study. 1-3 Hour.

(Formerly FINN 450V.) Permits students on an individual basis to explore selected topics in finance, with the consent of instructor. Graduate degree credit will not be given for both FINN 450V and FINN 550V. (Typically offered: Irregular)

FINN 5703. Multinational Business Finance. 3 Hours.

Problems pertinent to managers of firms in multinational business environments, including international institutions, risks, investments and capital budgeting. (Typically offered: Irregular)

FINN 6043. Finance Theory. 3 Hours.

Provides a conceptual understanding of key theoretical developments in the field of financial economics, including firm decisions under risk within a world of uncertainty. (Typically offered: Irregular)

FINN 6133. Seminar in Investment Theory. 3 Hours.

Study advanced literature in field investments, with special reference to theory of random walks, stock valuation models, portfolio management. (Typically offered: Spring)

FINN 6233. Seminar in Financial Management. 3 Hours.

Financial management of firm with emphasis on financial theory or firm, quantitative methods used in financial analysis, planning. (Typically offered: Irregular)

FINN 6333. Empirical Research in Finance. 3 Hours.

A study of recent empirically based research in finance. (Typically offered: Irregular)

FINN 636V. Special Problems in Finance. 1-6 Hour.

Case studies in investments, corporation finance, money and banking, monetary theory, international finance, public finance. By arrangement. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FINN 6733. Seminar in Financial Markets and Institutions. 3 Hours.

Recent developments in the literature of financial markets and institutions. Participants will be involved in the extensive study of existing theories and empirical tests of the theories. (Typically offered: Irregular)

FINN 683V. Contemporary Issues in Doctoral Colloquium. 1-3 Hour.

To explore and evaluate contemporary research issues in finance. Course content to reflect the most recent developments in theory and empirical research methodologies. Prerequisite: Doctoral student status and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 18 hours of degree credit.

FINN 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall and Spring) May be repeated for degree credit.

Food Science (FDSC)

Courses

FDSC 1011. Exploring Topics in Food Science. 1 Hour.

Introduces the depth and scope of Food Science as a profession. This course emphasizes the importance of science in processing and preservation of food and discusses current topics and issues. Practical information on food processing, composition, additives, labeling, environmental issues, regulations, safety, sensory analysis, and health benefits will be provided. Curriculum offerings in Food Science will be related to job responsibilities as a Food Scientist. Lecture/discussions, 2 hours per week for 8 weeks. (Typically offered: Fall)

FDSC 1103. Introduction to Food Science. 3 Hours.

This course is designed to provide students with a general application and understanding of current issues associated with food products and food ingredients. Discussions will focus on controversial subjects involving food products, food additives, food safety and preservation techniques based on scientific principles and popular belief. Lecture/discussions/demonstrations, 3 hours per week. (Typically offered: Spring)

FDSC 2111. Math Elements for Food Science and Technology. 1 Hour.

Basic data interpretation and analysis, problem interpretation and equation formulation, manipulation of algebraic functions representing applications in food science and technology, predictive models and curve fittings to determine model constants applied in food science and processing. Pre- or Corequisite: MATH 2043 or MATH 2554. (Typically offered: Spring)

FDSC 2401. Uncorked: Vines to Wines. 1 Hour.

This introductory course is designed to provide students with an understanding of the basic concepts of growing grapes and winemaking, including history, grape growing, cultivars, chemistry, wine microorganisms, fermentation, winery operations, wine marketing, and the sensory and appreciation of wine. Coursework is expected to integrate lecture and guest presenters with supplement reading assignments. This course will not include wine tasting, therefore there are no age restrictions for enrollment. (Typically offered: Fall)

FDSC 2401H. Honors Uncorked: Vines to Wines. 1 Hour.

This introductory course is designed to provide students with an understanding of the basic concepts of growing grapes and winemaking, including history, grape growing, cultivars, chemistry, wine microorganisms, fermentation, winery operations, wine marketing, and the sensory and appreciation of wine. Coursework is expected to integrate lecture and guest presenters with supplement reading assignments. This course will not include wine tasting, therefore there are no age restrictions for enrollment. Prerequisite: Honors standing. (Typically offered: Fall)
This course is equivalent to FDSC 2401.

FDSC 2523. Sanitation and Safety in Food Processing Operations. 3 Hours.

Topics covered will provide an understanding of the control of microbial, chemical, and physical food hazards as well as emerging food safety issues. Course will include a discussion of sanitation, cleaners and sanitizers, sanitary equipment and facility designs, and microbial growth and control in food processing operations. Lecture/discussion. Students may not receive credit for both FDSC 2523 and FDSC 2503. (Typically offered: Spring)

FDSC 2603. Science in the Kitchen. 3 Hours.

In recent years science has found its way into the kitchen and cooking into laboratories and food processing plants. This course is designed to integrate science and cooking to help students appreciate the chemical and physical properties of foods and understand how the processes used when handling, preparing, and storing foods affect these properties. (Typically offered: Fall)

FDSC 2701. Food for Health. 1 Hour.

The course is designed for students interested in how foods affect one's health. This course provides students with a background of functional food that will enable them to understand, discuss, and evaluate functionality of food in relation to health. This class is designed to appeal to students studying food science, nutrition, biology, chemistry, nursing, and health and human performance. (Typically offered: Spring)

FDSC 2723. Introduction to Brewing Science. 3 Hours.

An introduction to the biology and chemistry of fermentation, with an emphasis on beer brewing. Styles, flavors, and quality characteristics of beer will be discussed. The history, legal aspects, and economic impacts of homebrewing as well as craft and industrial brewing will be covered. One or more field trips to breweries will be part of the class. Students must be 21 years of age or older on the first day of class. Prerequisite: (CHEM 1123 or CHEM 1073) and BIOL 1543. (Typically offered: Fall)

FDSC 3103. Principles of Food Processing. 3 Hours.

The course is designed as an overview of the unit; food processing operations common to all types of food processing plants. Examples will be drawn from international food processing operations processing fruits and vegetables, poultry and meats, and oil seeds and cereal grains. Emphasis on oral communication and critical thinking skills. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and (MATH 2043 or MATH 2554). (Typically offered: Fall)

FDSC 3202. Introduction to Food Law. 2 Hours.

Discussion of government laws and regulations affecting the manufacture of food. Emphasis is on federal regulations relating to food safety, labeling, and the FDA. Discussion relates to practical use of food law. Lecture 2 hours per week. (Typically offered: Spring)

FDSC 400V. Special Problems. 1-4 Hour.

Investigation of assigned problems in food science. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

FDSC 4111L. Food Analysis Lab. 1 Hour.

Laboratory exercises providing students with experience of analytical techniques and instrumentation used in food analysis. Laboratory 3 hours per week. Corequisite: FDSC 4113. Prerequisite: FDSC 4304 and CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

FDSC 4113. Food Analysis. 3 Hours.

Methods of analysis, instrumentation, and laboratory techniques for measuring the chemical composition of raw and value-added products. Lecture 3 hours. Corequisite: FDSC 4111L. Prerequisite: FDSC 4304 and CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

FDSC 4121L. Food Microbiology Lab. 1 Hour.

A hands-on laboratory course designed to teach students microbiological techniques and certain enumeration and plating techniques of specific food spoilage and pathogenic bacteria. Pre- or Corequisite: FDSC 4122. (Typically offered: Fall)

FDSC 4122. Food Microbiology. 2 Hours.

The study of food microbiology including classification/ taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)

This course is cross-listed with BIOL 4122.

FDSC 4304. Food Chemistry. 4 Hours.

Water, carbohydrates, lipids, proteins, vitamins, and minerals in foods; biochemical and functional properties, enzymes, food additives (emulsifiers, pigments, colors, flavors, preservatives, and sweeteners) and texture as related to properties in food systems and during processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Fall)

FDSC 431V. Internship in Food Science. 1-4 Hour.

The Food Science Internship is a supervised practical work experience with a food industry, research program or governmental agency to gain professional experience and insight into career opportunities. Prerequisite: Junior standing and consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

FDSC 4333. Molecular Biology Techniques Applied to Nutrition and Food Science. 3 Hours.

This course will provide advanced knowledge on current molecular biology techniques and how they can be used in nutrition and food science. A specific emphasis will be given on learning how to understand and interpret results generated through these methods. Therefore, the course is of interest to a wider audience, as such analytic skills are valuable for a diverse array of disciplines. Methods covered will include DNA and RNA-based techniques (PCR, microarrays, sequencing, genomics and metagenomics), protein-based techniques (blots, proteomics) and other molecules-based techniques (metabolomics, immunoblots). Prerequisite: Junior or senior standing. (Typically offered: Fall)

FDSC 4413. Sensory Evaluation of Food. 3 Hours.

Principles and procedures for sensory evaluation of food. Appropriate uses of specific tests are discussed, along with physiological, psychological, and environmental factors affecting sensory verdicts. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: STAT 2303 or WCOB 1033 or AGST 4023 or STAT 2023 or PSYC 2013. (Typically offered: Fall)

FDSC 4713. Product Innovation for the Food Scientist. 3 Hours.

This is a capstone course integrating knowledge developed in Food Science to the development of new food products. This course will take an integrated multidisciplinary approach to developing innovative food products and will provide learning experiences in new product development and Research & Development. Topics include product formulation, ingredient interactions, sensory analysis, packaging, labeling, food safety and food law. Corequisite: Lab component. Pre- or Corequisite: FDSC 4113 and FDSC 4111L. Prerequisite: Senior standing, FDSC 4304, FDSC 3103, and FDSC 4413. (Typically offered: Spring)

FDSC 472V. Special Topics in Food Science. 1-4 Hour.

Discussion focused on selected topics of particular fields of raw product physiology, food processing, chemistry, physiology, microbiology, evaluation, sensory analysis, and preservation. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

FDSC 4754. Engineering Principles of Food Processing. 4 Hours.

Basic mechanics of refrigeration, temperature controls, materials handling and mechanical problems as applied to foods and food processing. Lecture 3 hours, laboratory 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 1213, PHYS 2013, and PHYS 2011L. (Typically offered: Spring Even Years)

FDSC 5001. Seminar. 1 Hour.

Presentation and discussion of graduate student research. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 2 hours of degree credit.

FDSC 509V. Special Problems Research. 1-6 Hour.

Original investigation on assigned problems in food science. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

FDSC 5111L. Food Analysis Lab. 1 Hour.

(Formerly FDSC 4111L.) Laboratory exercises providing students with experience of analytical techniques and instrumentation used in food analysis. Laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4111L and FDSC 5111L. Corequisite: FDSC 4113 or FDSC 5113 (formerly FDSC 4113). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304) and CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

FDSC 5113. Food Analysis. 3 Hours.

(Formerly FDSC 4113.) Methods of analysis, instrumentation, and laboratory techniques for measuring the chemical composition of raw and value-added products. Lecture 3 hours. Graduate degree credit will not be given for both FDSC 4113 and FDSC 5113. Corequisite: FDSC 4111L or FDSC 5111L (formerly FDSC 4111L). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304) and CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Spring)

FDSC 5121L. Food Microbiology Lab. 1 Hour.

(Formerly FDSC 4121L.) A hands-on laboratory course designed to teach students microbiological techniques and certain enumeration and plating techniques of specific food spoilage and pathogenic bacteria. Graduate degree credit will not be given for both FDSC 4121L and FDSC 5121L. Pre- or Corequisite: FDSC 4122 or FDSC 5122 (formerly FDSC 4122). (Typically offered: Fall)

FDSC 5122. Food Microbiology. 2 Hours.

(Formerly FDSC 4122.) The study of food microbiology including classification/taxonomy, contamination, preservation and spoilage of different kinds of foods, pathogenic microorganisms, food poisoning, sanitation, control and inspection and beneficial uses of microorganisms. Graduate degree credit will not be given for both FDSC 4122 and FDSC 5122. Prerequisite: BIOL 2013 and BIOL 2011L or BIOL 2533. (Typically offered: Fall)

FDSC 5223. Food Biosecurity. 3 Hours.

This course is the study of the security of agricultural products and the protection of our food supply from intentional and accidental, domestic and international contamination. Prerequisite: Graduate standing. (Typically offered: Irregular)

FDSC 5304. Food Chemistry. 4 Hours.

(Formerly FDSC 4304.) Water, carbohydrates, lipids, proteins, vitamins, and minerals in foods; biochemical and functional properties, enzymes, food additives (emulsifiers, pigments, colors, flavors, preservatives, and sweeteners) and texture as related to properties in food systems and during processing. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4304 and FDSC 5304. Corequisite: Lab component. Prerequisite: CHEM 1123 and CHEM 1121L and CHEM 2613 and CHEM 2611L or (CHEM 3603 and CHEM 3601L). (Typically offered: Fall)

FDSC 531V. Internship in Food Science. 1-4 Hour.

(Formerly FDSC 431V.) The Food Science Internship is a supervised practical work experience with a food industry, research program or governmental agency to gain professional experience and insight into career opportunities. Graduate degree credit will not be given for both FDSC 431V and FDSC 531V. Prerequisite: Completion of first year of graduate studies and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

FDSC 5333. Molecular Biology Techniques Applied to Nutrition and Food Science. 3 Hours.

This course will provide advanced knowledge on current molecular biology techniques and how they can be used in nutrition and food science. A specific emphasis will be given on learning how to understand and interpret results generated through these methods. Therefore, the course is of interest to a wider audience, as such analytic skills are valuable for a diverse array of disciplines. Methods covered will include DNA and RNA-based techniques (PCR, microarrays, sequencing, genomics and metagenomics), protein-based techniques (blots, proteomics) and other molecules-based techniques (metabolomics, immunoblots). Prerequisite: Graduate standing. (Typically offered: Fall)

FDSC 5413. Sensory Evaluation of Food. 3 Hours.

(Formerly FDSC 4413.) Principles and procedures for sensory evaluation of food. Appropriate uses of specific tests are discussed, along with physiological, psychological, and environmental factors affecting sensory verdicts. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both FDSC 4413 and FDSC 5413. Corequisite: Lab component. Prerequisite: STAT 2303 or WCOB 1033 or AGST 4023 or AGST 5023 (formerly AGST 4023) or STAT 2023 or PSYC 2013. (Typically offered: Fall)

FDSC 5423. Foodborne Diseases. 3 Hours.

This course will introduce students to the major pathogens associated with foodborne diseases, their epidemiology, and approaches to outbreak investigation and control of foodborne illness. An emphasis will be placed on understanding the relationships between the host, the etiologic agent, and the environment as they relate to disease causation. The student will gain knowledge through lectures, case studies, readings, and an individual project. Prerequisite: BIOL 1543 or equivalent. (Typically offered: Summer Odd Years)

FDSC 5503. Safety and Sanitation for the Food Industry. 3 Hours.

This web-based course will provide an appreciation of the need for sanitation in food processing and increase the students' knowledge of sanitary techniques. Topics will include contamination sources, plant and equipment design, cleaners and sanitizers, HACCP, and food biosecurity. Also covered will be considerations in selecting, establishing and maintaining a sanitation program. Prerequisite: General Microbiology or Food Microbiology; General Chemistry. (Typically offered: Irregular)

FDSC 5623. Principles of Food Science. 3 Hours.

This is an introduction for graduate students to the major food science disciplines and provides core knowledge and broad appreciation of basic food science principles. The basics of food engineering, food processing, food microbiology and food safety, food chemistry, sensory science, and nutrition will be discussed. This course provides a general foundation in food science prior to more specialized food science graduate studies. The student will gain understanding through lectures, readings and class discussion. Prerequisite: Graduate standing. (Typically offered: Fall)

FDSC 5713. Product Innovation for the Food Scientist. 3 Hours.

(Formerly FDSC 4713.) This is a capstone course integrating knowledge developed in Food Science to the development of new food products. This course will take an integrated multidisciplinary approach to developing innovative food products and will provide learning experiences in new product development and Research & Development. Topics include product formulation, ingredient interactions, sensory analysis, packaging, labeling, food safety and food law. Graduate degree credit will not be given for both FDSC 4713 and FDSC 5713. Corequisite: Lab component. Pre- or Corequisite: FDSC 4113 or FDSC 5113 (formerly FDSC 4113) and FDSC 4111L or FDSC 5111L (formerly FDSC 4111L). Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304), FDSC 3103, and FDSC 4413 or FDSC 5413 (formerly FDSC 4413). (Typically offered: Spring)

FDSC 5754. Engineering Principles of Food Processing. 4 Hours.

(Formerly FDSC 4754.) Basic mechanics of refrigeration, temperature controls, materials handling and mechanical problems as applied to foods and food processing. Lecture 3 hours, laboratory 3 hours per week. Graduate degree credit will not be given for both FDSC 4754 and FDSC 5754. Corequisite: Lab component. Prerequisite: MATH 1213, PHYS 2013, and PHYS 2011L. (Typically offered: Spring Even Years)

FDSC 5823. Principles of Food Microbiology. 3 Hours.

(Formerly FDSC 4823.) This web-based course is a study of the fundamentals of food microbiology to include its history, classifications, spores and their importance, and the most common and serious pathogenic food microorganisms. Fermentation, spoilage microorganisms and control methodology are also discussed. Graduate degree credit will not be given for both FDSC 4823 and FDSC 5823. (Typically offered: Irregular)

FDSC 5993. Global Horticulture and Human Nutrition to Enhance Community Resilience and Food Security. 3 Hours.

This course covers three broad areas (Global Horticulture, Sustainable International Development, Human Health and Nutrition) and experts on three campuses created the instruction. The course is intended to be multi-disciplinary, and students should use their contextual knowledge to add to weekly discussions. Prerequisite: Graduate standing. (Typically offered: Spring)

This course is cross-listed with AGED 5993, HORT 5993.

FDSC 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

FDSC 602V. Special Topics. 1-3 Hour.

Discussions focused on selected topics of particular fields of raw product physiology and food processing. chemistry, physiology, microbiology, evaluation, sensory analysis and preservation. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for degree credit.

FDSC 6033. Food Biochemistry. 3 Hours.

Biochemical characteristics, functions, regulation and impact of components in raw and processed foods of plant origin. Lecture/discussion 3 hours per week. Prerequisite: CHEM 3813. (Typically offered: Fall Odd Years)

FDSC 6123. Food Carbohydrate Chemistry. 3 Hours.

Focus is on carbohydrate chemistry including molecular structures and physical properties, production and food applications, analytical methods for food carbohydrates, and interactions among food polysaccharides. Prerequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304). (Typically offered: Fall Even Years)

FDSC 6143. Advanced Food Processing and Packaging and their Environmental Impact. 3 Hours.

The course is directed to graduate students in food science and related fields. Students will learn advanced food processing technologies and packaging as well as the environmental issues associated to food production, processing, and distribution. Prerequisite: FDSC 3103 or equivalent, or food processing/engineering background with knowledge of basic food processing operations. (Typically offered: Spring Even Years)

FDSC 6323. Nutraceuticals and Functional Foods. 3 Hours.

Course will include past, present and future of nutraceuticals and functional foods, chemistry, mechanism, novel technologies, nutrigenomics, processing, healthy lifestyle, regulation, safety, marketing, international aspects, and industry project. Prerequisite: CHEM 2613 (or CHEM 3603) and CHEM 3813 and FDSC 4304 or instructor consent. (Typically offered: Spring Even Years)

FDSC 6333. Food Protein Chemistry and Functionality. 3 Hours.

This course is a study in advanced food protein chemistry, including molecular structures, characterization, physicochemical bases of food protein functionality, structure-function relationship, processing technologies to improve functionality, as well as hands-on experiences with timely, practical projects related to food proteins. Lecture and problem solving projects for 3 hours per week. Pre- or Corequisite: FDSC 4304 or FDSC 5304 (formerly FDSC 4304). (Typically offered: Spring Odd Years)

FDSC 6403. Epidemiologic Principles in Food Safety and Public Health. 3 Hours.

This course will provide an introduction to epidemiologic methods used in foodborne disease outbreak investigations. The importance of surveillance systems in detecting outbreaks and in the development of effective disease prevention and control strategies will also be presented. An emphasis will be placed on understanding the relationships between the host, the etiologic agent, and the environment as they relate to disease causation. In addition, molecular methods utilized for the identification of etiologic agents will be discussed. Selected important foodborne diseases will be discussed in detail to clarify the role of epidemiology in understanding the pathogenesis of infectious processes in individuals and communities. Prerequisite: FDSC 4122 or FDSC 5122 (formerly FDSC 4122) or equivalent. (Typically offered: Fall Even Years)

FDSC 6443. Metabolism of Xenobiotics. 3 Hours.

This course is designed to provide in-depth knowledge of the integration of molecular, cellular, and physiologic aspects of xenobiotics (e.g. phytochemicals)/micronutrients and metabolism. This course will also discuss the current understanding of the mechanism and regulation of gene expression by xenobiotics/micronutrients. Examination of current research literature to understand how xenobiotics/micronutrients and physiological states metabolize and influence gene expression, as well as the research methodology used to address these relations. Prerequisite: CHEM 3813. (Typically offered: Fall Even Years)

FDSC 700V. Doctoral Dissertation. 1-18 Hour.

The doctoral program in food science is an interdepartmental program offered by the departments of Food Science, Animal and Poultry Sciences, and Human Environmental Sciences. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

French (FREN)

Courses

FREN 1003. Elementary French I (ACTS Equivalency = FREN 1013). 3 Hours.
Elementary French I. (Typically offered: Fall and Spring)

FREN 1013. Elementary French II (ACTS Equivalency = FREN 1023). 3 Hours.
Elementary courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability. (Typically offered: Fall and Spring)

FREN 2003. Intermediate French I (ACTS Equivalency = FREN 2013). 3 Hours.
Intermediate courses lead to greater facility in spoken language and to more advanced reading skills. (Typically offered: Fall and Spring)

FREN 2013. Intermediate French II (ACTS Equivalency = FREN 2023). 3 Hours.
Continued development of basic speaking comprehension and writing skills and intensive development of reading skills. (Typically offered: Fall and Spring)

FREN 2013H. Honors Intermediate French II. 3 Hours.
Honors intermediate French II. (Typically offered: Fall and Spring)
This course is equivalent to FREN 2013.

FREN 3003. Advanced French. 3 Hours.

Further intensive practice for the purpose of strengthening written and oral expression. Includes a review of the essentials of French grammar. Prerequisite: FREN 2013 or equivalent. (Typically offered: Fall, Spring and Summer)

FREN 3033. French Conversation. 3 Hours.

Three hours per week of guided conversation practice for the post-intermediate student. Prerequisite: FREN 2013. (Typically offered: Fall)

FREN 3063. Ph.D. Reading Requirement I. 3 Hours.

Ph.D. reading requirement I. (Typically offered: Summer)

FREN 3103. Cultural Readings. 3 Hours.

A course designed to build vocabulary and to strengthen reading skills and oral expression through extensive practice with culturally authentic materials. Prerequisite: FREN 2013. (Typically offered: Spring)

FREN 3113. Introduction to Literature. 3 Hours.

Further development of reading skills and introduction to literacy commentary and analysis. Prerequisite: FREN 3003 or FREN 3103. (Typically offered: Spring)

FREN 3123. French Phonetics. 3 Hours.

Improves students' pronunciation of French while they acquire the basic rules of standardized spoken French. The course takes into account the major contrastive features of the sounds of French and English and addresses the particular challenges the native speaker of American English faces when learning to pronounce French. Prerequisite: FREN 3003. (Typically offered: Fall Even Years)

FREN 399VH. Honors French Course. 1-6 Hour.

Honors French. Prerequisite: Junior standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

FREN 4003. French Grammar and Composition. 3 Hours.

French grammar and composition. Prerequisite: FREN 3003 or FREN 3103. (Typically offered: Fall)

FREN 4033. French for Oral Proficiency. 3 Hours.

Three hours per week of conversation practice for the advanced undergraduate. Prerequisite: FREN 3003 or FREN 3103. (Typically offered: Spring)

FREN 4113. Special Themes in French. 3 Hours.

Topics not normally covered in period courses. Sample topics: "The Comic Tradition in French Literature," "French Cinema." Topics announced one semester in advance. Prerequisite: FREN 3113. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FREN 4213. French Civilization. 3 Hours.

French civilization. Prerequisite: FREN 3113. (Typically offered: Spring)

FREN 4223. Survey of French Literature I. 3 Hours.

A survey of French literature, its forms and themes from the medieval period through the 18th century. Prerequisite: FREN 3113. (Typically offered: Irregular)

FREN 4233. Survey of French Literature II. 3 Hours.

A survey of French literature, its forms and themes in the 19th and 20th centuries. Prerequisite: FREN 3113. (Typically offered: Irregular)

FREN 4243. Studies in Francophone Literature. 3 Hours.

Introduction to seminal writers from Francophone cultures, mainly Quebec, the Maghreb and West Africa. Exploration of the following topics: national identity, morality, religion, and exile. Study of socio-political and cultural problems, while discovering recent trends in the globalization of Francophone literature. Prerequisite: FREN 3113. (Typically offered: Irregular)

FREN 4333. Introduction to Business French. 3 Hours.

Introduction and orientation to the French world of business and commerce through the study of vocabulary, forms, and formulas and expression used in commercial correspondence. Prerequisite: FREN 3113 or FREN 3103. (Typically offered: Irregular)

FREN 4433. Business Culture and Practices. 3 Hours.

A practical application of French to the business world focusing on the cultural challenges faced by Americans doing business in France and francophone countries. Case studies and translations of authentic documents from French to English and English to French reinforce the specialized vocabulary of the business world. Prerequisite: FREN 3103 or FREN 3113. (Typically offered: Irregular)

FREN 4663. French Short Story. 3 Hours.

Introduces the genre of the French Short Story, focusing on close readings of the stories and providing an overview of the most important literary movements of the periods from the Middle Ages to the twentieth century. Prerequisite: FREN 3113. (Typically offered: Irregular)

FREN 475V. Special Investigations. 1-6 Hour.

Special investigations. (Typically offered: Fall and Spring) May be repeated for degree credit.

FREN 5003. French Grammar and Phonetics. 3 Hours.

Systematic review of principles of French grammar and syntax; comprehensive presentation of French phonetics. (Typically offered: Irregular)

FREN 5033. Advanced French Conversation. 3 Hours.

This course will provide a small discussion environment in which graduate students will improve their command of spoken French in an interactive setting. Discussion will concentrate on current cultural issues in the French speaking world. (Typically offered: Irregular)

FREN 5213. French Culture & Civilization. 3 Hours.

An analysis of French cultural symbols and attitudes as observed in their historical, economical, political, social, educational, and linguistic aspects. (Typically offered: Irregular)

FREN 5333. Old French Literature. 3 Hours.

An intensive study of French Medieval Literature from the Chansons de Geste to Villon, including an in-depth analysis of the genres and their evolution, and of the major authors of the times. (Typically offered: Irregular)

FREN 5353. Survey of French Poetry. 3 Hours.

A comprehensive study of French poetry from the Middle Ages to the twentieth century, focusing on close readings of individual poems. This course will cover literary movements and trends of the periods and presents the terminology required to do explication de texte. (Typically offered: Irregular)

FREN 5433. French 16th-Century Literature. 3 Hours.

A survey of representative writers of the sixteenth century. (Typically offered: Irregular)

FREN 5543. French 17th-Century Literature. 3 Hours.

A survey of representative writers of the seventeenth century. (Typically offered: Irregular)

FREN 5663. French Short Story. 3 Hours.

An introduction to the French short story, focusing on close readings of a variety of contes and nouvelles from the Middle Ages through the twenty-first century. (Typically offered: Irregular)

FREN 5673. French 18th-Century Literature. 3 Hours.

French 18th-Century literature. (Typically offered: Irregular)

FREN 5703. Special Topics. 3 Hours.

May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

FREN 575V. Special Investigations. 1-6 Hour.

Special investigations. (Typically offered: Irregular) May be repeated for degree credit.

FREN 5773. Survey of Francophone Literature. 3 Hours.

A survey of representative texts in the field of sub-Saharan and North African literature concentrating on postcolonial novels using contemporary critical approaches. (Typically offered: Irregular)

FREN 5783. The French Nineteenth-Century Novel. 3 Hours.

The French Nineteenth-Century novel. (Typically offered: Irregular)

FREN 5813. French 20th-Century Theatre. 3 Hours.

French 20th-Century theatre. (Typically offered: Irregular)

FREN 5833. French 20th-Century Novel. 3 Hours.

French 20th-Century novel. (Typically offered: Irregular)

Gender Studies (GNST) Courses

GNST 2003. Introduction to Gender Studies. 3 Hours.

This course explores cultural constructions of gender and sexuality using a variety of media, including literature, film, and architecture. (Typically offered: Fall and Spring)

GNST 2003H. Honors Introduction to Gender Studies. 3 Hours.

This course explores cultural constructions of gender and sexuality using a variety of media, including literature, film, and architecture. (Typically offered: Fall and Spring)
This course is equivalent to GNST 2003.

GNST 3583. Body and Identity. 3 Hours.

This course explores personal, social and cultural constructions and performances of the body and identity, highlighting key intersections of embodiment including gender, race, sexuality and abilities. (Typically offered: Irregular)
This course is cross-listed with ANTH 3583.

GNST 4363. Gender, Race, and Power. 3 Hours.

Examines how communication shapes gender, race, sexuality, and power. Rather than focusing exclusively on interpersonal communication, this course looks at theories of power that shape institutional macro communication. (Typically offered: Irregular)
This course is cross-listed with COMM 4363.

GNST 4733. Reel Women. 3 Hours.

An examination of films made for, about, and/or by women with the aim of better understanding and centralizing issues pertinent to women's daily lives. Prerequisite: COMM 1003. (Typically offered: Irregular)
This course is cross-listed with COMM 4733.

GNST 4743. Representational Issues in Film. 3 Hours.

An examination of the varying ways that race and ethnicity, gender, sexual orientation, gender identity, class, (dis)ability, and age are represented in and by film - both historically and culturally. Prerequisite: COMM 1003. (Typically offered: Irregular)
This course is cross-listed with COMM 4743.

GNST 490V. Independent Study. 1-6 Hour.

An exploration of gender studies topics studied independently with the supervision of a faculty member. Credit arranged with instructor. Prerequisite: GNST 2003 or GNST 2003H or instructor consent. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GNST 490VH. Honors Independent Study. 1-6 Hour.

An exploration of gender studies topics studied independently with the supervision of a faculty member. Credit arranged with instructor. Prerequisite: GNST 2003 or GNST 2003H or instructor consent and honors standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.
This course is equivalent to GNST 490V.

GNST 4913. Internship in Gender Studies. 3 Hours.

Internship in applied gender work within public and private organizations. Prerequisite: 3 hours of GNST coursework and instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

GNST 4983. Special Topics in Gender Studies. 3 Hours.

This course covers gender topics that are not usually offered in-depth in regularly offered courses. Prerequisite: GNST 2003 or GNST 2003H. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

General Engineering (GNEG) Courses

GNEG 1103. Introduction to Engineering. 3 Hours.

This introductory course for first year engineering students introduces them to the fields of engineering and many of the modeling and problem solving techniques used by engineers. It also introduces the students to the engineering profession and some of the computer tools necessary for pursuing a degree in engineering. This course is designed for current and future transfer students. Freshman engineering students on campus should select GNEG 1201 or GNEG 1111 as appropriate. Pre- or Corequisite: MATH 1203 or MATH 1204 or MATH 1213 or MATH 1284C or MATH 2445 or MATH 2554 or MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. Corequisite: Engineering major. (Typically offered: Fall, Spring and Summer)

GNEG 1111. Introduction to Engineering I. 1 Hour.

Fundamentals of engineering problem-solving including skills from mathematics, science, and computing. Introduction to the engineering design process through team-based activities. Study of the contemporary engineering profession and the disciplines within the College of Engineering. Corequisite: Drill component and MATH 1284C or MATH 2445 or MATH 2554 or MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603 or GNEG 1514. Prerequisite: Engineering First Year majors only. (Typically offered: Fall and Spring)

GNEG 1111H. Honors Introduction to Engineering I. 1 Hour.

Fundamentals of engineering problem-solving including skills from mathematics, science, and computing. Introduction to the engineering design process through team-based activities. Study of the contemporary engineering profession and the disciplines within the College of Engineering. Corequisite: Drill component and MATH 1284C or MATH 2445 or MATH 2554 or MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603 or GNEG 1514. Prerequisite: Engineering First Year majors only and Honors College students only. (Typically offered: Fall and Spring)

This course is equivalent to GNEG 1111.

GNEG 1121. Introduction to Engineering II. 1 Hour.

Further study of engineering problem-solving including skills from mathematics, science, and computing. Experience with the engineering design process through a major, team-based project. Selecting a major within the College of Engineering. Discussion of academic and professional opportunities for engineering students. Corequisite: Drill component and MATH 2445 or MATH 2554 or MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. Prerequisite: GNEG 1111 or GNEG 1111H or GNEG 1514 and Engineering First Year majors only. (Typically offered: Fall and Spring)

GNEG 1121H. Honors Introduction to Engineering II. 1 Hour.

Further study of engineering problem-solving including skills from mathematics, science, and computing. Experience with the engineering design process through a major, team-based project. Selecting a major within the College of Engineering. Discussion of academic and professional opportunities for engineering students. Corequisite: Drill component and MATH 2445 or MATH 2554 or MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. Prerequisite: GNEG 1111H or GNEG 1111 or GNEG 1514, Engineering First Year majors only and Honors College students only. (Typically offered: Fall and Spring)

This course is equivalent to GNEG 1121.

GNEG 1122. Introduction CAD. 2 Hours.

General course in the use of engineering drawings for communications and design. Proper use of computer for computer-aided drafting and design; 2-dimensional, 3-dimensional, and solid modeling; use of manual drafting equipment; geometrical exercises; orthographic projections; auxiliary view; sketching; dimensioning. Corequisite: Lab component. Pre- or Corequisite: MATH 1213 or higher. (Typically offered: Fall and Spring)

GNEG 1201. Fundamentals of Success in Engineering Study. 1 Hour.

Assisting Engineering First Year students in developing skills for successful completion of engineering course work. Building a supportive learning community, assisting students in developing positive attitudes and productive behaviors resulting in both academic and personal success, and informing students of the resources available for maintaining their academic and personal wellness. Corequisite: Drill component and MATH 1204 or MATH 1203 or MATH 1284C. Prerequisite: Engineering First Year student only. (Typically offered: Fall and Spring)

GNEG 1301H. Honors Research Colloquium. 1 Hour.

Exploration of topics and processes associated with academic research in the engineering profession. Offered to a select group of Engineering First Year students enrolled in the Honors College. Corequisite: GNEG 1311H and MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. (Typically offered: Fall)

GNEG 1311H. Honors Research Experience I. 1 Hour.

An initial undergraduate research experience for a select group of Engineering First Year students enrolled in the Honors College. Corequisite: GNEG 1111H and MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. (Typically offered: Fall)

GNEG 1321H. Honors Research Experience II. 1 Hour.

Continuation of GNEG 1311H culminating with the annual Freshman Engineering Program Honors Research Symposium. Pre- or Corequisite: MATH 2564. Prerequisite: GNEG 1311H. (Typically offered: Spring)

GNEG 1401H. Honors Innovation Colloquium. 1 Hour.

Exploration of topics and processes associated with innovation, entrepreneurship, and design in the engineering profession. Offered to a select group of Engineering First Year students enrolled in the Honors College. Corequisite: Drill component, GNEG 1411H and MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. (Typically offered: Fall)

GNEG 1411H. Honors Innovation Experience I. 1 Hour.

An initial undergraduate innovation experience for a select group of Engineering First Year students enrolled in the Honors College. Corequisite: GNEG 1111H and MATH 2564 or MATH 2574 or MATH 2584 or MATH 3083 or MATH 2603. (Typically offered: Fall)

GNEG 1421H. Honors Innovation Experience II. 1 Hour.

Continuation of GNEG 1411H. Pre- or Corequisite: MATH 2564. Prerequisite: GNEG 1411H and honors standing. (Typically offered: Spring)

GNEG 1503. Pre-Engineering Applications of Mathematics. 3 Hours.

Overview of the basic algebra and trigonometry skills used in engineering. All topics are motivated by engineering applications. Prerequisite: Departmental consent. (Typically offered: Irregular)

GNEG 1514. Engineering Applications of Mathematics. 4 Hours.

Overview of the mathematics topics heavily used in sophomore-level engineering courses. Topics include algebraic analysis, trigonometry, vectors and complex numbers, sinusoids and harmonic signals, systems of equations and matrices, differentiation, integration, and differential equations. All topics motivated by engineering applications. Usage of mathematical analysis software is emphasized. Prerequisite: (MATH 1203 or MATH 1204) or at least 46 on the Math Placement Test or a score of at least 23 on the math component of the ACT or a score of at least 540 on the math component of the old SAT or 570 on the new SAT. (Typically offered: Fall and Spring)

GNEG 190V. Special Topics. 1-5 Hour.

Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. (Typically offered: Irregular)

GNEG 290V. Special Topics. 1-5 Hour.

Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. (Typically offered: Irregular)

GNEG 3103H. Honors Globalization and Innovation. 3 Hours.

Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 4103 or GNEG 5103. (Typically offered: Irregular)
This course is equivalent to GNEG 3103.

GNEG 3113. Special Topics-Study Abroad. 3 Hours.

Students travel abroad to gain a global perspective on a particular facet of the engineering discipline. Students are required to complete pre-travel investigative or background assignments, participate in all activities of the actual trip and will produce a post travel reflective or comparative product relative to the special topic. Prerequisite: Instructor consent. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

GNEG 3801. Parallel Cooperative Education. 1 Hour.

Part time supervised experience in industry where students apply classroom skills to problems specific to their discipline in a professional workplace setting. Credit may not be applicable to degree programs in engineering. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)

GNEG 3811. Alternating Cooperative Education. 1 Hour.

Full time supervised experience in industry where students apply classroom skills to problems specific to their discipline in a professional workplace setting. Application of credit to a degree program is at the discretion of the department owning the degree program. Prerequisite: Instructor consent. (Typically offered: Fall, Spring and Summer) May be repeated for up to 3 hours of degree credit.

GNEG 390V. Special Topics. 1-4 Hour.

Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

GNEG 390VH. Honors Special Topics. 1-4 Hour.

Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.
This course is equivalent to GNEG 390V.

GNEG 4103. Globalization and Innovation. 3 Hours.

Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 3103 or GNEG 5103. (Typically offered: Irregular)

GNEG 4103H. Honors Globalization and Innovation. 3 Hours.

Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 3103 or GNEG 5103. (Typically offered: Irregular)
This course is equivalent to GNEG 4103.

GNEG 490V. Special Topics. 1-4 Hour.

Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.

GNEG 490VH. Honors Special Topics. 1-4 Hour.

Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. (Typically offered: Irregular) May be repeated for up to 4 hours of degree credit.
This course is equivalent to GNEG 490V.

GNEG 5103. Globalization and Innovation. 3 Hours.

Integration of engineering in the globalized business environment. Innovation and integration models. Global survival skills. International organizational value-chain. Conducting business with emerging nations. Case studies; field trips; guest lectures. Experiential learning design component. Taken by students participating in departmental approved study abroad programs. May not earn credit for GNEG 3103 or GNEG 4103. (Typically offered: Irregular)

GNEG 550V. Master's Research Project. 1-3 Hour.

Required course for MSE students who wish to complete a Master's research project as part of their degree program. Prerequisite: Instructor permission. (Typically offered: Irregular)

GNEG 5801. Parallel Cooperative Education. 1 Hour.

Part time supervised experience in industry where students apply focused, discipline specific, classroom and research skills to problems directly related to their area of study in a professional work place setting. May be repeated for up to 3 hours of non-degree credit. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)

GNEG 5811. Alternating Cooperative Education. 1 Hour.

Full time supervised experience in industry where students apply focused, discipline specific, classroom and research skills to problems directly related to their area of study in a professional work place setting. May be repeated for up to 3 hours of non-degree credit. Prerequisite: Instructor permission. (Typically offered: Fall, Spring and Summer)

GNEG 590V. Special Topics. 1-4 Hour.

Consideration of current engineering topics not covered in other courses. Prerequisite: Instructor's consent. (Typically offered: Irregular) May be repeated for up to 16 hours of degree credit.

Geosciences (GEOS) Courses

GEOS 1111L. General Geology Laboratory (ACTS Equivalency = GEOL 1114 Lab). 1 Hour.

Laboratory exercises concerning the identification of rocks and minerals, use of aerial photographs and topographic maps, and several field trips. Pre- or Corequisite: GEOS 1113. (Typically offered: Fall, Spring and Summer)

GEOS 1111M. Honors General Geology Laboratory. 1 Hour.

Survey of geological processes and products and their relationships to landforms, natural resources, living environments, and human beings. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOS 1113H. (Typically offered: Fall)
This course is equivalent to GEOS 1111L.

GEOS 1113. General Geology (ACTS Equivalency = GEOL 1114 Lecture). 3 Hours.

Survey of geological processes and products, and their relationships to landforms, natural resources, living environments and human beings. Lecture 3 hours per week. GEOS 1111L is recommended as a corequisite. (Typically offered: Fall, Spring and Summer)

GEOS 1113H. Honors General Geology. 3 Hours.

Survey of geological processes and products and their relationships to landforms, natural resources, living environments, and human beings. Lecture 3 hours, laboratory 2 hours per week. Corequisite: GEOS 1111M. (Typically offered: Irregular)

This course is equivalent to GEOS 1113.

GEOS 1123. Human Geography (ACTS Equivalency = GEOG 1113). 3 Hours.

Basic course in human geography stressing the interrelationships between the natural factors of the environment and man's activities, especially the role of geography in the understanding of social problems and economic and political activities. (Typically offered: Fall and Spring)

GEOS 1123H. Honors Human Geography (ACTS Equivalency = GEOG 1113). 3 Hours.

Basic course in human geography stressing the interrelationships between the natural factors of the environment and man's activities, especially the role of geography in the understanding of social problems and economic and political activities. Prerequisite: Honors Candidacy (Typically offered: Fall and Spring)

This course is equivalent to GEOS 1123.

GEOS 1131L. Earth Science Laboratory (ACTS Equivalency = GEOL 1124 Lab). 1 Hour.

Laboratory exercises concerning human interactions with the physical environment including the study of earthquakes, volcanoes, flooding, erosion, mass wasting, water supply and contamination, and waste disposal. (Typically offered: Fall and Spring)

GEOS 1133. Earth Science (ACTS Equivalency = GEOL 1124 Lecture). 3 Hours.

The application of earth science principles and knowledge of problems created by human occupancy and exploitation of the physical environment. (Typically offered: Fall and Spring)

GEOS 2003. World Regional Geography (ACTS Equivalency = GEOG 2103). 3 Hours.

Survey of problems, development potential, and physical and human resources of the developing and developed world. (Typically offered: Fall and Spring)

GEOS 2003H. Honors World Regional Geography. 3 Hours.

Survey of problems, development potential, and physical and human resources of the developing and developed world. Prerequisite: Honors candidacy. (Typically offered: Fall and Spring)

This course is equivalent to GEOS 2003.

GEOS 2313. Mineralogy and Petrology. 3 Hours.

General principles of mineralogy and petrology, study and identification of common minerals, igneous & metamorphic rocks using hand samples. Corequisite: Lab component. Prerequisite: GEOS 1113 and CHEM 1103. (Typically offered: Fall)

GEOS 2813. Digital Earth. 3 Hours.

This course introduces the fundamental concepts and practical geospatial techniques of the digital earth initiative. Students will learn how digital geographical information is produced (also referred to as geospatial data) and utilized in a variety of economic, environmental, and scientific applications. The class will concentrate on how digital geospatial data are produced, integrated and applied in daily life and will review a variety of environmental and socioeconomic applications. (Typically offered: Fall)

GEOS 2813H. Honors Digital Earth. 3 Hours.

This course introduces the fundamental concepts and practical geospatial techniques of the digital earth initiative. Students will learn how digital geographical information is produced (also referred to as geospatial data) and utilized in a variety of economic, environmental, and scientific applications. The class will concentrate on how digital geospatial data are produced, integrated and applied in daily life and will review a variety of environmental and socioeconomic applications. Prerequisite: Honors standing. (Typically offered: Fall)

GEOS 3013. Foundations of Geospatial Data Analysis. 3 Hours.

Basic mathematical tools applied in geospatial technology, including trigonometry in mapping, linear algebra in remote sensing, optimization in spatial decision support, and graph theory in routing. Course develops the framework for spatial data analysis and decision support. Students may receive credit for the course through testing. Prerequisite: GEOS 3543. (Typically offered: Fall and Spring)

GEOS 3023. Introduction to Cartography. 3 Hours.

Students learn basic principles of map design, cartographic theory and field surveying to produce a variety of computer-generated maps. An introductory course designed for students in a variety of different disciplines using AutoCad software and various new technologies. Field trips may be required. (Typically offered: Fall)

GEOS 3033. Building Materials Field Studies. 3 Hours.

Study of durable building materials, their availability, strength, deterioration, limitation and utility. Historic construction techniques, identification of architectural materials, architectural elements assessment, causes and mechanisms of deterioration, conservation and treatment of architectural materials, preservation philosophies and standards and creation of a practical field identification kit will also be covered. Corequisite: Lab component. (Typically offered: Irregular)

GEOS 3043. Sustaining Earth. 3 Hours.

Theory and growth of conservation and sustainability, the wise use of the major natural resources of the United States. This course meets the requirement in conservation and sustainability for teachers. Prerequisite: Junior standing. (Typically offered: Fall)

GEOS 3043H. Honors Sustaining Earth. 3 Hours.

Theory and growth of conservation and the wise use of the major natural resources of the United States. This course meets the requirement in conservation for teachers. Prerequisite: Junior standing. (Typically offered: Fall)

This course is equivalent to GEOS 3043.

GEOS 3052. Geology for Engineers. 2 Hours.

Geologic principles involved in construction, reservoir location, etc. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. (Typically offered: Fall)

GEOS 3062. Geology of Arkansas. 2 Hours.

A survey of the distribution, genesis, and age of the rocks, fossils, structures, landforms and geological processes of Arkansas. Equivalent to two hours of lecture per week. Field trips required. Prerequisite: GEOS 1113 or GEOS 1113H. (Typically offered: Spring)

GEOS 3103. Geospatial Technologies Computational Toolkit. 3 Hours.

Basic computational tools and processes applied in geospatial software, related computer hardware components, systems and applications software, and spatial database fundamentals. Python, including SciPy and NumPy, geospatial implementations will be emphasized. No programming experience is required. Students may receive credit for the course through testing. Prerequisite: GEOS 3543. (Typically offered: Fall and Spring)

GEOS 3114. Invertebrate Paleontology. 4 Hours.

Survey of the invertebrate phyla commonly preserved as fossils emphasizing their physical and biological characteristics. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 1133 or (BIOL 1543 and BIOL 1541L) or equivalent. (Typically offered: Spring)

GEOS 3213. Principles of Remote Sensing. 3 Hours.

Fundamental concepts of remote sensing of the environment. Optical, infrared, microwave, LIDAR, and in situ sensor systems are introduced. Remote sensing of vegetation, water, urban landscapes, soils, minerals, and geomorphology is discussed. The course includes laboratory exercises in GIS software and field spectroscopy. (Typically offered: Fall)
This course is equivalent to GEOS 4413.

GEOS 3313. Igneous and Metamorphic Rocks. 3 Hours.

Megascopic study and classification of igneous and metamorphic rocks. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 2313. (Typically offered: Spring)

GEOS 3333. Oceanography. 3 Hours.

The sea, its landforms; its winds and currents as related to the atmosphere, world climates, and world trade; its basin as avenues for continental drift; its waters as habitat for plant and animal life; its marine and submarine resources as presently and potentially useful to man. Offered as physical science. Prerequisite: Junior standing. (Typically offered: Spring Even Years)

GEOS 3383. Principles of Landscape Evolution. 3 Hours.

Examines the role of waves, rivers, wind, and tectonics in shaping and modifying the surface of the earth. Considers the way in which an understanding of landscape processes is essential to the effective solution of environmental problems. Lecture 3 hours. (Typically offered: Fall) May be repeated for up to 3 hours of degree credit.

GEOS 3413. Sedimentary Rocks & Fossils. 3 Hours.

An introductory study of sedimentary rocks and fossils from the standpoint of classification, field and laboratory description, genesis, and preservation. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 2313. (Typically offered: Spring)

GEOS 3514. Structural Geology. 4 Hours.

Survey of deformational features and their geological significance in the crust of the earth. Lecture 3 hours per week. Corequisite: Lab component. Prerequisite: GEOS 1113 or GEOS 3052. (Typically offered: Spring)

GEOS 3543. Geospatial Applications and Information Science. 3 Hours.

An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. (Typically offered: Fall and Spring)
This course is cross-listed with ANTH 3543.

GEOS 3553. Spatial Analysis Using ArcGIS. 3 Hours.

Applications of analysis of spatial data using ArcGIS tools in map design, on-line mapping, creating geodatabases, accessing geospatial data, geo-processing, digitizing, geocoding, spatial analysis including basic spatial statistics, analysis of spatial distributions and patterning and 3D application using ArcGIS 3D Analyst. Prerequisite: GEOS 3543. (Typically offered: Fall and Spring)

GEOS 3563. Geospatial Data Mining. 3 Hours.

Basic tools for analyzing, summarizing and visualizing geospatial data. Exploratory data and spatial data analysis, probability distributions and application, single and multivariate analysis and hypothesis testing, and spatial smoothing and interpolation. Emphasis will be on problem solving in geospatial settings using the R statistical language. Prerequisite: GEOS 3013 and GEOS 3103 or equivalent. (Typically offered: Fall and Spring)

GEOS 3593. Introduction to Geodatabases. 3 Hours.

Fundamental concepts and applications of geospatial databases. Schema development and spatial data models for geodata. Spatial and attribute query and optimization, properties and structures of relational and object-oriented geodatabases. Spatial extensions of SQL, spatial indexing, measurement, and geometry. Prerequisite: GEOS 3543, GEOS 3013 and GEOS 3103. (Typically offered: Fall and Spring)

GEOS 360V. Undergraduate Special Problems. 1-6 Hour.

Library, laboratory, or field research in different phases of geology. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 3901. Junior Honors Course. 1 Hour.

Special honors research in geology. One hour credit each semester. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

GEOS 3911. Junior Honors Course. 1 Hour.

Special honors research in geology. One hour credit each semester. Prerequisite: Junior standing. (Typically offered: Fall, Spring and Summer)

GEOS 3923H. Honors Colloquium. 3 Hours.

Covers a special topic or issue, offered as part of the honors program. Prerequisite: Honors candidacy (not restricted to candidacy in geology or geography). (Typically offered: Irregular) May be repeated for degree credit.

GEOS 399VH. Honors Course. 1-6 Hour.

Honors course. Prerequisite: Junior standing. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GEOS 4033. Hydrogeology. 3 Hours.

Occurrence, movement, and interaction of water with geologic and cultural features. Lecture 3 hours per week. Corequisite: Lab component. Prerequisite: MATH 2043 or MATH 2554, and GEOS 3514. (Typically offered: Spring)

GEOS 4043. Geography of the Middle East. 3 Hours.

Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class. Prerequisite: Junior standing. (Typically offered: Fall)

GEOS 4043H. Honors Geography of the Middle East. 3 Hours.

Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class. Prerequisite: Junior standing. (Typically offered: Irregular)
This course is equivalent to GEOS 4043.

GEOS 4053. Geomorphology. 3 Hours.

Mechanics of landform development. Lecture 2 hours, laboratory 3 hours per week. Several local field trips are required during the semester. Corequisite: Lab component. Prerequisite: GEOS 1113 or GEOS 3052. (Typically offered: Spring)

GEOS 4063. Principles of Geochemistry. 3 Hours.

Introduction to fundamental principles of geochemistry from historic development to modern concepts. Prerequisite: CHEM 1121L, CHEM 1123 and GEOS 2313. (Typically offered: Fall)

GEOS 4073. Urban Geography. 3 Hours.

Areal patterns of modern urban regions and the focus shaping these patterns. Emphasis is placed on American urban areas and their evolution and functional areas. Field work. Prerequisite: Junior standing. (Typically offered: Spring)

GEOS 4083. Economic Geology. 3 Hours.

Introduction to mineral deposits used as economic resources. Covers basic geology and geochemistry of mineral deposit formations and the formation of major classes of deposits. Examines the relationship between the distribution of ores, oil, gas, coal, and Plate Tectonics. Explores environmental issues associated with the extraction of earth resources. Prerequisite: GEOS 2313. (Typically offered: Irregular)

GEOS 4093. History and Philosophy of Geography. 3 Hours.

This course familiarizes students with the history of geography, the contributions of geographers to scientific thought and theory, and research techniques that are used in geography. Emphasis is given to the integration of statistical and spatial analysis, and their applications in field research. The course includes short field-based projects in and around Northwest Arkansas. (Typically offered: Spring Even Years)

GEOS 410V. Special Problems in Geosciences. 1-6 Hour.

Designed to meet the needs of students who wish to study one particular geographic topic in some detail. Prerequisite: Junior standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

GEOS 410VH. Honors Special Problems in Geosciences. 1-6 Hour.

Designed to meet the needs of students who wish to study one particular geographic topic in some detail. Prerequisite: Junior standing. (Typically offered: Fall) May be repeated for up to 6 hours of degree credit.

This course is equivalent to GEOS 410V.

GEOS 4113. Global Change. 3 Hours.

Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. (Typically offered: Spring)

GEOS 4113H. Honors Global Change. 3 Hours.

Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. Prerequisite: Honors candidacy. (Typically offered: Spring)

This course is equivalent to GEOS 4113.

GEOS 4133. Radar Remote Sensing. 3 Hours.

Introduction to radar remote sensing and its applications in geology, geography, archeology, engineering, and agriculture. Focuses on Synthetic Aperture Radar (SAR) and advanced techniques including radar stereo, polarimetry, and interferometry. Covers Interferometric SAR (InSAR) for mapping topography and modeling Earth's surface motions due to earthquakes, volcanic eruptions, landslides, and subsidence. Prerequisite: GEOS 3023 or equivalent. (Typically offered: Spring)

GEOS 4153. Karst Hydrogeology. 3 Hours.

Assessment of ground water resources in carbonate rock terrains; relation of ground water and surface water hydrology to karst; quantification of extreme variability in karst environments; data collection rationale. Field trips required. Prerequisite: GEOS 4033. (Typically offered: Irregular)

GEOS 4223. Stratigraphy and Sedimentation. 3 Hours.

Introductory investigation of stratigraphic and sedimentologic factors important to the study of sedimentary rocks. Lecture 2 hours, laboratory 3 hours per week. A required weekend, two-day field trip will be conducted during the semester. Corequisite: Lab component. Prerequisite: GEOS 3413. (Typically offered: Fall)

GEOS 4233. Geography of Religion & Sacrality. 3 Hours.

Explores the spatial nature of the World's major faiths and religious institutions, focusing on the distribution and origins of these religions. Examines the religious beliefs, rituals, architecture, demographics, and art in different societies, cultures, and countries. Considers the tenets and practices of what is sacred and/or spiritual, held in common by a group or community. Prerequisite: Junior or senior standing. (Typically offered: Irregular)

GEOS 4243. Political Geography. 3 Hours.

Contemporary world political problems in their geographic context. Development of the principles of political geography with emphasis upon the problems of Eastern Europe, Africa, and Southeast Asia. Prerequisite: Junior standing. (Typically offered: Fall Odd Years)

GEOS 4253. Petroleum Geology. 3 Hours.

Distribution and origin of petroleum. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: Geology major and senior standing. (Typically offered: Fall)

GEOS 430V. Internship in Physical Geography. 3-6 Hour.

Supervised experience in municipal, county, state or private natural resource management agency, or any other such organization approved by instructor. (Typically offered: Fall, Spring and Summer)

GEOS 4353. Meteorology. 3 Hours.

Examination of the atmospheric processes that result in multifarious weather systems. Offered as physical science. Prerequisite: Junior standing. (Typically offered: Fall)

GEOS 4363. Climatology. 3 Hours.

Fundamentals of topical climatology followed by a study of regional climatology. Offered as physical science. Prerequisite: GEOS 1133 or GEOS 4353. (Typically offered: Spring)

GEOS 437V. Geology Field Trip. 1-2 Hour.

Camping field trip to areas of geologic interest, usually conducted during Spring Break. Prerequisite: GEOS 3313. (Typically offered: Spring) May be repeated for up to 4 hours of degree credit.

GEOS 4383. Hazard & Disaster Assessment, Mitigation, Risk & Policy. 3 Hours.

Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Prerequisite: Junior or senior standing. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

GEOS 4383H. Honors Hazard & Disaster Assessment, Mitigation, Risk & Policy. 3 Hours.

Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Prerequisite: Junior or senior standing. (Typically offered: Spring)

This course is equivalent to GEOS 4383.

GEOS 4393. American Public Lands & Policy. 3 Hours.

The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America's national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Junior or senior standing. (Typically offered: Irregular)

GEOS 4393H. Honors American Public Lands & Policy. 3 Hours.

The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America's national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Honors standing and Junior or senior standing. (Typically offered: Irregular)

This course is equivalent to GEOS 4393.

GEOS 440V. Internship in GIS & Cartography. 3-6 Hour.

Supervised experience in GIS and/or cartographic applications with municipal, county, state, or private enterprises. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 4433. Geophysics. 3 Hours.

Derivation from physical principles, of the geophysical methods for mapping the Earth. Computational methods of converting gravity, magnetic, radiometric, electrical, and seismic data into geologic information. Lecture 3 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: MATH 2564 and PHYS 2033 and PHYS 2031L and GEOS 3514. (Typically offered: Irregular)

GEOS 4443. The Solid Earth: Structure, Composition and Evolution. 3 Hours.

Modern views for the origin of the solid Earth and its structure, composition, and evolution through geologic time. Topics will include examination of relevant geophysical and geochemical constraints used to develop global models for the Earth. Prerequisite: CHEM 1123, GEOS 3313, MATH 2564, PHYS 2074 or instructor consent. (Typically offered: Irregular)

GEOS 4463. 3D Seismic Exploration. 3 Hours.

Interpretation of the spatial component of three-dimensional seismic data in geologic structure and stratigraphy with emphasis on hydrocarbon exploration. Prerequisite: GEOS 3514 or instructor consent. (Typically offered: Spring)

GEOS 4473. Applied Climatology. 3 Hours.

Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment. (Typically offered: Fall)

GEOS 4473H. Honors Applied Climatology. 3 Hours.

Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment. (Typically offered: Fall)

This course is equivalent to GEOS 4473.

GEOS 4483. Severe Weather. 3 Hours.

Focuses on the formation and impact of weather phenomena such as blizzards, floods, tornadoes, thunderstorms, hurricanes and droughts. Covers the mechanisms and physics that control severe weather, advanced terminology, physical concepts and scientific methods used in meteorology, and the analysis and interpretation of meteorological data. Prerequisite: GEOS 1133 and GEOS 1131L. (Typically offered: Spring)

GEOS 4493. Geography of Political Violence. 3 Hours.

This seminar focuses on the rise of civil conflict in the post-World War II world. We are particularly interested in understanding the institutional challenges facing countries that experience such conflict. The class will develop a contextually-informed understanding of the international system and how it is shaped by civil war. Pre- or Corequisite: INST 2013. Prerequisite: Junior or senior standing. (Typically offered: Fall Even Years)

This course is cross-listed with INST 4103.

GEOS 4493H. Honors Geography of Political Violence. 3 Hours.

This seminar focuses on the rise of civil conflict in the post-World War II world. We are particularly interested in understanding the institutional challenges facing countries that experience such conflict. The class will develop a contextually-informed understanding of the international system and how it is shaped by civil war. Pre- or Corequisite: INST 2013. Prerequisite: Junior or senior standing and honors standing. (Typically offered: Fall Even Years)

This course is cross-listed with GEOS 4493, INST 4103.

GEOS 4503. Advanced Cartographic Techniques & Production. 3 Hours.

Covers advanced production and techniques in cartography, including animation, geospatial visualization, pochade, and advanced visualization. Emphasizes client relationships in creating and producing cartographic materials. Prerequisite: GEOS 4523. (Typically offered: Irregular)

GEOS 4513. Introduction to GIS Programming. 3 Hours.

This course introduces fundamentals of GIS software engineering and offers hands-on tutorials in customized applications using Arc GIS through programming ArcObjects in VBA / VBA.net environment. Topics covered include ArcObjects, different programming syntax and styles, and fundamental routines and functions in ArcGIS. After completing the course, students will have the capability to develop customized ArcGIS applications. (Typically offered: Fall)

GEOS 4523. Cartographic Design and Production. 3 Hours.

This course addresses advanced cartographic concepts (i.e. visual hierarchy, aesthetics, image cognition) and production techniques as they relate to computer-assisted mapping. Students produce a variety of maps using Adobe Illustrator (CS 4-6) software to build a map portfolio. Field trips may be required. Prerequisite: GEOS 3023. (Typically offered: Spring)

GEOS 4533. Introduction to Petroleum Geophysics. 3 Hours.

Introduction to seismic wave propagation and petroleum seismology with particular emphasis on seismic events, elastic waves, and seismic survey design. Prerequisite: MATH 2564, (PHYS 2033 or PHYS 2074), and GEOS 3514 or instructor consent. (Typically offered: Fall)

GEOS 4533H. Honors Introduction to Petroleum Geophysics. 3 Hours.

Introduction to seismic wave propagation and petroleum seismology with particular emphasis on seismic events, elastic waves, and seismic survey design. Prerequisite: MATH 2564, (PHYS 2033 or PHYS 2074), and GEOS 3514 or instructor consent. (Typically offered: Fall)

This course is equivalent to GEOS 4533.

GEOS 4553. Introduction to Raster GIS. 3 Hours.

Theory, data structure, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Prerequisite: GEOS 3543 or ANTH 3543. (Typically offered: Fall)

This course is cross-listed with ANTH 4553.

GEOS 4563. Geology of Our National Parks. 3 Hours.

This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Prerequisite: GEOS 1113. (Typically offered: Fall)

GEOS 4563H. Honors Geology of Our National Parks. 3 Hours.

This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Prerequisite: GEOS 1113. (Typically offered: Fall)

This course is equivalent to GEOS 4563.

GEOS 4583. Enterprise and Multiuser GIS. 3 Hours.

GIS practice that's typical of collaborative team-based geospatial organizations. Solve real-world problems through end-to-end GIS design and implementation using ArcGIS Enterprise, extensive federal, state, and local repositories, and high quality software documentation. Includes relevant training in geospatial provenance and metadata, and in enterprise and multiuser GIS administration. (Typically offered: Spring)

GEOS 4593. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.

Fundamentals of navigation, mapping, and high-precision positioning using the Navstar Global Positioning System. Topics include datum definition and transformation, map projections, autonomous and differential positioning using both code and carrier processing, and analysis of errors. Prerequisite: GEOS 3543 or GEOS 5543. (Typically offered: Fall)

This course is cross-listed with ANTH 4593.

GEOS 4653. GIS Analysis and Modeling. 3 Hours.

Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. (Typically offered: Spring)

This course is cross-listed with ANTH 4653.

GEOS 4653H. Honors GIS Analysis and Modeling. 3 Hours.

Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. (Typically offered: Spring)

This course is cross-listed with GEOS 4653, ANTH 4653.

GEOS 4663. Low-Temperature Geochemistry of Natural Waters. 3 Hours.

Covers the low-temperature geochemistry of waters and their associated minerals at Earth's surface. Examines the controls on the chemical composition of natural waters and the minerals precipitated from them. Topics covered will include water-rock interactions, pH, redox, the carbonate-water system, clay minerals and exchange, heavy metals, and a brief introduction to stable isotopes and geomicrobiology. Prerequisite: CHEM 1121L, CHEM 1123, GEOS 1113, and GEOS 1111L. (Typically offered: Fall)

GEOS 4673. Volcanology. 3 Hours.

A broad introduction to volcanic processes and their associated hazards. Emphasis will be placed on applying basic physical and chemical principles to understanding volcanic systems. Prerequisite: GEOS 2313. (Typically offered: Irregular)

GEOS 4686. Geology Field Camp. 6 Hours.

A professional course taught off campus emphasizing occurrence, description, mapping, and interpretation of major rock types. May not be taken for graduate credit. Prerequisite: GEOS 3413 and GEOS 3514. (Typically offered: Summer)

GEOS 4693. Environmental Justice. 3 Hours.

This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. (Typically offered: Spring)

GEOS 4693H. Honors Environmental Justice. 3 Hours.

This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. (Typically offered: Spring)

This course is equivalent to GEOS 4693.

GEOS 4783. Geography of Europe. 3 Hours.

Geographic regions of the area with emphasis on their present development. Prerequisite: Junior standing. (Typically offered: Irregular)

GEOS 4793. Geospatial Unmanned Aircraft Systems. 3 Hours.

Geospatial unmanned aircraft systems (UAS) are becoming key technologies in a number of disciplines. This course will introduce safe and legal operation of UAS in aerial photography, multispectral, thermal and LIDAR applications, geodetic control, photogrammetric and computer vision processing, and the creation of accurate 2D and 3D digital information products. Pre- or Corequisite: GEOS 4413 and GEOS 4593 or equivalent. (Typically offered: Fall)

GEOS 4793H. Honors Geospatial Unmanned Aircraft Systems. 3 Hours.

Geospatial unmanned aircraft systems (UAS) are becoming key technologies in a number of disciplines. This course will introduce safe and legal operation of UAS in aerial photography, multispectral, thermal and LIDAR applications, geodetic control, photogrammetric and computer vision processing, and the creation of accurate 2D and 3D digital information products. Pre- or Corequisite: Honors standing, GEOS 4413 and GEOS 4593 or equivalent. (Typically offered: Fall)

This course is equivalent to GEOS 4793.

GEOS 481V. Cooperative Education Program. 1-6 Hour.

Credit for off-campus, compensated work experience related to geology arranged through the Cooperative Education Office and Department of Geology. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

GEOS 4863. Quantitative Techniques in Geosciences. 3 Hours.

An introduction to the application of standard quantitative and spatial statistical techniques to geoscientific analysis. Students will use both micro and large system computers in the course. (Typically offered: Spring)

This course is cross-listed with ANTH 4863.

GEOS 4873. Geological Data Analysis. 3 Hours.

Quantitative methods and techniques for analysis and interpretation of geological data. Corequisite: Lab component. Prerequisite: MATH 2564 and GEOS 3514. (Typically offered: Spring)

GEOS 4924. Earth System History (ACTS Equivalency = PHSC 1104). 4 Hours.

Physical and biological events that form the history of the earth from its formation to the beginning of the historical era. Graduate enrollment only with departmental permission. Corequisite: Lab component. Prerequisite: GEOS 3514. (Typically offered: Spring)

GEOS 4933. Ancient Forest Science and Sustainability. 3 Hours.

Ancient forests preserve beautiful habitat with high ecological integrity. This course will examine the development, spatial distribution, and ongoing destruction of ancient forests worldwide, and how science can contribute to the understanding and sustainable management of these valuable resources. (Typically offered: Spring)

GEOS 4972H. Senior Honors Course I. 2 Hours.

Special honors research in geology. Two hours of credit each semester. Prerequisite: Junior honors. (Typically offered: Fall, Spring and Summer)

GEOS 4982H. Senior Honors Course II. 2 Hours.

Special honors research in geology. Two hours of credit each semester. Prerequisite: Junior honors. (Typically offered: Fall, Spring and Summer)

GEOS 4993. Dynamics of Sediment Transport. 3 Hours.

This is a course focused on how fluids transport sediment and construct stratigraphy. Lectures will develop environmental fluid mechanics and sediment transport from first principles so they can be used to evaluate sedimentological and stratigraphic problems. This framework will be applied to a sedimentological problem using original data and analysis. Pre- or Corequisite: GEOS 4223. Prerequisite: GEOS 3413. (Typically offered: Fall Odd Years)

GEOS 5003. Seminar in Geography. 3 Hours.

Selected topics, the nature of which varies with the need. Prerequisite: Graduate standing. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

GEOS 5011. Colloquium. 1 Hour.

Weekly meetings of faculty, graduates, advanced students and guests to discuss research and trends in the field of geography. (Typically offered: Spring) May be repeated for up to 2 hours of degree credit.

GEOS 5023. Technical and Proposal Writing for the Geosciences. 3 Hours.

Preparation of technical reports, research proposals, and manuscripts for publication in the area of geosciences. (Typically offered: Spring)

GEOS 5033. Advanced Vector Geographic Information Systems. 3 Hours.

Advanced vector operations and analysis. Topics will include topological analysis, network analysis, geocoding, conflation, implications of source and product map scale, map generation, error mapping, and cartographic production. Prerequisite: ((ANTH 4563 or ANTH 5563 (formerly ANTH 4563)) or ((GEOS 4583 or GEOS 5583 (formerly GEOS 4583)) or equivalent. (Typically offered: Irregular)

This course is cross-listed with ANTH 5043.

GEOS 5043. Foundations of Geospatial Data Analysis. 3 Hours.

Basic mathematical tools applied in geospatial technology, including trigonometry in mapping, linear algebra in remote sensing, optimization in spatial decision support, and graph theory in routing. Course develops the framework for spatial data analysis and decision support. Pre- or Corequisite: GEOS 5543. (Typically offered: Fall and Spring)

GEOS 5053. Quaternary Environments. 3 Hours.

An interdisciplinary study of the Quaternary Period, including dating methods, deposits, soils, climates, tectonics, and human adaptation. Lecture 2 hours, laboratory 2 hours per week. Prerequisite: Graduate standing. (Typically offered: Fall)

This course is cross-listed with ANTH 5053, ENDY 5053.

GEOS 5073. Geospatial Technologies Computational Toolkit. 3 Hours.

Basic computational tools and processes applied in geospatial software, related computer hardware components, systems and applications software, and spatial database fundamentals. Python, including SciPy and NumPy, geospatial implementations will be emphasized. No programming experience is required. Pre- or Corequisite: GEOS 5543. (Typically offered: Fall and Spring)

GEOS 5083. Geospatial Data Mining. 3 Hours.

Basic tools for analyzing, summarizing and visualizing geospatial data. Exploratory data and spatial data analysis, probability distributions and application, single and multivariate analysis and hypothesis testing, and spatial smoothing and interpolation. Emphasis will be on problem solving in geospatial settings using the R statistical language. Prerequisite: GEOS 5043 and GEOS 5073 or equivalent. (Typically offered: Fall and Spring)

GEOS 5093. History and Philosophy of Geography. 3 Hours.

This course familiarizes students with the history of geography, the contributions of geographers to scientific thought and theory, and research techniques that are used in geography. Emphasis is given to the integration of statistical and spatial analysis, and their applications in field research. The course includes short field-based projects in and around Northwest Arkansas. (Typically offered: Spring Even Years)

GEOS 510V. Special Problems in Physical Geosciences. 1-6 Hour.

Special problems in Geosciences. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 5113. Global Change. 3 Hours.

Examines central issues of global change including natural and human induced climate change, air pollution, deforestation, desertification, wetland loss urbanization, and the biodiversity crisis. The U.S. Global Change Research Program is also examined. (Typically offered: Fall)

This course is cross-listed with ENDY 5113.

GEOS 5123. Stratigraphic Principles and Practice. 3 Hours.

Physical and biological characteristics of sedimentary environments and their correlation in time with emphasis on the local geologic section. Corequisite: Lab component. Prerequisite: GEOS 4223 or GEOS 5323 (formerly GEOS 4223). (Typically offered: Irregular)

GEOS 5133. Radar Remote Sensing. 3 Hours.

Introduction to radar remote sensing and its applications in geology, geography, archeology, engineering, and agriculture. Focuses on Synthetic Aperture Radar (SAR) and advanced techniques including radar stereo, polarimetry, and interferometry. Covers Interferometric SAR (InSAR) for mapping topography and modeling Earth's surface motions due to earthquakes, volcanic eruptions, landslides, and subsidence. Prerequisite: GEOS 3023 or equivalent. (Typically offered: Spring)

GEOS 5143. 3D Seismic Exploration. 3 Hours.

(Formerly GEOS 4463.) Interpretation of 3D seismic data for geological structure, stratigraphy, and pore fluid variations with emphasis on hydrocarbon exploration. Credit will not be given for both GEOS 4463 and GEOS 5143. Prerequisite: GEOS 4433 or GEOS 5433 (formerly GEOS 4433). (Typically offered: Spring)

GEOS 5153. Environmental Site Assessment. 3 Hours.

Principles, problems, and methods related to conducting an environmental site assessment. An applied course covering field site assessment, regulatory documentation, and report preparation. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Irregular)

This course is cross-listed with ENDY 5153.

GEOS 5163. Hydrogeologic Modeling. 3 Hours.

Topics include numerical simulation of ground water flow, solute transport, aqueous geochemistry, theoretical development of equations, hypothesis testing of conceptual models, limitations of specific methods, and error analysis. Emphasis on practical applications and problem solving. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033) and computer literacy. (Typically offered: Irregular)

GEOS 5173. Urban Geography. 3 Hours.

(Formerly GEOS 4073.) Areal patterns of modern urban regions and the focus shaping these patterns. Emphasis is placed on American urban areas and their evolution and functional areas. Field work. Graduate degree credit will not be given for both GEOS 4073 and GEOS 5173. (Typically offered: Irregular)

GEOS 5183. Geography of the Middle East. 3 Hours.

(Formerly GEOS 4043.) Physical and cultural landscapes, natural and cultural resources, art and architecture, land use, political history, OPEC, and current problems of North Africa and the Middle East region west of Afghanistan are discussed. Class participation, discussions, slides and films, and student presentations will round out the class. Graduate degree credit will not be given for both GEOS 4043 and GEOS 5183. (Typically offered: Fall)

GEOS 5196. Advanced Field Methods of Applied Hydrogeology. 6 Hours.

Applied field course emphasizing collection and interpretation of ground water data. Three hours may be applied toward an M.S. degree in geology. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Summer)

GEOS 520V. Special Problems in Human Geography. 1-6 Hour.

Special problems in human geography. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 5213. Principles of Remote Sensing. 3 Hours.

Fundamental concepts of remote sensing of the environment. Optical, infrared, microwave, LIDAR, and in situ sensor systems are introduced. Remote sensing of vegetation, water, urban landscapes, soils, minerals, and geomorphology is discussed. The course includes laboratory exercises in GIS software and field spectroscopy. (Typically offered: Fall)

GEOS 5223. Sedimentary Petrology. 3 Hours.

Sediments and sedimentary rocks. Lecture 2 hours, laboratory 2 hours per week. Corequisite: Lab component. Prerequisite: GEOS 4223 or GEOS 5323 (formerly GEOS 4223). (Typically offered: Fall)

GEOS 5233. Geography of Religion & Sacrality. 3 Hours.

Explores the spatial nature of the World's major faiths and religious institutions, focusing on the distribution and origins of these religions. Examines the religious beliefs, rituals, architecture, demographics, and art in different societies, cultures, and countries. Considers the tenets and practices of what is sacred and/or spiritual, held in common by a group or community. Prerequisite: Graduate standing. (Typically offered: Irregular)

GEOS 5243. Political Geography. 3 Hours.

(Formerly GEOS 4243.) Contemporary world political problems in their geographic context. Development of the principles of political geography with emphasis upon the problems of Eastern Europe, Africa, and Southeast Asia. Graduate degree credit will not be given for both GEOS 4243 and GEOS 5243. (Typically offered: Fall Odd Years)

GEOS 5253. Geomorphology. 3 Hours.

(Formerly GEOS 4053.) Mechanics of landform development. Lecture 2 hours, laboratory 3 hours per week. Several local field trips are required during the semester. Graduate degree credit will not be given for both GEOS 4053 and GEOS 5253. (Typically offered: Spring)

GEOS 5263. Hydrogeology. 3 Hours.

(Formerly GEOS 4033.) Occurrence, movement, and interaction of water with geologic and cultural features. Lecture 3 hours per week. Graduate degree credit will not be given for both GEOS 4033 and GEOS 5263. Corequisite: Lab component. Prerequisite: MATH 2043 or MATH 2554, and GEOS 3514. (Typically offered: Spring)

GEOS 5273. Principles of Geochemistry. 3 Hours.

(Formerly GEOS 4063.) Introduction to fundamental principles of geochemistry from historic development to modern concepts. Graduate degree credit will not be given for both GEOS 4063 and GEOS 5273. Corequisite: Lab component. Prerequisite: CHEM 1121L, CHEM 1123 and GEOS 2313. (Typically offered: Fall)

GEOS 5283. Economic Geology. 3 Hours.

(Formerly GEOS 4083.) Introduction to mineral deposits used as economic resources. Covers basic geology and geochemistry of mineral deposit formations and the formation of major classes of deposits. Examines the relationship between the distribution of ores, oil, gas, coal, and Plate Tectonics. Explores environmental issues associated with the extraction of earth resources. Graduate degree credit will not be given for both GEOS 4083 and GEOS 5283. Prerequisite: GEOS 2313. (Typically offered: Irregular)

GEOS 5293. Introduction to Global Positioning Systems and Global Navigation Satellite Systems. 3 Hours.

(Formerly GEOS 4593.) Fundamentals of navigation, mapping, and high-precision positioning using the Navstar Global Positioning System. Topics include datum definition and transformation, map projections, autonomous and differential positioning using both code and carrier processing, and analysis of errors. Graduate degree credit will not be given for both GEOS 4593 and GEOS 5293. (Typically offered: Fall)

This course is cross-listed with ANTH 5593.

GEOS 530V. Special Problems in Regional Geography. 1-6 Hour.

Special problems in regional geography. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer)

GEOS 5313. Planetary Atmospheres. 3 Hours.

Origins of planetary atmospheres, structures of atmospheres, climate evolution, dynamics of atmospheres, levels in the atmosphere, the upper atmosphere, escape of atmospheres, comparative planetology of atmospheres. (Typically offered: Irregular)

GEOS 5323. Stratigraphy and Sedimentation. 3 Hours.

(Formerly GEOS 4223.) Introductory investigation of stratigraphic and sedimentologic factors important to the study of sedimentary rocks. Lecture 2 hours, laboratory 3 hours per week. A required weekend, two-day field trip will be conducted during the semester. Graduate degree credit will not be given for both GEOS 4223 and GEOS 5323. Corequisite: Lab component. Prerequisite: GEOS 3413. (Typically offered: Fall)

GEOS 534V. Internship in Physical Geography. 3-6 Hour.

(Formerly GEOS 430V.) Supervised experience in municipal, county, state or private natural resource management agency, or any other such organization approved by instructor. Graduate degree credit will not be given for both GEOS 430V and GEOS 534V. (Typically offered: Fall, Spring and Summer)

GEOS 5353. Meteorology. 3 Hours.

(Formerly GEOS 4353.) Examination of the atmospheric processes that result in multifarious weather systems. Offered as physical science. Graduate degree credit will not be given for both GEOS 4353 and GEOS 5353. (Typically offered: Fall)

GEOS 5363. Climatology. 3 Hours.

(Formerly GEOS 4363.) Fundamentals of topical climatology followed by a study of regional climatology. Offered as physical science. Graduate degree credit will not be given for both GEOS 4363 and GEOS 5363. (Typically offered: Spring)

GEOS 537V. Geology Field Trip. 1-2 Hour.

(Formerly GEOS 437V.) Camping field trip to areas of geologic interest, usually conducted during Spring Break. Graduate degree credit will not be given for both GEOS 437V and GEOS 537V. Prerequisite: GEOS 3313. (Typically offered: Spring) May be repeated for up to 4 hours of degree credit.

GEOS 5383. Hazard & Disaster Assessment, Mitigation, Risk & Policy. 3 Hours.

(Formerly GEOS 4383.) Comprehensive introduction to interdisciplinary approaches to natural and environmental hazards and risk. Hazards and disaster assessment, mitigation, and policy are the focus of the class. Graduate degree credit will not be given for both GEOS 4383 and GEOS 5383. (Typically offered: Spring) May be repeated for up to 6 hours of degree credit.

GEOS 5393. Mathematical Modeling of Geological Processes. 3 Hours.

This course explores a variety of topics in applied mathematics and computational methods within the context of studying geological processes and from the perspective of a modeling practitioner. Programming is conducted in Python. Knowledge of Calculus II is necessary. (Typically offered: Irregular)

GEOS 5403. American Public Lands and Policy. 3 Hours.

The course examines the role of American federal public lands in 19th-21st century geography, history, policy, and art. It investigates the growth of conservation, preservation, and management movements in the US by looking at America's national parks, forests, dams, wildlife refuges, wilderness areas, managed and agricultural lands. Prerequisite: Graduate standing. (Typically offered: Irregular)

GEOS 5423. Remote Sensing of Natural Resources. 3 Hours.

Introductory digital image processing of remotely sensed data. Topics include data collection, laboratory design, scientific visualization, radiometric and geometric correction, enhancement, pattern recognition, artificial intelligence, and change detection in natural resource remote sensing. GIS-based exercises and a course project are included. Prerequisite: GEOS 4413 or GEOS 5213. (Typically offered: Spring Even Years)

GEOS 5433. Geophysics. 3 Hours.

(Formerly GEOS 4433.) Derivation from physical principles, of the geophysical methods for mapping the Earth. Computational methods of converting gravity, magnetic, radiometric, electrical, and seismic data into geologic information. Lecture 3 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both GEOS 4433 and GEOS 5433. Corequisite: Lab component. Prerequisite: MATH 2564 and PHYS 2033 and PHYS 2031L and GEOS 3514. (Typically offered: Irregular)

GEOS 5443. The Solid Earth. 3 Hours.

Modern views for the origin of the solid Earth and its structure, composition, and evolution through geologic time. Topics will include examination of relevant geophysical and geochemical constraints used to develop global models for the Earth. Prerequisite: GEOS 3313, MATH 2564, CHEM 1123, PHYS 2074 or instructor consent. (Typically offered: Irregular)

GEOS 5453. Introduction to Raster GIS. 3 Hours.

(Formerly GEOS 4553.) Theory, data structure, algorithms, and techniques behind raster-based geographical information systems. Through laboratory exercises and lectures multidisciplinary applications are examined in database creation, remotely sensed data handling, elevation models, and resource models using boolean, map algebra, and other methods. Graduate degree credit will not be given for both GEOS 4553 and GEOS 5453. (Typically offered: Fall)

This course is cross-listed with ANTH 5553.

GEOS 5463. Microtectonics. 3 Hours.

Focuses on the microstructural evolution of tectonite rocks and the constraints that can be gleaned from optical microscopic evaluation of rocks in petrographic thin-sections and hand samples. Results are evaluated in the context of plate tectonic theory and geodynamics. Knowledge of mineralogy and petrology equivalent to GEOS 2313 is required. Pre- or Corequisite: GEOS 5563. Corequisite: Lab component. (Typically offered: Fall)

GEOS 5473. Applied Climatology. 3 Hours.

Applied climatology involves the use of climatic data to solve a variety of social, economic and environmental problems, such as for clients in agriculture, water and energy management. The basic purpose of applied climatology is to help society, at all scales and levels, to achieve a better adjustment to the climatic environment. (Typically offered: Fall)

GEOS 5483. Severe Weather. 3 Hours.

(Formerly GEOS 4483.) Focuses on the formation and impact of weather phenomena such as blizzards, floods, tornadoes, thunderstorms, hurricanes and droughts. Covers the mechanisms and physics that control severe weather, advanced terminology, physical concepts and scientific methods used in meteorology, and the analysis and interpretation of meteorological data. Graduate degree credit will not be given for both GEOS 4483 and GEOS 5483. (Typically offered: Spring)

GEOS 550V. Internship in GIS & Cartography. 3-6 Hour.

(Formerly GEOS 440V.) Supervised experience in GIS and/or cartographic applications with municipal, county, state, or private enterprises. Graduate degree credit will not be given for both GEOS 440V and GEOS 550V. (Typically offered: Spring and Summer) May be repeated for up to 6 hours of degree credit.

GEOS 5513. Introduction to GIS Programming. 3 Hours.

This course introduces fundamentals of GIS software engineering and offers hands-on tutorials in customized applications using Arc GIS through programming ArcObjects in VBA/VA.net environment. Topics covered include ArcObjects, different programming syntax and styles, and fundamental routines and functions in ArcGIS. After completing the course, students will have the capability develop customized ArcGIS applications. (Typically offered: Fall)

GEOS 5523. Cartographic Design & Production. 3 Hours.

(Formerly GEOS 4523.) This course addresses advanced cartographic concepts (i.e. visual hierarchy, aesthetics, image cognition) and production techniques as they relate to computer-assisted mapping. Students produce a variety of maps using Adobe Illustrator (CS 4-6) software to build a map portfolio. Field trips may be required. Graduate degree credit will not be given for both GEOS 4523 and GEOS 5523. (Typically offered: Spring)

GEOS 5533. Introduction to Petroleum Geophysics. 3 Hours.

(Formerly GEOS 4533.) Introduction to seismic wave propagation and petroleum seismology with particular emphasis on seismic events, elastic waves, and seismic survey design. Credit will not be given for both GEOS 4533 and GEOS 5533. Prerequisite: MATH 2564, PHYS 2033, and GEOL 3514 or consent of instructor. (Typically offered: Fall)

GEOS 5543. Geospatial Applications and Information Science. 3 Hours.

An introduction to the methods and theory underlying the full range of geographic information science and collateral areas - including GNSS, remote sensing, cadastral, spatial demographics and others. (Typically offered: Fall and Spring)

GEOS 5553. Spatial Analysis Using ArcGIS. 3 Hours.

Applications of analysis of spatial data using ArcGIS tools in map design, on-line mapping, creating geodatabases, accessing geospatial data, geo-processing, digitizing, geocoding, spatial analysis including basic spatial statistics, analysis of spatial distributions and patterning and 3D application using ArcGIS 3D Analyst. Prerequisite: GEOS 3543 or GEOS 5543. (Typically offered: Fall and Spring)

GEOS 5563. Tectonics. 3 Hours.

Development of ramifications of the plate tectonics theory. Analysis of the evolution of mountain belts. Lecture 3 hours per week. Prerequisite: GEOS 3514. (Typically offered: Fall)

GEOS 5573. Advanced Cartographic Techniques & Production. 3 Hours.

Covers advanced production and techniques in cartography, including animation, geospatial visualization, pochade, and advanced visualization. Emphasizes client relationships in creating and producing cartographic materials. Prerequisite: GEOS 4523 or GEOS 5523. (Typically offered: Irregular)

GEOS 5583. Enterprise and Multiuser GIS. 3 Hours.

GIS practice that is typical of collaborative team-based geospatial organizations. Solve real-world problems through end-to-end GIS design and implementation using ArcGIS Enterprise, extensive federal, state, and local repositories, and high quality software documentation. Includes relevant training in geospatial provenance and metadata, and in enterprise and multiuser GIS administration. Introductory-level familiarity with GIS is recommended. (Typically offered: Spring)

GEOS 5593. Introduction to Geodatabases. 3 Hours.

Fundamental concepts and applications of geospatial databases. Schema development and spatial data models for geodata. Spatial and attribute query and optimization, properties and structures of relational and object-oriented geodatabases. Spatial extensions of SQL, spatial indexing, measurement, and geometry. Course will use PostGIS, ESRI File Geodatabases, and MS-SQL. Prerequisite: GEOS 3543 and GEOS 3103 or equivalent. (Typically offered: Fall and Spring)

GEOS 560V. Graduate Special Problems. 2-6 Hour.

Library, laboratory, or field research in different phases of geology. (Typically offered: Fall, Spring and Summer) May be repeated for up to 4 hours of degree credit.

GEOS 5612. Research Methods in Geosciences. 2 Hours.

Survey of research methodologies used in both geology and geography, with an emphasis on quantitative analysis. Preparation of research proposals and presentations in the field of geosciences. Prerequisite: Graduate standing. (Typically offered: Fall)

GEOS 5643. Introduction to Internet GIS. 3 Hours.

This course introduces Internet computing and Web GIS and offers hands-on tutorials in customized applications using ArcGIS Server JavaScript API. Topics covered include Internet protocols and Web standards, Web services, and fundamental routines and functions in Arc GIS server development. Students will have the capability to develop customized ArcGIS server applications. Prerequisite: GEOS 5513 or equivalent. (Typically offered: Spring)

GEOS 5653. GIS Analysis and Modeling. 3 Hours.

(Formerly GEOS 4653.) Unlike conventional GIS courses that focus on studying "where", this course will teach students to address beyond "where" using various GIS analysis and modeling techniques to explore "why" and "how". The course will provide theoretical and methodological reviews of the principles of cartographic modeling and multi-criteria decision-making. Graduate degree credit will not be given for both GEOS 4653 and GEOS 5653. (Typically offered: Spring)

This course is cross-listed with ANTH 5653, ENDY 5043.

GEOS 5663. Low-Temperature Geochemistry of Natural Waters. 3 Hours.

(Formerly GEOS 4663.) Covers the low-temperature geochemistry of waters and their associated minerals at Earth's surface. Examines the controls on the chemical composition of natural waters and the minerals precipitated from them. Topics covered will include water-rock interactions, pH, redox, the carbonate-water system, clay minerals and exchange, heavy metals, and a brief introduction to stable isotopes and geomicrobiology. Credit will not be given for both GEOS 4663 and GEOS 5663. Prerequisite: CHEM 1121L, CHEM 1123, GEOS 1113, and GEOS 1111L. (Typically offered: Fall)

GEOS 5673. Volcanology. 3 Hours.

A broad introduction to volcanic processes and their associated hazards. Emphasis will be placed on applying basic physical and chemical principles to understanding volcanic systems. Prerequisite: GEOS 2313. (Typically offered: Irregular)

GEOS 5693. Environmental Justice. 3 Hours.

(Formerly GEOS 4693.) This course deals with the ethical, environmental, legal, economic, and social implications of society's treatment of the poor, the disenfranchised, and minorities who live in the less desirable, deteriorating neighborhoods, communities, and niches of our country. The class integrates science with philosophy, politics, economics, policy, and law, drawing on award-winning films, current news, and case studies. Credit will not be given for both GEOS 4693 and GEOS 5693. (Typically offered: Spring)

GEOS 5713. Geology of Our National Parks. 3 Hours.

(Formerly GEOS 4563.) This course examines the underlying geology responsible for selected parks, and explores the interplay of geology, biology, climate, topography, and humans to evaluate the value of the parks, and to anticipate the problems they will face in the near and long-term. Credit will not be given for both GEOS 4563 and GEOS 5713. Prerequisite: GEOS 1113. (Typically offered: Fall)

GEOS 5743. Petroleum Geology. 3 Hours.

(Formerly GEOS 4253.) Distribution and origin of petroleum. Lecture 2 hours, laboratory 2 hours per week. Graduate degree credit will not be given for both GEOS 4253 and GEOS 5743. Corequisite: Lab component. Prerequisite: Admission to the Geology graduate program. (Typically offered: Fall)

GEOS 5753. Karst Hydrogeology. 3 Hours.

(Formerly GEOS 4153.) Assessment of ground water resources in carbonate rock terrains; relation of ground water and surface water hydrology to karst; quantification of extreme variability in karst environments; data collection rationale. Field trips required. Graduate degree credit will not be given for both GEOS 4153 and GEOS 5753. Prerequisite: GEOS 4033 or GEOS 5263 (formerly GEOS 4033). (Typically offered: Irregular)

GEOS 5783. Geography of Europe. 3 Hours.

(Formerly GEOS 4783.) Geographic regions of the area with emphasis on their present development. Graduate degree credit will not be given for both GEOS 4783 and GEOS 5783. (Typically offered: Irregular)

GEOS 5793. Geospatial Unmanned Aircraft Systems. 3 Hours.

Geospatial unmanned aircraft systems (UAS) are becoming key technologies in a number of disciplines. This course will introduce safe and legal operation of UAS in aerial photography, multispectral, thermal and LIDAR applications, geodetic control, photogrammetric and computer vision processing, and the creation of accurate 2D and 3D digital information products. Pre- or Corequisite: (GEOS 4413 or GEOS 5213 (formerly GEOS 4413)) and (GEOS 4593 or GEOS 5293 (formerly GEOS 4593)) or equivalent. (Typically offered: Fall)

GEOS 5853. Environmental Isotope Geochemistry. 3 Hours.

Introduction to principles of isotope fractionation and distribution in geologic environments, isotopic analytical methods, and extraction of isotope samples; application of isotopes in characterization of geologic processes and interaction with hydrologic, surficial, and biologic attenuation, paleothermometry soil, and biogeochemical processes. (Typically offered: Spring) May be repeated for up to 3 hours of degree credit.

This course is cross-listed with ENDY 5853.

GEOS 5863. Quantitative Techniques in Geosciences. 3 Hours.

(Formerly GEOS 4863.) An introduction to the application of standard quantitative and spatial statistical techniques to geoscientific analysis. Students will use both micro and large system computers in the course. Graduate degree credit will not be given for both GEOS 4863 and GEOS 5863. (Typically offered: Spring)

This course is cross-listed with ANTH 5863.

GEOS 5873. Geological Data Analysis. 3 Hours.

(Formerly GEOS 4873.) Quantitative methods and techniques for analysis and interpretation of geological data. Credit will not be given for both GEOS 4873 and GEOS 5873. Corequisite: Lab component. Prerequisite: MATH 2564 and GEOS 3514. (Typically offered: Spring)

GEOS 5924. Earth System History (ACTS Equivalency = PHSC 1104). 4 Hours.

(Formerly GEOS 4924.) Physical and biological events that form the history of the earth from its formation to the beginning of the historical era. Credit will not be given for both GEOS 4924 and GEOS 5924. Graduate enrollment only with departmental permission. Corequisite: Lab component. Prerequisite: GEOS 3514. (Typically offered: Spring)

GEOS 5933. Ancient Forest Science and Sustainability. 3 Hours.

Ancient forests preserve beautiful habitat with high ecological integrity. This course will examine the development, spatial distribution, and ongoing destruction of ancient forests worldwide, and how science can contribute to the understanding and sustainable management of these valuable resources. (Typically offered: Spring)

GEOS 5973. Seminar in Geoinformatics. 3 Hours.

Geographic information science and technology research topics of particular interest to the graduate student class. (Typically offered: Irregular) May be repeated for up to 9 hours of degree credit.

GEOS 5993. Dynamics of Sediment Transport. 3 Hours.

The course will give aspiring geologists and civil engineers tools for solving sedimentological problems in their fields. Starting from a grounding in fluid mechanics, we will learn how sediment is transported and stratigraphy accumulated. This will be applied to problems in sedimentology at all scales. (Typically offered: Fall Odd Years)

GEOS 600V. Master's Thesis. 1-6 Hour.

Master's thesis. Prerequisite: Graduate standing. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

GEOS 700V. Doctoral Dissertation. 1-9 Hour.

Dissertation research. Prerequisite: Graduate standing and Ph.D. candidacy (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

German (GERM) Courses

GERM 1003. Elementary German I (ACTS Equivalency = GERM 1013). 3 Hours.

Elementary German I. (Typically offered: Fall, Spring and Summer)

GERM 1013. Elementary German II (ACTS Equivalency = GERM 1023). 3 Hours.

Elementary courses stress correct pronunciation, aural comprehension, and simple speaking ability, and lead to active mastery of basic grammar and limited reading ability. (Typically offered: Fall, Spring and Summer)

GERM 2003. Intermediate German I (ACTS Equivalency = GERM 2013). 3 Hours.

Intermediate courses lead to greater facility in spoken language and to more advanced reading skills. (Typically offered: Fall, Spring and Summer)

GERM 2013. Intermediate German II (ACTS Equivalency = GERM 2023). 3 Hours.

Continued development of basic speaking comprehension and writing skills and intensive development of reading skills. (Typically offered: Fall, Spring and Summer)

GERM 3003. Advanced German I. 3 Hours.

Development of reading, writing, listening, and speaking skills. Some grammar review and translation exercises. Emphasis on vocabulary acquisition and the correct use of idiomatic expressions. Prerequisite: GERM 2013. (Typically offered: Fall)

GERM 3013. Introduction to Literature. 3 Hours.

Development of reading skills and introduction to literary analysis. Prerequisite: GERM 2013 or equivalent. (Typically offered: Fall)

GERM 3033. Conversation. 3 Hours.

Three hours per week of guided conversation practice for the post-intermediate student. Prerequisite: GERM 2013 or instructor consent. (Typically offered: Spring)

GERM 3063. Ph.D. Reading Requirement I. 3 Hours.

Ph.D. reading requirement I. (Typically offered: Summer)

GERM 399VH. Honors German Course. 1-6 Hour.

Honors german. Prerequisite: Junior standing. (Typically offered: Fall and Spring) May be repeated for up to 12 hours of degree credit.

GERM 4003. Advanced German II. 3 Hours.

Further development of reading, writing, listening, and speaking skills. Some grammar review and translation exercises. Emphasis on vocabulary acquisition and the correct use of idiomatic expressions. Prerequisite: GERM 3003. (Typically offered: Spring)

GERM 4013. Germany and the Holocaust: The Significance of the Holocaust in Differentiated Contexts. 3 Hours.

Taught in English. Topics covering the role of the Holocaust in German history, culture, art, language and German Studies. Equal emphasis will be placed on historical competence and philosophical/theoretical inquiry, addressed from a variety of media and primary and secondary sources. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GERM 4023. German Migration and National Identity. 3 Hours.

Examines the experiences of Germans who have migrated abroad, migrants in Germany, and those who have felt like migrants in their own country due to isolating historical experiences and are confronted with what it means to be a German. Incorporates traditional literary narrative, autobiography, film, and music. Prerequisite: GERM 3003 or GERM 3013, or instructor consent. (Typically offered: Irregular)

GERM 4033. Advanced Conversation. 3 Hours.

Three hours per week of conversation practice for the advanced undergraduate. Prerequisite: GERM 3033 or instructor consent. (Typically offered: Irregular)

GERM 4043. German Cinema. 3 Hours.

Presents a range of German films in cultural-historical context; vocabulary and structures for discussing film, film history, and film theory in German. Prerequisite: GERM 3003. (Typically offered: Irregular)

GERM 4123. The German Novella. 3 Hours.

An intensive study of the novella as a genre from its origin to the present. Prerequisite: GERM 3013. (Typically offered: Irregular)

GERM 4133. The German Drama. 3 Hours.

A study of the development of the forms and themes of the German drama from the middle ages to the present. Prerequisite: GERM 3013. (Typically offered: Irregular)

GERM 4143. German Lyric Poetry. 3 Hours.

A study of the forms and themes of German lyric poetry from the middle ages to the present. Prerequisite: GERM 3013. (Typically offered: Irregular)

GERM 4213. German Civilization. 3 Hours.

German civilization. Prerequisite: GERM 3003 or equivalent. (Typically offered: Spring)

GERM 4333. Professional German I. 3 Hours.

Introduces students to the language of German used in the workplace and provides insights into business practices in German-speaking countries. Follows a project based approach and covers aspects of professional presentations, team assignments, business correspondence, resume writing and job application. Open to all majors; no business prerequisites. Prerequisite: GERM 3003, GERM 3013, or consent of the instructor. (Typically offered: Irregular)

GERM 470V. Special Topics. 1-3 Hour.

May be offered in a topic not specifically covered by courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GERM 475V. Special Investigations. 1-6 Hour.

Special investigations. (Typically offered: Irregular) May be repeated for degree credit.

GERM 5013. Germany and the Holocaust: The Significance of the Holocaust in Differentiated Contexts. 3 Hours.

(Formerly GERM 4013.) Taught in English. Topics covering the role of the Holocaust in German history, culture, art, language and German Studies. Equal emphasis will be placed on historical competence and philosophical/theoretical inquiry, addressed from a variety of media and primary and secondary sources. Graduate degree credit will not be given for both GERM 4013 and GERM 5013. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GERM 5043. German Cinema. 3 Hours.

(Formerly GERM 4043.) Presents a range of German films in cultural-historical context; vocabulary and structures for discussing film, film history, and film theory in German. Graduate degree credit will not be given for both GERM 4043 and GERM 5043. Prerequisite: GERM 3003. (Typically offered: Irregular)

GERM 5123. The German Novella. 3 Hours.

An intensive study of the novella as a genre from its origin to the present. Prerequisite: GERM 3013. (Typically offered: Irregular)

GERM 5133. The German Drama. 3 Hours.

A study of the development of the forms and themes of the German drama from the middle ages to the present. Prerequisite: GERM 3013. (Typically offered: Irregular)

GERM 5143. German Lyric Poetry. 3 Hours.

A study of the forms and themes of German lyric poetry from the middle ages to the present. (Typically offered: Irregular)

GERM 5223. Early German Literature: Middle Ages to the Enlightenment. 3 Hours.

Early German literature. (Typically offered: Irregular)

GERM 5273. German Literature: Enlightenment, Storm and Stress, and Classicism. 3 Hours.

German literature. (Typically offered: Irregular)

GERM 5343. Early Modern German Literature: Late 19th and Early 20th Century. 3 Hours.

Early modern German literature. (Typically offered: Irregular)

GERM 5363. German Literature after 1945. 3 Hours.

German literature after 1945. (Typically offered: Irregular)

GERM 5703. Special Topics. 3 Hours.

May be offered in a subject not specifically covered by the courses otherwise listed. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

Graduate Education Courses (GRSD)

Courses

GRSD 400V. Research Experience Undergraduate Internship. 1-6 Hour.

Internship for students participating in an undergraduate research experience. (Typically offered: Summer) May be repeated for up to 12 hours of degree credit.

GRSD 5003. The Professoriate: Teaching, Learning and Assessment. 3 Hours.

Designed to introduce the future academic professional to the expectations of the faculty teaching role in higher education. Topics include techniques of effective teaching and learning, dealing with a variety of institutional expectations, course management issues, and using models of effective teaching across a broad spectrum of class sizes and levels. (Typically offered: Spring)

GRSD 5013. Practicum for Future Faculty. 3 Hours.

This course is designed to follow GRSD 5003 and to give participants opportunities to apply theories and methods learned in that course. To accomplish these goals, the course instructor helps the participant arrange a mentoring opportunity as part of this course. Prerequisite: GRSD 5003. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GRSD 502V. Special Topics in Preparing Future Faculty. 1-3 Hour.

Seminar on selected topics for those anticipating a career teaching in higher education. (Typically offered: Irregular) May be repeated for up to 6 hours of degree credit.

GRSD 5033. The Professoriate: Research and Service. 3 Hours.

Designed to complement GRSD 5003 by focusing on topics of interest to future academic professionals beyond those related to instruction. Topics include developing a research statement, strategies for securing an academic position the general nature of employment and service expectations in higher education, research ethics, and funding issues, including grant proposal writing. (Typically offered: Fall)

GRSD 5041. Graduate Enrollment. 1 Hour.

This course allows a degree-seeking graduate student to continue as an active graduate student. Students should enroll in this course only when they are not enrolled in credit-bearing academic courses. This course cannot be counted for degree credit. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Graphic Design (GDES)

Greek (GREK)

Courses

GREK 1003. Elementary Ancient Greek I. 3 Hours.

The rudiments of classical Greek, with concentration on grammar, vocabulary, and syntax. Short selections from ancient authors lead to basic reading ability. (Typically offered: Fall)

GREK 1013. Elementary Ancient Greek II. 3 Hours.

A continuation of the rudiments of classical Greek, with concentration on grammar, vocabulary, and syntax. Short selection from ancient authors lead to basic reading ability. (Typically offered: Spring)

GREK 1203. Beginning Modern Greek I. 3 Hours.

Conversational language of Greece today. Stresses correct pronunciation, aural comprehension, and simple speaking ability. Leads to active mastery of basic grammar and limited reading ability. (Typically offered: Fall)

GREK 1213. Beginning Modern Greek II. 3 Hours.

A continuation of GREK 1203. Stresses correct pronunciation, aural comprehension, and simple speaking ability. Leads to active mastery of basic grammar and limited reading ability. (Typically offered: Spring)

GREK 2003. Intermediate Ancient Greek I. 3 Hours.

Ancient Greek grammar and syntax, with readings in Greek prose. Prerequisite: GREK 1013 or equivalent. (Typically offered: Fall)

GREK 2013. Homer. 3 Hours.

Selections from the Iliad or the Odyssey: a survey of Greek epic poetry. Prerequisite: GREK 2003 or equivalent. (Typically offered: Spring)

GREK 2203. Intermediate Modern Greek I. 3 Hours.

Continuation of Beginning Modern Greek. Prerequisite: GREK 1203 and GREK 1213, or equivalent. (Typically offered: Fall)

GREK 2213. Intermediate Modern Greek II. 3 Hours.

Continuation of Intermediate Modern Greek I. Prerequisite: GREK 2203 or equivalent. (Typically offered: Spring)

GREK 4003. Greek Lyric Poetry. 3 Hours.

Readings from selected Greek lyric poems, to be chosen from several appropriate authors from the 7th through the 5th centuries BCE: Archilochus, Hipponax, Sappho, Alcaeus, Tyrtaeus, Mimnermus, Semonides, Solon, Xenophanes, Theognis, Pindar, Bacchylides. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 4013. Greek Epic Poetry. 3 Hours.

Study of the primary works of Greek hexameter poetry, including Homer, Hesiod, and/or the Homeric Hymns, with special attention to issues of oral composition and performance. Prerequisite: GREK 2013. (Typically offered: Irregular)

GREK 4023. Greek Philosophy. 3 Hours.

Study of representative works of Greek philosophy, including those of the Pre-Socratics, Plato, and/or Aristotle. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 4033. Herodotus or Thucydides. 3 Hours.

Readings of Herodotus, Book VII, and Thucydides, Book VI; collateral readings on the Persian and Peloponnesian Wars. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 4043. Greek Drama. 3 Hours.

Readings of 2 tragedies and one comedy; a study of the Greek theatre. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 4053. Greek Syntax and Composition. 3 Hours.

Greek syntax and composition. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 4063. Hellenistic Poetry. 3 Hours.

Selections from significant post-classical authors, including Callimachus, Theocritus, Bion, Moschus, Herondas, Apollonios of Rhodes, and/or poets of the Greek Anthology. Special attention to archaic and classical influences, contemporary Hellenistic culture, and Roman responses. Prerequisite: GREK 2013. (Typically offered: Irregular)

GREK 4073. Ancient Greek Novel. 3 Hours.

Study of the development of the Greek novel including the works of Lucian, Longus, Heliodorus, and/or Achilles Tatius. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 4083. Greek Epigraphy. 3 Hours.

Study of inscriptions, especially Attic, in their historical and social contexts, from the 8th century BCE to the Hellenistic/Roman period. Training in epigraphical conventions and symbols. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 4093. Biblical and Patristic Greek. 3 Hours.

Selected readings from appropriate texts, varying by semester, including the Septuagint, New Testament, Apostolic Fathers, and other patristic literature to the 5th century CE. Reading and discussion of selected texts in major genres. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 4103. Greek Oratory. 3 Hours.

Readings from selected speeches, to be chosen from one or more appropriate authors: Lysias, Antiphon, Demosthenes, Isocrates, Andocides. Study of sophism and rhetoric of Athens in the 5th and 4th centuries BCE. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 475V. Special Investigations. 1-6 Hour.

Special investigations. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

GREK 5003. Greek Lyric Poetry. 3 Hours.

(Formerly GREK 4003.) Readings from selected Greek lyric poems, to be chosen from several appropriate authors from the 7th through the 5th centuries BCE: Archilochus, Hipponax, Sappho, Alcaeus, Tyrtaeus, Mimnermus, Semonides, Solon, Xenophanes, Theognis, Pindar, Bacchylides. Graduate degree credit will not be given for both GREK 4003 and GREK 5003. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5013. Greek Epic Poetry. 3 Hours.

(Formerly GREK 4013.) Study of the primary works of Greek hexameter poetry, including Homer, Hesiod, and/or the Homeric Hymns, with special attention to issues of oral composition and performance. Graduate degree credit will not be given for both GREK 4013 and GREK 5013. Prerequisite: GREK 2013. (Typically offered: Irregular)

GREK 5023. Greek Philosophy. 3 Hours.

(Formerly GREK 4023.) Study of representative works of Greek philosophy, including those of the Pre-Socratics, Plato, and/or Aristotle. Graduate degree credit will not be given for both GREK 4023 and GREK 5023. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5033. Herodotus or Thucydides. 3 Hours.

(Formerly GREK 4033.) Readings of Herodotus, Book VII, and Thucydides, Book VI; collateral readings on the Persian and Peloponnesian Wars. Graduate degree credit will not be given for both GREK 4033 and GREK 5033. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5043. Greek Drama. 3 Hours.

(Formerly GREK 4043.) Readings of two tragedies and one comedy; a study of the Greek theatre. Graduate degree credit will not be given for both GREK 4043 and GREK 5043. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5053. Greek Syntax and Composition. 3 Hours.

(Formerly GREK 4053.) Greek syntax and composition. Graduate degree credit will not be given for both GREK 4053 and GREK 5053. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5063. Hellenistic Poetry. 3 Hours.

(Formerly GREK 4063.) Selections from significant post-classical authors, including Callimachus, Theocritus, Bion, Moschus, Herondas, Apollonios of Rhodes, and/or poets of the Greek Anthology. Special attention to archaic and classical influences, contemporary Hellenistic culture, and Roman responses. Graduate degree credit will not be given for both GREK 4063 and GREK 5063. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5073. Ancient Greek Novel. 3 Hours.

(Formerly GREK 4073.) Study of the development of the Greek novel including the works of Lucian, Longus, Heliodorus, and/or Achilles Tatius. Graduate degree credit will not be given for both GREK 4073 and GREK 5073. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5083. Greek Epigraphy. 3 Hours.

(Formerly GREK 4083.) Study of inscriptions, especially Attic, in their historical and social contexts, from the 8th century BCE to the Hellenistic/Roman period. Training in epigraphical conventions and symbols. Graduate degree credit will not be given for both GREK 4083 and GREK 5083. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5093. Biblical and Patristic Greek. 3 Hours.

(Formerly GREK 4093.) Selected readings from appropriate texts, varying by semester, including the Septuagint, New Testament, Apostolic Fathers, and other patristic literature to the 5th century CE. Reading and discussion of selected texts in major genres. Graduate degree credit will not be given for both GREK 4093 and GREK 5093. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 5103. Greek Oratory. 3 Hours.

(Formerly GREK 4103.) Readings from selected speeches, to be chosen from one or more appropriate authors: Lysias, Antiphon, Demosthenes, Isocrates, Andocides. Study of sophism and rhetoric of Athens in the 5th and 4th centuries BCE. Graduate degree credit will not be given for both GREK 4103 and GREK 5103. Prerequisite: GREK 2013 or equivalent. (Typically offered: Irregular)

GREK 575V. Special Investigations. 1-6 Hour.

Special investigations. (Typically offered: Irregular) May be repeated for up to 12 hours of degree credit.

Health, Human Performance and Recreation (HHPR)

Courses

HHPR 5353. Research in Health, Human Performance and Recreation. 3 Hours.

Methods and techniques of research in health, human performance and recreation including an analysis of examples of their use and practice in their application to problems of interest to the student. (Typically offered: Fall, Spring and Summer)

HHPR 560V. Workshop. 1-6 Hour.

Workshop. (Typically offered: Irregular)

HHPR 6233. Management in HHPR. 3 Hours.

Deals with principles, procedures, relationships, problems, and current practices in the supervision of health education and kinesiology. Includes management of facilities, programs, personnel, and processes. (Typically offered: Irregular)

HHPR 6333. Measurement in HHPR. 3 Hours.

Competencies for analysis and application of evaluation and measurement in HHPR. (Typically offered: Fall Odd Years)

HHPR 689V. Directed Research. 1-6 Hour.

Laboratory investigations, in basic and applied research. (Typically offered: Fall, Spring and Summer)

HHPR 699V. Seminar. 1-3 Hour.

Seminar. (Typically offered: Irregular) May be repeated for up to 3 hours of degree credit.

HHPR 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

Higher Education (HIED)

Courses

HIED 5003. Overview-American Higher Education. 3 Hours.

A basic course in the study of higher education open to all students seeking careers in colleges and universities. Serves as an introduction to the programs, problems, issues, and trends in higher education. (Typically offered: Fall)

HIED 5033. Student Affairs in Higher Education. 3 Hours.

Study of origins, functions, and policies in student personnel services in contemporary 2- and 4-year colleges and universities with emphasis on the student and student development. (Typically offered: Fall)

HIED 5043. Student Development in Higher Education. 3 Hours.

Provides those who work or plan to work in post secondary educational institutions with an understanding of the student population in contemporary colleges and universities. (Typically offered: Spring)

HIED 504V. Practicum in Higher Education. 1-6 Hour.

Students are assigned to a department or agency within or outside the university for professional experience under the joint supervision of on-site personnel and university faculty. Periodic meetings are scheduled for evaluation, discussion, and examination of techniques. (Typically offered: Fall, Spring and Summer)

HIED 5053. The Community College. 3 Hours.

An overview of the community college. Topics include the history and philosophy of the community college movement, students, curriculum, state and local campus governance, teaching, student personnel work, finance and issues, problems, and trends. (Typically offered: Irregular)

HIED 5063. Diversity in Higher Education. 3 Hours.

Broadly explores how sociocultural contexts influence diversity at colleges and universities. Focuses on the responsibilities of higher education leaders to be multiculturally competent professionals who foster inclusive practices for diverse student populations. (Typically offered: Irregular)

HIED 5073. Management of Higher Education Institutions. 3 Hours.

Principles and concepts of management and their application in college and university settings. (Typically offered: Fall and Summer)

HIED 5083. History and Philosophy of Higher Education. 3 Hours.

An examination of the history and development of higher education including the study of the philosophy, objectives, and functions of various types of institutions. (Typically offered: Spring)

HIED 5093. Research in Higher Education and Student Affairs. 3 Hours.

This course provides master's students an overview of research and literature applicable to the discipline; teaches students how to understand academic literature and use empirical evidence to inform practices and policies at colleges and universities. Prerequisite: MEd students in the Higher Education Program. (Typically offered: Fall, Spring and Summer)

HIED 5103. Higher Education in International Contexts. 3 Hours.

Explores various systems of higher education around the world. Equips students with the knowledge and skills to work in the increasingly internationalized field of higher education. (Typically offered: Irregular)

HIED 5303. Non-Profit Fundraising. 3 Hours.

Non-Profit Fundraising examines the theory and practice of the professional field of fundraising and development, which is dedicated to attracting philanthropic support from constituents for colleges, universities, health organizations, hospitals, non-profit organizations, museums and other philanthropic endeavors. (Typically offered: Irregular)

HIED 5643. Reflective Practice in Higher Education and Student Affairs. 3 Hours.

Provides students an opportunity to work in a functional area of higher education, reflect on how their experiences inform their career goals as higher education professionals, and learn job search strategies in higher education. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HIED 574V. Internship. 1-3 Hour.

Supervised field experiences in student personnel services, college administration, academic advising, institutional research, development, or other areas of college and university work. (Typically offered: Fall, Spring and Summer)

HIED 600V. Master's Thesis. 1-6 Hour.

Master's Thesis. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

HIED 6013. The Professoriate: Problems and Issues. 3 Hours.

An examination of the vital issues and trends affecting college faculty personnel with emphasis upon institutional practices and policies. (Typically offered: Irregular)

HIED 6023. Introduction to the Study of Higher Education. 3 Hours.

A requirement for all new doctoral and specialist students. Familiarization with writing requirements, library search procedures, library resources, and program requirements. Prerequisite: Admission to Higher Education Ed.D program. (Typically offered: Irregular)

HIED 605V. Independent Study. 1-6 Hour.

Provides students with an opportunity to pursue special study in higher education. (Typically offered: Fall, Spring and Summer)

HIED 6083. Management Skills for Effective Leadership. 3 Hours.

Development of management skills that enhance leadership includes understanding yourself, managing yourself, team building, personnel selection, group and individual decision-making, problem solving, managing conflict, developing valid performance appraisal systems, conducting performance appraisal interview, and other topics of current interest. Prerequisite: Doctoral students in Higher Education or permission of the instructor. (Typically offered: Irregular)

HIED 6093. Leading Change. 3 Hours.

An in-depth examination of leadership, change, and culture in postsecondary education. (Typically offered: Irregular)

HIED 6183. Organization Development and Change in Higher Education. 3 Hours.

An examination of the theory and practice of organization development as it relates to planned change in colleges and universities. (Typically offered: Irregular)

HIED 6303. Advancement in Higher Education. 3 Hours.

Advancement in Higher Education examines the theory and practice of the professional field and function referred to as "institutional advancement", which is dedicated to attracting philanthropic support as well as building attitudinal and behavioral support among key constituents for colleges and universities. (Typically offered: Irregular)

HIED 6323. Design and Evaluation of College Teaching. 3 Hours.

Theory and practice of effective college teaching. Emphasis is placed on preparation and evaluation of instruction. (Typically offered: Irregular)

HIED 6333. Curriculum Design in Higher Education. 3 Hours.

Types of undergraduate curricula and their supporting philosophies; approaches to curricula planning and assessment; curricular reforms; and factors influencing curricular policy making. (Typically offered: Irregular)

HIED 6343. Strategies for Effective College Teaching. 3 Hours.

An examination of traditional and innovative instructional strategies for use in college teaching. (Typically offered: Irregular)

HIED 6353. The College and University Presidency. 3 Hours.

The course explores the basic elements of the presidency of an academic institution and examines the critical issues facing the college and university presidents/chancellors. (Typically offered: Irregular)

HIED 6423. Trends, Issues and Problems in Higher Education. 3 Hours.

A study of the current problems and trends related to the field of higher education. (Typically offered: Irregular)

HIED 6483. Strategic Enrollment Management. 3 Hours.

An examination of admissions marketing strategies, communications plans, branding, and forecasting as well as how other areas (financial aid, honors, scholarships, and student affairs) contribute to successful recruitment efforts. Other key enrollment management areas of focus for the class include academic records, registration, degree audits, FERPA, student support, and most importantly, retention. Major state and federal legislation that underscores any of these activities will be discussed as well. (Typically offered: Irregular)

HIED 6533. Assessment of Institutional Effectiveness in Higher Education. 3 Hours.

The course examines the fundamentals of assessment of learning outcomes and institutional effectiveness and introduces assessment as a tool to inform strategic planning and data-driven decision-making in higher education. (Typically offered: Irregular)

HIED 6643. College Students in the United States. 3 Hours.

Students will engage with the leading theoretical and empirical scholarship related to college students and use this information to engage in class discussion, complete course assignments, consider implications for practice, and contemplate opportunities for new scholarship. Prerequisite: Doctoral student in the Higher Education Program or instructor consent. (Typically offered: Irregular)

HIED 6653. Legal Aspects of Higher Education. 3 Hours.

An examination of the legal status of higher education in the United States; the rights and responsibilities of educators and students including fair employment; due process; torts liability and contracts; student rights landmark court decisions; federal and state legislation having an impact on education. (Typically offered: Fall and Spring)

HIED 6663. Finance and Fiscal Management. 3 Hours.

Higher education finance and budgeting practices: problems, issues, trends, and policy issues in higher education. (Typically offered: Irregular)

HIED 6683. Governance and Policy Making in Higher Education. 3 Hours.

An analysis of governance and policy making affecting the control of colleges and universities. Attention is given to policy generation, governing board supervision, and the impact of institutional, professional, and regional groups as well as community, state, and federal pressures. (Typically offered: Irregular)

HIED 6693. Research Techniques in Higher Education. 3 Hours.

Techniques of research applicable to Higher Education. (Typically offered: Irregular)

HIED 674V. Internship. 1-6 Hour.

Supervised field experiences in student personnel services, college administration, college teaching, institutional research, development, or other areas of college and university work. (Typically offered: Fall, Spring and Summer)

HIED 699V. Seminar. 1-6 Hour.

A series of seminar for specialized study into areas of current significance in postsecondary education, such as leadership and planning; organization, development, and change; human resource development and appraisal; the student in higher education; etc. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HIED 700V. Doctoral Dissertation. 1-18 Hour.

Doctoral Dissertation. Prerequisite: Candidacy. (Typically offered: Fall, Spring and Summer) May be repeated for degree credit.

History (HIST) Courses

HIST 1003. Perspectives in History. 3 Hours.

Introduction to the history major and to college life, emphasizing essential collegiate academic skills and the methods and techniques of the professional historian. Designed for history majors, history minors, and those with an interest in learning skills relevant to history, other humanities, or other social sciences. (Typically offered: Irregular)

HIST 1003H. Honors Perspectives in History. 3 Hours.

Introduction to the history major and to college life, emphasizing essential collegiate academic skills and the methods and techniques of the professional historian. Designed for history majors, history minors, and those with an interest in learning skills relevant to history, other humanities, or other social sciences. Prerequisite: Honors standing. (Typically offered: Irregular)
This course is equivalent to HIST 1003.

HIST 1113. Institutions and Ideas of World Civilizations I (ACTS Equivalency = HIST 1113). 3 Hours.

Introduces the major civilizations of the world in their historical context to 1500. (Typically offered: Fall and Spring)

HIST 1113H. Honors Institutions and Ideas of World Civilizations I. 3 Hours.

Study of Western and non-Western civilizations. (Typically offered: Irregular)
This course is equivalent to HIST 1113.

HIST 1123. Institutions and Ideas of World Civilizations II (ACTS Equivalency = HIST 1123). 3 Hours.

Introduces the major civilizations of the world in their historical context, since 1500. (Typically offered: Fall and Spring)

HIST 1123H. Honors Institutions and Ideas of World Civilizations II. 3 Hours.

Study of Western and non-Western civilizations. (Typically offered: Irregular)
This course is equivalent to HIST 1123.

HIST 2003. History of the American People to 1877 (ACTS Equivalency = HIST 2113). 3 Hours.

A history of American life encompassing constitutional, political, social, intellectual and economic development from prior to European colonization to 1877. (Typically offered: Fall, Spring and Summer)

HIST 2013. History of the American People, 1877 to Present (ACTS Equivalency = HIST 2123). 3 Hours.

A history of American life encompassing constitutional, political, social, intellectual and economic development from Reconstruction to the present. (Typically offered: Fall, Spring and Summer)

HIST 2093. Animals in World History. 3 Hours.

Survey of the interrelationship between human and nonhuman animals in comparative historical settings. The course is interdisciplinary by design and draws from social history, cultural studies, religious history, literature, film, and visual culture to gain a deeper sense of how animals have been integral to human societies. (Typically offered: Fall and Spring)

HIST 3003. History of Christianity. 3 Hours.

This course surveys the theological, political, and cultural history of Mediterranean Christianity, c. 30-600 CE. Special topics include patristics, Christianity and Empire, and the formation of Christian sacred space. (Typically offered: Irregular)

HIST 300V. Internship in History. 1-3 Hour.

Work experience in a historical agency arranged by the student under the guidance of a faculty member. Paper required. (Typically offered: Fall, Spring and Summer) May be repeated for up to 6 hours of degree credit.

HIST 3013. Ancient Historians. 3 Hours.

Survey of ancient historiography from Herodotus (5th c BCE) to Ammianus Marcellinus (4th c CE). Topics covered include the development of ancient history, historical causality, rhetoric and history, military history, historical biography, use of polemic, Roman adaptations of Greek models, and the portrayal of the "other" in history. (Typically offered: Fall)

HIST 3033. Islamic Civilization. 3 Hours.

A survey of the foundation, evolution, and distinctive character of Islam, with attention to religion, literature, art, architecture, science, and political society. Particular attention given to the development of Islamic doctrines, sectarian movements, and systematic theology. Concludes with a look at Islamic resurgence movements and their place in the contemporary world. (Typically offered: Irregular)

HIST 3043. History of the Modern Middle East. 3 Hours.

Examines the history of the Islamic Middle East from the rise of the Ottoman and Safavid Persian empires up to World War I and then concludes with the issues and patterns of 20th century Middle Eastern political and socio-economic life. Topics include Islam and politics, Arab nationalism, Western imperialism, the Arab-Zionist conflict, petroleum politics, and modernization vs. traditionalism. (Typically offered: Irregular)

HIST 3053. Women, Gender, and Sexuality in Colonial Latin America. 3 Hours.

This course examines women, gender, and sexuality in colonial Latin America. It explores the lives of indigenous, Spanish, African, and mixed-race women from all social ranks. A central question is: does the current status of women in Latin America stem from a colonial legacy of gender oppression and sexual repression? (Typically offered: Irregular)

HIST 3063. Military History. 3 Hours.

Survey of the basic principles and problems of strategy, tactics, and military organization from Alexander the Great to the present. Special attention will be given to the operation of these factors in the American Revolution, the Napoleonic Wars, the American Civil War, and World War II. (Typically offered: Irregular)

HIST 3073. Women and Gender in Modern Latin American History. 3 Hours.

Examines the role of women in Latin America and the Spanish Caribbean from independence to modern times. Special emphasis will be on women's changing gender roles and expectations as they confronted legal, political, and social institutions. (Typically offered: Irregular)

HIST 3083. Women and Christianity. 3 Hours.

From Paul to the mystics of the late medieval church, this course considers women's religious expression, symbolic action, interaction with holy men, and their relationship with the ecclesiastical hierarchy. Other important questions include women's institutional subordination opportunities for autonomous action. (Typically offered: Irregular)

HIST 3093. Women in U.S. History. 3 Hours.

Examines women in U.S. History from the early encounters of North American colonization to the gendered experiences of American women in the present day. (Typically offered: Irregular)

HIST 3133. History of Sports in Africa. 3 Hours.

This course considers the ways that Africans have strategically employed sports to confront and overcome both domestic and external challenges and how these approaches and the range of constituent strategies have changed over time. (Typically offered: Irregular)

This course is cross-listed with AAST 3133.

HIST 3183. Popular Culture in the Caribbean. 3 Hours.

History of the Caribbean through a historically-situated analysis of popular culture production, including literature, dance, music, cuisine, film, carnival, television, and sexuality. (Typically offered: Irregular)

This course is cross-listed with AAST 3183.

HIST 3193. The Making of the Modern Caribbean. 3 Hours.

History of the Caribbean from pre-Columbian to present times focusing in particular on indigenous origins, colonialism, slavery, rebellion, independence, nationalism, and political integration in the making of the modern Caribbean region. (Typically offered: Fall)

This course is cross-listed with AAST 3193.

HIST 3203. Colonial Latin America. 3 Hours.

An introduction to the social, cultural, political and economic formation of Latin America, during the period from 1492 to the movements for independence. (Typically offered: Fall Odd Years)

HIST 3213. Modern Latin America. 3 Hours.

An investigation of the varying courses of modernization in Latin America, covering popular revolution, urban populism and military dictatorship. (Typically offered: Spring Even Years)

HIST 3233. African American History to 1877. 3 Hours.

History of the African American experience in North America emphasizing economic, social, and cultural perspectives. Topics include the African slave trade, the creation of race and racism, the institution of slavery, free community formation in North, and the impact of the Civil War and Reconstruction on African Americans. (Typically offered: Fall and Spring)

This course is cross-listed with AAST 3233.

HIST 3243. African American History Since 1877. 3 Hours.

The course will study the major social, political, and economical issues relating to the African American experience beginning with the late post-Reconstruction period and will include, all of the major personalities and influences in the Civil Rights Movement, from 1877 to the present. (Typically offered: Fall and Spring)

This course is cross-listed with AAST 3243.

HIST 3253. The History of Sub-Saharan Africa. 3 Hours.

Sub-Saharan African history from the 18th century to the present, with emphasis on the impact of the slave trade, colonization, Independence, and contemporary issues of the post-colonial period. Examination of the ways Africans experienced change in terms of culture, society, economics, gender, religion, politics, and labor. (Typically offered: Fall)

HIST 3263. History of the American Indian. 3 Hours.

Survey of North American Indian history from their arrival include pre-Columbian Indian history, the interaction of Indian and white societies, U.S. Government policy, and the role of Indians in modern American culture. (Typically offered: Fall)

HIST 3273. Agricultural and Rural History of the United States. 3 Hours.

The history of U.S. agriculture from the pre-Columbian period through the twenty-first century. Focuses on the social and economic implications of agricultural development and the changing nature of rural life in the late twentieth century. (Typically offered: Irregular)

HIST 3283. U.S. Latinos and Latinas through Film. 3 Hours.

This course will examine the portrayal of U.S. Latinos and Latinas in Hollywood films and how those images have changed over time. While coverage will extend to the early years of the twentieth century, the chosen films will place particular emphasis on the century's second half, from the Cold War to the modern day. (Typically offered: Spring)

HIST 3293. History of Popular Culture. 3 Hours.

Historical survey of the popular arts in American with emphasis upon 20th century. Principal topics are the history of bestsellers, the theatre, popular music, movies, radio, television, and sports. (Typically offered: Irregular)

HIST 3303. U.S. Immigration History. 3 Hours.

Examines the migration of ethnic groups into the United States from geographical areas that include Europe, Asia, Africa, and Latin America. Special emphasis will be given to cultural history, and will trace the impact of industrialization, urbanization, class formation, and popular culture on various ethnic groups. (Typically offered: Irregular)

HIST 3313. Latinos and Latinas in the U.S.. 3 Hours.

Examines the emergence and growth of the Latino population of the United States. A broad survey of the Latino experience will complement more specific case studies focusing on cultural identity and the generational process of acculturation into the American mainstream. (Typically offered: Fall)

HIST 3323. The West of the Imagination. 3 Hours.

The changing image of the American West from the colonial period to the present and how popular impressions have reflected national attitudes and values. Special attention given to the West's portrayal in folklore, literature, art, films, and television. (Typically offered: Irregular)

HIST 3333. LGBTQ+ Histories. 3 Hours.

How have gender and sexuality conceptions changed from the sixteenth century to the present? Who defined which sexual practices were deviant, when and why did those ideas transform? When and why did the terms lesbian, gay, bisexual, transgender, queer, and intersex arise, and become linked? (Typically offered: Irregular)

HIST 3373. Rise of the American Empire: War, Migration and Expansion, 1789-1917. 3 Hours.

Explores the history of U.S. expansion and imperialism from the nation's founding to the start of World War I. It proceeds both chronologically and thematically, considering the evolution of U.S. imperialism and its various manifestations - territorial, political, economic, and cultural. (Typically offered: Irregular)

HIST 3383. Arkansas and the Southwest. 3 Hours.

Political, economic, social, and cultural development of Arkansas from the coming of the Indian to the 20th century, with special emphasis on Arkansas as a national and regional component. (Typically offered: Fall, Spring and Summer)

HIST 3423. British History, 1688-Present. 3 Hours.

A survey of British history from the Glorious Revolution of 1688 to the Present, covering the political, social, cultural, and military history of Britain during those years. (Typically offered: Irregular)
